ACCOUNTS from Shanghai continue to report an increased state of lawlessness and prevalence of crime in and around that important foreign settlement on Chinese soil. It would appear that as the rebellion becomes subdued in its vicinity, the foreign adventurers and discontented natives who found profitable occupation in their intercourse with the Taipings, are now thrown adrift on society, preying upon the wealthy and industrious inhabitants, imbuing their hands with blood. This may be considered the necessary consequence of internecine wars in all countries during their transition state, before peace has restored person and property to their normal state of security. At the present time we have evidence of a similar condition of affairs in Italy since the war of independence, where brigandage of the worst character has prevailed; and, be it observed, Europeans have committed crimes upon unoffending victims surpassing in brutality the horrible tortures of the Chinese. It will readily be supposed that if there is a difficulty in suppressing lawless bands in Europe, where a strong and active Government exists, how much more so it must be in China under weak and sluggish rulers, and especially in Shanghai, where a heterogeneous foreign element exists in the body politic without a proper governing power. According to treaty, all Chinese criminals captured by the foreign police or troops are handed over to the native authorities for punishment, and foreign criminals to their respective Consuls. The former, if not actually destitute of means or friends, can easily purchase their freedom after conviction from the venal officials, while the latter rarely meet with punishment beyond a fine; so that, on the whole, the majority of criminals escape the pains and penalties of the law from the ineffectual administration of justice. In making these remarks we do not wish to reflect upon the *personnel* of any Consular establishment in Shanghai, but simply to point out the system as insufficient for the ends of justice and good government. As far as the British Consulate is concerned, it is a matter of impossibility for any Consul with his assistants to get through the multifarious and overwhelming business that comes to his office. We do not exaggerate when we assert that more cases are adjudicated in his court, criminal and civil, than at Hong Kong, where there is a chief justice and judicial establishment on an imperial scale. The fact is every day becoming more apparent, that it is time this consular system of judicature be superseded by a regular court of justice, with competent judges, having jurisdiction over every person, native and foreign, within the limits of Shanghai settlement. We have a striking example of the insufficiency of this red-tape system to meet the exigencies that arise in mixed communities on a foreign soil, at the present time in Alexandria, where the correspondent of *The Times* informs us that "the European Consulates are literally attracting and protecting bands of ruffians, who could not exist under a proper 'system of control." "Under this system it is unfortunately 'too true that evildoers, the refuse of Europe, who are unable "to live in their own countries, here revel in perfect lawlessness, the scourge and terror of all honest and peaceful men." In like manner Shanghai has become the receptacle of all the vagabondism, indigenous and exotic, in the Far East.

This growing evil in that flourishing settlement was foreseen and commented on by the local press during the influx of refugees and adventurers at the height of the rebellion, and the community seriously discussed the vital question of how to provide for the better government of the place. Various opinions and views were brought forward, among which was a suggestion for the formation of an "International Council" to deliberate upon general measures affecting the foreign community, which we are glad to observe has been adopted in principle by the Consuls of all the Treaty Powers assembling frequently and passing resolutions for the protection of peaceable residents and the conservation of equitable maritime and commercial laws. This is a step in the right direction, and may form the basis of a properly constituted Executive and Legislature. All that is necessary to come to an understanding on this point is the sanction of the several Governments who have accredited Ministers in China, to give it effect. Unfortunately the views of Sir FREDERICK BRUCE, Her MAJESTY'S Minister at Peking, were rather against than for granting an independent and central government at Shanghai, at the time of the abovementioned discussion, which checked the action of the Land Renters and the Defence Committee to form a council for general purposes, leaving the construction of public works, maintenance of roads, and police management, to the Municipal Council. It is to be hoped that the views of the British Minister are considerably modified and enlarged on this question, and that in unison with his colleagues at Peking, a consolidated administration may be formed with legislative powers. Now that Sir HARRY PARKES has returned to China as Consul-General for England, with his head-quarters at Shanghai, he will, we trust, prove an able exponent to the home Government and the Minister on this unsatisfactory state of affairs, and will doubtless remedy them with his usual ability.

That something ought to be done, and speedily, is agreed on all hands, the great difficulty is to know in what manner to proceed. Might it not be a judicious and effective movement on the part of the influential merchants and others in London to form a deputation on the subject to Earl RUSSELL, who might thereby be induced to lend his powerful aid in promoting the object in view; or, at all events, eliciting from him the opinion of Her MAJESTY'S Ministers on the point. The great drawback hitherto, among the representatives of foreign Powers at Shanghai, preventing united action, has been the limited powers transmitted to them by their several Governments, and the natural jealousy of one Consulate taking precedence of another. Happily all feeling on the latter head is gradually giving way to combination in the cause of law and order, in the Consuls having shown their appreciation of the urgency of affairs by holding deliberative meetings to discuss questions for the benefit of the community at large. It now remains with the higher powers to grant extended authority to that body so as to form a general tribunal, with an admixture of the native element and the foreign military and naval authorities for the time being to take cognizance of every case that may arise involving the rights and privileges of all subjects, native and foreign, within the jurisdiction of the settlement; together with a properly constituted court of justice for the punishment of criminals, without handing any over to the Chinese authorities. We feel confident that if England proposed a general basis for such a government, the other Powers would readily give in their adhesion. To say the least of it, the heterogeneous mode of Consular Government at the crowded and and wealthy port of Shanghai, with its external trade in imports and exports of nearly forty millions sterling per annum, is not creditable to the Treaty Powers, and calls for urgent improvement.

PARLIAMENTARY PAPERS ON JAPAN.

SOME further correspondence with the British Minister in Japan has been published in continuation of that published in our issue of the 12th Feb.:—

LIEUT.-COL. NEALE TO EARL RUSSELL.

Yokohama, Dec. 17, 1863.

My Lord.—By the mail which left this on the 2nd instant, I had the honour to acquaint your lordship that the Envoys of the Prince of Satsuma had failed to carry out the arrangements which had been agreed upon. It now affords me extreme satisfaction to state that the whole of the stipulations have been definitely settled and determined.

On the 9th inst. the Envoys returned from Yedo to Yokohama, and held an interview with me lasting several hours, at which endeavours were

Digitized by Google

resorted to on their part to soften and smooth down the terms and circumstances under which the demands were originally preferred by me upon the Prince of Satsuma, in accordance with my instructions. They desired that the money which they were about to pay over to me should be considered in the light of a deposit, the absolute payment of which might take place hereafter, and that they accordingly only required a simple or temporary receipt. These obstacles and objections, pertinaciously urged during some hours, were utterly rejected by me, and as good-humouredly one by one abandoned by the Envoys. The indemnity money was brought to the Legation and the sum of $100,000 duly paid, that sum being the equivalent of £25,000 sterling at the current rate of exchange. It will, I trust, be obvious to your lordship that I could hardly have imposed other terms in respect to the value of the dollar.

While the money was in course of counting and shroffing, I received from the Envoys a written engagement in respect to the pursuit, and execution when arrested, of the principal perpetrators of the murder of Mr. Richardson. Your lordship will observe that this document, a copy of which I have the honour to inclose, is countersigned by two of the Tycoon's officers as attesting witnesses. The agents of Satsuma now expressed a desire that I should furnish them with a written promise to facilitate the purchase of a ship of war in England. I saw no material objection to this, if the terms in which such promise was conveyed were expressed with a view to all contingencies, and I accordingly furnished them with a memorandum, a copy of which I have the honour to inclose, and with which they expressed themselves entirely satisfied.

(Inclosure 1 in No. 1.)

THE AGENTS OF THE PRINCE OF SATSUMA TO LIEUT.-COL. NEALE.

(Translation.) Yokohama, Dec. 11, 1863.

The money demanded by the British Government having been paid by the officers of Shimadzu Awadzi no Kami, a branch of the family of Satsuma, we hereby promise as follows:—

The persons who last autumn, in the eighth month (14th September, 1862), killed and wounded your countrymen at Namamugi, on the tokaido, have escaped from that place, and although we have diligently searched for them their place of abode has not been found out.

And as also some time has passed, it is not possible to state with certainty whether they are still alive, but we will use every diligence in searching for them, and as soon as arrested punish the same with death, in the presence of your country's officers.

As a promise for the future we sign this.

(Signed) SIKENO KONOSHO,
Diplomatic Agent of the Prince of Satsuma.

IWASTA SADZIMON, Acting Minister of Satsuma.

Countersigned as witnesses to the above promise—

(Signed) UKAI TAITSI, Officer of Department for Foreign Affairs of the Tycoon's Government.
SAITO KINGO, Assistant Ometsky.

(Inclosure 2 in No. 1.)

(Memorandum.) British Legation in Japan, Dec. 11, 1863

The basis of goodwill and amity being established by the settlement of the demands preferred on the Prince of Satsuma and the agents of the Prince of Satsuma having preferred to the undersigned, Her Majesty's Charge d'Affaires, a request in presence of officers of the Tycoon, and as a token of friendly feeling re-established, that he would facilitate the desire of the Prince of Satsuma to purchase a ship of war in England, Her Britannic Majesty's Charge d'Affaires does hereby engage to represent such request when formally and specifically preferred to Her Majesty's Government, provided that at the period when such request is made or in course of execution the relations of the Tycoon's Government with Great Britain in general, and the proceedings and disposition of the Prince of Satsuma in particular, are not inimical or directed against the rights acquired by treaties now existing between the Tycoon of Japan, Great Britain, and other friendly States.

Given at Yokohama, this 11th day of December, 1863.

(Signed) EDWD. ST. JOHN NEALE,
Her Majesty's Charge d'Affaires.

The next Despatch, No. 2, is a letter from Colonel Neale to Earl Russell, enclosing copy of a despatch addressed to Admiral Kuper, in which he announces that the demands of Her Majesty's Government have been conceded.

Despatch No. 3 is from Colonel Neale to Earl Russell, dated 30th Dec., simply confirmatory of the previous Despatch No. 1. Despatch No. 4 is from Colonel Neale to Earl Russell, enclosing the report of Consul Winchester, as follows:—

CONSUL WINCHESTER TO LIEUTENANT-COLONEL NEALE.

British Consulate, Kanagawa, December 24, 1863.

Sir,—Since I had the honour to address you in my despatch of the 9th inst., respecting some interruption in the conveyance of cattle to the settlement, I have had no further complaint from any of the provisioners on that score.

There has been some deficiency in the supply and a consequent rise in the price of poultry, game, and other articles; but this is partly to be attributed to the large demand for such articles incidental to the festivities of the season at a port where there is so large a squadron of war vessels.

A number of curio-shops in the main street are shut up. Various causes are given as accounting for this. The principals of these establishments are said to have been either killed or threatened in the recent disturbances at Yedo, excited against Japanese engaged in foreign trade. Other statements refer to forbidden operations connected with the currency market here as the reason for the closure of these shops, while in one case it is believed that the disposal to a foreign merchant of gold cobangs stolen from the Tycoon's palace during the last fire has been the cause of trouble.

A system of terror, involving the lives of several Japanese merchants, has been unscrupulously instituted at Yedo; but to what extent the Tycoon's Government are implicated in these proceedings, either by direct order, secret instigation, or tacit sanction, it is impossible to say.

Reflection on the extraordinary rise in the value of silk and cotton, the articles so eagerly sought for by foreigners, is scarcely necessary to convince one that the extension of foreign trade is likely to create much discontent among large classes of Japanese, not deriving immediate and visible benefit from foreign trade. Raw cotton, so universally employed for the garments of the poorer classes, sold formerly at five to six dollars per picul all over Japan. Its value in the Yokohama market to-day is thirty-five dollars for the same weight.

One of the demands of the party inimical to foreign trade is stated to have been the distribution of large gratuities to the poorer classes of the capital.

Indeed, there is some reason to think, looking to the fact that there has been little or no interruption to the trade of the settlement, that the whole of these proceedings have been set on foot with no other intention than to extort a large share of the profits of the native dealers.

However this may be, there is no lack either of silk or cotton in the market; and I am informed that the stock of imports in foreign hands is almost quite exhausted. I have, &c.,

(Signed) CHARLES A. WINCHESTER.

Despatch No. 5 is from Colonel Neale to Earl Russell, and is the one read in the House of Commons by Mr. Layard, and published in our issue of the 28th March. Despatches No. 6 and 7 are from Earl Russell to Colonel Neale, approving of the steps taken, and occupy only eight lines.

"THE CHINESE QUESTION."

SUCH is the title affixed by the Count D'ESCAYRAC DE LAUTURE to the section which forms the main feature of that portion of his *Mémoires sur La Chine* which has just made its appearance. Our readers, like ourselves, will be at once eagerly curious to know what that "question" is which so immediately presses for a solution. All difficulties between China and Europe were, we thought, settled; and so evident is the determination of the Western Governments to give the Peking Cabinet every chance of administering its own affairs—including even the arduous duty of suppressing the rebellion—that we had hoped to be free, for some time, of any other anxiety regarding that quarter than the prospects of the Tea and Silk crop, and the rate of exchange. But the Count DE LAUTURE devotes himself not to the behaviour of China, but to the manner in which France should conduct herself towards her distant ally. If the title of the section be not very happily chosen, the contents at least are highly deserving of notice, as will be at once admitted when the reader is reminded that the Count D'ESCAYRAC DE LAUTURE was appointed to accompany the last French expedition to China as the scientific and statistical commissioner—was, in fact, that "sole representative of French science" whose mission M. CHEVALIER, in his "Mexico," laments as proving barren of results, from his "having fallen into the hands of the Chinese." The regret expressed is perhaps premature, as the Count gives us a programme of the *Mémoires*, of which we have before us the first hundred pages, that promises a fuller description of China than any we have yet had; purposing, as he says, to fill whatever blanks have been left by the *Lettres Edifiantes*, and other works of the Jesuit Missionaries, or by the *Chinese Repository;* to which last he awards the praise of being "often more substantial and more profound than the former." We are in presence, then, of a man who has every claim to be heard on the subject he is asking our attention to, and who certainly has not lessened that claim by this instalment of the great task he contemplates. What M. DE LAUTURE conceives to be the "Chinese Question" will best be seen by at once giving his concluding summary of what, according to his notion, should be the policy of France in the matter:—

We ought to develop our commerce and maintain our rank in the Far East; the independence and neutrality of the States of the Far East are of particular interest to us; the development of civilisation and public authority in those States being guarantees of peace and stability, we ought, as far as we can, to assist such legitimate progression; we ought to seek to conclude treaties and to take care that they are faithfully carried out, and if we should for that purpose be constrained to have recourse to any military manifestation, no permanent occupation should result thence—the imposition of a war compensation being sufficient to cover our expenses and also for the chastisement of the enemy; we ought not to compromise the Missions either by over-zealous protection or by claiming from them services easy to be obtained from other quarters, and, as far as possible, we ought to repudiate any interference in the religious or political affairs of the Far East; that such a moderate and honest policy is clearly that of the United States; that England and Russia are sufficiently enlightened, and prudent enough, to pursue the same course so long as no untoward example of an opposite policy excites that covetousness which in the Far East would have more powerful means of action at their service than at ours.

All these points are ably and strongly enforced by the Count. He complains that the commerce of France with the Far East is at the present but a seed of promise. Where one French vessel is seen in China, there are three German, four American,

Digitized by Google

and ten English. France will probably purchase eight millions-worth of silk in the London market this very year; and this is not to be ascribed to English craft or foresight, but is the fault of the French alone. Trade and China are both neutral, and equally accessible to every European. The boldness and the industry of some are no outrage on the idleness and cowardice of others. The natural policy of France in China is one of conservative progress: China must be transmuted before she can be elevated. The necessity for reforms is felt there. Could Prince KUNG be induced to visit Europe, China would be regenerated. The visit of PETER the GREAT was sufficient to make Russia European. Europe has too much grandeur for ambassadors to dare to avow all that they have seen to a suspicious master, in the face of a malevolent Court and an incredulous people. The special need of China at the present moment is an increased revenue and a more effective army. The inhabitants of the large towns and the ports of commerce are ready to make any sacrifice provided they are governed and defended. An immediate sum might be procured by the sale of certain privileges and the temporary alienation of the salt and customs' revenues. A loan, too, might be obtained from the great European houses established in China, as a high rate of interest is perfectly normal in that country. A good army would be created with much greater facility than is supposed. The cowardice of the Chinese troops is one of those received fables that enter far too much into the composition of history. All that China wants is a settled discipline, a few simple manœuvres, a good artillery, and a militia sufficiently numerous and well drilled to defend their homes against the robbers whom success turns into rebels. There are, however, certain difficulties in the way of accomplishing this. Count DE LAUTURE observes here:—

Various defections, the appearance in China of doubtful characters, the occupation of Cochin-China, may have caused to the Chinese Government some degree of disquiet, and rendered its disposition towards us more unfavourable than might at first appear. There is room for belief that the credit of Prince Kung is not so great as it was; we are assured that the Supreme Council is now under the ascendancy of Tsen-kwo-fan, the Viceroy of Kiang-nan, who is an enemy to Europeans. Lastly, it is possible—it appears to me probable even—that a section of the men who possess the confidence of the Government, without being in league with the rebels, desire the continuation of disorder, which enables them to tax some arbitrarily and to plunder others, without even imposing on them the obligation of paying their troops. The misery of the public is the impure source whence they draw their wealth. It would require a vigorous hand to close that gulf, a severe inquiry and heavy punishments, to make the defenders of order understand that they themselves are not to be its disturbers.

But these great reforms cannot be accomplished without peace, while the finest provinces of China have for some years been a prey to brigands. The rebellion was at first mistaken for a religious movement, but that mask has now fallen. It lays waste towns and villages, leaving behind it only ruins and blood, and changes its locality without extending itself. Still, all that Europe can do is to offer good advice to the Chinese Government, and to keep the rebels at a distance from the great ports of trade. The only privilege Europeans require from China is to have their own magistrates, and to know no others; than which nothing can be more just or less dangerous to the independence of Asiatic States, who lose through it simply the chance of committing daily blunders, under the responsibility of which they would fall to the ground. It is greatly to be desired that the integrity of both China and Japan should be placed under the common protection of the Great Powers. The occupation of China by any European Power would be the signal for great disorder, but such a step can be feared from England and Russia alone. The latter, however, has so many Asiatic peoples within the limits of its empire as yet but half subjected, that its position is in some degree the same as that of China, and it is not likely, therefore, to set them all in a state of agitation. The people of England are satiated with conquests: they know what they cost, and what they return. They know that Shanghai, which costs them merely the maintenance of a Consul, does a trade with Europe, and principally with themselves, four, and, perhaps, five times more considerable than what France does with Algeria, which costs her so dear. Besides, though England preceded all Europe in China, to the general benefit, she has never put forward any pretence to remain there alone. Again, climate sets a boundary of its own on each side of the Equator, beyond which if the European settles, he vegetates, decreases, and finally disappears. The author continues:—

Thence spring a few rules which I should not lay down in London or in New York, but which I must do in Paris, where it appears not yet to be known that Algeria has neither the climate under which we can labour, nor that which produces spices; for we are calling for French hands for New Caledonia, perhaps, even, for Cochin-China, and we are sending our convicts to Guiana, without a suspicion that the climate of the country will not let them live long enough to reform themselves by industry.

In the pages devoted to this branch of his subject we find a note in which M. DE LAUTURE speaks out even more plainly, with a firmness and decision that, as in the case of some observations from M. CHEVALIER quoted in our last number, will surprise those who entertain the belief that freedom of opinion is forbidden or condemned to silence in France, especially in those who are in any way connected with the public service. Our author denounces the acquisition of Cochin-China in good set terms:—

The military *regime* is not the vice but the necessary condition of Algeria, peopled as it is by respectful, but not to be conciliated, Mussulmans, thrown into a ferment by all our wars, and, like India and the Caucasus, inspired from Mecca. That *regime* is the absence of life; the civil *regime* would be death. There was a necessity, perhaps, for taking Algiers, a nest of pirates, and for occupying it afterwards, so that others should not quarter themselves at our doors. Was it so with Cochin-China, that distant Algeria, that perpetual Mexico? I doubt not that Cochin-China offers all those elements of power and prosperity that have been so long pointed out to us in Algeria, and which appear to me to be nowhere wanting. The climate is doubtless as wholesome as that of a vast rice-field can be, at the mouths of a great river, and close to the Equator. It was at the mouths of the Ganges, 260 leagues further to the north, that the cholera had its birth; and at the mouths of the Mississippi, 400 leagues further north, was born the yellow fever. The population are said to be formidable; I sincerely hope they may not be; but our aggression menaces the whole Peninsula. The Christianity succoured is again compromised; some imprudent people may perhaps know of a legitimate pretender, ready to accept our support in order to insure the happiness of his subjects. In any case, our treaties appear deficient in solidity. We shall be obliged to extend ourselves, as in Algeria, or as the English in India, till all the land is under our feet. The sole guarantee we shall have, so far from our control, will be the prudence and moderation of agents whose advancement will depend on war, and their emoluments on the extension of our limits.

If it should be replied to this that France needs a naval station in the Eastern seas, Count DE LAUTURE would prefer a small island, and thinks the chances are, a quarrel with Japan will, before long, justify the occupation of some one of the insular fractions dependent on it; and the Americans, he says, have cast a longing eye on the little archipelago of Lew-Chew, neighbours to Japan and China both, and lying in the track between San Francisco and Shanghai.

Should the time ever come for European laws to flourish in China, our author hopes it will be through the medium of free cities, with republican institutions, and a flag of their own, indifferent to the quarrels of Europe, and open to the ships of all nations:—

Thus, Tyre, Carthage, Marseilles, Venice, would rise again, grander than ever, at the other extremity of our old world. It would, probably, be without war, without any European people suffering the slightest damage by it. I am not, however, of opinion that if such transformations are to be accomplished, it would be wise to hasten them for a moment. So long as led, if needful, by our counsels, enlightened by a reflection from our experience, the Asiatics know how to govern themselves, it would be more just and more prudent to remain their guests than to become their masters. The great European cities of China are already free and neutral; neither we nor they would gain much should Hong Kong cease to be English and Shanghai to be Chinese. Let us, on the contrary, be ardent conservatives. Let us restrain a too sudden and too precipitate invasion from Europe. Let us endeavour to hold it back till China has had time to recover herself a little, so that she be not overwhelmed, become not the theatre of a European struggle, or the prey of filibusters, ravaging the country and ruining our commerce, under the fallacious pretext of fighting each other.

Even as regards Catholic missionaries, the author is for great caution, and for care that none but men of great prudence should be sent out; and he holds that the Chinese authorities are perfectly indifferent to the religious tenets of the populace, and that where there has been persecution it has frequently arisen from Christianity being confounded with the secret societies. To the suggestion that missionaries would be useful as intelligencers, or even for the purpose of stirring up agitation, if at any time desirable, he replies "that if it was wanted to add to "the disorder of China by preparing it for invasion, it is not "the Christians but the Mussulmans, far more numerous, far "more warlike, and far more influential, that should be made "use of. To set them in insurrection would require but half a "score of scoundrels to be picked up at Mecca, and a few "Mussulman soldiers trained in the European mode." He adds that a capable agent, having a dozen chosen spahis for a guard of honour, might, if the population of Peking were in insurrection, rally every Mussulman therein to the defence of the French Legation. He absolves the Protestant missionaries from the charge alleged against them of being deeply political. As to the English Government, it neither tutors nor fosters them, and patronises missionaries no more than colonists or

Digitized by Google

merchants: far from being the servants of its policy, missionaries are often its bitter opponents. He considers that increased powers should be given to European Consuls and Ministers to remove disorderly characters, and views with pleasure the authority conferred on Sir Rutherford Alcock for that end in Japan. The attention of those officials should also be specially directed to the operations carried on in the name of emigration, under which great abuses have been perpetrated; and he instances particularly—what was months since stigmatised in our own columns—the coolies carried off to Peru for working on the guano deposits. Lastly, he considers it as absolutely indispensable that the policy of the Government should be concentrated in one person, the Minister of France. "It would be strange that acts of armed "repression should take place, unless in a case of absolute "necessity, or that political negotiations should be entered "into, otherwise than under the order or with the instructions "of the accredited political representative of France."

It will be seen, therefore, that in the hands of the Count D'Escayrac de Lauture, "the Chinese Question" is something that belongs to the future rather than to the actual present. Looking, however, at the official position he once held in China, and the probability, from his devoting himself to the labour involved in the *brochure* before us—which is but the first part of a work that must run to a considerable length—that he looks for further employment in the Far East, the summary of his opinions above given will be read with great interest. He is evidently a man who thinks for himself, and has the boldness to proclaim the result, even though there may be much that may not be palatable to "departments." A remarkable specimen of trenchant thought, expressed with a freedom that will startle English notions of French liberty of the press, is the following extract from the preface, in which the author signalises the lessons that may be learnt from China:—

We shall see there a doctrine, philosophy, and literature; all official; fallacious honours rendered to subservient *literati*; competitions and examinations unknown in the country of Morse and Fulton, promising power to merit alone, and, as a result, imbecility triumphant and decay precipitated. We shall see equality in the education of the people, a level in an abyss; the poor man consoled for his own bastinado solely by the bastinado inflicted on the rich. We shall find the administration innumerable, present everywhere, in the way everywhere—a veritable national workshop, for the benefit of lazy and servile mediocrity. We shall find a Minister of Music and no musicians—as elsewhere, the first agriculture in the world without a Minister and without premiums. Thus, whether we look at the West or the East, the oracle always responds with the same lesson—"Nothing lives or is developed in the world but by liberty."

THE SWISS TREATY WITH JAPAN.

The following are the heads of the Swiss Treaty with Japan:—

The treaty of commerce with Switzerland is modelled altogether after the treaty with Prussia. Like the latter, it consists of twenty articles, which may be thus summarised:—

Art. 1 stipulates for perpetual peace and friendship between Japan and the Helvetic Confederation.

Art. 2 secures to the latter the right of maintaining a diplomatic agent at Yedo, as well as consular agents at the open ports of the country, who shall be at liberty to travel throughout Japan.

Art. 3 opens to Switzerland all ports open to the other Powers.

Art 4 permits free exercise of religion.

Arts 5 to 7 treat of the adjustment of disagreements.

Art. 8 secures the right of free sale and purchase.

Art 9 permits Swiss to take Japanese subjects into their service.

Art 10. stipulates that the mercantile code appended to the treaty shall form an integral part thereof, and be equally binding.

Art. 11 admits the right of the Japanese tribunals to take measures against fraud and smuggling.

Art. 12 permits the re-exportation, without further charge, of imported goods furnished with customs certificates.

Art. 13 permits the transport of such goods without further charge by Japanese subjects into the interior of the country.

Art. 14 secures currency according to its bullion value to all foreign money.

Art. 15 treats of customs arrangements.

Art. 16 grants the Swiss equal rights with all the subjects of other nations.

Art. 17 stipulates that after 12 months' previous notice the treaty may be revised from the 1st of February, 1872.

Art. 18 states that official communications may be made in the French language, provided they are accompanied by a Dutch translation, during the first five years the treaty is in force.

Art. 19 stipulates that the treaty shall be published in the French, Japanese, and Dutch languages.

Art. 20 arranges that the ratifications shall be exchanged within 18 months at Yedo. The treaty becomes valid immediately after signature

From BATAVIA.—At FALMOUTH: Frederika. At CHANNEL: Ceres.

From PENANG.—At LONDON: Nipisiquit, Rockliff, Teesdale, Edinburgh Castle. At FALMOUTH: Schlosser.

From BANGKOK.—For London: Bankok.

FREIGHTS AND CHARTERS.

Outward Freights are very low from London, the amount of tonnage on the berth being in excess of the present requirements of the trade. From the outports, however, good rates are being paid to China. Homeward charters are more difficult to obtain from the East, except for teak from Maulmain.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s.* to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41, and £1. 17s. 6d. For Shanghai: £51 to £52, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £30, and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the supply of 6,000 tons of Welsh coal, to be delivered at Shanghai. Ships are in request also for coals to Singapore and Hong Kong.

CASUALTIES.

AMSTERDAM, March 24.—The Vertrowen (ship), de Vos, hence to Sourabaya, has put back to-day with considerable damage, and must go into dry dock to repair, having been in collision.

The Alexander, of New York, from Liverpool to Singapore, struck on the Frederick Rock, Straits of Rhio, Feb. 5, and was beached same night in a sinking state on East Island.

The Eunice Nicholas, Simons, from Sunderland for Shanghai, arrived at Gravesend, March 27, with damage.

Advices from Batavia, dated Feb. 27, state that the Wilhelmina (brig) Wiersma, from Rotterdam to Maccassar, has been wrecked near the latter port; crew and part of cargo saved.

ST. THOMAS, March 13.—The Sarah, Van Name, from Shanghai to New York, put in here, March 2, leaky, and is discharging.

CALLAO, Feb. 28.—The Westward Ho! (national ship), which was fitted for a voyage to China, took fire in the anchorage in this bay on the night of Feb. 26, and was burned to the water's edge.

ST. HELENA, Feb. 8.—The Childe Harold, Gunnion, from Shanghai to Liverpool, arrived here to-day, making nine inches water per hour, having struck some unknown object floating on the water, Jan. 23, in lat. 30 S., lon. 35 E.

The Tustan, from Hamburg for Singapore, arrived at Rio Janeiro, Feb. 27, with damage, partly dismasted.

At ST. HELENA.—Feb. 4, Helvetia, Menk, from Manila, and sailed, 5, for New York; Rudolf, Meisma, from Batavia, and sailed, 5, for Rotterdam; Graf Eulenberg, Meyer, from Canton, and sailed, 5, for New York; 5, Magnus, Noring, from Macao, and sailed for Bremen; 6, Forfarshire, Kemp, from Hong Kong; Maggie Lauder, Henry, from Manila, and sailed, 8, for Cork or Falmouth for orders; Cordova, M'Kenzie, from Shanghai, and sailed, 8, for Liverpool; 7, Bulgersteyn, Geerling, from Banjoewangie, and sailed, 8, for Rotterdam; 8, Iron Crown, Rogers, from Hong Kong, and sailed, 9, for Liverpool; Casas, Pardo, from Manila, and sailed, 9, for Cadiz; Childe Harold, Gunnion, from Shanghai, and sailed, 9, for Liverpool; 6, Merry England, Kemp, from Ningpo, and sailed for Liverpool; 8, Santa Maria, Madrid, from Manila, and sailed, 9, for Alicante; 9, Maria Adolfina, Blom, from Batavia, and sailed, 10, for Amsterdam; Sophie (brig), Martin, from Shanghai, and sailed, 10, for London; Europe, from Japan; 11, Bankok, from Bankok; 13, Nipisiquit, from Penang; H.M.'s ship Scout, from China and Cape; 15, Tieu Tsin (str.), from Shanghai and Cape; 16, Balmacarra, from Shanghai; Queen of the Seas, from Foo-chow-Foo, to New York; 19, Glen Huntley, from Shanghai; 20, Dolphin, from Japan; 25, Dygden, from Java; 29, Lodore, from Shanghai.

At TABLE BAY.—Jan. 23, Watergens, from Batavia, for Amsterdam; 29, Scawfell, Guthrie, from Japan, and sailed 31, for London; Falcon, Sullivan, from Hong Kong, for Liverpool; Citadelle, Horman, from Hong Kong, for London; 30, Walcheren, from Batavia; Alfonzo de Albuquerque, from Macao, for Havana; 31, Maria da Gloria, from Macao, for Havana. Feb. 1, Ocean Gem, from London, for Hakodadi: 6, Vulcan (str.), from New York, and left 13, for China; 4, Prins Carl, from Batavia, and sailed 18, for Amsterdam.

AT SIMON'S BAY.—Jan. 29, China (str.), Osborne, from China, to England; 27, Pekin (str.), Cheefoo, to England; H.M.S. Scout, Capt. Corbett, from Hong Kong and Singapore, for England; Tientsin (gunboat), Nicholas, from China; 10, Ballarat, from Shanghai, for England; 12, H.M.S. Conqueror, from Plymouth, for Japan.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, A. Bugeja, Magri, and A. Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Franjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia: L. Platon and Co. Macao: J. D. Freita.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Brown, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF ITS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 33, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relives pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford—"It is without doubt the most valuable and certain anodyne we have.

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell, street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through JOSEPH KIRKMNA, Capetown.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

Merchants and Shippers supplied on liberal terms.

J. OUSELEY, General Manager.

SCINDE RAILWAY (INDUS STEAM FLOTILLA, PUNJAUB, and DELHI RAILWAYS) COMPANY.

At the NINTH ANNUAL GENERAL MEETING of the above Company, held at the LONDON TAVERN, Bishopsgate-street, in the City of London, on WEDNESDAY, the 30th March, 1864,

W. P. ANDREW, Esq., Chairman of the Company, presiding,

The following resolutions were carried unanimously:—

1. That this meeting receive and adopt the report and accounts of the directors.
2. That W. P. Andrew, Esq., be re-elected a director of this Company.
3. That Colonel Sir Frederick L. Arthur, Bart., be re-elected a director of this Company.
4. That George Gordon Macpherson, Esq., be re-elected auditor of this Company.
5. That the cordial thanks of this meeting are tendered to W. P. Andrew, Esq., for his courteous conduct in the chair this day.

W. P. ANDREW, Chairman.
S. H. R. PARRY, Acting Secretary.

Gresham House, Old Broad-street,
London, 30th March, 1864.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

THIRTIETH ANNUAL GENERAL MEETING of SHAREHOLDERS of the AGRA and UNITED SERVICE BANK (Limited), held at the Bank, 27, Cannon-street, E.C., on SATURDAY, April 2, 1864.

GEORGE GORDON MACPHERSON, Esq., Chairman, in the chair.

The notice convening the meeting and the following report and statement of accounts were read:—

The Directors have to submit to the shareholders the audited accounts for the year ended 31st December last, and to report that, after making provision for all bad and doubtful debts, the net profits of the bank for the year amounted to £242,909. 12s. 6d.

Out of this sum the Directors have declared, free of income-tax, two half-yearly dividends at the rate of 10 per cent. per annum each, and have added to the last of these a bonus of £4 per share, thus making a return for the year of 18 per cent. on the paid-up capital of one million sterling.

From the balance remaining, the directors have refunded to reserved fund account the sum of £7,341. 2s. 4d. taken from it last year, and, in consideration of the greatly extended business of the bank, have carried to credit a further sum of £25,000, thus raising that fund to £225,000. They have also passed the sum of £5,000 to superannuation fund, and £15,000 to building fund, carrying forward £10,568. 10s. 2d. to credit of profit and loss account for the current year.

Since last annual meeting the directors have purchased desirable premises in Sydney, and have secured land at Shanghai, Kurrachee, and Madras, in view to the erection of suitable buildings for the branches of the bank at those ports.

The present auditors being eligible for re-election, in terms of the deed of settlement, offer themselves accordingly. By order of the Board,

MACKINTOSH BALFOUR, General Manager.

G. B. DALBY, Chief Accountant.

We have examined the preceding statements (Nos. 1, 2, and 3), with the books, vouchers, and securities, at the head-office, in London, and with the detailed returns and balance-sheets signed by the auditors of the several branches, and we hereby certify to the correctness and satisfactory character thereof.

W. FARR,
J. HILL WILLIAMS, } Auditors.

London, March 16, 1864.

The following resolutions were duly moved, seconded, and carried unanimously:—

"1. That the Report and Statements which have been read to the meeting, and previously circulated to the shareholders in Europe, be adopted.

"2. That George Gordon Macpherson, Esq., Colonel Henry Doveton, James Sydney Stopford, Esq., and James Thomson, Esq., be re-elected directors.

"3. That John Hill Williams, Esq., and William Farr, Esq., D.C.L., F.R.S., be auditors for the present year.

"4. That the thanks of the Shareholders be given to the Board of Directors for their careful control of the Bank's affairs; to the General Manager, Mr. Mackintosh Balfour; to the London Manager, Mr. William Shipman; and to the Local Committees and Managers of the Branches, for the satisfactory manner in which they have conducted the business of the Bank for the past year; and to the Auditors, for their efficient supervision of the accounts.

"5. That the thanks of the Meeting be given to the Chairman for his able conduct in the chair."

JAMES HENDERSON,

COMMISSION MERCHANT, TIEN-TSIN, CHINA.

AGENT FOR THE "LONDON AND CHINA EXPRESS."

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 "

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co have been appointed Perfumers to H.R.H. the Princess of Wales.

HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing three great secrets of health by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion, or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitutions, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

DIRECT FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper ship SYDNEY EGGERS, classed A 1, 20 years, in the Liverpool Underwriters book; 870 tons register; H. W. CAMPBELL, Commander; loading in the East India Docks. This magnificent vessel, built on the Clyde in 1859, made her last passage to Bombay in seventy-nine days, is noted for her great speed and sound delivery of cargo, and will be found an excellent opportunity to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

FOR HONG KONG and WHAMPOA, will be immediately despatched the celebrated clipper ship PRINCE ALFRED, A1 twelve years, 663 tons register, W. ELLISON, Commander, loading in the West India Docks. Has splendid poop accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, London, E.C.

COLOMBO, CEYLON, direct, will have very quick despatch, the well-known, fast sailing, regular trader AVON, A 1 for thirteen years, register 645 tons, WILLIAM RICHARDSON, Commander; loading in the West India Docks. This splendid vessel has a full poop, with most superior accommodations for cabin passengers.

For Passage apply to W. H. TINDALL, 4, Clement's-lane; and for Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill.

FOR COLOMBO, direct, the beautiful clipper ship SOUTHERN CROSS, A 1 ten years, 591 tons register, Commander, ———, loading in the West India Docks. This fine vessel is recommended to shippers of fine goods as a fast and safe conveyance; has a full Poop and excellent accommodation for cabin passengers.

For Freight or plans of her poop apply to the owners, STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR SHANGHAI Direct (to sail 25th April), the well-known clipper ship ANGLO-SAXON, A 1 13 years, 693 tons register; A. W. PLUMMER, Commander; lying in the London Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the celebrated British clipper MARY MILDRED, 3 T. French Lloyd's, 460 tons register; C. J. FINE, Commander; lying in the London Docks. This beautiful vessel has superior accommodation for passengers, and sails very fast.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

FOR HONG KONG and WHAMPOA, direct, with quick despatch, the well-known British-built ship CAMBALU, A 1 13 years, 499 tons register, loading in the London Docks. This fine vessel has good accommodation for passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

COLOMBO Direct.—The very fast-sailing clipper WILLIAM AND JANE, A 1, 410 tons register, now loading in the West India Docks, will shortly be despatched.

For Freight, &c., apply to SARTU and SIMPSON, 9 Clement's-lane, E.C.

FROM LIVERPOOL for CHINA.

List of Passengers.

PASSENGERS INWARD.

By this Mail, to Marseilles, per Mussilia, arrived April 11.—From Shanghai: Mr. Simpson.—From Hong Kong: Messrs. Barston, Brush, Yung Wing, Bowyer, Macdougal, Franzo, and Novello, Capt. Howard.—From Singapore: Mr. Cadroniga, wife, two children, and servant, Don Pedriman and servant, Don Porras, Don Samie.—From Penang: Mr. Brown.

To Southampton, per Baroda, expected to arrive April 17.—From Hong Kong: Mrs. Stanford and infant, Mr. Wilkinson, Mrs. Murray, infant, and European female servant, Capts. Hogg and Hodgson, J. Oliveroo, and one Chinaman.—From Singapore: Mr. and Mrs. Little and infant, two children, and European female servant, Messrs. Boster and May.—To Gibraltar.—From Hong Kong: Mr. J. Loureiro, J. H. Calderan.—From Singapore: Mr. and Mrs. Aldon, child, and servant, Mr. Pasantandur, Don P. Beaumont and European male servant, Don Torres and European male servant, Don Garai and European male servant.

By last Bombay Mail, to Southampton, per Syria, arrived April 12.—From Hong Kong: Mr. S. J. Smale. From Singapore: Mr. J. Tayler and Son. To Suez, per Salsette, arrived March 28.—Bishop and Mrs. Smith.

PASSENGERS OUTWARD.

By this Mail.—Per P. and O. steamer Ceylon, from Southampton, April 4.—To Hong Kong: Mr. Robertson, Messrs. F. D. Eckersley, R.N., J. T. Page, R.N., W. Chase, R.N., E. Bennett, R.N., J. Pickles, R.N., A. McIntyre, R.N., J. Brown, R.N., G. F. Graves, R.N., A. Trenham, R.N., J. Lewthwaite, R.N., R. Pattison, R.N., and W. Power, R.N. To Shanghai: Mr. Sharpe, Mrs. Mackellar and child, Mr. Craven Wilson, Mr. and Mrs. J. Aitken. To Singapore: Mr. Maxwell. To Calcutta: Mrs. Dundas and native female servant, Ensig J. D. Serrell, Mr. H. Millett, Miss La Nauze, Surgeon W. Whylock, Mr. E. Barron, Mrs. Gilchrist and infant, Mr. G. Schar, Lieut. Ruxton, Mr. Frith, and three second-class passengers. To Madras: Capt. and Mrs. J. Geddes, infant, and native female servant, Capt. and Miss M. Williams, Major and Mrs. Ritherdon, Miss Rowland, Ensign R. W. Hill. To Ceylon: Mrs. Sampson Mr. C. Ravenhill, Mrs. Dyer's ayah and infant. To Alexandria: Maurice Gatrell. To Alexandria and back: Messrs. Hacker and Johnston, Mr. and Mrs. Wotton.

From Marseilles, per Euxine, to leave April 12.—To Shanghai: Mr. Thos. Francis Wade, and European male servant, Bishop Boone. To Singapore: Mr. J. C. Guy. To Calcutta: Mr. C. H. Foster, Major G. and Mrs. Hutchinson, Messrs. H. C. M'Iver, W. Douglas, and J. D. Hutchinson. To Madras: Mr. Fane. To Ceylon: Mr. White, two Misses White, Mr. and Mrs. Dyer. To Alexandria: Messrs. J. Davidson, J. J. Cater, and E. M. Phillips. From Suez.—To Hong Kong: Mr. C. F. Grossmith, Mr. E. C. Weghorst.

Summary of News from the Far East.

JAPAN.

HAKODADI.

A correspondent's letter, of the date of the 24th January, gives an interesting account of the loss of the British barque *Egeria*, on her passage from Shanghai to Hakodadi. The conduct of the Japanese Prince of Matsumai on the occasion is another most convincing proof that many of the Daimios of rank and power desire to foster and protect the trade with foreigners by every means at their command.

Since my last communication (11th December) the only arrivals at the port have been the *Black River Packet* on Dec. 29th, *Theresa* on Jan. 1st, and the *Voltigeur* this day. On Dec. 14th the *Osborn*, which had left for Shanghai two days previously, in company with the *Dove*, put back with sails blown away and some of her crew frost-bitten. She had experienced very heavy and cold weather at the western entrance of the Strait of Tsugar. She subsequently put to sea again on the 18th. On the 22nd and 23rd Dec., a very heavy typhoon was experienced at Hakodadi, the gale commencing at S.E., and as usual here, hauling round by south to west. The foreign residents speak of never having felt a more severe huricane here. A considerable amount of damage was done by the drifting away of boats and junks, and several houses were unroofed. Luckily there was no foreign vessel in port at the time, or the holding power of her anchor would have been severely tried. Since the gale we have had regular cold winter weather.

I have now to record the loss of the British barque *Egeria*, Captain M'Kay, on her voyage from Shanghai hither on the night of the 31st Dec. The vessel was under charter by Messrs. Lindsay and Co. She was favoured by the weather, and had made a rapid passage from Shanghai till she was off the western entrance of the Straits of Tsugar on the afternoon of the 31st Dec. The captain's account of the affair is, that about four o'clock he obtained cross bearings of O-sima Island and Cape Greig, and then steered N.E. by E. to clear Cape Sirakani by four or five miles. A heavy snow-storm then came on. At five P.M. the ship struck a rock under water, and the lead being hove, there were ten feet on one side, and no bottom at over thirty fathoms on the other. In slipping off the rock and slewing, the rudder was carried away. The vessel was then worked entirely by the yards, and having struck again, the captain caused a blue-light to be burned and let go the anchor, but the vessel drove and ultimately went ashore stern foremost on the beach, about two miles S.E. of the town of Matsumai. At daylight, endeavours were made to run an anchor out, but in the attempt a boat was smashed. During the forenoon, the Bremen barque (but under British colours) *Teresa* passed, bound for Hakodadi. The captain of the *Egeria* believes that had this vessel come to his assistance at that time, his ship might have been hove off and towed into Hakodadi. The mate of the *Teresa* (her worthy Captain Staats was, unfortunately, not in her) states that no colours were flying in the *Egeria*, and he took her to be a Japanese vessel. Captain McKay, seeing that all his efforts to get his vessel off would be fruitless on account of a heavy sea setting in, which bilged the vessel against a rock on the starboard side, set to work to get everything that was possible out of the wreck on the beach. Japanese also came to his help, and, in accordance with orders from the Prince of Matsumai's officers, good shanties were erected, a guard stationed on the spot, and everything necessary for the comfort of the crew provided — rice, fowls, potatoes, firewood, charcoal, &c., and the captain was informed, by means of a vocabulary, that if he was in want of anything he need only apply for it; and more than this, all payment was positively refused. The Prince himself

Digitized by Google

was at the time absent at Yedo, but his son, a boy, was in Matsumai. Shipwrecks would lose half their horrors if the unfortunates were always to be treated as in the territory of the Prince of Matsumai, and it is to be hoped that some token of gratitude, more substantial than the mere thanks of a Consul, will be presented to the Prince, either by the British Government, the owners of the vessel, or the insurance office. The presentation of a piece of plate, an Arab charger, or something appropriate, would certainly be the least that could be done, and would go farther to cement the friendship of the so-called treacherous Japanese with foreigners, than all the gunboats and frigates that could be mustered in the harbours of Japan.

It remains only to be mentioned that some of the foreign residents, as soon as they heard of a vessel ashore, proceeded to the spot; some by water, among whom was the British Consul, and some by land. By this latter route the distance is reckoned at 25 ri, something over 60 miles. The road first skirts the shore of the harbour and bay of Hakodadi, then follows a long valley into the mountains, which are crossed by a zig-zag bridle path. The sea shore of the straits is then reached, and one passes through several substantial villages, proceeding all the time to the southward and westward. After the road leaves the sea again, another high mountain has to be traversed, and thence you descend to the sea about three miles from Matsumai. The journey at no time can be made with any other conveyance than horses, and in winter, when the country is deeply covered with snow, it is in many parts of the mountains impossible to ride. The scenery well repays the labour of the journey, and the civility of the people at the villages and wayside inns, although beyond the 10 ri treaty limits, is such as you would not be apt to find in all parts of the world. Altogether, the behaviour of all classes in the dominions of the Prince of Matsumai, on this occasion, is an example to the world.

The *Egeria* was sold by public auction as she lay on the beach, for $2,100. The foreigners who went to the wreck were invited into the town of Matsumai, and entertained by the Prince's order at the best temple in the town, with a repast in first-class native style. Horses were even provided for the use of the foreigners. The captain and most of the crew arrived at Hakodadi in the ship's boats; and the stores, sails, &c., saved from the wreck will be sold by public auction to-morrow.

The existence of a rock in the position ascribed to it by Captain McKay, has not been known among ship captains frequenting this port; nor is it on the chart. It is the prevailing opinion here, that the unfortunate *Egeria* struck on the end of a reef running out from a point just westward of the town of Matsumai, but on account of the snow-storm, the land could not be seen. If this be the case, chart makers will be saved the trouble of investing "Egeria Rock."

Although it is usual for one or more Russian Government vessels to winter at this port, not one has been here for months, and it is believed most of them are at California.

There has been one death here from small-pox on board the *Teresa*. The disease was in the vessel when she left Shanghai. She will leave for Nagasaki in a day or two. The *Black River Packet* is intended to start to-morrow for Shanghai.

CHINA.

PEKING.

We take the following *curious* correspondence from the *Friend of China*. The *Friend* is always original in giving us a bit of fun :—

(To the Editor of the *Friend of China*.)

SHANGHAI, Feb. 16, 1864.

Dear Sir,— A friend of mine in the North sends me copies of some correspondence which has passed between the British Legation and an English curiosity dealer of the name of Andrews. This I hand to you, and hope you will see fit to publish it. The "private document" which Sir Frederick asks for, was a series of jottings picked up near the British Legation, from which it is supposed to have been blown. A portion of these I send also; and though my correspondent does not say by whom they were made, I think they must have come from Mr. Under-Secretary St. John's pen—that gentleman—like him of Pope's Essay, answering that invocation to Bolingbroke :—

"Awake — let's leave all meaner things
"To low ambition and the pride of kings"

—and daring to comment occasionally on the political acts of his chief. What a disclosure of the state of things in the Elgin and Kincardine Court!

Mr. Andrews, the party addressed by Sir F. Bruce, has now been over a year in or about the neighbourhood of the Court, seeking for curios, and is described as a quiet, inoffensive man. His dealings, however, interfered with the "curiosity" speculating proclivities of certain gentlemen, and so, when some Germans annoyed the Government by doing a little in drug, the complaint was availed of to stop—or "spoil his fun."

I am, dear Sir, yours, A SUBSCRIBER.

British Legation, Peking, Jan. 6th, 1864.

Sir,—I am desired by Sir F. Bruce to state that your motive in coming to Peking being contrary to treaty, he must request you to leave the capital as soon as possible.—Your obedient servant,

F. R. ST. JOHN, Second Secretary to H.M. Legation.

Mr. Andrews.

British Legation, Peking, Jan. 7th, 1864.

Sir,—I have to acknowledge receipt of your letter to Sir F. Bruce, dated to-day, and I have to state, in reply, that he regrets it is out of his power to grant you the permission you ask for.—Your obedient servant,

F. R. ST. JOHN, Second Secretary to H.M. Legation.

Mr. Andrews, Peking.

Peking, Jan. 9, 1864.

Sir,—Mr. St. John has nothing to do with my determination not to allow the treaty to be infringed at Peking.

I request you to state how you obtained access to the private document of which you purport to enclose me an extract.—I am, Sir, your obedient servant, FREDERICK BRUCE.

Mr. Andrews.

Sir F. Bruce laid an embargo on the squadron, and subsequently decided to send it back to England for sale, the proceeds to defray voyage expenses and salaries, and the surplus remitted to the Chinese Government. What would any other people say to having their own property disposed of in this way?

Lay, who should have resigned voluntarily, has waited till he has got his dismissal, and now starts for home with a present of £8,000, which the Chinese willingly booked up to be rid of him. Osborn, who, with the rest of the officers and men, will receive pay to the 31st of August, 1864, has, besides, got cumshaws to the tune of £3,300, which, with his two years' salary at the same rate, brings it up to £10,000 that he will have made by a trip to Peking and back, without firing a shot.

I have at last succeeded in spoiling the fun of an Englishman who has for some time been hanging about Peking. The Government here had complained that foreigners, on pretence of visiting the capital, had been smuggling opium; and as we had reason to think that the said barbarian took back return cargoes, consisting of curios which he doubtless sold at great profit to the merchant princes on the coast, and that by such means he was interfering with our own speculations. Consequent on the freezing of the Gulf and the approach of the Chinese new year (when all have to raise the wind) we have desired the Consul to issue no more passports from Tien-tsin, except to those engaging themselves to observe the treaty regulations with regard to trading to the capital. I will never find fault with the passport system again.

SHANGHAI.

The French mail of Dec. 17 arrived out on Feb. 8, and the English mail of the 26th on the 18th. The dates by the present mail are down to the morning of Feb. 24, or three days later than given in our issue of the 4th inst., per French mail.

Crime continues, and our leading article in another column is by no means too early or too urgent for "something to be done" to stop this scandal committed under the eyes of the foreign merchants, missionaries, &c.

A junk anchored opposite Hong-Que was boarded by three Europeans armed with swords, who demanded money, and this not being given them, they savagely attacked one of the junk sailors, wounding him so severely as to render his recovery a matter of doubt. The supercargo was cut in the face, and all on board were forced below. The hatches were then closed while the junk was rifled. The following articles were taken:—13 balls opium, 110 Mexican dollars, 20,000 cash, one copper and one iron gun, four sheepskins, one coverlid. No clue has been obtained as to the whereabouts of the perpetrators of this outrage.

The Taotai Hwang, whose friendship to foreigners has never been marked, has tendered his resignation to the Futai, and it has been accepted. His Excellency has appointed Ying-Pao-Shih, late head of the Defence Committee, as acting Taotai, pending instructions from Peking. The appointment will, we anticipate, be very acceptable to foreigners, by whom Ying-Pao-Shih has long been known, and by whom he is much esteemed.

The following is from the *Daily Shipping List* of the 22nd February :—

A notification has been issued by the Futai, under date of the 7th day of this moon (14th Feb.), and has been posted up in the settlements. We have been unable to procure a copy, but the general sense of the document is to the following effect :—It states that from the time that Gordon took command of the "Ever Victorious Army," everything has gone well with it, and that no effort made by him has been unsuccessful. The friendly relations existing between him and the Governor were clouded by the events which followed the fall of Soochow, but are now for a second time friendly. Up to the day on which the city was surrendered, every movement and purpose of the one was known to the other, but the execution of the Wangs, the reason for which Gordon did not know, sowed

Digitized by Google

the seeds of discord between them. Gordon considers that it was not right to execute the Wangs, and the Futai is of the same opinion. But the motives of each were the same, and the circumstances under which the slaughter took place were such as to justify the proceeding. The La Wang had not shaved his head, and when he and the others arrived in the presence of the Governor, one said he should be a commander-in chief, another insisted on obtaining a generalship, while others demanded that the soldiers who had congregated under their banners within the city should still remain exclusively their own. If such demands had been granted the consequences would have been most serious, whereas, if they had been refused, the course of events would have proved equally ruinous. A consultation with Gordon would have involved a delay which might have had fatal results. The execution of these princes was thus rendered necessary for the preservation of several myriads of the people, who would have been involved in certain destruction, had the requirements of the Wangs been either refused or granted. The means taken by the Government were misrepresented to Gordon and the foreign authorities, and hence the ill-feeling which arose. If, however, the rebels of Nan-buei or Chan-chou offer to surrender, no such steps will be taken. The circumstances of the case and the reasons for the seizure of the Wangs have been fully explained to the Tsung-li Yamên. Those of the people who presume to criticise the acts of the Futai, and to abuse him in public or in private, are forbidden to do so for the future. Such remarks are calculated to hurt the feelings of the soldiers, and to interfere with their future conduct in action.

The above is an abstract of the notification. We will, if possible, take an early oppotunity of publishing a translation in extenso.

On Major Gordon and trhe notification issued by the Futai, the *North China Herald* says :—The misunderstanding which arose between Gordon and the Futai relative to the slaughter of the Wangs has been "arranged," and the former officer is now making active preparations to leave Quinsan, and lead his troops to the attack of Yih-shinghsien, a town in the neighbourhood of Chang-Chow, south-west of the Tai-hu. This step on the part of Major Gordon has not given unmixed satisfaction to his friends in Shanghai. It is feared that whatever representations may have been made by Sir Frederick Bruce with respect to the massacre of the Wangs will be nullified by the renewed friendly relations between Gordon and the governor.

The New Year festivities have passed over, and trade is, in consequence, again becoming, to a certain extent, possible. Few important transactions have, however, been reported since last mail.

Messrs. Wainwright and Co. sold 140 bales of Hankow cotton, saved from the *Fire Cracker*. They weighed, originally, 150 catties to the bale, at 18.7.5 t s. per bale.

The weather has been extremely changeable, every variety of temperature between 60 degs. and 28 degs. Fahr. Theatrical entertainments have been given by an American company brought from California by a Mr. Faylor, but the attempt proved a decided failure. The character of the drama to which the company has directed its attention, and the atrocious acting were, when combined, sufficient to deter the most inveterate pleasure seekers from patronising the performances.

The arrival of the Japanese Ambassadors, reported in our last as having left Yokohama, is thus noticed :—The Japanese embassy, which is about to proceed to England to negotiate the closure of Kanagawa, and to explain the death of M. Camus, arrived here in H.I.M.S. *Monge*. The ambassadors are three in number, and are accompanied by thirteen minor officials, and a retinue of twenty-four attendants. They took up quarters at the Astor House, and walked freely about the settlement exciting an immense amount of attention from the Chinese. An evening or two after their arrival a policeman, of more than ordinary density, arrested one of the inferior officers, and led him in triumph to the station, on a charge of carrying arms in the settlement. Mr. Inspector Rumsbottom of course immediately ordered the prisoner to be released. It was fortunate that no serious disturbance was caused. The ambassadors embarked on board the *Hydaspe*, for Hong Kong and Suez, on the 21st Feb., and they have safely arrived in Paris.

We (*Recorder*) learn with surprise that Government has come to the determination of charging the officers of H.M.'s 67th Regiment for barrack accommodation, provided by their tender mercies in the China city, and that such charges are to be retrospective, making for a subaltern with his scanty pay and numerous requirements a lump sum of £60, which he is expected to shell out at once, or be put under stoppages as the very mildest mode of proceeding. This is really too bad, and we hope the respectful remonstrances in the form of a memorial, which we understand are either gone or going home, will have their due weight with the authorities, and cause them to at once withdraw so iniquitous a charge. In the early pages of this paper the present editor (then wholly unconnected with it), wrote a series of articles on the "Sanitory Condition of our Troops in China," which created considerable attention at the time, and caused various boards and inspections to take place, which resulted in some slight improvement in the quarters in questions, as well as those then occupied by H.M.'s 31st Regiment. The picture then given was a true one, and we do not hesitate to say that many a valuable life was sacrificed by a residence in the wretched outhouses, surrounded by stagnant green ponds, occupied in the city by our officers and men. Any attempt to make them pay for running an extra risk of death, or almost certain disease, is certainly most monstrous.

The following official notification appears :—From the 11th Feb. all communications referring to the jurisdiction of Prussian and German subjects, with the exception of those of the free Hanseatic towns, have to be addressed to the Secretary of the Prussian Legation, R. von Radowitz, who has been charged with the management of the affairs of the Consulate General. All business concerning the shipping will still be conducted by the Prussian Vice-Consulate.—PRUSSIAN CONSULATE GENERAL.

The Steam Washing Company (says the *Recorder*) has already found too many difficulties to contend with to carry out its promises and intentions. The Chinese workmen (as we are informed, to our sorrow) will not wash at all by the new system, and have struck. Anxious to be able to report favourably of its operations, we tried the experiment, and at the end of a fortnight had our clothes returned in soldierly parlance "as they were." This, to say the least, is unpleasant, and would have been more so in the hotter part of the year. We are sorry for the proprietors, who must have gone to considerable outlay, the return of which is now seriously jeopardised, but until they get affairs in proper working order they are bound to take no more articles.

We (*Recorder*) have frequently had occasion to notice the improvements made or being made in the shape of wharves, jetties, &c., on the river. Probably there is no public wharf where so many facilities for discharging and loading vessels and storage of goods can be obtained as at the Shanghai wharf. A short time since our esteemed contemporary in commenting on the facilities to be obtained, instanced the *Chanticleer's* having one hundred tons of coal shipped in five hours, and on the shortest possible time to prepare for her coming alongside. The *Feiloong* also took in forty tons in two hours ; and as high an average of discharge as 1,000 tons in five days has been attained. The *Fiery Cross* is now discharging, or rather has completed her discharge, of about 1,100 tons of cargo in about four days. Greater feats are possibly performed in the docks in Liverpool and London by the application of steam and hydraulic power ; but such rapid loading and discharge as above is rarely obtained elsewhere, and reflects credit alike to the company and their servants, as to the port. We have observed several vessels which arrived weeks before the *Fiery Cross*, still discharging, the ordinary appliances being so much slower in effect. We cannot doubt but that owners and captains of ships will find this wharf a great convenience.

HANKOW AND PORTS ON YANG-TSZE.

Latest advices are to the 4th February. Trade is reported to be at a standstill, trips into the country in search of game employing the greater part of the time of the merchants.

HONG KONG.

The dates are down to the 1st March, or four days later than per French mail, which arrived on the 4th instant. No later mail had arrived from England ; the French mail of 17th January, having, as noticed in our last, broken down near Galle.

The arrival of the *Falcon* from London is announced in 95 days.

The last of a series of three concerts given here by the various artistes at present in the city came off. On account of the weather the entertainment was thinly attended. These concerts have been by far the most excellent concerts ever given in Hong Kong. The leading feature of the programme

Digitized by Google

was a fantasy on "Linda de Chamounix," beautifully arranged and composed for two pianos and an organ, which was played by Mr. R Sipp and two gentlemen amateurs; it was the only piece encored, and it must be very gratifying to Mr. Sipp to have called forth such vehement applause from so small an audience. We wish every success to the various musical artistes who have lately entertained us, and we deeply regret that various circumstances have prevented them from receiving the success which they deserved.

The *Evening Mail* of the 26th February says:—The Japanese Embassy, which arrived last night by the *Hydaspe*, consists of three Ministers, six First-class Officers, ten Second-class Officers, and sixteen servants—in all thirty-five. It is the intention of the Embassy, which is accompanied by Mr. Blakeman, of the French Legation, to visit Paris, London, and the various capitals of countries which have treaties with Japan, for the purpose of explaining the present state of affairs, and likewise to endeavour to arrive at some arrangement about foreigners quitting Yokohama (only). The entire expenses of the Embassy are borne by the Tycoon's Government. A rumour is current that they are men of low extraction put forward under false pretences. It can make very little difference who they are, so long as they are duly accredited to the various Courts they mean to visit; and it is to be hoped that advantage will be taken of their visit to Europe to impress upon the country they represent that the time has gone by for nations remaining in a state of isolation. As for the evacuation of Yokohama, it would be a grave mistake on the part of the English Government to concede so much. The time was when the concession might have been made, but it is too late now.

The following is the conclusion of an article which appeared in our last number, taken from the *China Mail*:—

"In these views we are borne out by the tone which the Chamber of Commerce adopted in the last half-yearly report. The ground which that body took was in our opinion good ground. They advised the English Government to adhere to the treaty in its letter and spirit, and they proved successfully that our authorities in China had permitted both to be openly violated in numerous particulars. For example, the system of confiscating English property by the award in a Chinese court, where the proceedings are conducted with closed doors, is not only opposed to the letter of the treaty, but is hostile to every received principle of law and justice. This and many other matters call for diplomatic interference, and we are not at all surprised that China merchants should have expressed an objection to the existing state of affairs; but we are somewhat astonished at the fact that the English Government, both at home and through its representative in China, should have been so negligent in watching how the articles of the treaty are carried out. The fact is that the Chinese have no sense of honour, or if they have they do not make much use of it with regard to foreigners. They are a magnificent people to trade with, and, so long as they see a *quid pro quo*, they are ready to deal with anybody and everybody. With the natural instinct of traders, however, they always like to drive the best bargain they can, and the consequence is that Englishmen, with their usual good-nature and generosity, have allowed themselves to be "chiselled" out of various privileges which they ought to have enjoyed by the treaty. Sir Frederick Bruce is a tolerably clever man, but we are greatly mistaken if his policy of conciliation towards the Chinese Government proves to be the best in the end. Recent events have shown that the rulers of this empire lose no opportunity of humiliating foreigners. Their contempt for us is feigned, which renders their treatment of foreigners all the worse. We, on the other hand, wishing to deal fairly by them, have hitherto been rather yielding in our behaviour. It is perhaps best that such should have been the case, and that we should have learned by simple experience what Chinamen were. That experience has, we think, been somewhat dearly bought, but it is now too late to complain. Mr. Lay has been sacrificed partly through his own fault, and partly owing to Chinese dislike of foreigners, and Captain Osborn has also been thrown overboard from similar causes.

"We attribute the growing assurance of the Chinese rulers to the fact that they have been lifted out of the mud lately by the action of Major Gordon; and we should be sorry, after what has passed, were the Major to remain in their employ. Gratitude is a quality totally unknown to Chinamen, and it is very seldom that a feeling of honour is evoked in their bosoms; they must, therefore, be dealt with on the principle of expediency, and everything we require of them must be insisted upon. By adopting this policy we shall be relieved, to a great extent, of the exercise of that cleverness which our fourth-class diplomatists out here pique themselves so much upon. We can easily deal with the Chinese by the rule of thumb, and that is the sort of treatment they are most able to appreciate. The Futai of Shanghai has, by his recent conduct towards Major Gordon, opened our eyes to the Chinese method of acting towards foreigners. In point of fact, that simple affair may be considered as a very good exponent of Chinese ideas of English assistance. It is necessary that those ideas should undergo some modification, and, if we are rightly informed, the process has already begun; in other words, the Futai has been making desperate attempts to pacify Gordon, having even gone the length of sending his pliable Scotch lieutenant, Dr. Macartney, to see whether matters could not be patched up. Our own opinion is, that Gordon will withdraw from the business altogether, and leave the Imperialists to manage their own affairs. From the beginning he has shown that pecuniary profit has had nothing to do with his actions, and it is likely that the Chinese have failed to understand what could have been his actual motives. With a view, therefore, of indoctrinating our celestial friends in the secret of English labour, courage, pluck, and all that sort of thing, it would be well to drop lending them any more martial assistance until they begin to appreciate it better. We think that affairs in China are very near a turning-point, and that, should matters be properly conducted, we ought to obtain a better footing in the empire than we have ever possessed before."

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Privat.
At Shanghai (per Tael.)	6 months sight.	6s. 4d. to 6s. 6d.	6s 5d. to 6s. 7d.
At Foo-Chow-Foo (per dol.)	6 ditto	...	...
At Canton, At Hong Kong, At Macao	6 ditto	4s. 11d.	5s. 0d. to 5s. 1d.
At Singapore	6 ditto	4s. 11d. to 4s. 11½d.	5s. 0d. to 5s. 1d.
At Manila	6 ditto	4s. 7d. to 4s. 8d.	4s. 7d. to 4s. 9d.

At Shanghai: Bills on India, Rs. 303 to 304 per 100 taels. At Hong Kong: Rs. 230 to 233 per $100. Bar silver at Shanghai, 110.75. Hong Kong, 4 prem. Mexican Dollars at Shanghai, 75; and exchange on Hong Kong, 25 discount.

The Circular of Messrs. Sharp & Co. has the following items:—

GOLD.—One lakh of dollars worth has been imported during the fortnight; and the outward shipments, including those by the *Ottawa* on the 15th inst., and excluding those to leave by the *Emeu* to-morrow, amount to two and-a-half lakhs. Messrs. Russell and Sturgis state in their circular of the 20th inst., that "A Royal order having been received to the effect that no payments of coin are to be made from the Mint until each month's coinage is approved from Spain, it will require three or four months to realise gold sent to the Manila Mint."

SILVER.—But a few bars have been received, and the transactions carried through have been altogether unimportant.

DOLLAR CURRENCY.—The amounts received and exported during the last two weeks have been almost the same, and may be called a little over three lakhs on either side. The amount sent to Shanghai is in excess of that received in clean coin.

DISCOUNTS AND MORTGAGES.—A considerable business has been done in discount during the fortnight at rates ranging from 8 to 12 per cent. per annum, the former representing discounts of our own acceptances at short periods, and the latter of usual good paper for a longer time.

EXCHANGE.—Private bills have been unusually scarce, but remitters have been supplied freely with Bank paper at previous rates and purchases have been made for 15th March and even 1st April mails. On Calcutta no transaction has been made since the direct steamers for which the rate closed at 23½ for 15 sight.

SIAM.

The *Straits Times* of the 7th March reports that a great fire had taken place at Bankok, by which a large amount of property had been destroyed.

MALACCA STRAITS.

SINGAPORE.

Dates are to the 8th March. The Governor returned to Singapore on the 5th. His Honour has made the following appointments:—Mr. D. E. Thom, Chief Officer of the steamer *Pluto*, to be commander of the steamer *Mohr*; Mr. Horace Brown, to be engineer in charge of the steamer *Mohr*, with effect from the 5th March; Mr. William H. Goodman, to be chief officer of the steamer *Pluto* on probation; Assistant Surgeon A. Fergusson, M.D. Madras Establishment, to be Residency Assistant Surgeon at Singapore.

Mr. A. Conighi assumed charge of the Austrian Consulate at Singapore on the 1st March.

Digitized by Google

Intelligence had been received from Saigon that the captain and crew of the British ship *Madras*, of Greenock, had arrived there, their vessel having been totally lost when on her passage from Bankok to Hong Kong, in north lat 8.17, and east lon. 113.54, or about forty miles west of the Palawan Investigator Shoal, and twenty miles north of the Ardasier breakers. The crew were in the boats six days before reaching Saigon.

There had also been made known the loss of the French ship *Flora*, from Europe, bound to Saigon, when within about forty miles S.W. of the latter port.

We hear of the loss at Boelocamba (south coast of Celebes), of the Dutch vessel *Wilhelmina*, from Rotterdam for Macassar, with a full cargo, on the 27th Jan. At Macassar were also landed the captain and crew of the Danish ship *Jupiter*, lost in the Straits of Sallayer, supposed to be bound for China from Bankok.

A letter from Akyab to private hands, dated Feb. 3, states that the *Alabama* had burnt off the Sumatra coast a large American ship, called the *Expounder*, bound for that port.

Captain de Bathe reports that on January 17, at 5 A.M., the barque *Douglas*, steering S.S.W. ½ W. ran over a bank in the China Sea; water having a milky and phosphoric appearance. Sounded and got no bottom; shortly afterwards got eight fathoms sandy ground, keeping the same water for 20 casts, then seven fathoms, then 6½ fathoms. Wore ship round to the N.N.W. when they slowly deepened their water, getting 8 fathoms for 10 casts, 9 fathoms for 12 casts, then 9½, then 10 fathoms for many casts. The position of the centre of the shoal from dead reckoning on the previous noon is longitude 111 deg. 20 min. east, latitude, 17 deg. 43 min. The position at 5 A.M. worked back by observation at 8 A.M. for longitude, and from noon for latitude, gave 111 deg. 18 min. 39" and latitude 17 deg. 41 min. 12" North.

HARBOUR LIGHT, SINGAPORE.—On and after the 1st of March, a new light will be exhibited from the flagstaff, Fort Canning. The light will be fixed at an elevation of 245 feet above the sea (high water mark), and it is calculated will be seen from a distance of fifteen miles. It will be visible through an arc of 90 degrees, extending from St. John's Island and Johore Shoal, at the northern entrance of the Old Straits.—J. O. MAYNE, Captain, R.E.

The failure of Messrs. G. H. Brown and Co., of Singapore, with liabilities for about half a million dollars, is announced. The estate is to be wound up under inspection, and is expected to realise 100 cents to the dollar.

The Chamber of Commerce here lately addressed the French Consul, soliciting his aid in having boxes for the reception of late letters placed on board the steamers of the *Messageries Imperiales*, under charge of the Mail Agents. M. Troplong has forwarded this letter to the Minister for Foreign Affairs, and in the meantime suggests that the Post-office here might follow the course adopted by that at Hong Kong, which is, to send on board the steamers a clerk who receives letters up to the moment of sailing, and makes up an after-packet which he delivers to the Mail Agent. M. Troplong observes that there would be less difficulty in carrying this out here than at Hong Kong, as the clerk need not be stationed on board the steamers, but might receive the late letters and make up his after-packet either in the Telegraph-office or in some part of the extensive premises of the Borneo Company, both of which adjoin the wharf at which the steamers of the *Messageries Imperiales* lie when at Singapore.

We trust the Post-office will at once adopt M. Troplong's suggestion, as it will greatly conduce to the public convenience. Some of the Naval Agents on board the P. and O. Company's steamers carrying Her Majesty's mails, have lately shown a disposition to ignore the instructions given by the Admiralty in 1858, to allow the public to use the letter boxes on board the steamers for the reception of late letters, and we think it may be well therefore to republish the letter from the Secretary to the Admiralty on this subject. This letter, it will be observed, was in reply to one from the Singapore Chamber of Commerce, requesting that arrangements might be made for the reception of late letters on board the steamers up to the time of sailing:—

ADMIRALTY, 6th Nov., 1858.

SIR,—In reply to your letter of the 3rd of September last, urging on behalf of the Chamber of Commerce at Singapore the convenience that would result from a box for the reception of late letters being placed on board the steamers employed in the conveyance of Her Majesty's Mails, I am commanded by my Lords Commissioners of the Admiralty to acquaint you that previous to the receipt of your communication steps had been taken to place moveable letter boxes on board the packets employed in the Indian and China Seas.—I am, Sir,

Your most obedient servant, W. G. ROMAIN.

The Penang Chamber of Commerce at a meeting lately held by them resolved to make further representations to the British Government on the subject of the proceedings of the Dutch on the East Coast of Sumatra. In connection with this movement the *Penang Gazette* publishes a detailed statement of the trade between Penang and the native ports of Sumatra for the last five years, proving the valuable nature of the trade which is now considered to be jeopardised. The imports into Penang from these ports consist of pepper, gutta-percha, india-rubber, betelnut, and other kinds of produce. The exports from Penang consist of piece goods, twist, yarn, opium, and other articles. The following is the sum total of the imports and exports from 1858-59 to 1862-3:—

	Imports.	Exports.
1858-59	£296,143 ..	£299,936
1859 60	252,031 ..	364,933
1860 61	385 886 ..	506,727
1861 62	343,666 ..	511,093
1862-63	944,097 ..	1,512,235

It will be seen from these figures that the trade between Penang and the native ports in Sumatra is rapidly increasing, and it will therefore be matter of regret if anything should be allowed to interfere with such a valuable branch of the commerce of the Straits Settlement. We have not the means at hand at the present moment of giving a comparative view of the trade between Singapore and Sumatra for the last five years, but we find that in 1860-61 the imports amounted in value to £144,297, and the exports to £93,015. The trade of Malacca with the same quarter must also be of considerable importance.

The *Penang Gazette* says:—The drought mentioned by us in our issue of the 30th of January still continues. With the exception of a few showers which fell on the first few days in February, we have had hot dry weather for the last five or six weeks. The heat is, in consequence, very oppressive, and the only places at all comfortable are the beach and the hill. The dust on some of the roads lies very thick, and the passage of carts and carriages stirs it up in clouds. For many years we have not had such a continuance of dry weather like the present, and if it lasts much longer it may cause serious injury to the various plantations. Coffee and young cocoanuts which were lately planted are already suffering much, and the grass has quite a brown and burnt-up appearance.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BAILEY—On Sunday, the 14th Feb., at the Parsonage, Yokohama, the wife of the Rev. M. Buckworth Bailey, H.B.M. Consular Chaplain, of a daughter.

FITTOCK—On the 28th March, at 21, Rokeby-road, New-cross, Mrs. Edwin Fittock, of a son.

FOWLER—On the 22nd March, at Elie, Fifeshire, the wife of Capt. David Fowler, late of the steamer Thunder, of a daughter.

MCMILLAN—On the 27th Feb., on board the Kalahome, the wife of Captain McMillan, of a daughter.

NASH—On the 29th March, at Tolpuddle Vicarage, Dorchester, the wife of the Rev. George L. Nash, of a daughter.

RANKINE—At the Johore Steam Saw Mills, Singapore, on the 29th Feb., Mrs. James Rankine, of a daughter.

TONNOCHY—On the 31st March, at Chanonry, Old Aberdeen, the wife of Captain V. Tonnochy, H.M.'s 81st Regt., of a daughter.

WILKINSON—On the 7th April, at 78, Inverness-terrace, Bayswater, the wife of Alfred Wilkinson, Esq., of a son.

MARRIAGES.

BOLTON—DARE.—At St. Andrew's Church, Singapore, on the 23rd Feb., by the Rev. Charles J. Waterhouse, M.A., Chaplain, Charles James Bolton, Esq., Commander of Messrs. Jardine, Matheson and Co.'s steamer Reiver, to Louisa Caroline, second daughter of the late George Julius Dare, Esq.

DENNE—MENZIES.—On the 31st March, at the parish church, Hampstead, by the Rev. G. A. Herklots, M.A., Thomas Denne, Esq., of Camberwell-grove, to Mary, daughter of the late William Menzies, Esq., of Kor pan, Java. No cards.

MACLACHLAN—TOWSE.—On the 5th April, at St. Magnus the Martyr, London-bridge by the Rev. R. M. South, of East Peckham, Kent, assisted by the rector, the Rev. Alex. Israel McCaul, William Maclachlan, of the Stock Exchange, Esq., second son of Dr. Maclachlan, of Rothesay, Isle of Bute, to Adeline Annie, eldest daughter of William Beckwith Towse, of Fishmongers'-hall, Esq.

TARRANT—HONISS.—At the Episcopal Church, Honque, Shanghai, on the 20th Jan., 1864, by the Rev. Elliot Thompson, William Tarrant, to Marie Helene, only daughter of the late M. Vital Edouard Duprat, and relict of W. H Honiss, Esq., of Hastings, Sussex.

WHITNEY—CARPENTER.—On the 6th April, at the parish church, Dawlish, by the Rev. Thomas King, uncle of the bride, assisted by the Rev. F. H. Tucker, Silas Russell Whitney, Esq., of Whitney, and Fifth Avenue, New York, to Marina Charlotte, third daughter of the late Major-General Carpenter, of H.M.'s Indian Army.

DEATHS.

CAMPBELL—On the 30th March, at George-street, Portman-square, her Highness the Princess Victoria Gouramma, wife of Colonel John Campbell.

DOWNIE—On the 21st February, at Hong Kong, John Downie, Inspector of Machinery, R.N., aged 49.

GILMAN—On the 24th February, at the Civil Hospital, Hong Kong, Thomas Gilman, destitute seaman.

GREENFIELD—On the morning of the 10th April, at 15, Whitehall-place, Hume Greenfield, Esq., Assist.-Secretary Royal Geographical Society, in the 35th year of his age.

GREENWOOD—In Dec., 1863, drowned between Shanghai and Ningpo, Robert Joseph, second son of the late Mr. Greenwood, of Guernsey, aged 26.

JANTZEN—On the 21st February, at Hong Kong, Carl Jantzen, master of the Russian schooner Rusalka, aged 50 years.

KNEVITT—On the 28th March, Mrs. Hannah Parker Knevitt, widow of the late Thos. Knevitt, Esq., of Whitton, in the 42nd year of her age.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is dividediuto uecimal parts of ten.

COMMERCIAL REPORT.
CHINA EXPORTS.

TEA.—Canton: There has been very little change in the position of this market since the departure of last mail, the transactions reported being very restricted. The teamen continue very firm, but the tendency of rates for black teas is downward notwithstanding. Three more chops of country Congou have arrived. The following settlements comprise the business of the fortnight:—Congous, 1 chop good black leaf at 25½ taels, being a small decline on previous rates. Scented teas, no sale; Canton teas, 2,000 boxes Gunpowder, mid. to good, at 20 to 22 taels; Country Greens, 7,800 packages (for New York); Gunpowder at 41 to 58 taels; Imperial at 38 to 55 taels; Hyson at 37 to 63 taels; Young Hyson at 31 to 50 taels; Twankay at 23 to 30 taels. The stock of teas remaining on the market consists of Congou 45 chops; Scented Teas 20,000 boxes Caper and 5,000 boxes Orange Pekoe; Canton Greens uncertain; Country Greens, 2,950 pkgs.

FOOCHOW.—Operations were resumed after the holidays on the 15th Feb., and a considerable business has been done in Congous by a few buyers. Prices are about on a par with those ruling before the China new year, except that common Congous have been settled at a slight reduction. The sales since the holidays are reported as under. Congous 6,500 chests and 3,500 half-chests at 10½ to 14 taels for low and dusty, 14½ to 18½ taels for good common to flavoury, and 19 to 22½ taels for good flavoury. Souchongs, 240 chests at 18 taels for common. The comparative supplies to date are as under:—

	1863-64	1862-63
Congou ..	546,800 chests ..	563,100 chests
Souchong ..	59,100 " ..	33,000 "
Pekoe ..	7,700 " ..	11,900 "
Oolong ..	178,900 ½-chts. ..	214,100 ½-chts.
Green Tea ..	7,600 " ..	8,880 "
Scented Tea	73,400 boxes ..	135,200 boxes

The comparative sales and contracts:—

	1863-64.	1862-63.
Congou	530,400 chests ...	537,100 chests.
Souchong... ..	58,000 " ...	33,900 "
Pekoe	7,100 " ...	10,900 "
Oolong	174,100 ½-chts. ...	198.400 ½-chts.
Green tea	1,000 " ...	8,800 "
Scented tea ...	67,000 boxes ...	118,500 boxes.

And the comparative stocks:—

	1863-64.	1862-63.
Congou	16,400 chests ...	26,000 chests.
Souchong ...	1,100 " ...	Nil.
Pekoe	600 " ...	1,000 "
Oolong	4,800 ½ chts. ...	15,700 ½-chts.
Green tea ...	Nil. ...	Nil
Scented tea ...	6,400 boxes ...	6.700 boxes.

SHANGHAI.—Black: The transactions of the fortnight have been very limited. The holders are very firm, and evince a preference to shipping on their own account rather than sell at current rates. This has caused buyers to come up in their offers a trifle, but not to a sufficient extent to meet the ideas of holders. The transactions of the fortnight are thus reported. Settlements 200 ch. Ningchow at 24 taels. Transshipments 1,630 ch. Congou. The stock on the market is estimated at nearly 10,000 ch. Congou. Greens: Country packed have advanced a little to a good demand, whilst Shanghai packed have become a little easier and are dull. The settlements and transshipments of the fortnight amount to 7,750 hf.ch. Fychow, 750 as Pingsuey, and three chops of Shanghai packed. Making total settlements of the season to date 241 317 hf.ch. Stocks are much reduced, and no supplies have come forward from Kewkiang—they are estimated at 10,500 hf.ch. Fychow. 4.000 ditto Pingsuey, and 3.000 ditto Shanghai packed—total 17,000 hf.ch.

HANKOW.—Business has not been resumed since the holidays. The stock is limited to 8 chops.

KEWKIANG.—Business was resumed on the 12th or 13th Feb. The first purchases were for shipment to London, and after that the market became fairly opened. The settlements of the fortnight are reported as follows:—

5,000 hf.-ch.	Moyune	at 35 to 40	Tls.
1,000 "	Fychow (fine)	" 38 " 38½	"
500 "	do. (good)	" 31 " 33	"
1,250 "	Kewkiang (packed) ..	" 31 " 36	"

7,750 hf.-ch. in all.

These rates are fully equal to the quotations ruling before the holidays. Shippers have doubtless been encouraged by the fall in Exchange at Shanghai. The stock remaining on the market is estimated at nearly 35.000 hf.-ch. The total shipments of the season to date amount to 107.000 chests black and 172,500 hf.-ch. green, against 51,500 ch. black and 202,250 hf.-ch. green same period last season. Of black one chop remains on the market.

YOKOHAMA.—No business has been transacted during the fortnight, owing to the Japanese holidays. The stocks on the market are computed at 250 pls. ordinary, 300 pls. good ordinary, 200 pls. common, 200 pls. good common, 300 pls. medium, and 50 pls. fine; total, 1,200 pls. The quotations are—ordinary $1 to 3, good ord. 4 to 6, common 8 to 15, good common 16 to 19, medium 21 to 25, fine 26 to 29, finest (none) 32 upwards.

NAGASAKI.—There is a great falling off in the supply, and rates have advanced materially, good and medium being fully $2 above last quotations. There is no prospect of a reduction until supplies are more free. The total export this season to date amounts only to 2,500 pls. to all China, and 288,500 lb. to London.

RAW SILK.—SHANGHAI.—The rate of exchange having further declined, transactions to the extent of 460 bales have been concluded at a reduction of about tls. 5 to 5.10 per picul on Taatlees and Hainings. Taysaams, however, on account of their continued scarcity, have remained firm. The market closes rather firmer for all descriptions, but the rate of exchange having somewhat advanced, has already checked the desire to purchase. There have been no arrivals from the interior or Japan, so

Digitized by Google

that the stock is further reduced. It is reported that Kashing has been retaken by the Imperialists, which, if held, will greatly assist the supply of Taysaams for next season. The transactions of this fortnight are reported at 460 bales, against 7,000 bales corresponding fortnight last season, and 2,000 bales the season before. The total settlements this season to date are 32,044 bales, against 60,000 bales corresponding period last season, 57,000 bales the season before, and 71,500 the season previous to that. The present unsold stock is 4,500 bales, against 3 000 do. same period last season, and 8,000 do. the season before. The following are the latest quotations:—Tsatlees, No. 2 chops, 430 to 440 taels per picul; 3, 415 to 425 do.; market, 3, 405 to 415; 4, 390 to 400; 5, and com., 375 to 385. Taysaams, No. 1 and 2, 390 to 420 taels per picul; 3 and inferior, 340 to 380. Yuenfa, No. 1 and 2, 405 to 425 taels per picul; 3 and inferior, 375 to 395. Hainings, 375 to 420 taels per picul.

YOKOHAMA.—Owing to the Japanese holidays and the continuance of the prevalence of the political causes explained in our prior market reports, business in this staple has been entirely at a stand during the past week. Stocks may be quoted at 50 bales. Quotations, nominal, as follows:—Ida, medium, $540 to $555; inferior, 490 to 510. Sodi, fair to good, 480 to 505; Mybash, best parcels, 550 to 560; medium, 530 to 545; inferior, 510 to 525. Oshio, best parcels, 535 to 545; medium, 495 to 515; inferior, 445 to 465. Coshu, best parcels, 495 to 510; medium, 475 to 490; inferior, 460 to 470. Hatchogee, 385 to 420.

NAGASAKI.—Expected supplies have not come to market, and as there is a good demand, first arrivals will command high rates.

DRUGS, &c.—MACAO.—Cassia Lignea: Sales 500 piculs at $14.80 to 15; stock 3,000 piculs. Cassia Buds: Sales 22 piculs at 58; no stock. Cassia Oil: Sales 10 piculs at 206 to 210; stock 15 piculs. Aniseed Oil: No sales; stock 80 piculs held at 148 to 150. Star Aniseed: Sales 800 piculs, mostly for the Northern markets, at 16.50 to 17.50; stock 600 piculs. Galangal Root: Sales 400 piculs at 2 80 to 2.90; stock 200 piculs held at 3. Gall Nuts: Sales 30 piculs at 11.50 to 12; no stock. China Galls: None, nominal price 12.50. Ginger Preserves: 2.90 for best. Vermilion: 40.

CAMPHOR.—HONG KONG.—Has considerably declined in value, and some lots have been sold as low as $16 per picul. With stocks far in excess of requirements, holders find it difficult to realise, and prices may further recede if supplies continue to arrive. Sales reported during the fortnight: 200 piculs at $16.50; 220, at 16.25; 80, at 16. Stock on hand about 1,800 piculs.

NAGASAKI.—There is a good supply in stock, but little has been placed on the market, as holders expect an advance. The nominal quotation is $20 to 21.

RAW COTTON.

CANTON.—The sales of the fortnight amount to 450 bags Shanghai, at 18 to 23 taels per picul, and 150 bags Ningo, at 23 to 25 taels per picul. The stock is limited to 450 bags Shanghai, and 200 bags Ningpo.

HONG KONG.—A good business has been transacted during the fortnight, both among Chinese and foreigners. This was stimulated by receipt of intelligence per 11th January mail, which caused an advance of $1 to 2 per picul. About 5,000 piculs Shanghai, and about 3,000 Ningpo have changed hands, the present quotations being—Shanghai, $31 to 32½; Country do. 33 to 34; Ningpo, 33½ to 35; Japan, 37. The stock is estimated at about 30,000 piculs of all kinds.

SHANGHAI.—The market was dull, and bore a drooping aspect prior to the receipt on the 18th inst. of the telegram from London, dated 2nd January. The news of an advance of 1d. per lb. on the article at home, coupled with an easier, and a declining exchange here, caused an immediate reaction, and prices rallied fully 2½ to 3 tls. per picul. The purchases have not been heavy, and buyers seem rather afraid to operate at these rates, but holders, conscious that the supply still to arrive from the country must be only trifling, are firm, and should the telegram be confirmed, a further advance will, in all probability, be established. The settlements since China New Year are estimated at 12,000 piculs. The quotations are:—Shanghai, 22 to 23 taels; Hankow, 23 taels. Stock small.

NINGPO.—Supplies are scant—quotations ranging from $31 to 34.

YOKOHAMA.—Since our last report no supplies have reached. Stocks on the spot are moderate, and holders are asking $25½ to 27, which is more than buyers feel disposed to pay. The exports of this staple for the season, since the 1st July, have been as follows:—Shanghai, 1,422 bales; Hong Kong, 16,819 bales; England, 18,920 bales; America, 342 bales—37,583 bales. Against same time last season, Shanghai, 817 bales; Hong Kong, 4,874 bales; England, 1,036 bales—6,227 bales.

CHINA IMPORTS.

COTTON YARN.—The sales effected of this article in Hong Kong since the date of last report amount to 250 bales, prices showing an advance upon the quotations then given of about three to five dollars in the value of low numbers of twist. Grey Shirtings: Have not met with much inquiry during the fortnight, settlements having been limited to about 5,600 pieces of sound goods, and 300 pieces of sea damaged cloths disposed of by public auction. Prices remain without material alteration. White Shirtings have been but in limited request, and sales of only 550 pieces are reported. T.-Cloths: The transactions of the fortnight have been confined to sales of about 3,500 pieces of damaged goods, which have been moved off by public sale. Quotations remain without alteration. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: A fair amount of business has been transacted in this class of goods since the date of last report, and the settlements effected amount to 3,000 pieces of the first-named, 1,500 pieces of Dyed Shirtings, and 250 pieces of Brocades; the value of Spotted Shirtings shows a slight improvement, Brocades, both white and coloured remaining as quoted under date of last advices. Damasks: There has not been any inquiry for these goods during the past fortnight. Chintzes have found buyers to the extent of 350 pieces. Handkerchiefs have recently met with some demand, and the sales of the fortnight amount to 4,650 dozens.

WOOLLENS, SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—There is no material alteration to notice in the prices of any of the above articles, but the sales of Spanish Stripes have been upon an unusually large scale, amounting to about 1,700 pieces. Of medium cloths 120 pieces have changed hands. Long Ells: Have also met with more than average demand during the fortnight which has elapsed since the date of last circular, and sales of 2,700 pieces are reported, at prices which show no alteration as compared with previous rates in the value of Scarlet, although assorted colours have fallen from 20 to 30 cents per piece. Camlets: In these goods also the business transacted has been upon a fair scale, prices remaining as before quoted; the sales of the past fortnight are put at 1,216 pieces. Lastings: 360 pieces have been purchased during the fortnight.

METALS.—Iron, Flat, &c.: The business done in Iron in this Colony has been upon a fair scale, and prices of the various descriptions imported remain as quoted under date of 13th Feb. Some 1,700 piculs of Nail Rod, 1,600 piculs of Square and Flat Bar, and 400 piculs of Hoop have changed hands. In Canton the sales of the fortnight are put at 1,600 piculs of Square and Round Bar taken at an advance in value of from 20 a 50 cents per picul. Other kinds remain as before quoted and without inquiry. Lead: Both here and in Canton the value of Lead remains without material change to notice, the sales reported amounting to about 1,100 piculs in this Colony, and 2,000 piculs placed in Canton. Tin: Has not met with the same amount of inquiry as was reported in last Circular, and sales during the fortnight do not exceed 350 slabs. Nothing has been done in Canton. Tin Plates: Have met with good demand during the fortnight, and the sales effected amount to 1,937 boxes, Steel: There are not any sales to notice.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN—From Newcastle: Jan. 23, Milbrook.

At SHANGHAI—From London: Feb. 18, Min. From Liverpool, 19th: Cornelia.

At FOO-CHOW—None.

At AMOY—From London: Feb. 12, Sea Belle.

At HONG KONG From London: Feb. 29, Flying Spur. From Liverpool: 14, Indiaman. From Newport: 14, A. H. Willie. From Cardiff 14, Anton Gunther; 16, E. V. Beaulieu; 29, Trio and Maria Bartleit. From Bremen, 14, Rio Plata.

At MANILA.—None.

At SINGAPORE.—From London: Feb 22, Avonvale; 28, Eleanor. From Liverpool: 26, Sharpshooter; 28, Nymph. From Newport: 23, Carabel. From Shields: 24, Maude. From Cardiff: March 3, Beuchleuch, Hortensia, and Anversois. From Hamburg: 4, Canton.

At PENANG.—From London: 14, Devonale. From Glasgow (*via* Singapore): Scotland.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—For Europe: None. For New York: Feb. 18, Lord Collingwood.

From FOOCHOW.—None.

From HONG KONG.—None.

From MANILA.—For London: Feb. 18, Tyburnia. For Liverpool: 12, Jalawar.

From SINGAPORE.—For London: Feb. 25, Polly; 28, Eliza Thornton; March 3, Kalahome.

From PENANG.—For London: Claymore, Sophie Georgette, and Scotland.

VESSELS LOADING.

At JAPAN.—For London: Millbrook, Ann Adamson, Cissy, Anglo-Indian, Auld Reckie, Mary Shepherd For New York: Osborne.

At SHANGHAI.—For London: Samuel and Spirit of the North. For Liverpool: Blackburn, Bentick, Berdinlik, George Ruxton, Glengairn, Mayflower, Semida, Dunkeld, Fort William, Polmaise. For New York: Heversham and Egean,

At FOOCHOW—For London: Daybreak.

At HONG KONG and CANTON.—For London: Blackwatch, Queen's Own. For Liverpool: Vanguard, Black Prince, Berwickshire, Patrician. For New York: Resolute and Sophia.

At MANILA.—For London (calling at Cadiz: Cervantes. For Liverpool: Loyola.

At SINGAPORE.—For London: Avonvale.

At PENANG: For London: Devonvale.

At NAGASAKI.—For London: Millbrook and Ann Adamson.

FREIGHTS AND CHARTERS.

SHANGHAI.—There are no home charters to report, and less inquiry exists for tonnage. The rates (which are nominal) are, to London and Liverpool, £3. 15s. to £4 per ton.

FOOCHOW.—To London: £5.

HONG HONG.—Freights are brisk, and the demand for suitable vessels is good; an increased demand also exists for the coast. The rates are as follows:—To London and Liverpool: £4. 10s. to £5. To Ningpo: 40 cents per picul, with upward tendency. To Saigon and back: 52½ cents per picul. To Singapore and back: 55 cents; or to Shanghai, 80 cents.

MANILA.—For London or Liverpool, £5. 7s. 6d. for clayed sugar, and £6. 10d. per ton for hemp.

SINGAPORE.—The demand for suitable craft continues good. The rates to London are:—£4. 10s. per ton for measurement goods, and dead weight £3. 10s.

PENANG.—For London: Light freight (scarce), £4. 5s. to £4. 10s. Dead weight, £4. 5s. per ton.

At NAGASAKI.—For London: £5. 5s. for general goods.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—February 20, Kosmos, from Hamburg, to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—February 18, Norwood, Hong Kong to Liverpool, and Queensbury, Shanghai to Liverpool; 17, Annie Duthie, Hong Kong to Liverpool; 18, H.M.'s Pearl, Singapore to England; 20, La Plata, Macao to Falmouth.

From CHINA, &c., to UNITED STATES, &c.—February 17, Madura, Shanghai to Montreal.

Digitized by Google

CASUALTIES.

JAPAN.

LOSS OF THE EGERIA.—Captain Ingram, of the Black River Packet, reports the loss of the British barque Egeria, on Matzumai point, during a violent gale, on or about the 12th of January. The passengers and crew arrived at Shanghai on February 21.

HONG KONG.

The China Overland Trade Report has the following:—At 1 P.M. the long boat of the barque Star of Peace came along side and reported the loss of the above barque upon Sunday morning about 4 A.M. January 31st, upon the Lady Inglis Rocks, five miles E.S.E. of Cape One Saki, from Nagasaki bound to Yokohama to load; all the crew saved with the exception of the master, who refused to leave the ship. The three-masted schooner Kung Mow, Thomas Wascott master, supplied the boat with provisions, and they proceeded to Yokohama, being then about 40 miles from that port.

The Malvina Vidal experienced a succession of gales from the 29th of January to the 12th of February, with an unusually heavy sea. On February 1 sprung the mizen-mast and rudder; lost fore topsail, foresail, spanker, and fore topmast staysail, and sustained much damage to the standing and running rigging. February 2, stranded fore shroud, and lost jibboom and martingale, and found the main topmast badly sprung. At four P.M. it fell a dead calm for some hours, and the ship rolled fearfully in the trough of the sea; the spare spars and guns broke adrift, and were washed about the deck, which was full of water, doing much injury.

SINGAPORE.

The British barque Sea Bird, of Singapore, arrived from Rangoon, and reports having been in collision off Pulo Pisang with the Hamburg schooner Soon Hoon. The Sea Bird has received considerable damage.

COMMERCIAL POSTSCRIPT.

The Admiralty have engaged freight in the Maiden Queen for Government stores from the River Thames to Hong Kong.

The Euphrates, which cleared from Liverpool 14th March with 500 tons of coal for Singapore, afterwards relanded her cargo and abandoned the voyage.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 8, at Falmouth, from Moulmain, Miriam; off Dartmouth, from Shanghai, Clarendon; 10, at Liverpool, from Shanghai, Solway; from Hong Kong, Falcon, Light of the Age; off Falmouth, from Batavia, Telegraph; at Liverpool, from Shanghai, Rhine; at Crookhaven, from Manila, Maggie Lauder; off Liverpool, from Shanghai, Princess Royal; 8, off Torbay, from Batavia, Marie Adolphine; off Scilly, from Sourabaya, Bulgersteyn; 11, at Queenstown, from Batavia, for Amsterdam, Insulaneren, with loss of mainyard; 9, at Scilly, from Shanghai, Sophie; off Cape Clear, from China, Cordova; 12, at Deal, from Foo-chow-Foo, Renown; 10, off Falmouth, from Macao, Mary Ann Wilson; 12, at London, from Singapore, Maid of the Tyne; 8, off Beer, from Java, for Rotterdam, General Michiels; off the Lizard, from China, Chamberlain (?), ship; from Batavia, Staatsraad (?); 12, at Queenstown, from Rangoon, Anniversary; 9, at Brouwershaven, from Batavia, Mary and Hillegonda; 13, off Salcombe, from Japan, Dolphin.

DEPARTURES.—April 9, from London for Cardiff and Shanghai, Pillen Helena; 8, from Newport for Singapore, Alfred; 7, from Cardiff for Shanghai, Hampton Court; from Sunderland for Shanghai, Beatrice; 11, from Liverpool for Hong Kong, Veronica; from London, for Cardiff and Shanghai, Spirit of Trade; 8, from off Torbay, for Batavia, Anthony; from Cardiff, for Shanghai, Pembrokeshire; 12, from London, for Cardiff, Singapore, Hong Kong, and Shanghai, Woizlava; 7, from Sunderland, for Hong Kong, James Vinicombe; 11, from Antwerp, for Manila, Earl of Mar and Kelly.

LAID ON.—At Liverpool, for Hong Kong, Tricolor, Amizone; for Singapore, Simoom.

SPOKEN.—British Queen, Clyde to Batavia, Feb. 25, 49 N., 19 W.; Aalborg, Copenhagen to Amoor River, Feb. 24, 1 S., 24 W.; North land, Sunderland to Hong Kong, Feb. 26, 1 N., 22 W.; Jacoba Helena, Batavia to Rotterdam, Jan. 24, 32 S., 34 E.; Viede, Batavia to Amsterdam, Jan. 21, 34 S., 28 E.; Melrose, Amoy to London, Feb. 13, 7 S., 17 W.; Robert Morrison, Manila (?) to London, 96 days out, 29 March; Melrose, Amoy to London, April 5, 49 N., 11 W.; Iron Crown, of and for Liverpool, from Hong Kong, March 16, 21 N., 45 W.; Oasis, of and for Liverpool, from Singapore, April 6, 49 N., 16 W.; Philomela and Corea, both from London to China, March 4, 2 N., 22 W.; Verwachting (Dut.) Batavia to Amsterdam, March 16, 31 N., 38 W.; Conference, Manila to Liverpool, March 21, 26 N., 39 W.; Lady Westmoreland (?), ship, Hong Kong to Liverpool, 86 days out, Jan. 22, 35 S., 17 E.; Wilhelmine (brig), Shanghai to New York, Feb. 6, 15 S., 7 W.; Johanna Christina, Bali to Rotterdam, Feb. 8, 12 S., 10 W.; Euphrosyne, Penang to Bordeaux, Feb. 17, on the line, 22 W.

CASUALTIES.—The Solway, which arrived at Liverpool April 10, from Shanghai, had been in collision on the evening of the 7th April off Holyhead, and had bows and head gear damaged, and lost jibboom.

The Hoang Ho, from the Clyde to Singapore, was towed into Liverpool, April 10, after having been on shore on the Saltees, whilst there she knocked away a portion of her keel and made water. In attempting to dock she grounded on Pluckingbon, but got off, and was placed on King's gridiron.

COTTON.—There was a good business at Liverpool on the 9th at rather dearer prices. The sales were 15,000 bales, including 8,000 for speculation and export. Among the list we note 7000 China at 16¾d. to 19¼d.

The arrivals of cotton from China during the past week have been: From Shanghai, the *Rhine*, with 2,300 piculs; the *Glenhuntly*, with 4,507; the *Princess Royal*, with 7,480; and the *Solway*, with 7,172. From Hong Kong: the *Falcon*, with 3,304 piculs, and *Light of the Age* with 4,108.

THE MISSIONARIES IN PEKING.

(To the Editor of the *Patriot*.)

PEKING, Jan. 5, 1864.

SIR,—We are enjoying the calm, cold, sunshiny weather of a Peking winter. The water in the streams is all ice, and the thermometer at night ranges between 18 deg. and zero, while by day it ascends to from 30 deg. to 45 deg. The cold, however, is not intensified by penetrating winds, and the sun, day after day, traverses a cloudless ether. The broad and lofty windows of the Pekingese houses are well fortified against the entrance of cold, by being papered with Corean paper, manufactured from the bark of a tree. If care is also taken to close up slits and crannies of doors and windows, water in houses is scarcely ever frozen, while outside all surface-water remains solid through the winter.

Last night, at our monthly meeting for conference and prayer, eight missionaries were present. The conductor of the meeting proposed that we should discuss the difficulties to be apprehended in the spread of the Gospel in Peking. One thought our danger was from the Catholics, who are numerous in Peking, are patronised by the French Government, and are assisted in their endowment and building schemes by French national money. Some fear was expressed that they may interfere with us by exerting an unfavourable influence in unexpected quarters. To others it appeared more likely that the Lama hierarchy would become alarmed if their system were publicly attacked, and books published speaking disrespectfully of Buddhism. To others it seemed most likely that the Government or the high Manchus will become extremely jealous, should they find conversions taking place among the resident Manchus. There are already indications that among the large Manchu population using the Chinese language, the teaching of Christianity will be favourably listened to by individuals. They are supported by State funds, and have much leisure time, without sufficient fondness for literary pursuits to advance themselves by the force of their own abilities.

The number of respectable Chinese and Manchu residents having leisure enough to give them the opportunity to study a new religion is very great, and much of our hope rests on them. But they are timid, and, like Nicodemus, prefer to come to us by night. A good scholar lately visited an American missionary, expressing his great pleasure in becoming acquainted with foreign men of learning. He would like much to meet them frequently, but he requested that his visits might not be returned. If a foreigner entered his house, Prince Kung himself might hear of it, and the sensation among all his neighbours would be immense.

I wished to ask some questions on Chinese ancient geography of some scholars attached to the office where the affairs of foreign nations are transacted. Dr. Martin, who has been promised liberal assistance by the Chinese Government in the preparation and publication of a translated treatise on international law, kindly undertook to introduce me. Four literary men at the office attend him there daily to aid in giving his translation the necessary native polish and finish in regard to style. These men told him that it would be needful for them to receive from him a written request, which must be shown to a Cabinet Minister. After this was done, if there were no objection, I could be introduced. The approval was given, and I went accordingly at an appointed hour, and conversed with these scholars pleasantly for an hour and a half on various literary subjects. They are well instructed and sharp-witted men. They gave me the names of the best recent works for the study of Chinese ancient geography, and some facts about the recent change in the course of the Yellow River. This river has broken out of its channel at three points, and its waters are now spreading themselves over many parts of the province of Shantung, sometimes covering fields which once smiled with the rich products of an industrious agriculture, and elsewhere contributing to swell small rivers into large ones, which rush with increased velocity and bulk of sediment into the already too shallow Gulf of Pechili. Meantime engineering must wait for the end of the rebellion.

I also asked them why at the imperial sacrifice to heaven a bullock is burnt whole, and not at any other of the Chinese sacrifices. One of them said it was in imitation of the ancient Emperor Shun, who, at the beginning of the national history, also burnt a bullock. Another said that at the sacrifices on the classical mountain Tai-shan, it not being convenient to ascend to the summit, the service was performed half-way up. The bullock used to be burnt in order that the smoke and flame might reach the top. I told them that I thought there was in this custom a vestige of the primitive patriarchal religion of the world, and that the idea of the burnt sacrifice was that of the remission of sin, this circumstance becoming lost in China through the lapse of time and the influence of a different culture. This they did not believe, they said. The burnt sacrifice could not be intended for the remission of sins. It would have been imprudent to engage with such persons, in such a place, in a theological controversy, and I referred them to Dr. Martin, who, during his frequent intercourse with them, might have opportunities of explaining this remarkable circumstance, that burnt sacrifices should have continued in China for four thousand years as a part of the imperial religion exclusively, without their object and meaning being properly understood.—I remain, Sir, yours very truly,

JOSEPH EDKINS.

THE PERSIAN GULF CABLE.

The following is from the *Times of India*:—

So far as the work has gone, it may be pronounced a complete success; communication between Bombay and the farthest end of the cable is

Digitized by Google

uninterrupted, and much important business connected with the expedition is daily transacted through it. If things only go on as they have begun, less than three months will see messages passing, with almost electric speed, from London to Calcutta; we say, almost, for the recent disturbances among the Arabs in Mesopotamia, when they ill-used some Europeans connected with the work, will probably render it necessary, for a time, to employ messengers across part of that district, though there is every reason to hope that next year all difficulties, even in that wild region, may be got over by negotiation. When the Bombay Marine Steamer *Victoria* left, Colonel Stewart with his Staff, Sir Charles Bright, and Colonel Goldsmid, were just about making a hurried trip in the *Coromandel* to Bushire and Bussorah, to make arrangements for the stations to be established at those points, and facilitate the arrangements in Mesopotamia; by the time they return to Mussundem they will probably find the *Tweed* and *Assaye* with further sections of the cable awaiting them. If so, and the weather be even tolerably favourable, ten days would see the end of the cable in the Euphrates.

SEA WAGES.—THE "HEROES OF ALMA."

Captain Grove Price Lees, the master of the ship *Heroes of Alma*, from Shanghai, appeared before Mr. Paget to answer a claim for wages made by a seaman named Spers Feniga, who sued for a balance of £16. 13s. 5d.

Mr. Young appeared for the complainant, who had been imprisoned at Shanghai for six weeks, by order of the British Consul, for neglect of duty. A charge of £5. 8s. 6d. was made by the captain for the expenses he had incurred in respect to the imprisonment. It was contended by Mr. Young that the charge could not be sustained, because the particulars did not appear in the account of wages rendered, in accordance with the 171st sec. of the Merchant Shipping Act, also, the 251st section of the Merchant shipping Act enacted, "that whenever, in any proceeding relating to seamen's wages, it is shown that any seaman or apprentice has in the course of the voyage been convicted of any offence by any competent tribunal, and rightfully punished therefor by imprisonment or otherwise, the court hearing the case may direct a part of the wages due to such seaman, not exceeding £3, to be applied in reimbursing any costs incurred by the master in procuring such conviction and punishment." There was no conviction by a competent tribunal in this case. The British Consuls at foreign ports were not clothed with authority to send seamen to prison.

The defendant said the Consul at Hong Kong committed a seaman to prison for six months for some offence.

Mr. Young: Hong Kong is a British settlement, with a regular staff of English officials there.

The defendant said he had to pay for the maintenance of the complainant in prison.

Mr. Young said the complainant must have been maintained if he had been out of prison. He contended that the Consul had exceeded the powers entrusted to him by the 168th clause of the Merchant Shipping Act.

Mr. Paget said no Consul had any power to imprison any seaman in a foreign port; there had been no legal conviction. An action for false imprisonment might be maintained against the Consul, or captain, or both. The expenses could not be charged to the seaman under the 251st section. He ordered the whole of the wages, £16. 13s. 5d., to be paid, with one guinea costs.

THE AGRA BANK.

THE thirtieth annual meeting of this bank was held at the offices in Cannon-street, on the 2nd inst., when the report, which we noticed in our last, was unanimously agreed on. The dividend on this occasion has been increased to £18 per cent. It is proposed to alter the name of the bank to the "Agra and London Bank," and it was announced that premises had been secured in a more central position—viz., at the corner of Lombard-street and Gracechurch-street. This has been found necessary owing to the large increase of the London business. The balance-sheet, &c., will be found in another column. The Chairman, Mr. G. G. Macpherson, with his usual ability and candour, made the following statement of the affairs of the institution, from which it is quite apparent that the Board are determined to exercise prudence in the days of prosperity. In the days of adversity we are all cautious. We hope, however, the year is far distant that will show how wise this course is. If an institution of this sort divided every shilling of profits, it would certainly not be in a position to stand times of panic, such as occurred only a few months since in India, without heavy sacrifices.

The CHAIRMAN said before proceeding to move the adoption of the report, he would offer some observations with the view of affording information upon the matters referred to in that document, and of acquainting the proprietors with the views of the board as to the general conduct of the large and very important concern committed to their charge. In the first place he had to congratulate the proprietors—and did so in all sincerity—upon the great and marked progress that the Agra Bank had made, and was daily continuing to make, in public estimation, as evinced by the increase of its deposits and its current accounts, and by the large accession of excellent business that it had acquired both at home and abroad, resulting, after making ample provision for all bad and doubtful debts, in a gross profit of the large sum of £496.652, or very nearly one-half of the paid up capital of the bank, and, after deducting interest paid on the deposits and current accounts, and defraying expenses of every description, yielding a net profit or available surplus of no less a sum than £242,909 on the year's transactions—(hear, hear) - a result so unprecedented, and he might truly say so splendid, that it could not fail to be most satisfactory to the proprietors and to every friend and well-wisher of the Agra Bank upon this its thirtieth anniversary. (Hear, hear.) He need scarcely inform the meeting that such a result could not be attained without great attention, vigilance, and sound judgment on the part of the directors in the performance of their important and responsible duties; but he should fail in his duty, and in doing justice to others, if he did not avail himself of this opportunity of acknowledging how much was due to the untiring, unceasing, and most efficient labour of their excellent general and London managers—(cheers)—aided by the cordial co-operation of those abroad, and the well working of the whole establishment both at home and abroad. (Hear, hear.)

The directors, to mark the high sense they entertain of the value of such services, and as a stimulus for the future, had followed the example of other great similar institutions by specially recognising the services of the principal managers, and granting a gratuity of 10 per cent. on the salaries of all the *employes* of the bank, feeling confident that all the proprietors would highly approve of the course the board had adopted. (Cheers.) He now came to the application of their net profits, which amounted to something over 24 per cent. on the paid-up capital. From this there had been paid during the year in dividends and bonus the sum of £180,000, besides Income-tax—very nearly one-fifth of the capital. (Cheers.) There had been repaid to the reserve fund the amount taken from it last year—£7,341—and there had been added, moreover, to that fund the sum of £25,000, which now stood at £225,000. He had heard, he confessed with surprise, that some of their friends took exception to what they termed this large addition to the reserve fund, and maintained that they understood it was determined that the amount was to be limited to £200,000. He, however, could trace no record of any such understanding; on the contrary, his worthy predecessor in the chair, when the subject was mooted in 1860, stated, with his usual prudence and caution, that he himself was in favour of a larger sum, but for the present he was contented with £200,000. (Hear.) At that time, their liabilities, as shown by the balance-sheet, were under £3,000,000, but they were now over £10,000,000, consequently no prudent man at all conversant with banking business could for a moment doubt the propriety—nay, the absolute necessity—for the step the board had thus taken, both for their security and to deserve and maintain the confidence of the public. (Hear, hear.)

It must not be forgotten that the past year had been, notwithstanding the many new concerns that had sprung up, and consequent great competition, perhaps the most remunerative and prosperous ever known for banking. This had been exemplified in their own case; but they could not expect such good fortune always to attend them, nor to realise such large profits. On the contrary, they must expect to incur losses, and, like prudent and honourable men, they must be prepared to meet those losses without difficulty when they did occur. (Hear, hear.)

The next item which required remark was the amount set aside for building fund—viz., £15,000, which was quite indispensable, for the reasons stated in the report. They had staved off this expense longer, perhaps, than was consistent with the position of the bank, but it must now be incurred. They did not consider themselves justified in taking the amount from capital account, and it would be very unwise to trust to profits that had yet to be made. The last item requiring notice was the amount—£5,000—set aside to superannuation fund. Proprietors were aware that by clause 55 of the deed, the officers of the bank, after long and meritorious services, had a claim on the bank for a portion of their salaries—proprietors had already sanctioned annuities under this clause, and would it was probable be ere long called upon to sanction others. The directors, therefore, were bound to provide that this fund should be in a condition to meet all legitimate claims upon it, and this could only be done by adding to it such sums as could be spared in prosperous years.

The only change that had taken place in the establishments abroad was the closing of the Umritzur branch. They found that after the opening of the railroad between Lahore and Umritzur, the whole of the important business likely to be got in that part could be just as well transacted at Lahore, and therefore it was unnecessary to keep open the Umritzur branch. He had also to report that, in order to ensure complete supervision over their numerous branches, the directors had secured the services of a gentleman, who, from position and experience, was thoroughly qualified to perform the important duties of inspector. (Hear, hear.)

As regards home, the immense increase of the business of the bank had rendered it absolutely necessary for the directors to obtain more extensive and central premises, and the difficulty of finding anything suitable had caused the board considerable anxiety. He was glad, however, to be able to announce that satisfactory arrangements had been made with the Fishmongers' Company for a long lease of a site at the corner of Lombard-street and Gracechurch-street, which, for a bank, he need hardly say, was, from position, the most eligible in all London. He congratulated the shareholders upon this important acquisition. Costly as land was in that locality, he was glad to say that the extensive site which the directors had secured would enable them to make arrangements by which they would have suitable premises at a moderate rental. (Hear, hear.) The shareholders were aware that the freehold of the premises now occupied by the bank was purchased some time ago, and so great has been the rise of the value of property in the City, that the directors had no doubt of being able to re-sell at a considerable profit.

He now begged to announce that, having found that the words "United Service," attached to the name of this bank, misled the public in regard to the business transacted, and considering that for several years the bank had ceased to encourage such business, the directors were of opinion that the words should be dropped, and it was their intention shortly to call a special meeting for the purpose of submitting a resolution to change the name to that of the "Agra and London Bank." In conclusion, the only subject of regret he had to announce was that they had not yet been admitted to the privileges of the clearing-house, but he trusted that ere long those who from some short-sighted policy objected to their admission, would see that, in performing a simple act of justice towards the bank, they would conduce largely to their own convenience and that of the City banking community. (Hear, hear.)

Digitized by Google

Mr. Alderman FINNIS, having referred in eulogistic terms to the zeal and ability of their worthy chairman, submitted a notice of motion to the effect that the salary of the chairman should be increased to £1,000. He said it was most important that constituents of the bank should always be able to communicate with the same gentleman, and the shareholders could not expect anyone to undertake the responsible duties of governor, and to attend daily at the bank, unless a fitting remuneration were attached to the office. (Hear, hear.)

Upon the proposition of Colonel MACGEORGE, seconded by Mr. EDMUND WILMOT, it was unanimously resolved:—"That the thanks of the shareholders be given to the board of directors for their careful control of the bank's affairs; to the general manager (Mr. Mackintosh Balfour), to the London manager (Mr. William Shipman), and to the local committees, and managers of the branches, for the satisfactory manner in which they have conducted the business of the bank for the past year; and to the auditors, for their efficient supervision of the accounts."

BREACH OF PROMISE.

(Before Mr. Justice WILLES and a Special Jury.)

ROWLINSON v. GORDON.

Mr. Temple, Q.C., and Mr. T. Jones were counsel for the plaintiff; the Hon. A. Liddell, Q.C., and Mr. John Henderson were for the defendant.

This, which was an action of breach of promise of marriage, created more than ordinary interest on account of the position of the parties and the largeness of the damages claimed. The plaintiff was Miss Eliza Blanche Rowlinson, the daughter of Mr. Richard Rowlinson, of Liverpool, a retired indigo broker; and the defendant was Mr. William Alexander Grant Gordon, the son of Captain Gordon, of Nairn, near Glasgow. The defendant is now 25 years old, and had formerly been a clerk in the firm of Lloyd, Matheson, and Co., of Liverpool, teabrokers, and in 1858 he had gone out to China, to be in the employment of Jardine, Matheson, and Co., at Shanghai, in which position he remained until June, 1861, when he left to go to Hankow, under an engagement with Mackellar and Co., a firm in which he ultimately became a partner. These employments proved of very considerable profit to him, and at the time of his engagement to the plaintiff he declared that he was in the receipt of £1,100 a year, and had saved a sum of £3,000, since his arrival in China. The plaintiff is 24 years old, and reported to be a very engaging young lady in appearance. It appeared that the plaintiff and defendant had been in the habit of meeting in their walks and from time to time in Liverpool, and had become intimate for some time previous to the defendant's departure for China, but the defendant did not appear to have become acquainted with the plaintiff's family beyond herself and her sisters, and Mr. Rowlinson admitted at the trial that he scarcely knew him and had never invited him to his house in his life. The defendant, however, met at Shanghai a married sister (Harriet) and a brother-in-law of the plaintiff's named Tate, and whether his thoughts were drawn to the remembrance of the plaintiff through the intimacy with her sister, who very much resembled her, or in what other way, the defendant, on the 20th of June, shortly after his removal from Shanghai to Hankow, wrote the following letter to Mr. Rowlinson:—

"Hankow, June, 20, 1861.

"My dear Mr. Rowlinson,—I have no doubt you will be rather surprised at receiving a letter from one who is a comparative stranger to you, especially written on a subject such as I am about to communicate to you. However, I trust that you will excuse the liberty I take, and I sincerely hope I may obtain your sanction to what I am going to propose. I dare say you already know that while I lived in Liverpool I had frequently the pleasure of seeing your daughters, and I have long been deeply attached to Blanche, although my circumstances and position in Liverpool prevented my making those proposals to her which I would willingly have done, had I felt that I had the means of placing her in the position she ought to hold. Knowing that I did not possess the means, I refrained from openly making my feelings known to her, especially as my position in China I felt would at first be a subordinate one. I have now left my former employers, and have obtained an excellent appointment, with every prospect of success, and my object in writing to you now is to ask your permission to pay my addresses to your daughter, without obtaining which I feel it would be wrong in me so to do. I will now mention to you my circumstances, &c., and I fervently hope you will not withhold your consent from me, although I am a poor man and without any expectations from my friends, as my father, an old soldier, has a large family and is by no means wealthy. I am, therefore, entirely dependent on my own endeavours, which, you may rest assured, should I obtain the hand of your daughter, would be redoubled in order to maintain her in the position she would deserve. My present income is equivalent to £1,100 a year, with the promise of a partnership in two years from this date in a business the prospects of which are very good and encouraging. In order to provide for your daughter in the event of my death, I would be very glad to insure my life for what amount you might consider advisable to be settled on her. Believe me, should you confide her to my care, her happiness would be my sole aim through life. With regard to my relations, they are all soldiers, my father being a very old one, and all my brothers being in the Indian armies. As to my own character, I hope your son-in-law in Shanghai, with whom I am very intimate, and who has promised to write to you on my behalf, may satisfy you, as also Mrs. Tate, to whom I have told my intentions. I inclose a letter for Blanche, which, should you give me your sanction, I would be very much obliged by your giving to her. Otherwise please to return it to me. I would now conclude, and sincerely and anxiously hoping for a favourable reply from you, believe me my dear Mr. Rowlinson, yours very sincerely, "W. G. GORDON."

To this letter Mr. Rowlinson wrote a reply stating his surprise at the communication it contained, but giving his assent to the match proposed for his daughter, and he handed to the latter the letter of the plaintiff to her, inclosed in that to himself, and which was as follows:—

Hankow, June 22, 1861.

"My dearest Blanche,—Will you be very much astonished at receiving a note from me? I think not, as I fancy you knew not how fond of you I was in Liverpool, although I dare not then, in the position I was in, say to you what I should much have liked to do, and which I am now going to do. Blanche, dearest, I have loved you long, very long, and have only waited until I was in a position to make you comfortable to declare my love for you. Can I hope that it is reciprocal? If so, I shall be the happiest man alive; for, believe me, my aim since I came to China has always been to be able to write to you as I am now doing. Blanche, darling, will you share my lot with me, will you be contented to come out to a wretched place like this, to put up with all sorts of discomforts, without even great wealth to induce you? If your love to me, dearest, is such as would lead you to do this, then we shall be truly happy; and I think where true love is many of the troubles that would otherwise exist turn out not so formidable after all, and riches are not essential to happiness by any means. Can I venture to hope, my Blanche, that you think as I do? If you do, I trust we shall soon, very soon, be happy as the day is long together, and you may be sure your happiness, dearest, will be my sole aim through life. Believe me, I shall count the days until I receive an answer from you, as I feel it will be better for me not to write to you, darling, until it arrives, much as I should like to do so. I have written to your papa, to whom I enclose this, asking him to give it to you, my Blanche, should he approve of me as a son-in-law; and I have also asked Mrs. Tate, as well as Tate, to write to him on my behalf, and I sincerely trust that I may obtain his sanction, and then, dearest, it will only be for me to obtain your love to make me happy. Did you never think, Blanche, that I was very fond of you in Liverpool? I can assure you I was, and often have I thought of those happy days since I came to China. I confessed all my secrets to Mrs. Tate before I left Shanghai a week ago, and I hope she will give you a good account of me, and tell you that I am not much changed from the Willie Gordon of Huskisson-street. Oh! Blanche, darling, you cannot fancy what anxiety I feel as to the result of your answer, but I live in hope. Every morning I see your happy, jolly little face smiling at me from a photograph Mrs. Tate gave me in Shanghai, and I frequently hope that, ere many months elapse, I may have the original to love and to keep me in order. Blanche, dearest, I am now in a miserable place, as it is only within the last few months that English people have come here, but by this time next year I have no doubt we shall have very fair houses, and then it is, darling, that I should like to see you here; and Tate has kindly said that he will be only too glad to have you with them for a short time, when I should go to Shanghai for you. I am now living in a regular Chinese house, with pigs, fowls, &c., all about me, but as it is only for a short time, I must not complain. There are already two ladies here, and I hope before you come out, dearest, as I trust you will, there will be several others to keep you company. With regard to my means, the wretched money, Blanche, dearest, although I have no fortune, still I have an income of £1,100 a-year, and very good prospects of future success, which is quite enough and ample to keep us comfortable if we are not too extravagant, which I do not think we are. I have written to your papa about these subjects, as I do not think, darling, if you truly love me, you will think much of these matters. Any other small things as to your coming out I can very easily arrange. I was so sorry leaving Shanghai, where your sister and old Tate were so kind to me. However, she has promised to write to me often, and when you come out, dear (you see I cannot help thinking of it), we shall have them up here to pay us a visit, and then we shall be so jolly together. I wish I could write to you by every mail, but Tate says it is better not, darling, until I hear from you, so I must try and refrain from doing so, and do, Blanche dear, answer this letter by the very first mail, as you know how I shall long for your reply. And now, my own darling, I must finish my letter, as the steamer is just about to leave; so with fondest and best love to you, and fervently hoping that the return mail may bring me good news from you, ever believe me, my dearest Blanche, yours very loving,

"WILLIE GORDON."

In answer to this the defendant received the kind of reply he desired in the following terms:—

"90, Crown-street, Sept. 7, 1861.

"My own darling Willie,—I must say I was a little surprised when I received your letter, for I really began to think you had forgotten your little Blanche. I used to flatter myself you cared a little for me in Liverpool, and I did really love you, my own; but when you went away I could not help thinking you would forget me, and I tried to persuade myself that you really never had cared for me at all. However, now all doubts are at an end, and I trust, my own darling, you may never have cause to repent your choice. Oh! what an age it will seem until I hear from you again, and what a long time until I see you. Please let me come soon, for I don't care what sort of a place it is; if it is good enough for you, my Willie, it is good enough for me. Of course, I shall be very sorry to leave dear papa and all my dear friends, but it will be just the same sooner as later. If I only had wings would not I fly in a minute to you, my own darling? But, as I have not, I must try and wait patiently until I hear from you again. I hope, darling, Harrie has told you what a very naughty child I am, for sometimes I am very naughty, and I don't wish you to be disappointed, so I must tell you myself; but I will try and be very good, for your sake, and you can help me, for I am sure you are very good, are you not, my own darling Willie? I am sure you will be tired of reading such a silly letter, but I am a very bad letter writer; I keep asking such foolish questions and bothering you so; but you must try and excuse me, won't you, darling? I wish I had your likeness. Tom promised to give me one, but I suppose he has forgotten. Please write and tell him he must give me one. I am sure the likeness Harrie has given you of me must be a fright, for I remember she had not got one good one of me. I make a horrid likeness, but I shall send you one I had taken the other day. I don't know anything about money, but £1,000 a-year seems to me an enormous quantity. However, I know I am not extravagant at all, whatever my other faults may be. You must be perfection from Harrie's and Joe's accounts. In fact, I used to feel quite jealous when Harrie used to tell me what nice walks you took together. You see what a silly little thing I am. Can you really love such a foolish child? Oh! Willie, my darling, my prayer night and morning is that I may make you as good a wife as you deserve. . . . I remember everything so well, how we used to walk round and round the Falkner gardens, and what scoldings I used to get for stopping out so late. Don't you remember how I used to bother you

Digitized by Google

about a little face you used to have in a breastpin, and you used to say it was your niece's likeness, and how you used to teaze poor Mr. —— until his face was scarlet? Oh, dear! those were very happy days; but never mind, we shall have plenty more soon—shall not we, my darling boy? I wish I might come now, this very minute, to you—but not to keep you in order. I am sure you don't want that. Oh! I do hope you won't be disappointed when you see me, for it would break my heart if I thought you would be. Kind Willie, my pet, I am not nearly so pretty as dear Harrie, so don't you expect to see a pretty girl. I know Harrie has a trick of praising me up to people, and when they see me they are disappointed. Joe Tate hates letters crossed, and perhaps you do too, so perhaps I had better stop. Hoping this will find you quite well, I remain, my darling Willie, your own loving "BLANCHE.

"P.S.—They all send their best love to you. God bless you my Willie."

There was a very voluminous correspondence between the defendant and Miss Rowlinson for a long time couched in the same affectionate strain, which need not be given further. In the immediate answer to the letter of Miss Rowlinson just referred to, dated Hankow, 14th of November, 1861, the defendant commenced—"You do not know what joy I felt when last evening your loving and long, long-waited-for letter reached me, although I think you may fancy my happiness when I read it, and now I can call you my own darling wife," and proceeded to express his regret that as the steamer was on the point of leaving he could only write "three lines." If these had not been, as the learned counsel said, "lover's line's" we could have embodied them in our report, but they are too extended to give. They expressed, however, an intention to set about getting things ready at once, and to have his lover over the moment that he could, and his satisfaction at the consent of her father in the following words:—"I had such a nice letter from your dear old father, giving us all his sanction and best wishes. It is so nice to think that we have the consent of our parents." He also promised to send home his photograph to her, and hoped that she would not be disappointed when she "saw her Willie a great big-whiskered boy, in place of poor shy Willie of Huskisson-street," and declared with regard to her beauty that it was not her "sweet little phiz" he looked to, but her kind little heart and winning way that made him love her. He subsequently expressed a hope that she would be enabled to come out to an English settlement that was in contemplation to be established within a year, and that the following Christmas they might have a "jolly party" in their own house there, the one then at hand being the last of his bachelor Christmas-days. As soon as he got his own house built in the settlement she was to come and join him, and he hoped that, possibly, even by August things might be got sufficiently ready. Subsequently to that he mentioned the escort of a particular lady who was coming out in October as a very desirable opportunity, and that he was picking up furniture by degrees to start their housekeeping with. He told her that he had written to Mrs. Tate to send home a list of things to form Miss Rowlinson's outfit, and he hoped that it would include some black silk dresses which he mentioned as striking him as particularly becoming. He also wrote, "Here everyone knows I am going to be married, and I am chaffed on every occasion, which, however, I rather like, considering the little darling I am chaffed about." In a letter of the 12th of May, 1862, he wrote, "You will be very glad to hear that I have been most fortunate in China. I have laid by the nice little sum of £3,000 to settle on you, darling; besides which I shall be made a partner very soon, which will give us another addition to our income," and the postscript to that letter was, "Only fancy, six months more and we shall be married, I hope!"

THE CHANGE O'ER THE SPIRIT OF THE DREAM.

In the very next letter, however, which was only written eight days later on the 20th of the month, the defendant began thus:—"I do not know wha you will say when you read this letter, and find that you are not coming out in October. Well, dearest, there are several things that prevent it. First of all, my father and mother are in a dreadful state about my marriage, and will not hear of it. Well, this has first of all to be got over. Then, again, there are several other difficulties in the way, so that altogether it is, I think, better that we postpone the marriage a little, as I have quite made up my mind to take a run home as soon as I possibly can. Believe me, Blanche dearest, I am quite as grieved about it as you can be, but you know well that no good ever came of marriages made against the consent of our parents." He subsequently got rapidly briefer and less affectionate in his tone to the plaintiff, and eventually broke the match off in a letter to her father of the 15th of December, on the ground of the dissent of his parents, and of his discovering from the correspondence that there never could be that "congeniality of feeling between them which ought to exist between man and wife."

This was the case which Mr. Temple laid before the jury with great emphasis, and occasionally, when reading passages from the correspondence, with considerable emotion, as one, whether considering the loss and grief of the plaintiff, or the conduct or resources of the defendant, demanding large damages. In support of this claim he laid peculiar stress on the disgraceful excuse of want of consent on the part of his parents, when the defendant had expressly congratulated himself and the plaintiff on having the sanction of their parents to their match.

The only witness called was Mr. Rowlinson, the plaintiff's father, to produce the letters.

In cross-examination, by Mr. Liddell, he said that he was living in Crown-street, near Falkland-square, and that he had not himself gone out to parties since his wife's death, some years ago. His daughter had gone out to balls and into society in Liverpool after the defendant's departure from England, as she did before, and a gentleman had applied to him to be allowed to pay his addresses to her before the defendant's offer, but he found the acquaintance undesirable, and it was broken off by himself, the father, and not by his daughter. He had sent her to London and into society, as far as possible, since the letter of December of 1862, in order to divert her attention and afford her amusement, and he said that she now loathed the defendant, since he had cast aspersions on her character, and that he himself would rather see her in her grave than married to him. If he had his way, he would publish all the defendant's letters in China, and put him beyond the pale of respectable society.

Mr. Temple then again briefly addressed the jury with great force and continued emotion, and concluded by quoting, with reference to the suggested gaiety of Miss Rowlinson at Liverpool and elsewhere, the lines—

"From place to place they hurry me,
To banish my regret;
And when they win a smile from me,
They think that I forget."

Then Mr. Liddell, in rising to address the jury on behalf of the defendant, said that when he had recovered from the poetry and pathos of his learned friend, which made him, like Niobe, all tears, he would address himself, and very briefly, to the case before them. He admitted, of course, that the plaintiff must have a verdict, and what he, as counsel, had to do was to turn their attention dispassionately to the question of damages. The defendant was twenty-five only, and he had as much right to state it as his friend to state that he was twenty-seven, which he had not proved, and was not the fact, and the intercourse between him and the plaintiff took place in 1858, when he, therefore, was nineteen, and the young lady was eighteen. They were then, therefore, merely boy and girl, and the intercourse was between them as such only, and had been interrupted for several years, so that they never had had an opportunity of becoming acquainted with each other's principles and characters, and of monopolising each others sympathies and affections, about all of which his friend had been so eloquent. In 1858 the defendant had gone out to Hankow, "and a nice place that must be;" and what had the plaintiff lost in being disappointed in going out there and dwelling "among pigs and pigtails," or in her affections and hopes being interfered with by a lover who had been so far off for so long a time? "Oh, but," said his learned friend, in that beautifully tremulous voice which would almost lead one to suppose that he was making love himself, "the love professed and inspired by the defendant was of that kind, and it was made the subject of emphatic congratulation by the defendant that it was sanctioned 'by their parents.'"

Now, he would refer to the letters, and as his friend had picked out the tit-bits which suited his purpose, he would do the same with regard to some that suited his. With reference to this matter of the sanction of the parents, of which his friend had talked solemnly for half an hour, and to the general tenor of the correspondence and character of intercourse between them, the jury would find in the passage read by Mr. Temple so decorously that the defendant had introduced an "i" into parents, and the passage in the original letter stood, "I had such a nice letter from your dear old father giving us all his sanction and best wishes; it is so nice to think that we have the full sanction of our 'parients.'" In another letter, in order to show the real nature of the relationship between them, the defendant wrote:—"I was stopped in the middle of writing last night by Captain Poole, of the gunboat, coming in to pay me a visit. I think you will like him, Blanche dear, he is such an amusing fellow. He pulled me out with him to call for another man, who happened to be out; so we immediately got the bolsters and pillows from his bed, his great coat, inexpressibles, boots, hat, &c., and made a figure with them, and placed it in the armchair before the fire, and we waited the arrival of the owner of the diggings, as we say in China. He came in and really thought it was some fellow fallen asleep, and began tapping him on the hat with his stick, which having no effect, he took the hat off, much to our amusement, as we were hiding outside."

That was the letter of a boy, like the other correspondence, and that was the key to the real relationship of these two young people. They had never met each other in society, or even within Mr. Rowlinson's house, nor ever beyond walks in the Liverpool-square, and the defendant had not been in England since 1858 till last December, when he was served with the writ three weeks after setting his foot on shore. Their whole intercourse was that, therefore, of boy and girl, without the involvement of the principles and affections of which his friend had talked. Dismissing what he might call the "mercantile part" of this case with a very few words, what damages would the jury give for this boyish indiscretion? With the task of apportioning of damages to a lady's disappointment in losing a husband, the learned counsel said men very often found it very difficult to deal, and he often wished that they could transport some of the ladies who were accustomed to take their places on one side of the court into the jury box on the other, so that they might be enabled to have a sort of jury of half-and-half, selected *de medietate*, which would then be able to come to a thoroughly satisfactory conclusion in these matters. Their bias would probably be at first greatly against the defendant.

Here his Lordship interposed, and said, amid much laughter, that they would probably ask to see the defendant before giving way to their bias.

Mr. Liddell acknowledged that might be possible, but, he asked, what damages would a female jury give for the supposed outrage upon such juvenile affections as were disclosed here? What would the jury themselves give? The defendant cast no aspersions on the young lady whatever, and he had committed a youthful indiscretion, for which he must pay something. On the other hand, he had behaved perfectly honourably and delicately. He had returned all the letters and portraits, wishing them to be sacredly delivered to the plaintiff, and from him she had suffered no injury to her delicacy, and she might hope for another husband and a happy match at any time. He had, moreover, done the right and the only thing under the circumstances; and, finding he had committed a boyish error, and mistaken his own feelings, he wrote to tell the truth, and confess the uncongeniality on account of which he must break off the engagement. What would the jury make him pay for that? If one of their own boys, entering life in the army, or the law, or what not, fell in love with and promised to marry a young lady who turned out not congenial, and he came and confessed it to his father, would the father say, "You must go on with it; you must marry, happiness or no happiness, you must keep your promise, for if you don't you'll have to pay damages?" or would he say to him, "You have acted honourably to tell the truth and confess your real feeling, and come to me. I'll see you through it, and I don't believe there's a jury in the country will give heavy damages against you?"

This concluded the learned counsel's powerful and humorous speech, and his lordship then proceeding to sum up, and to applaud the manner in which the defendant's case had been conducted. The jury, after a short consultation, returned a verdict for the plaintiff, with £750 damages.

LONDON, WEDNESDAY, APRIL 13, 1864.

INCREASE OF CRIME AND LAWLESSNESS IN SHANGHAI.

ACCOUNTS from Shanghai continue to report an increased state of lawlessness and prevalence of crime in and around that important foreign settlement on Chinese soil. It would appear that as the rebellion becomes subdued in its vicinity, the foreign adventurers and discontented natives who found profitable occupation in their intercourse with the Taipings, are now thrown adrift on society, preying upon the wealthy and industrious inhabitants, imbuing their hands with blood. This may be considered the necessary consequence of internecine wars in all countries during their transition state, before peace has restored person and property to their normal state of security. At the present time we have evidence of a similar condition of affairs in Italy since the war of independence, where brigandage of the worst character has prevailed; and, be it observed, Europeans have committed crimes upon unoffending victims surpassing in brutality the horrible tortures of the Chinese. It will readily be supposed that if there is a difficulty in suppressing lawless bands in Europe, where a strong and active Government exists, how much more so it must be in China under weak and sluggish rulers, and especially in Shanghai, where a heterogeneous foreign element exists in the body politic without a proper governing power. According to treaty, all Chinese criminals captured by the foreign police or troops are handed over to the native authorities for punishment, and foreign criminals to their respective Consuls. The former, if not actually destitute of means or friends, can easily purchase their freedom after conviction from the venal officials, while the latter rarely meet with punishment beyond a fine; so that, on the whole, the majority of criminals escape the pains and penalties of the law from the ineffectual administration of justice. In making these remarks we do not wish to reflect upon the *personnel* of any Consular establishment in Shanghai, but simply to point out the system as insufficient for the ends of justice and good government. As far as the British Consulate is concerned, it is a matter of impossibility for any Consul with his assistants to get through the multifarious and overwhelming business that comes to his office. We do not exaggerate when we assert that more cases are adjudicated in his court, criminal and civil, than at Hong Kong, where there is a Chief Justice and judicial establishment on an imperial scale. The fact is every day becoming more apparent, that it is time this consular system of judicature be superseded by a regular court of justice, with competent judges, having jurisdiction over every person, native and foreign, within the limits of Shanghai settlement. We have a striking example of the insufficiency of this red-tape system to meet the exigencies that arise in mixed communities on a foreign soil, at the present time in Alexandria, where the correspondent of *The Times* informs us that "the European Consulates are literally attracting and protecting bands of ruffians, who could not exist under a proper "system of control." "Under this system it is unfortunately "too true that evildoers, the refuse of Europe, who are unable "to live in their own countries, here revel in perfect lawlessness, the scourge and terror of all honest and peaceful men."

In like manner Shanghai has become the receptacle of all the vagabondism, indigenous and exotic, in the Far East.

This growing evil in that flourishing settlement was foreseen and commented on by the local press during the influx of refugees and adventurers at the height of the rebellion, and the community seriously discussed the vital question of how to provide for the better government of the place. Various opinions and views were brought forward, among which was a suggestion for the formation of an "International Council" to deliberate upon general measures affecting the foreign community, which we are glad to observe has been adopted in principle by the Consuls of all the Treaty Powers assembling frequently and passing resolutions for the protection of peaceable residents and the conservation of equitable maritime and commercial laws. This is a step in the right direction, and may form the basis of a properly constituted Executive and Legislature. All that is necessary to come to an understanding on this point is the sanction of the several Governments who have accredited Ministers in China, to give it effect. Unfortunately the views of Sir FREDERICK BRUCE, Her MAJESTY'S Minister at Peking, were rather against than for granting an independent and central government at Shanghai, at the time of the above-mentioned discussion, which checked the action of the Land renters and the Defence committee to form a council for general purposes, leaving the construction of public works, maintenance of roads, and police management, to the Municipal Council. It is to be hoped that the views of the British Minister are considerably modified and enlarged on this question, and that in unison with his colleagues at Peking, a consolidated administration may be formed with legislative powers. Now that Sir HARRY PARKES has returned to China as Consul-General for England, with his head-quarters at Shanghai, he will, we trust, prove an able exponent to the home Government and the Minister on this unsatisfactory state of affairs, he will doubtless remedy them with his usual tact.

That something ought to be done, and speedily, is agreed on all hands, the great difficulty is to know in what manner to proceed. Might it not be a judicious and effective movement on the part of the influential merchants and others in London to form a deputation on the subject to Earl RUSSELL, who might thereby be induced to lend his powerful aid in promoting the object in view; or, at all events, eliciting from him the opinion of Her MAJESTY'S Ministers on the point. The great drawback hitherto, among the representatives of foreign Powers at Shanghai, preventing united action, has been the limited powers transmitted to them by their several Governments, and the natural jealousy of one Consulate taking precedence of another. Happily all feeling on the latter head is gradually giving way to combination in the cause of law and order, in the Consuls having shown their appreciation of the urgency of affairs by holding deliberative meetings to discuss questions for the benefit of the community at large. It now remains with the higher powers to grant extended authority to that body so as to form a general tribunal, with an admixture of the native element and the foreign military and naval authorities for the time being to take cognizance of every case that may arise involving the rights and privileges of all subjects, native and foreign, within the jurisdiction of the settlement; together with a properly constituted court of justice for the punishment of criminals, without handing any over to the Chinese authorities. We feel confident that if England proposed a general basis for such a government, the other Powers would readily give in their adhesion. To say the least of it, the heterogeneous mode of Consular Government at the crowded and wealthy port of Shanghai, with its external trade in imports and exports of nearly forty millions sterling per annum, is not creditable to the Treaty Powers, and calls for immediate improvement.

SIR FREDERICK BRUCE'S CORRESPONDENCE.

THERE is this advantage in the often-censured delay of public offices in publishing official papers—that it admits of secondary, and, perhaps, calmer views being formed upon topics which, at the time of their first being broached, elicited heated criticisms, resulting in most prejudiced opinions being formed. Few will forget the storm of obloquy which broke upon Sir FREDERICK BRUCE'S head when it was supposed that it was owing to supineness, if not something worse, that every obstacle was thrown in the way of British gentlemen of standing and position availing themselves of the celebrated Order in Council, and leaving it optional to officers holding Her MAJESTY'S

Digitized by Google

commission to accept service under the Celestial EMPEROR without forfeiting their rank. Another instalment of correspondence between Sir F. BRUCE and the Foreign-office, noticed in our last, throws light upon this hitherto misunderstood matter. Sir F. BRUCE, as a statesman, is bound to consider not merely the present, but the future. He foresees the anomalies and complications which are pretty sure to result as the numbers of adventurers increase, flocking to the dainty prey sketched out before them. He is, of course, too diplomatic to express in direct words his utter distrust of the Chinese authorities, and his conviction that, wherever possible, they will avail themselves of the evil diplomatic talent they possess to evade or nullify their engagements with all and sundry. He quite despairs of our ever being able—at least, for a generation or two—to teach them the humanities of civilised warfare, and we all know how signally these views have been verified by recent occurrences.

But, forming the continuous groundwork of the pattern, so to speak, is the true and most justifiable statesman-like dread of our being gradually committed to enterprises of which we have but a faint notion at present. He dare not, of course, in express terms, condemn the Council Minute, especially with Mr. LAY and Capt. OSBORN, for whose behoof it may be said to have been enacted, besieging him to have their Chinese commissions drawn out in form, and countersigned by the British Ambassador. But while not very sanguine as to the prospects of either of these gentlemen—spiced, it may be, with a slight *soupcon* of jealousy as to the very prominent position this agreement was to confer on Mr. LAY, he overlooks these minor matters, which were then only just approaching the ripening point, to give the Foreign-office a solemn warning of the danger they would incur in the future by permitting a too lax interpretation to be assigned to the policy of encouraging adventurers not by any means strenuously disclaimed by the Ministry. His half-whispered warnings have received an additional confirmation by the news just received. Major GORDON, whom he was very loth from the first to permit to assume the position he did without more positive guarantee, has gone through all the phases of the mercenary soldier's career. The mercenary leaders of the middle ages, when they first appeared, were gentlemen of tried probity and untarnished honour, as well as great military skill; and many an instance is recorded of their quitting in disgust the side they had espoused when any infraction of the laws of chivalry, or derogation from the strict canons of knightly faith, was proved against their allies, nor was the breach healed till ample restitution had been made. In what does this differ from the case of Major GORDON? He took suit and service with the Imperialists; he gained battles and took cities, and then, by a lying subterfuge, his allies wrested the power out of his hands, and indulged their own devilish cruelty. He resigned; his resignation was accepted; and now by this mail comes the news that he has been reinstated. The result must be sorely to hamper Sir F. BRUCE "in his endeavours to induce the Chinese Government to "disavow the breach of faith toward the rebel Wangs at "Soo-chow," as the Shanghai *Daily Shipping List*, very properly points out. The motive of the Imperialists is obvious. Promises have no doubt been lavished by the bushel on Major GORDON to induce him to continue in command of the foreign contingent, and that gentleman has nobody's permission to ask but his own.

Now, to what does all this point? We do not for a moment suppose that this great groundwork for all the grotesque patterns of Chinese political life to be worked into has not long since attracted the earnest attention of statesmen of all shades in this country. But here, in a dry collection of Blue-books, we find a sort of essence pervading every page, subtle, and indescribable, and which leaves on the mind of a casual reader the feeling that there is a something which he cannot even gaze upon. If he turn to the political map of Asia, he will observe two of the great leading Powers advancing parallel with each other, with thousands of miles of impassable steppe between, to keep them apart till they meet on the frontiers of China. In that country he will behold a society where even the slight tie of respect for official superiority—almost the sole bond of society in past years—has crumbled to the dust before the events of the past quarter of a century. How are the two leading Powers —how are England and Russia, representing, as they do, such widely different principles of civilisation—to harmonise with each other in the policy best qualified for the maintenance of a *quasi* Imperial Government, in the fast approaching moribund attitude of the Mantchu dynasty? Were the internal administration of China other than it is, there might be some hope for a gradual transition. Had the hereditary principle ever succeeded in establishing itself in this anomalous country, we might, as we have done before, leave time's "unwearied foot" to drag us along in his "accomplished flight," till we, too, sank exhausted in the race, and left our posterity to fashion their policy for themselves. Such has been our policy in India, where it should never be forgotten that the Company of Traders always had with them, at each of their three chief stations, a small body of trained European troops.

Such has not been our experience in China. Their trade is the sole interest that has a really tangible legal existence. All our wars have been but isolated campaigns carried out for a special purpose. The soldier has not yet made his appearance; the adventurer has, and the rewards of success are such as are likely ere long to attract mercenaries in crowds. These, as we have said, are, at the outset, men of stainless honour, careful of their country's name and fame. But those who would see how long this *beau ideal* of the friend of oppressed humanity is likely to remain the type of the hordes who will surely gather to the spoil, need but read the accounts of the free companies of the later middle ages. This is the danger which, perhaps all unconsciously, modifies everyone of these despatches, and it is one which this country should face boldly: DE TOCQUEVILLE said that all modern forms of Government, even that of England, are slowly tending in the direction of democracy; but that in our country, where there were properly marked grades of society, not much damage need be done. It is in the recklessness of teeming millions suddenly let loose, each with his own crude theories, that the real danger lies. Much the same as this last sentence may be predicated of China, if we substitute "animal necessities" for "crude theories." The celebrated Scotch motto "Thou shalt want ere I want," would be the cry in China, should society be suddenly dissolved, as there is no small prospect at present, and scenes would be enacted before which all the horrors of the Taipings, or the Footai, who wrested GORDON'S authority out of his hands, would be enacted on a scale comprising one-third of the human race. All these disasters may even yet be avoided. But they can only be so by the power of the sword, used in proper hands. The time has now arrived when Chinese trade must have a legitimate and recognised support, backed by the sword of civilisation, in a firm policy.

LAUNCHES, &c., FOR THE CHINA TRADE.

The paddle-wheel steamer which we have before noticed as building for Messrs. Jardine, Matheson and Co. on the Clyde, was launched from the yard of Messrs. Denny and Co., on the 8th inst., and named the *Glengyle*. The *Dumbarton*, for Messrs. Gibb, Livingston and Co., leaves for Hong Kong on the 16th inst.

The China and Japan Steam Company's vessels *Vulcan* and *Teen Chang*, on their trial trip on the Clyde, attained a speed of about eleven knots. Their paddle-boxes have been unshipped, and other alterations made necessary for the voyage. They will be duly recorded in our shipping when they sail for China. We may mention that the agency of this company has been transferred from Messrs. W. R. Adamson and Co. to Messrs. Smith, Kennedy and Co., and Messrs. Gibb, Livingston, and Co.; and with such influential co-operation we may expect that a more prosperous career is before the company.

Messrs. A. Hall and Co. launched from their building-yard at Aberdeen a fine clipper-ship of about 700 tons register, named the *Goolwa*. This vessel is of the composite class, being framed with iron. She is the property of a London firm, and is intended for the China trade.

Messrs. Barclay, Curle, and Co. have just launched from their building-yard at Stobcross a handsome new iron sailing ship, for Messrs. George Smith and Sons. Her dimensions are 213 feet by 32½ feet by 21½ feet. Tonnage, about 1,020 tons registered. She was named the *City of Foochow*, and is intended as an addition to their fleet engaged in the East India trade.

THE ANGLO-CHINESE FLEET.

THE gunboats *Peking*, *Tien-tsin* and *China* have arrived from China. The Lords of the Admiralty will negotiate the sale of these vessels, all of which may be expected home shortly. We congratulate Captain SHERARD OSBORN on being relieved from this onerous duty. We understand that the applications for the purchase of the vessels have been very numerous, both for America and the Continent. On their realisation the Government will close the accounts with Prince KUNG.

THE STRAITS TRANSFER QUESTION.

THE report of the Commissioners' drawn up at Singapore, and which we have already announced as entirely justifying the transfer, is now before the Treasury, and we hear, on good authority, that the measure will be carried out during the present session.

FRENCH MAIL SERVICE.

WE noticed in a late issue the intended reduction of the P. and O. Company's fares. We understand that it is the intention of the French Company, *Messageries Imperiales*, to make a corresponding reduction.

Naval and Military.

The Scout, 21, screw corvette, 400-horse power, Capt. John Corbett, arrived at Spithead on the 7th of April from China, the Cape, and St. Helena, sailing from Hong Kong on the 5th of December, 1863; Cape of Good Hope, Feb. 2, 1864, and St. Helena on the 17th of February. Her news has been anticipated. She has brought from China and the Cape Lieuts. Vicary and Clarke, R.N., and 70 naval and marine invalids. The departure of the Adventure for China is not yet fixed on, as fresh cases of small-pox have occurred.

The whole of the troops now in garrison at Chatham have been reviewed by his Royal Highness the Duke of Cambridge. The troops performed the various evolutions with great precision and rapidity, and at the close of the review his Royal Highness expressed to General Eyre the satisfaction he felt in witnessing this creditable display of the drill and discipline of the garrison.

The United States' gun-vessel *Kearsage* has discharged her powder—5 tons—at the powder-buoy off Woolwich Arsenal, in charge of the shipping agent, and proceeded to the Victoria docks, to make good certain damages sustained during the late gale in the channel. She will be thoroughly overhauled, will be supplied with a new topmast, and have her bottom cleaned. She is manned at all quarters with a most formidable armament of six powerful 11-inch guns, weighing 6 tons, to carry a 200lb. shot each, so as to maintain a steady fire from every part of the ship. The *Kearsage* is last from Dover, where she was an object of much attraction and was visited by a large number of persons.

A singular fraud on the Government, and one whose long impunity seems to discredit the viligance of the military authorities at Woolwich, has lately been discovered there. Sergeant Saunders was entrusted with the duty of attesting recruits before the magistrates there, for which his legal fee was 15s 6d. each. It now turns out that a great many of the attestation papers, on which he was paid, were forged, and this had been done so often that the amount out of which the Government has been defrauded is about £1,000. Saunders was placed under close arrest, but he managed to escape, and has not since been heard of. Another non-commissioned officer is under arrest for complicity with the fraud.

By the last mail from the Cape we have advices to the 20th Feb. that the following ships were in port. Narcissus, with the flag of Rear Admiral Sir Baldwin Walker, was in Simon's Bay, as was also the Rapid, 11, screw, Commander Jago. The last named was to leave in a few days for the Mozambique. Ariel, 9, screw, Commander Chapman; Valorous, 16, paddle, Captain Forsyth; Orestes, 21, screw, Captain Alan H. Gardner; and Penguin, 5, screw, Lieutenant Commanding, E. St. J. Garforth, were on the east coast. The latter was to bring the members of the Zambesi mission and exploring party to Capetown. Conqueror, 74, screw, Captain Luard, with marines for Japan, from Plymouth, Dec. 19, arrived in Simon's Bay, Feb. 13; and on the 15th, the Wasp, 13, screw, Captain Bowden, also from Plymouth, on the 19th December, for Trincomalee. The troops on board the Conqueror were all well, excepting First-Lieut. A. Donellan and Second-Lieut. E. T. Richards, Royal Marines, both of whom have been invalided. Lieutenant Fitzgibbon, of the 10th regiment, was drowned on the night of the 13th February, in crossing the Kieskamma Drift in a cart, the driver of which was also drowned. The body of Lieut. Fitzgibbon had been recovered and buried with military honours at King Williamstown.

Staff Surgeon John Stirling, M.D., late of Her Majesty's ship St. George, has proceeded to take up his appointment as staff surgeon and medical storekeeper at the naval hospital at the Cape of Good Hope.

The position of Her Majesty's gunboat Magpie has become very dangerous. On the 3rd inst. she was on her way to Galway with supplies for the Coastguard, steaming slowly along the coast of Clare, the stupendous cliffs of which are the admiration of tourists. The weather was very hazy, and while Captain Bell went below to look at the chart and reckoning, the vessel struck upon the rocks, where she remained fast. There was no wind, but, as oftens happens on that coast, the swell of the Atlantic caused the sea to roll high, and the waves were breaking over the masts. Exertions were being made to get her off the rock, but a mighty wave came and lifted her further inland, and left her stranded as the water receded, so that when tugs arrived it was impossible for them to get near enough to be of use. After 20 hours of fruitless efforts the waves continued to dash over the stranded boat, and her keel has been nearly stripped off. There are faint hopes that she may be saved when the spring tides set in.

ADMIRALTY.—APRIL 5.

Vice-Admiral of the Blue Michael Quin has been appointed to receive a pension of £150, a-year, as provided by Her Majesty's Order in Council of the 25th of June, 1851, vacant by the death of Admiral Sir Edward Tucker, G.C.B., and the name of Vice-Admiral Quin has been removed to the Reserved Half-pay List accordingly. In consequence of that removal the following promotions, dated the 28th ult., have been made:—

Rear-Admirals Brunswick Popham, Thomas Ogle, George Evans, and John Hackett, on the Reserved List, to be Vice-Admirals on the same list

Rear-Admiral of the Red Frederick Bullock to be Vice-Admiral of the Blue.

Rear-Admiral of the White Sir Edward Belcher, Knight, C.B., to be Rear-Admiral of the Red.

Rear-Admiral of the Blue George Henry Seymour, C.B., to be Rear-Admiral of the White.

Parliamentary Intelligence.

HOUSE OF COMMONS.

TROOPS IN JAPAN.

(April 7th.) Col. SYKES rose to call attention to a recent statement in *The Times* to the effect that the 20th Regiment on its arrival at Calcutta had immediately been transferred to other transports and despatched to Japan. It would be said that the motive of this transfer of troops—of the probable consequences of which he warned the Chancellor of the Exchequer in the strongest manner—was to insist upon the fulfilment of our treaty with Japan. To that he replied that we had no treaty with the Emperor of Japan. We had a treaty with one of the princes of the empire who was called the Tycoon of Jedo, though, in fact, there was no such person as the Tycoon. The name originated in this way. When Commodore Pellew went to Japan he had with him a Cantonese interpreter, who, not knowing how to describe this prince, called him the Tycoon, which was Cantonese for a great prince. His proper title was Ziogoon, meaning Generalissimo. A gentleman who seemed to possess good sources of information, in writing to the editor of the *Japan Herald*, expressed it to be his opinion that the Tycoon's Government was the cause of the serious difficulties with which we had to contend in that quarter, adding that the result of the relations which had been established with Japan was, that in the first instance two Russians fell victims, an event which was followed by the attack on a party, one of whom was killed while riding on the high road; while the principle was maintained that it was a good thing to kill foreigners. Now, that it appeared was the feeling in the immediate vicinity of Yokohama, whither we were sending a regiment of Europeans. And what, he would ask, were our prospects for the future when we got our regiment there? Why, in all probability, that some fine morning some of the officers would go out on a shooting excursion, that they would be seized, would endeavour to defend themselves, like Mr. Moss; that a struggle would ensue; that they would be put into the Black Hole, and ultimately, perhaps surrendered to our consuls. With a regiment at hand we should not submit to what we might deem an outrage, and should take the law into our own hands. We should, in short, be likely to get into a contest with all the princes of the empire in succession, all of whom were opposed to us, and thus we should have in Japan a renewal of our China policy, which, as the Chancellor of the Exchequer had informed the House, has cost us half a million and an enormous sacrifice of human life. That, he contended, was a result which was not likely to lead to a diminution or our expenditure, while another element of discord and consequent loss was to be found in the probability that attempts would be made to smuggle opium into the country; that it would be seized, and that then we should feel ourselves called upon to demand redress. Was it consistent with our professions of humanity to seek to hold our ground in Japan against a people who were inimical to us by means of force? Under all the circumstances of the case he hoped the House would look upon the question in a cautious and earnest spirit, so that we might be saved from falling into the same groove as in China. He begged, in conclusion, to ask the Under-Secretary for War whether he had made any provision for the charge of the 1st battalion 20th Regt., transferred in December from the Indian establishment for Service in China and Japan, and whether other regiments were under orders for service in those countries.—The Marquis of HARTINGTON, in his reply to Colonel Sykes, said he was labouring under some misapprehension on the subject of his question. The 1st battalion of the 20th Regiment was doing duty in India, and was, therefore, not provided for in the estimates. The 2nd battalion had been devoted for service in China and Japan, and was provided for in the estimates. Colonel Neale had applied to General Brown for a small number of troops to protect the settlers at Yokohama, which request had, in the first instance, been refused. Subsequently, a small detachment had been granted, but that would, in all probability, be soon withdrawn. The number of soldiers in Japan did not exceed 160.

JAPANESE VIEW OF THE ENGLISH.

(TO THE EDITOR.)

SIR,—The following, extracted from the work published as to the recent visit of the Japanese Ambassadors, may be interesting to your readers. It has been forwarded to me by a correspondent in Nagasaki.—Yours, &c., A JAPANESE MERCHANT.

(Copy.)

"They, the Western barbarians, who have lately destroyed our town, we visited. The men are red-faced and fond of eating, and the low men (we think) eat raw meat, of which lumps are exhibited, much to our disgust. These people are very expert in iron; copies of their works our artists have drawn. Their buyers and sellers (? merchants) are not allowed to do any other work, and, therefore, being somewhat ignorant, principally talk of business. The nobles (Daimios) buy their wives from the merchants who train (*sic*) their daughters for that purpose. We think them great barbarians! The women wear frames to keep away men during the summer, when they are amorous. Some are pretty, but their eyes are large and close together; their feet are large and clumsy, and they have big legs. These women sing loud and roll their eyes, keeping time with motions of their heads. When they meet the men in the evening they are but partly dressed. These people made us sick with eating and drinking. The carriages in the streets try to knock down the people on foot, especially the women, to amuse the drivers. Their Government house, where the Daimios meet to talk and sleep, is well-built, and equal to a first-class tea house; the women are kept there in a cage. These people looked at us much. The women are allowed to run about without keepers, playing with umbrellas (parasols). They are the greatest barbarians in the West."

A CHINAMAN FROM REBELDOM.—A young man named John Fouenty, a native of Hong Kong, China, recently arrived in New York city, having made his escape from Savannah, Ga, where he was conscripted. John speaks but little English. His story, which is undoubtedly true, is somewhat interesting. He says his people are quite "well to do" in China, but owing to some arrangement he could never exactly understand, he found himself at seven years of age shipped as a coolie on board a vessel bound for Cuba. His term of "apprenticeship" being out at the expiration of his four years he was furnished with money to pay his passage home. He made an arrangement with the captain of a barque which was, as he was informed, to sail direct for China. He paid thirty dollars for his passage, and in four or five days afterwards was surprised to find himself in St. Augustine, Florida. The captain explained the matter by saying his passenger shipped under a mistake, and that his vessel was going no further. This was in 1862. Some kind gentlemen, residents of St. Augustine, hearing John's story, took him in charge, and sent him to school for a year, when he moved to Savannah. There he learned the cigar maker's trade, At the breaking out of the rebellion he was induced to join the rebel army, in which he served for a year. He was then mustered out, being under age. The last rebel Conscription Act brought John under the rule, and he was accordingly notified. Determined not to fight any more under the rebel flag, he seized the first favourable opportunity to make his escape to St. Augustine. The Provost Marshal of that place kindly furnished him with transportation to New York. John is now trying to get passage to China, hoping to see his people once more. His news is not of a very late date. He says that, before he left Savannah, Jeff. Davis came there and addressed the people. He was asked the question, "When will the war be ended?" Jeff. replied, "Don't, for Heaven's sake, ask me such a question."

Two magnificent swords, one of gold and the other of silver, intended as presents to the two Kings of Siam by the President of the United States, were brought to Southampton, consigned to the United States Consul at that port, who has to forward them on.

Monetary and Commercial.

The "Imperial Bank of China," which Mr. Montgomery Martin has been for some months engaged in forming, has been handed over to the "Credit Mobilier," who have completed the Board of Directors, a list of whom will be found in the prospectus in another column. The applications for shares are much in excess of the number to be allotted. The large increase of our trade in China since the Elgin treaty leaves little doubt as to the success of this institution. There is an ample field for its capital with the Government and Chinese traders, without encroaching on the Exchange business of existing banks in China. The shares are quoted on the Stock Exchange at 3 premium.

The prospectus of the Commercial Bank Corporation of India and the East, for the purpose of taking over the business of the Commercial Bank of India, established in Bombay in 1845, will be found in our advertising columns. The capital is to be £1,000,000, in shares of £25 each, half of which will be apportioned to the shareholders of the existing bank in substitution of the shares now held by them. Of the remaining £500,000 the sum of £250,000 will be allotted to these shareholders at par, in consideration for the transfer of the business and the reserved fund, which amounts to about £50,000, while the balance of £250,000 is offered for subscription in London at £10 per share premium, such premium to form an addition to the reserve fund. The shares were last quoted from Bombay at a premium equal to £21. 5s. per share of £25. The shares are quoted at 4 premium over the 10 at which they are issued.

Mr. Page has published a very useful table of prices of bullion; rates of Exchange, &c., in London, Hong Kong, and Shanghai for 1863.

Messrs. Jones Lloyd and Company, the well-known bankers, have retired, and made over their business to the London and Westminster (Joint-Stock) Bank.

On the Budget, the following is from *The Times*:—

It cannot be said that the Budget was received in the City to-day with any especial favour. The advocates of a uniform duty on sugar maintain that none of their principles were controverted by the arguments of the Chancellor of the Exchequer, and are disappointed at a result being delayed which they had hoped might be attained at once. The refiners and West India planters are at the same time dissatisfied, since they seem to apprehend that the discrimination under the new scale of duties will not be sufficiently wide to prevent the foreign producers of the better classes of sugar from entering into keen competition with them. The former party, it is said, intend to force the question to a division in the House, since they consider it to involve certain general points of the highest commercial importance, while the latter are already understood to be preparing to besiege the Government for a differential scale of a more decisive character. In connexion with the fire insurance question there is also some disappointment, and surprise is expressed that Mr. Gladstone should attempt to establish a distinction as to the class of property that is in the present stage of universal enterprise to be regarded as trading stock.

The biddings for £400,000 in bills on India took place at the Bank of England on the 6th inst. The proportions allotted were—to Calcutta, £222,400; to Bombay, £160,000; and to Madras, £17,600. The *minimum* price was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11⅝d. on Bombay. The applications within the limits amounted to £4,260,000. Tenders on Calcutta at 2s. will receive about 16 per cent., and above that price in full; on Bombay at 2s. 0⅛d., about 76 per cent., and on Madras at 2s. 0⅛d. in full. On the last occasion the applications within the limits reached only £2,300,000, so that a considerable increase in the demand for remittance to India is indicated.

The general meeting of shareholders of the Société Générale de Commerce et d'Industrie à Amsterdam was held in that city on the 29th March. The general meeting, in pursuance of the 36th article of the company's statutes, having heard the report of the directors, adopted the balance-sheet, and fixed the dividend at florins 14-05, or thirty francs per share, and authorised the chairman to sign the minutes accordingly.

The directors of the British and Californian Banking Company (Limited) have concluded an arrangement with the firm of Faulkner, Bell and Co., of San Francisco, for the acquisition of their banking and exchange business. Mr. James Bell, of that firm, will be a local director at San Francisco, and Mr. Henry D. Harrison, of the same house, will join the London board.

The certificates for the new shares of the Bank of Hindustan, China, and Japan, are now ready for delivery.

The following is from a report just issued by the Directors of the Chartered Bank of India, Australia, and China, and to be presented at general meeting on the April 13 (this day):—

The directors have now the pleasure to submit to the shareholders the general balance-sheet of the bank for the year ended December 31 last, showing a net profit of £101,193. 2s. 10d. To this has to be added the unappropriated balance of £4.368. 11s. 6d. from last year, making £105,561. 14s. 4d. The directors have to report that the increase of the bank's capital from £644,000 to £800,000 by the issue, at a premium of £10 per share, of 7,800 new shares of £20 each, is in course of being most satisfactorily carried out; and the premium received, viz.. £78,000, has been carried to the reserve fund. After deducting from the balance of £105,561. 14s. 4d. the sum of £32,200—the interim dividend paid to the shareholders in October last, at the rate of 10 per cent. per annum—there remains £73,361. 14s. 4d. now available for division. The directors recommend the shareholders to declare a dividend on the present occasion at the same rate of 10 per cent. per annum, and also a bonus of 10s. per share (free of income-tax), which together will amount to £48,300. They further recommend that £12,000 be added to the reserve fund, leaving a balance of £13,061. 14s. 4d. of undivided profits to be carried forward. The reserve fund, with the above two additions, will then stand at £105,000. The directors can continue to report favourably of the prospects of the bank; and they have to state that since the last annual meeting a new agency has been established at Batavia—now in full working order—and another more recently at Hankow, in China.

The failure of Messrs. G. I. and P. Watson, of London, who have been engaged in miscellaneous consignments to China, has been announced. The cause of failure is attributed to non-remittances for goods shipped; especially by Mr. Palmer, Auctioneer, of Shanghai, who it is stated has absconded.

At the meeting of the Oriental Bank Corporation, to be held on April 21, the directors propose to declare a dividend of £3 a share, making, with £1. 15s. already paid, a distribution of 19 per cent. for 1863.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton, on the 4th inst., was:—In gold, to Alexandria, £6,500; to Aden, £1,000; to Galle, £1,104; to Madras, £3,661; to Calcutta, £1,920. In silver, to Madras, £70,932; to Calcutta, £55,000; to Penang, £10,500; to Singapore, £10,500; to Hong Kong, £16,073; to Foo-chow-Foo, £400; to Shanghai, £11,375. Total, in gold, £14,185; in silver, £174,780.

ARTICLES OF IMPORT.

TEA.—It is satisfactory to notice the very large scale on which the deliveries are going on; those for export for the first three months amounting to 7,900,000 lbs., against 4,700,000 lbs. last year, whilst the home consumption deliveries show a further increase even upon the advanced scale since the reduction of duty last year, and this must, ere long, tell upon our stocks, and give some relief to holders. Low and dusty kinds of Congou continue to support former prices, those with leaf have also been saleable to a fair extent, but prices have ruled a shade easier. Good common have been scarce at 1s. 0½d. to 1s. 1d. per lb. Fair to good Sinchune Kais, and Fair Kaisow kinds, from 1s. 2d. to 1s. 7d., have met with only a limited inquiry. Good Kaisow kinds have been scarce and in request; fine to finest maintain former value. Common to fair blackish-leaf kinds show no alteration. Good second class Monings and Wopaks have been fairly saleable; fine to finest remain much as before. Tayshans have been scarce, the new make from Canton have sold at previous prices. Oolongs under 1s. 3d per lb. have been in demand for export, other sorts remain unchanged. Souchongs show no material alterations. Flowery Pekoes continue to sell at public sale at low prices. In Scented Teas business has been moderate, the sales made have been at about previous prices. Uncolored Japans continue in demand at fully former prices. Indian Teas have sold steadily at public sale at full prices. The arrivals of Green Tea have been considerable, and these have been freely offered, and the result has been large sales both for export and home consumption. Moyune kinds have sold readily at very high prices, but Ping-Suey kinds have been less saleable and prices have ruled lower. Good to fine Canton-make Gunpowders have sold at very full prices. Young Hysons show now alteration. The only public sale commenced on the 5th inst., comprising 60,650 packages, of which 32,428 packages were printed without reserve. Of these 40,523 packages have passed auction and 20,719 packages have been sold, including 18,881 packages without reserve. The sales will conclude next week, when further sales of Indian Tea will also take place.

SILK.—We have had more business in China and Japan silk during the past month, and the tone of the market has experienced some improvement. Importers show less disposition to sell, and prices are, consequently, a shade dearer. The deliveries for the month, 2,800 bales of China, and 1,567 bales of Japan, show that the consumption of Asiatic silk is still on a small scale. The China letters recently delivered report an almost total absence of business in silk; some 500 bales had arrived from Japan, but the settlements of China silk for the whole month would not amount to 100 bales. Unsold stock on the market was estimated at 5,000 bales. Exchange at Shanghai, which at one moment in the month was quoted 7s. 3d., had again declined to 6s. 6d.

SUGAR.—There has been a gradual revival of speculation since our last report, and prices advanced fully 6d. per cwt. The home trade, however, continued to act sparingly. The reduction of duty proposed by the Chancellor of the Exchequer on Thursday night imparted increased animation to the Raw market, and business of some extent was done next day at an advance of 1s. to 2s. per cwt. on the rates of the previous Friday, viz., 4,000 bags common Madras jaggery at 37s.; 1,400 bags Native at 40s.; and 200 tons clayed Manila, to arrive, at 30s. Before the announcement regarding the duty, we have to note sales by private treaty of 43,000 bags clayed Manila at 41s. 6d. to 42s., 5,000 bags unclayed at 38s. 6d., and a floating cargo of 670 tons for the United Kingdom, at 24s. The ollowing is the new scale of duties proposed by the Chancellor of the Exchequer in his Budget, those on Raw to take effect on the 16th inst., that on refined to be postponed for a month, viz.:—

	Dutch, Nos. Refined. 12s. 10d.	Do., Nos. 15 to 18. 11s. 8d.	D., Nos. 11 to 14. 10s. 6d.	Nos. 7 to 10. 9s 4d.	No. 6 and under. (New rate) 8s. 2d.	Melado, 6s. 7d.
Present Duties	18s. 4d.	16s.	13s. 10d.	12s. 8d.	12s. 8d.	10s. 4d.

The drawback to be allowed on the export of refined by centrifugal process, on and after the 5th May, will be 12s. 4d., and on unstoved, crushed, &c., not inferior to No. 1 standard, 11s. 9d.; on and after the 21st April the drawback on loaves equal to standard No. 1. will be 12s. 4d., that on bastards, unstoved, and broken, not inferior to standard No. 3. to be 10s. 10d., and bastards, &c., inferior to No. 2, 8s. 2d. per cwt.

COFFEE.—Plantation has given way 1s. to 2s. per cwt., the better sorts experiencing the greatest reduction, but a fair quantity has been sold, Native has been in steady demand at quite the previous value. For Mocha the market is quiet, and 72 bales at auction were all retired.

RICE.—Market quiet; 538 bags of Java retired at auction, at 13s. per cwt. for middling.

COTTON.—A languid tone has continued to prevail in the market, and only small sales have occurred, at prices generally ¼d. to ⅜d. per lb. lower—viz., 2,800 bales on the spot; middling fair to good fair Western Madras, 19d. to 19⅞d.; good fair Tinnevelli, 19¼d.; and fair to good China, 17d. to 17¾d. Sales for arrival:—50 bales Tinnevelly, 19¼d., December shipment, for guaranteed good fair; 100 bales Western, 18¾d., July and August delivery, for guaranteed fair; 1,500 bales China, 16¾d., June and July delivery, for guaranteed fair; 200 bales Japan, 18¼d., January shipment, for guaranteed fair—total, 1,850 bales.

CAMPHOR.—Good business has been done privately at £5. 10s. per cwt. for China; 200 chests at auction, retired.

CASSIA LIGNEA.—1s. per cwt. higher, and 548 cases at auction sold at 86s. to 93s. per cwt. for 3rd to 1st pile. Buds: Limited business privately, at about the previous value. 10 cases at auction, retired.

DRUGS.—Cubebs: Quiet; 184 bags at auction, retired. Dragon's Blood: Flat; 18 boxes at auction, retired. Galangal Root: Cheaper; of 389 bags at auction, three-fourths sold at 20s. to 21s. 6d. per cwt. for good. Rhubarb: Quiet, with very limited business, but no relaxation in terms. Auctions unimportant.

GUMS.—Benjamin: Siam scarce, wanted, and dearer: 7 cases sold at £33 to £38 per cwt. for 2nd to 1st tear partly block; £18. 5s. to £20. 5s. good to fine 3rd block, and £12 dust in block. Sumatra steady, and of 426 cases three-fourths sold at £5. 17s. 6d. to £6 middling 3rd, and 25s. to 27s. 6d. low fourth. Damer: Steady, and of 227 cases at auction, half sold at 44s. 6d. to 45s. per cwt. for good picked, and 36s. to 37s. fair sorts. Gamboge:—Little offering; 2 cases sold at auction at £9. 7s. 6d. per cwt. for good pipe, being dearer.

GUTTA PERCHA.—Quiet; 28 tons at auction all retired. India Rubber: Some inquiry, but very little actual business doing, and no change in value; 8 cases Assam at auction sold at 7¼d. to 7¾d. per lb. for ordinary ball.

HEMP.—Manila is quoted £35 to £36. 10s. for roping qualities.

JAPAN WAX.—Quiet; 230 boxes at auction all retired.

OILS.—Anniseed: Was very quiet till quite recently, when sales to some extent were effected at the quotation of 6s. 8d. Cassia: Very moderate business at the higher figure of 9s. 6d. 5 cases at auction retired thereat. Cinnamon: Quiet, 2 cases at auction, all retired. Mace and Nutmegs: Nothing doing: Nutmeg Paste very flat at 1d. per oz.: of 3 cases at auction, one only sold.

SAGO.—Steady, 281 boxes sold at auction at 22s. per cwt. for fair large. Flour: Quiet, and without business of any importance. Tapioca: Of 729 bags Penang only a small part of the sound was realized, good middling and good white 2⅞d. to 3d.

SPICES.—Cloves: Nothing doing in Penang; Zanzibar again the turn dearer, with moderate business for the supply of actual requirements. Mace: Firm, with little offering. Nutmegs: Quiet, and 15 cases Penang at auction sold at 3s. 4d. per lb. for fair bold, and 1s. 2d. to 1s. 11d., middling small to fair medium. Pepper: Black has been in extraordinary demand, and prices have advanced ⅛d. per lb.; extremely large quantities have changed hands at 3⅞d. to 4d. for Singapore, and 3½d. to 3¾d. Penang. 4,455 bags Singapore and 5,992 bags Penang at auction all placed at and after the sales. White: Moderate business done privately in Penang at 5⅞d. per lb. for fair, being rather dearer; 349 bags Singapore at auction held for advanced rates, and retired.

TERRA JAPONICA.—Cutch, Pegue: Has been very quiet, with most limited business, but without any abatement in rates. 828 bags at auction all retired. Gambier: Is again 3d. to 6d. per cwt. dearer, and very large business has been accomplished, both on the spot and for arrival, up to 23s. 6d. per cwt. 838 bales sold at auction at 25s. 6d. to 26s. 3d. good cubes.

TOBACCO.—Manila Leaf: There have been several inquiries for the different lots to arrive, but in this market no business transpired. Manila Cheroots and Segars: Rather weaker in price. Java: Is in good demand, and prices well maintained for good and fine qualities. Japan: Desirable descriptions wanted. Quotations: Manila Cheroots and Segars, 7s. to 7s. 6d.; Java, 6d. to 1s. 1d.; Japan, 4d. to 8d.

MISCELLANEOUS.—Galls: All kinds—Bussorah, China, and Japan—very scarce, and much wanted. 8 cases China and 25 cases Japan at auction all retired. We quote Japan and China 70s. to 100s. per cwt. Blacklead: Lower, and of 173 barrels at auction two-thirds sold at 20s. 6d. to 23s. per cwt. for very good lump, and 9s. 6d. good dust. Musk: Is 1s. to 2s. per oz. dearer, and in active demand; 62 caddies sold at auction at 24s. to 34s. 6d. per oz. for middling rough to very good Tonquin, and 7 tins grain 50s. 6d. to 51s. 6d. Rattans: Continue very firm; and 7,263 bundles Penang, and 1,908 bundles Singapore at auction, sold at 4s. 6d. to 9s. 2d. per 100. Sapanwood: Firm, with quotations on former terms. Mother o'Pearl Shells: A recent importation, 84 cases, sold at auction at 90s. to 95s. per cwt. for good Manila, being very firm. Soy: being more scarce, and in some demand for the supply of actual requirements, has realised as much as 3s. per gallon for a few hogsheads of fine. Star Anniseeds: A few cases at auction retired at £9 per cwt., the advanced rate of £8 having been bid. Sticklac, Siam: Firm: and 280 cases at auction, all sold at 55s. to 59s. per cwt. for good to very good; 53s. small, and 46s. to 52s. block. Tortoiseshell: Of 8 cases Singapore at auction, three fourths sold at 15s. per lb., being the previous value; and one case Manila at 18s. Turmeric: No China here; Java steady; and of 459 bags at anction, a few sold at 21s. per cwt. for good. Vermilion: Scarce and wanted; no auctions.

From PENANG.—At LONDON: Nipisiquit, Rockliff, Teesdale, Edinburgh Castle. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

There is still an excess of East India shipping in our home ports, and outward freights continue very low in consequence. Fair rates are offering for coals from the outports to Singapore and China. Homeward freights remain firm. £5 is still offered for teak from Maulmain, and small British ships are required for the China trade, with the usual time options.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight. 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: 40 to £41, and £1. 18s. For Shanghai: £51 to £52, and £2. 3s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore; £26 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the supply of 6,000 tons of Welsh coal, to be delivered at Shanghai, also for the conveyance of 227 tons Government naval stores (46 heavy, 181 light), from the River Thames to Hong Kong.

CASUALTIES.

AMSTERDAM, March 24.—The Vertrouwen (ship), de Vos, hence to Sourabaya, has put back to day with considerable damage, and must go into dry dock to repair, having been in collision.

The Alexander, of New York, from Liverpool to Singapore, struck on the Frederick Rock, Straits of Rhio, Feb. 5, and was beached same night in a sinking state on East Island.

The Eunice Nicholas, Simons, from Sunderland for Shanghai, arrived at Gravesend, March 27, with damage.

Advices from Batavia, dated Feb. 27, state that the Wilhelmina (brig), Wiersma, from Rotterdam to Macassar, has been wrecked near the latter port; crew and part of cargo saved.

ST. THOMAS, March 19.—The Sarah, Van Name, from Shanghai to New York, put in here, March 2, leaky, and is discharging.

CALLAO, Feb. 28.—The Westward-Ho (national ship), which was fitted for a voyage to China, took fire in the anchorage in this bay on the night of Feb. 26, and was burnt to the water's edge.

ST. HELENA, Feb. 8.—The Childe Harold, Gunnion, from Shanghai to Liverpool, arrived here to day, making nine inches water per hour, having struck some unknown object floating on the water, Jan. 23, in lat. 30 S., lon. 35 E.

The Tustan, from Hamburg for Singapore, arrived at Rio Janeiro, Feb. 27, with damage, partly dismasted.

CAPETOWN, Feb. 20.—The Watergeus (Dutch barque), from Batavia for Amsterdam, which arrived here Jan. 23, put in for repairs; part of her cargo (800 bags coffee) has been sold.

The Eastern Queen, Short, from Sunderland to Shanghai, was spoken 20th May, in lat. 49 N., lon. 9 W., and has not since been heard of.

AMSTERDAM, April 4.—The Anna Digna, Ouman, from Batavia, which arrived in the Texel April 2, struck in coming in, lost an anchor and chain, and became leaky.

The Scheveningen, Annokkee, from Batavia for Rotterdam, which arrived at Brouwershaven April 2, had lost boats, bulwarks, water casks, &c., having been struck by a sea, and the cargo, it is feared, has also sustained damage.

The Maori, Ashby, which arrived off Plymouth, April 7, from Singapore, had experienced most severe weather on the 17th (supposed March 17), and had decks swept and lost everything movable.

At ST. HELENA.—Feb. 4, Helvetia, Menk, from Manila, and sailed, 5, for New York; Rudolf, Meisma, from Batavia, and sailed, 5, for Rotterdam; Graf Eulenberg, Meyer, from Canton, and sailed, 5, for New York; 5, Magnus, Moring, from Macao, and sailed for Bremen; 6, Forfarshire, Kemp, from Hong Kong, and sailed, 10, for Liverpool; Maggie Lauder, Henry, from Manila, and sailed, 8, for Cork or Falmouth for orders; Cordova, M'Kenzie, from Shanghai, and sailed, 8, for Liverpool; Merry England, Kemp, from Ningpo, and sailed for Liverpool; 7, Bulgersteyn, Geerling, from Banjoewangie, and sailed for Rotterdam; 8, Iron Crown, Rogers, from Hong Kong, and sailed, 10, for Liverpool; Casas, Pardo, from Manila, and sailed, 9, for Cadiz; Childe Harold, Gunnion, from Shanghai, and sailed, 10, for Liverpool; Santa Maria, Madrid, from Manila, and sailed, 9, for Alicante; 9, Maria Adolfina, Blom, from Batavia, and sailed, 10, for Amsterdam; Sophie (brig), Martin, from Shanghai, and sailed, 10, for London; Europe, Boutes, from Nagasaki, and sailed, 11, for London; 10, Reina de los Angelos Vildo Sola, from Manila, and sailed, 12, for Cadiz; 11, Bankok, Duval, from Bankok, and sailed for London; Schelde, Hoffman, from Batavia, and sailed, 12, for Middelburg; 12, Aldebaran, Meyboom, from Banjowangie, and sailed, 13, for Amsterdam; 13, Nipisiquit, from Penang, and sailed, 16, for London; 14, Koerier, Karso, from Padang, and sailed, 15, for Amsterdam; H.M.S. Scout, from China and Cape, and sailed, 17, for England; 15, Tien-tsin (str.), from Shanghai and Cape, and sailed, 15, for England; 16, Balmacarra, from Shanghai, and sailed, 17, for London; Queen of the Seas, from Foo-chow-Foo, and sailed, 17, for New York; 18, Christine and Jeannette, Rademaker, from Java, and sailed, 20, for Amsterdam; 19, Glen Huntley, Crone, from Shanghai, and sailed, 20, for Liverpool; Iberica, Onati, from Manila, and sailed, 20, for Cadiz; 20, Dolphin, Withers, from Kanagawa, and sailed, 22, for London; Germania, Francke, from Java, and sailed, 22, for Amsterdam; California, de Wyn, from Banjoewangie, and sailed, 22, for Amsterdam; 21, Apollo, Hagedorn, from Shanghai, and sailed, 22, for New York; 24, Hollandia, Wap, from Java, and sailed, 25, for Rotterdam; 25, Dygden, Ahrenberg, from Banjoewangie; 29, Lodore, Morrison, from Shanghai.

OFF ST. HELENA.—Feb. 16, Princess of Wales, from Shanghai, for London; 24 Bankside, from Foo-chow-Foo, for London.

AT TABLE BAY.—Jan. 23, Watergeus, from Batavia, for Amsterdam; 29, Seawfell, Guthrie, from Japan, and sailed 31, for London; Falcon, Sullivan, from Hong Kong, and sailed Feb. 2, for Liverpool; Citadelle, Horman, from Hong Kong, and sailed Feb. 8, for London; 30, Walcheren, from Batavia; Alfonzo de Albuquerque, from Macao, for Havana; 31, Donna Maria da Gloria, from Macao, and sailed Feb. 3, for Havana; Feb. 1, Ocean Gem, Selby, from London, and sailed 18, for Hakodadi; 6, Vulcan str., from New York, and sailed 13, for China; 4, Prins Carl, Bergmann, from Batavia, and sailed 18, for Amsterdam.

AT SIMON'S BAY.—Jan. 22, H.M.S. Pelorus, from Rio Janeiro, and sailed, 26, for China; 29, China (str.), Osborne, from China, and sailed 6 Feb for England; 27, Pekin (str.), from Cheefoo, for England; H.M.S. Scout, Capt. Corbett, from Hong Kong and Singapore, for England; Tientsin (gunboat), Capt. Nicholas, from China; 10, Ballarat, Baker, from Shanghai, for England; 12, H.M.S. Conqueror, from Plymouth, and sailed, 13, for Japan.

AT NATAL.—Jan. 26, Carl Wilhelm, Marten, sailed for Singapore.

At MAURITIUS.—Feb. 28, H.M.S. Centaur, from Hong Kong on Feb. 26, in lat. 21 S., lon. 62 E., she experienced a very severe gale from E.N.E. to N., which lasted four hours, and during which she lost some sails. March 1, Walvisch, Baskett, from Singapore.

TEMPORARY OFFICES.

64, Moorgate-street, London, E.C.

One of the objects of this Corporation is to take over the business and assets with the reserved fund of the Commercial Bank of India, established in Bombay in 1845, an arrangement to that effect having been made with the shareholders.

By this arrangement one-half of the required capital (viz., 20,000 shares of £25 each, fully paid up) has been already secured. A further number of 10,000 shares, on which £12. 10s. per share has been paid up, has also been subscribed for, pro rata, by the shareholders of that Bank. In consideration of the transfer of the business and reserved fund, it has been arranged that these shares be taken at par.

The shares of the Commercial Bank of India command a high premium in Bombay; and by the last advices received were above 85 per cent., equivalent to £21. 5s. premium per £25 share. The last dividend declared on the 30th June, 1863 (being an interim dividend) was at the rate of 9 per cent per annum. The reserve fund, by advices lately received from the Chief Manager in Bombay, was expected to amount to above £50,000; the accounts up to 31st December last not being completed the precise amount cannot be stated.

The remaining 10,000 shares (with the exception of a sufficient number retained for Directors' qualifications not exceeding 500 shares, to be allotted at par) are now offered at a premium of £10 per share, which premium will form part of the reserved fund.

The calls on these shares will be made as follows:—

On application (on capital account...	£2	10	On allotment on premium account) £2 10
1st call (8th July)...	10	0	Ditto 5 0
2nd call (8th Oct.) .	2	10	Ditto 2 10
3rd call (8th Dec.) .	5	0	—
4th call (8th Feb. 1865)	5	0	—
			—
	£25	0	£10 0

All calls paid on their due dates will be entitled from those dates to their proportion of the dividend which may be declared at the usual Half-yearly Meeting.

The calls may, however, be paid in anticipation; and on all such payments in advance interest will be allowed at the rate of £5 per cent. per annum to the respective due dates of the calls.

The Directors trust that the arrangement for the transfer of the business of the Commercial Bank of India will be completed so as to admit of its being carried on under the Corporation in July next.

Application for shares may be made in the subjoined form, but no application will be entertained unless the requisite deposit has been previously made.

In the event of no allotment of shares being made the deposit will be returned in full.

Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of application may be obtained from the brokers, or at the temporary offices of the Company.

NO APPLICATIONS will be received after THURSDAY, the 14th inst.

TELEGRAPH CONSTRUCTION and MAINTENANCE COMPANY (Limited), uniting the business of the Gutta Percha Company with that of Messrs. Glass, Elliot, and Co.

WORKS.

Wharf-road, City-road, N., and East Greenwich, S.E.

This Company has been formed for the purpose of making and maintaining telegraphic lines of communication, both submarine and on land, in every part of the world.

The facility of intercourse which telegraphic communication, now in such extensive operation, has afforded to the public in its varied communities—political, commercial, and social—has rendered that which was but a few years ago regarded merely as a scientific experiment absolutely necessary for the purposes of our social system, and a highly remunerative investment. It has been found that, as in the case of railways (although to a much greater extent), telegraphic cables have uniformly developed a constantly-increasing traffic, with this remarkable and special feature, that the more distant the points brought into connection the greater the proportion of business done.

Experience has proved that increasing receipts from the working of submarine cables bring with them only a trifling proportionate increase in the amount of working expenses.

Messrs. Glass, Elliot and Co., and the Gutta Percha Company, have hitherto together had the principal share in the manufacture of submarine telegraphic cables.

The former firm, who have undertaken the manufacture, laying down, and maintenance of the cables, have hitherto obtained the inner cores of the cables from the Gutta Percha Company, which has in this branch of its trade confined itself entirely to the production of that part of the cable.

Messrs. Glass, Elliot, and Co. have during the last ten years manufactured and laid down in different parts of the world no less than 6,500 miles of submarine telegraph cable, while the Gutta Percha Company have during a like period manufactured upwards of 9,000 miles of insulated wires for submarine telegraph cables now in work.

It has been ascertained that the manufacture of entire cables could be more securely and beneficially carried on by uniting in one establishment the manufacture of the outer cable and wires and the execution of the portion of the work heretofore separately executed by the Gutta Percha Company, and with this view contracts have been entered into for the purchase of the entire machinery, premises, plant, patents, stock, goodwill, &c., of the Gutta Percha Company, by Messrs. Glass, Elliot and Co; and that firm have agreed to transfer to this Company, at the cost price to them, the works so acquired. A contract has also been concluded with Messrs. Glass, Elliot, and Co. for the acquisition by this Company of their manufactory, premises, patents, stock, and business, the consideration being paid, to the extent of £100,000, in fully paid-up shares of the Company. Under these combined arrangements the Company will enter into possession of the amalgamated businesses, and be entitled to their profits, as from the 1st of January last.

The Company's business will be conducted under the personal superintendence of Mr. Barclay and Mr. Glass, as Managing Directors, assisted by the efficient staff of the united Companies.

The agreement with Messrs. Glass, Elliot, and Co. provides for the assignment, with the consent of the Treasury, to the Company of the lease held by that firm of the submarine telegraph between Malta and Alexandria. The Alexandria, Cairo, and Suez Telegraph, held by Messrs. Glass, Elliot and Co. under agreement with the Telegraph to India Company, is also comprised in the arrangement.

The large profits which have hitherto been realised by both of the above firms, and the prospect which exists of considerable extension of the business, justify the expectation of a large return to the shareholders, independently of the profits arising from the working of the telegraph lines above referred to.

Copies of the above contracts, together with the Articles of Association of the Company, may be inspected at the solicitors' offices.

Applications for shares must be made in the annexed form; but no application will be considered unless the deposit of £1 per share has been previously paid to the bankers of the Company. This deposit will be returned if no allotment is made to the applicant, and if an allotment is made it will be applied towards the payment then due.

An option will be given to the subscriber of taking one fourth of the shares allotted as fully paid-up shares.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the brokers

London, April 7, 1864.

FORM OF APPLICATION FOR SHARES.

No. ——.

(This form should be presented entire to the Bankers of the Company, who will detach the receipt, and return it to the applicant.)

To the Directors of the Telegraph Construction and Maintenance Company (Limited).

Gentlemen,—I request you to allot me —— shares of £20 each in the Telegraph Construction and Maintenance Company (Limited), and I hereby agree to accept such shares, or any less number that may be allotted to me, subject to the regulations of the Company, and to pay the further deposit of £3 per share on allotment; and I authorize you to enter my name on the register of members of the Company in respect of the shares allotted to me.

Temporary Offices—1, White Hart-court, Lombard-street.

PROSPECTUS.

The object of this Company is to promote financial, commercial, and industrial enterprise in India and the East by the application of English capital, for the legitimate and remunerative employment of which there is ample and constantly-extending scope.

The success of the operations of the financial companies in England has now been satisfactorily proved; and a similar institution, adapted especially to the requirements of the East, and combining on its direction the needful experience, will have a field for profitable operations equal, if not superior, to any other.

The Corporation will act as general financial agents, will make advances on approved securities, and will promote the development of the internal resources of the countries in which it may operate by assisting in the establishment of sound industrial undertakings and enterprises.

The Corporation will also undertake on commission the investment of funds placed in its hands either in the purchase of property, or in lending it out on mortgage and other securities. It will receive deposits at rates to be agreed upon; and it will take powers to issue bonds or obligations on the security of its mortgages and subscribed capital.

The revenue of India has risen in a few years from £26,000,000 to £47,000,000, and the aggregate import and export trade during the same period has more than doubled itself. The increasing development of her natural productions, and the successful cultivation of tea, coffee, and other staple articles, together with the high rates there current for money, compared with those upon which it can be borrowed in this country, make the opening very favourable for the establishment of a Company of this description.

Powers will also be taken to extend the operations of the Corporation elsewhere as may be found expedient.

Arrangements are in progress by which the business may be speedily commenced.

Prospectuses and Forms of Applications for Shares may be obtained at the Temporary Offices, or of the Brokers or Solicitors. The Memorandum and Articles of Association may be inspected at the Offices of the Solicitors. In the event of no allotment being made, the deposits will be returned without deduction.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of constructing a railway from Chiasso to Biasca, in the canton of Tessin, Switzerland, with the design of extending the line to Lucerne, by the Alpine pass of the St. Gothard, or to Coire by the pass of the Luckmanier.

The line now to be made from Chiasso to Biasca is indispensable to either of these routes, it being the only line allowed by the Swiss Government to connect the railways of North Italy, the line being comparatively easy of construction, free from costly works, and promising a large traffic.

The Company has, however, secured from the Canton Tessin, besides the concession of the line from Chiasso to Biasca, the preferential right to construct the extension of their line to any junction with the system of railways of Central Europe, whether at Lucerne or at Coire, and this peculiarly advantageous condition forms a very important feature of the present enterprise.

State subventions to a very considerable amount have been voted in aid of the proposed Alpine Railway, which is acknowledged to be of the highest national importance to both Switzerland and Italy. The lines proposed by this Company will complete the shortest overland route to India and China across the centre of Europe, and will effect a saving of three days' sea navigation.

As the line from Chiasso to Biasca, which is intended to join the Lombardo-Venetian lines, will open a direct communication between the most important towns of the Canton Tessin and the railway network of Italy, connecting also the three lakes of Como, Lugano, and Maggiore, and as it forms the key of the whole position, the Directors have resolved to commence this line forthwith, pending the surveys and negotiations for determining the precise Alpine pass to be finally adopted for the extension.

Responsible contractors have undertaken to construct and complete the line for a sum within the amount of capital, and the works were commenced on the 18th of January, in the presence of Government officials.

Interest at the rate of 5 per cent. per annum will be paid to shareholders, during construction, upon the amounts from time to time paid in respect of their shares.

Full particulars are given in the detailed prospectus, which may be obtained, together with the map, at the offices of the Company.

Applications for shares must be addressed to the Directors, and copies of the prospectus may be obtained at the temporary offices of the Company, or at the offices of the Financial Corporation (Limited), No. 14, Leadenhall-street, the brokers and solicitors; but no application will be considered unless a deposit of £1 per share on the number of shares applied for has been paid.

CHINA FIRE INSURANCE COMPANY

Subscribed Capital, 2,000,000 taels, in 400 Shares of 5,000 taels each.

Paid up Capital, 200,000 taels.

JOHN SCOTT, Secretary.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

DOCKS. PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 236 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £500,000. Reserve Fund, £100,000.

PROSPECTUS.

China is the only large country in the civilised world which has no direct bank in London operating solely for its benefit; and it is obvious that a vast fertile region, inhabited by three hundred millions of intelligent people who carry on an enormous internal trade by means of native joint stock and private banks of issues, and who have an extensive and increasing commercial intercourse with Europe, India, America, and Australia, must present a lucrative field for monetary operations.

Great Britain imports from China and Japan (via China) upwards of seven million pounds of silk, and about one hundred and twenty million pounds of tea. The rapid increase of trade is thus shown:—

Years.	Imports of China Produce.	Exports to China of British Manufactures.	Total Trade between China and United Kingdom.
1842 ...	£3,956,290 ...	£969,381 ...	£4,925,671
1862 ...	11,376,150 ...	5,310,036 ...	16,694,186

The commerce between India and China has increased during the past twenty years from three to fifteen millions sterling.

The port of Shanghai alone exhibits an extraordinary development. In 1842 it had no European trade; in 1862 the value of its exports was £14,667,466, its imports £22,863,953; total, £37,531,419.

The balance of trade with China is paid in bullion—chiefly silver—of which the export value was in 1851 £102,316; in 1862, £3,498,397. Cotton is now becoming a large item of trade: during the last six months of 1863 more than twenty million pounds were exported.

The Imperial Bank of China has therefore been formed to supply an acknowledged want on the plan which has been so successfully carried out in London by the Banks for India, and other similar institutions, the success of which the following table will exemplify, and it is believed at least equal success will mark the progress of this Bank.

Name of Bank.	Paid up per Share.	Present price per Share.
Agra and United Service	£50 ...	£126
Chartered Mercantile of India, London, and China	25 ...	70
Hindustan, China, and Japan	25 ...	40
Oriental	25 ...	66

The Imperial Bank of China will transact all operations connected with those of a Bank of Issue, Deposit, Discount, and Exchange.

The directing and controlling authority will be in London. Branch Banks, with Boards of Local Directors, will be formed at Hong Kong, Canton, Shanghai, Foochow, Tientsin, Pekin, and at such other cities as may from time to time be deemed advisable. The branches will be under the control of the London Board, aided by the supervision of an Inspector-General, as in the case with the Indian and Colonial Banks, and the authorisation of the Government at Pekin has been solicited, to allow the specie notes of the Imperial Bank of China to be received in payment of Custom Duties and at the Tax Offices throughout the Empire, an official correspondence now being carried on by the Bank with Pekin for that object; and as the Pekin Government will not trust the native local banks, it is believed this Bank will become to the Government of China, what the Imperial Ottoman Bank is to that of Turkey.

The desire on the part of the Government of China for railways and telegraphic communication will render necessary extensive financial operations, which the Imperial Bank of China will be peculiarly favourably situated to undertake.

Applications for Shares to be made in the annexed Form. In the event of no allotment of Shares being made, the deposit will be returned in full. Should a less number of Shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and Forms of Applications for Shares may be obtained at the Offices of the Credit Mobilier (Limited), 80, Lombard Street, and from the Bankers, Brokers, and Solicitors.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Imperial Bank of China (Limited).

GENTLEMEN,—Having paid to your Bankers, Messrs. Robarts, Lubbock and Co., the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares or any less number you may allot to me: and I agree to pay the deposit on allotment, and to sign the Articles of Association of the Company when required, and I authorise you to insert my name on the register of members for the number of shares allotted to me.

Usual signature .....

THIRTIETH ANNUAL GENERAL MEETING OF SHAREHOLDERS

OF THE

AGRA AND UNITED SERVICE BANK

(LIMITED),

Held at the Bank, 27, Cannon-street, E.C., on Saturday, April 2, 1864.

GEORGE GORDON MACPHERSON, Esq., Chairman, in the Chair,

The notice convening the Meeting and the following REPORT and STATEMENT of ACCOUNTS were read:—

The Directors have to submit to the shareholders the audited accounts for the year ended 31st December last, and to report that, after making ample provision for all bad and doubtful debts, the net profits of the Bank for the year amounted to £242,909. 12s. 6d.

Out of this sum the Directors have declared, free of income-tax, two half-yearly dividends at the rate of 10 per cent. per annum each, and have added to the last of these a bonus of £4 per share, thus making a return for the year of 18 per cent. on the paid-up capital of one million sterling.

From the balance remaining the Directors have refunded to reserved fund account the sum of £7,341. 2s. 4d. taken from it last year, and, in consideration of the greatly extended business of the Bank, have carried to credit a further sum of £25,000, thus raising the fund to £225,000. They have also passed the sum of £5,000 to superannuation fund, and £15,000 to building fund, carrying forward £10,568. 10s. 2d. to credit of profit and loss account for the current year.

Since last annual meeting the Directors have purchased desirable premises in Sydney, and have secured land at Shanghai, Kurrachee, and Madras, in view to the erection of suitable buildings for the branches of the Bank at those ports.

The present Auditors being eligible for re-election, in terms of the deed of settlement, offer themselves accordingly.—By order of the Board,

MACKINTOSH BALFOUR, General Manager.

(No. I.)—BALANCE-SHEET, DECEMBER 31, 1863.

G. B. DALBY, Chief Accountant.

We have examined the preceding statements (Nos. 1, 2, and 3) with the books, vouchers, and securities, at the head office in London, and with the detailed returns and balance-sheets signed by the auditors of the several branches, and we hereby certify to the correctness and satisfactory character thereof.

London, March 16, 1864. W. FARR, J. HILL WILLIAMS, } Auditors.

The following resolutions were duly moved, seconded, and carried unanimously:—

"1. That the Report and Statements which have been read to the meeting and previously circulated to the Shareholders in Europe, be adopted.

"2. That George Gordon Macpherson, Esq., Colonel Henry Doveton, James Sydney Stopford, Esq., and James Thompson, Esq., be re-elected Directors.

"3. That John Hill Williams, Esq., and William Farr, Esq., D.C.L., F.R.S., be auditors for the present year.

"4. That the thanks of the Shareholders be given to the Board of Directors for their careful control of the Bank's affairs; to the General Manager, Mr. Mackintosh Balfour; to the London Manager, Mr. William Shipman; and to the Local Committees and Managers of the Branches, for the satisfactory manner in which they have conducted the business of the Bank for the past year; and to the Auditors, for their efficient supervision of the accounts.

"5. That the thanks of the meeting be given to the Chairman for his able conduct in the chair."

G. G. MACPHERSON, Chairman.

THE AGRA AND UNITED SERVICE BANK (LIMITED).

HOLLOWAY'S PILLS.—ENFEEBLED EXISTENCE.—This medicine embraces every attribute required in a general and domestic remedy: it overturns the foundations of disease laid by defective food and impure air. In obstructions or congestions of the liver, lungs, bowels, or any other organ, these Pills are especially serviceable and eminently successful. They should be kept in readiness in every family, as they are a medicine without a fault for young persons and those of feeble constitutions. They never cause pain or irritate the most sensitive nerves or most tender bowels. Holloway's Pills are the best known purifiers of the blood, and the best promoters of absorption and secretion, which remove all poisonous and obnoxious particles from both solids and fluids.

For freight or passage apply to ESCOMBE, BROTHERS, andCo., Cross-street, Manchester; to LISTON, YOUNG, andCo., 36, Cannon-street, E.C.; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

GELLATLY, HANKEY, and SEWELL will despatch the undermentioned SHIPS, from the East India Docks, as under:—

Destination	Ship's Name.	Reg. Tons.	Commanders	To Sail.
Bombay ..	Mary Smithouse	1,243	H. Finlay	April 20
Calcutta ...	SirJohn Lawrence	1,090	J. Sinclair	April 20
H. Kong & Whampoa	Sydney Eggers ...	870	H. Campbell	April 20

For Freight or Passage, apply to GELLATLY, HANKEY, and SEWELL, No. 27, Leadenhall-street, E.C.

CHINA, JAPAN, SINGAPORE, and BANGKOK.—The following splendid first-class Clipper Ships will be despatched as under:—

Port.	Ships.	Docks	Last Shipping Day
Shanghai	Laurel ...	E.I D	May 3.
Shanghai	Isles of the South ...	E.I.D	To follow.
H. Kong & Whampoa.	GustavAdolp.	S.K.D	With des.
Amoy & Foo-chow-Foo	Rubicon ...	L D.	With des.
Kanagawa, Japan ...	Medina ...	W.I D	With des.
Singapore	Maggie ...	W.I.D.	With des.
Singapore	Xan heppe...	W.I.D.	To follow.
Bangkok	Helen Baird .	S K.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 28, Nicholas-lane, Lombard-street, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Heroes of Alma ...	W.I.D.	April 30.
H. Kong & Whampoa	Maida Queen	W.I.D	With des.
Manila	Concha ...	W.I.D.	April 18.
Manila	Angela ...	W.I D.	To follow.
Singapore	Moneta ...	W.I.D.	April 25.
Calcutta	Jas. Livesey .	E.I.D.	With des.
Bombay	Tiverton ...	E.I.D.	April 25.
Penang	Celestial ...	W.I.D.	With des.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Euxine, arrived April 26.—From Hong Kong: Sir Malcolm and Lady Stevenson, Messrs. Baker, Montejo, Desnagieres, and Clarke. From Singapore: Messrs. Oviessen, Ducasse, and Voight. From Penang; Mr. Jevons.

To Southampton, per Ceylon, expected to arrive May 2.—From Shanghai: G. W. Goodman, Deputy-Purveyor Menzies, Capt. Coney, and Jas. Axford. From Singapore: J. Nevin. From Penang: Mrs. Plunket and two children. To Malta.—From Hong Kong: Messrs. W. H. Dalgleish and H. E. Bush.

By last Bombay mail, to Gibraltar, per Ellora, arrived at Southampton April 23.—From Hong Kong: Mr. and Mrs. Burrows, Miss Trowbridge. From Singapore: Mr. and Mrs. Zarate.

PASSENGERS OUTWARD.

By this mail, per P. and O. steamer Delhi, from Southampton, April 20.—To Hong Kong: Rev. J. Wilson, R.N., Mr. H. Hickling, and one second-class passenger. To Shanghai: Mr. H. Morrison. To Penang: Mr. Maxwell, and one second-class passenger. To Singapore: Mr. R. B. Torrance, and one second-class passenger. To Calcutta: Messrs. B. Stainforth, Brind, Hamilton, J. Tulloch, A. H. Rennie, A. Smith and P. Stainforth, and eight second-class passengers. To Madras: Mr and Mrs. C. Pochin, Mr. and Mrs. Lushington, infant, and native female servant, Mrs. Anne Dinger and two children. To Ceylon: Deputy Inspector-General of Hospitals Fraser, Mrs. Fraser, infant, two children, and European female servant, Capt. J. Allen, Miss Gray, and one second-class passenger. To Alexandria: Mr. Geils, Mr. and Mrs. Boustead. From Marseilles, per Massilia, to leave April 28.—To Shanghai: Mr. W. Aretz, Mr. Charles Don, Mr. G. Ryding, M.D., Mr. W. Neuhoff. To Hong Kong: Mr. F. H. Lane, Mr. Paul Ehlers, and one second class passenger. To Calcutta: Messrs. H Greaves and Witney. To Ceylon: Messrs Gordon, J. H. Ranken, A. G. Jack, and C. Tatham. To Alexandria: Messrs. W. Johnston and Garland. From Suez.—To Madras: Capt. M. W. Carr.

Per P. and O. steamer, from Marseilles, May 5.—To Hong Kong via Bombay: Mr. and Mrs. Neilson.

Per P. and O. steamer Syria, from Southampton, May 4.—To Singapore: Mr. P. L. Blyth. To Hong Kong: Mr. H. D. Margesson, Mr. and Mrs. Nielson. From Marseilles, May 12.—To Penang: Mr. Jno. Lamb. To Shanghai. Admiral Steen Bille and Secretary. From Suez.—To Hong Kong: Mr. J. M. Borntraeger, Mr. G. Hubbe.

Per P. and O. steamer, from Marseilles, May 28.—To Singapore: Mr. and Mrs. Von der Heyde. To Shanghai: Mr. Broadbent.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Our advices by the present mail continue the complaints of the foreign merchants relative to the impediments thrown in the way of trade by the Government of the Tycoon. However, the mist that has so long hung over the commercial policy of that potentate seems to be gradually clearing away. The report current now among the natives (states the *Commercial News*) is, that the Mikado has consented to allow foreigners to remain during another five years in Japan; and that as soon as this resolution is fully confirmed and approved of by the Great Council of Daimios, trade at the open ports will go on as usual. It is upon this ground that native merchants have been promising for some weeks past the immediate prospect of a greatly improved trade. It is said that raw silk will be allowed to come to market at the rate of 500 bales a month. During the past week about 200 bales came down. There are indications that the Government are doing what we sometime ago stated they were likely to do, namely, to encourage and direct trade to Nagasaki while discouraging it at Kanagawa, with the view of closing the last-named port.

We have again to record the total loss of a British ship in Japanese waters. In the present instance, less fortunate than in the case of the *Egeria*, reported in our last issue, the mishap of the *Star of Peace* was accompanied by great loss of human life, there being but one survivor, it is feared, out of a crew of fourteen, with one passenger, a Chinaman. The seaman, Joseph Corbett, a native of Bristol, aged twenty-nine, made the following solemn declaration before Mr. Consul Winchester :—

I belong to the Naval Reserve, and shipped at Bristol on the 14th July, 1862, in the *Star of Peace*, and have been in her ever since. We came first out to Shanghai, from which we took a cargo of tea to Sydney, and returned to Shanghai with coal. We have been in the interval between twice to Chefoo; and on the 15th of January the ship sailed from Shanghai for this port. There were 15 souls in all, including one Chinese passenger. I do not know his name. I have heard him say he had a brother in Yokohama. The name of the captain of the vessel was William Eames, master; James Renton, 1st officer, of Plymouth; McLennan, 2nd officer, Stornoway; Peter Asmasson, steward (a Dane). Shipped in Bristol: John Tuwsell, A.B, Bristol; James Bennett, A.B., Bristol; Dennis M'Carty, A.B., Castletown, Ireland; George King, A.B., Shoreham; John James, O.S., native of Bristol. Shipped in Shanghai: Henry Bragg, A.B., native close by Dover, England; Thomas White, A.B., native of Edinburgh; Henry Graves, O.S., Whitehaven.

On the 31st of January about 4.30 A.M. I heard the chief officer say we were off Cape Omosaki. I was on watch; the captain and chief officer had gone to the cabin to look at the map. When the vessel went on, she did so quite easily on what appeared to be a coral reef. The weather was hazy; we were under short sail; we were running along the coast, and about half an hour before the captain had kept her off the coast a little. There were no signs of breakers; there was a man on the look-out. It was blowing very strong from N.N.E. as near as I remember; we were under close-reefed topsails, fore-topmast staysail and main spencer. As soon as it was perceived she touched, the yards were backed to get her off. The ship bumped heavily four or five times. I was up loosing the foresail and the mate called us down, thinking the mast would go. After the foresail was set, the ship backed off. When the pumps were sounded, three feet or three feet and a half of water were found in the well. The captain then ordered the men to the pumps and to get the boats clear. We got out the long boat and gig. There was another boat, the pinnace, but it was not deemed sea-worthy, and left standing. The boats were hoisted out alongside, and left hanging in the tackles. After we had got the boats out, and some water, biscuits, and cheese on board the boats, the pumps were again sounded and 6 or 8 feet of water, I can't be sure which, were found in the hold. The captain then ordered the reefs to be shook out and topgallant sails to be loosed in order to make the next cape. This was done, and the topgallant sails set about 6.30 A.M. After that we found we were making little way, and the water was washing over the decks—we sounded and found 12 feet of water in the hold, though the pumps were going all the time. The water was washing up to the boats and we feared losing them if we did not take to them. Thomas White was steering up to this time. All hands, officers and men, tried to persuade the captain to leave the ship but he declined to do so, and told the second officer to keep as close to the ship as he could in the gig.

Digitized by Google

McLennan, the steward, cook, and Thomas White were in the gig; the rest in the long-boat. The captain took the wheel from White before he went into the gig. He then ordered White into the gig. About ten minutes after we got into the boats, it was found that the gig could not live in the sea, and the few men in that boat came into the long-boat, and the gig was set adrift. We were then astern of the ship about a quarter of a mile. After that we saw the main yard of the ship squared, and we could not keep up with or near her on account of the sea: we tried to keep as near as we could, but we drifted in shore. The only sail we had set in the long-boat was the gib. We could not set the main and foresail on account of the weather, and because we had only the gig's mast, on which the gib was set as a mainsail. There was no quarrel or mutiny in the ship before we left it. We had the captain's permission to leave the ship. I had been 23 months in the ship with the captain, having been in her a previous voyage to the West Indies. I asked the captain myself to come into the boat. He told me he would not come, but that I was to go into the boat. The last time I saw the captain he was steering the ship towards the next cape. About 7 A.M. we got into the boats. About 7.30 I saw the ship go down, but could not distinguish whether she went down head or stern first: this was about half an hour after we got into the boats. The sea was higher where the ship went down than at the place where we were in the long-boat. We were closer in shore. The vessel had 150 tons of ballast, and had only 300 cases of glass and as many of champagne on board. She was drawing 12½ by the stern and 10½ by stem; her depth of hold might be about 16 feet. The Chinaman was in the long-boat. I cannot state what were the captain's hopes or object in remaining in the ship. We were lost on this side of Cape Omosaké. The captain may have hoped to see a ship and get assistance.

The captain was about fifty-four years of age. He was married; he has two daughters and a son. I have never seen these; but James Bennett, who was an apprentice, knew the family. The captain was a very quiet man, sober in his habits, and got on well with the crew: he was a strong man of his age. I did not hear the captain making any reproaches against himself or the officers for getting on shore. There were four hands pulling at the long boat and the chief officer steering when we were trying to keep near the ship. We were nearly two miles off the land. The ship might be going two or three knots; she was waterlogged, The gib in the long-boat was hoisted to keep her steady. We were trying to fetch the next cape. The master was on good terms with the officers so far as I know. The master was on good terms with the crew; he never quarrelled with us; he never struck any one; he was a very quiet man. The proposal to leave the ship came first from the officers and crew, not from the captain. We went aft; and he told us that he was not going to leave the ship, but that we were to go into the boats ourselves. The captain asked for no one to remain with him; he ordered White into the boat. Everything was done in the way of pumping to save the ship. She measured 293 tons. Nothing belonging to the captain was put into the boats, no chronometer, ships' papers, logbook, nothing. We were on the port tack at the time we struck. It was this side of the westerly point of Tootamy Bay when we struck. The mate said it was above five miles off the land. When the ship struck we were running off the wind with the yards braced up. After the ship got off the rocks the yards were squared. About three or four hours after we left the ship we got round the next point, and took refuge in an inlet where there were some Japanese junks. The chief officer and the Chinaman went on shore, and came back in about an hour, saying that the Japanese would keep us till they could communicate with Yokohama. We all landed, and remained on shore in the village till the 5th February (Friday). I don't know the name of the village. We were well treated at this place, and got potatoes, rice, and fish to eat. On Thursday, the 4th, while I had gone off to see if I could discern any signs of a ship, the second mate cut down a tree near a temple to make a mast for the boat. We had only the gig's mast in the long-boat, though we had all her sails; the mast was in the hold. When I came back on Thursday afternoon, I found the second mate working the tree, making it into a mast. I believe the chief mate must have ordered this tree to be cut down, for he directed me help the second mate to make the mast. There came a great crowd, and made signs on Thursday evening that we should go on; however, we did not leave till next morning, having then made a mast of the tree. The mate said the Japanese would not let us stay any longer. The mate had about 30 dollars with him, and paid away about 15 dollars for what provisions we had from this village. We left on Friday morning, the 5th, in company with a Japanese boat, and the same day about 1 P.M. we boarded the British schooner *Kung Mou*, of Bristol. The mate and two others, including myself, went on board. The mate, Renton, was about half-an-hour in the cabin with the captain of the *Kung Mou*, who offered to take us to Hong Kong, but that was declined by all of us, for we had then a fair wind for Yokohama. About 4 or 5 P.M. the wind came off the land and blew us off, and we were obliged to lash four oars to break the sea. About 9, the wind died away, and we kept to our oars all night, and about 8 A.M. a breeze sprung up and we stood in towards the cape. The Japanese boat that was with us went to a large village, but seeing the schooner, we declined to accompany them.

About 8 A.M. on the morning of the 6th, we headed up towards the land and got into a bay, at the east side of the gulf, about noon. We pulled the boat upon the beach and lay there all night in the boat. The chief officer and the Chinaman went into the village. The Chinaman, on coming back, said the Japanese would send a boat along with our boat. Next morning, Sunday 7th, we launched the boat, and on getting outside the rocks and finding no Japanese boat, we pulled on by ourselves, and got round the next headland. There was an island in the bay of which this headland formed the point; and the chief mate thought it was the way to Yokohama, but a Japanese boat we met motioned us to go round the next point. A breeze then sprung up between 10 and 11 A.M., and we set close-reefed mainsail and foresail on the port tack, and carried on up to about 1 P.M., when the boat was capsized. The second mate, McLennan, was at the helm. One of the men attended an oar on the lee quarter, and the chief mate was looking out for the seas, to luff up and get under the weather shore. We were then about mid-channel, very near abreast of Uraga. When the boat was capsized, all came up except Dennis MacCarty and Henry Bragg. We all clung round the boat; 4 or 5 of us got on the top of the keel—that is to say, Witnal, Graves, Bennett and McLennan. The sea righted the boat twice or thrice, mast uppermost, but it always capsized again, and all but White, Witnal, Bennett, and myself were shaken off the last time the boat turned. The second mate, who was in the life-buoy, was drowned in it. The steward and the second mate had both hold of the life-buoy, and both were drowned. The second mate was within the circle of the life-buoy and the steward had hold of it outside. The second mate had his arms over the life-buoy: when I took the life-buoy from him he was drowned. I had no struggle with him for the life-buoy; he was quite dead. I slipped his arms over it and he went down like a stone. When I got hold of the life-buoy, I swam as well as I could towards the shore. The sea helped me—I am a pretty good swimmer, but was nearly half drowned when I got into the life-buoy. I think it must have been near 4 P.M. on Sunday, the 7th, when I got on the east side of the bay, about opposite Uraga. I was thrown on the rocks and managed to scramble up. The life-buoy saved me. I could then see nothing of the boat. I went into the nearest house, and remained there till Saturday, the 20th Feb., that is, fourteen days. I was well-treated all that time; had plenty to eat, and clothes from the people of the house. The Japanese owner of this house took off my clothes, put on me dry ones, and lit a fire for me. I was much exhausted. I remained in his house throughout the fourteen days. His name is Kosemon; he is married, and has three children. I wrote a letter to the Consul on Wednesday, the 10th, and Kosemon promised to send it off. Kosemon is a fisherman, and was very good to me all the time I was there. I landed in my cotton shirt and drawers. I was an object of great curiosity to the Japanese at this place, but they were all very kind to me. On Saturday, the 20th, I was taken across to Uraga, and put into a tea-house with the officer and interpreter. I remained there well treated on Sunday and Monday; on the Monday I got some European clothes, and yesterday, Tuesday, came back here.

After we were in the boats, we saw the main yard squared. It had been backed to enable us to get in the boats. The captain must have done this himself. I am doubtful as to the precise direction of the wind after the ship was on the rocks, and we got into the boats. We had had a rough passage from Shanghai. There was no spirits in the boats, a glass was served out to us after we got the ship off, by the steward. There was no allowance of spirits served out to the crew. None of the champagne was touched that morning.

Read over to declarant before signature and solemnly declared to be the truth.—JOSEPH CORBETT.

Declared before me at the British Consulate, Kanagawa, this 24th February, 1864.—CHARLES A. WINCHESTER, H.B.M's. Consul.

The *Commercial News* observes on the above:—"We need not comment upon the strange conduct of Captain Eames in deliberately devoting himself to death, nor upon the ill-fate of the crew after having been well saved from the wreck; but the kindness of the Japanese, wherever the unfortunate crew had occasion to test it, is above all praise; and we trust that the humane, hospitable treatment extended to the survivor by a poor fisherman and his family on the opposite side of this bay, in the province of Kadzusa, will not be allowed to pass unacknowledged by those interested in the prosperity of commerce—by the merchants as well as by the Government of the country to which the merchant seaman belongs. H. B. M.'s authorities have taken the necesssary steps for bringing the matter before the Board of Trade in England, but the delay which such a course entails is likely to reduce the moral effect of any acknowledgment that may be made, and it would be well if something could be done on the spot and at once, to mark the gratitude of this mercantile community for humanity and disinterested kindness shown by a poor Japanese to a merchant seaman."

Two reports have reached us (says the same journal of the 24th February), which we give without vouching for the truth of either. One is to the effect that there is another wreck down the coast, some ship having struck on a rock near Volcano Island, and that the crew were saved and accommodated in a temple in that neighbourhood. This is probably another version of the wreck of the *Star of Peace*. The other report is that some steamer had lately been fired into on Satsuma coast, and considerable harm done to the vessel and to those on board. This is highly improbable, and the report may have originated also in the wreck of the *Star of Peace*. Both reports are traceable to Japanese fishermen who came in yesterday from a cruise outside the bay.

As there is no further reference to the above in the *Commercial News* of the 2nd March, both rumours may be taken as having no foundation.

We have by this mail further accounts of the loss of the Russian Government schooner *Perwee*, which ran ashore on the 8th November last on the Nambu coast, on the opposite side of the Tsugar Strait to that on which Hakodadi is situated. It would appear the Russians met with no such kindly treatment from the Japanese as did the crew of the *Egeria*, or the sole English survivor of the *Star of Peace*. Mr. Frederick Wilkie, an enterprising merchant of Hakodadi, well acquainted with the language and customs of the Japanese, was selected by the

Digitized by Google

European Consuls to visit the locality, and he accordingly proceeded thither, accompanied by Captain Vyse, the British Consul. From Mr. Wilkie's report, it is clear that the Hakodadi officials are, some of them, much behind others of their brethren in civility and promptitude. He says :—

In the latter part of the day (Nov. 21) we again took to boats, and by 4 P.M. arrived at the village of Oestaki. Along the beach in front of the village we saw many fragments of the wreck, in the shape of planks, broken spars, torn sails, &c. Our first care was to discover the unfortunate officers and crew ; the latter, twenty in number, we found drawn up near the beach, who pointed out a small hut where their commander and officers were located, to which we immediately repaired. We soon gained from Captain Naoomoff the particulars of the loss of his ill-fated schooner the *Perwee*. It was distressing to witness in what miserable quarters they had lived, as they informed us, for the last twelve days. The room occupied by them was not over twelve feet square, in a very filthy state, and in my opinion barely fit for human beings to exist in. The house was certainly one of the worst in the place ; and to add to this, the only food they had been able to procure was rice and raw turnips. I would particularly draw your attention to this point, because we discovered that a Japanese officer —although perhaps on a different errand—had been in the village several days, and had not taken a single step to afford assistance to the shipwrecked sufferers, who, having lost the greater part of their clothes, and the remainder being frozen or wet, were in a pitiable plight. This, as you are well aware, is not carrying out the stipulations of the treaties existing between foreign nations and Japan. By urging the officials who accompanied us, fresh and better lodgings were soon provided, as well as superior food ; and arrangements were made so that the whole party might start for the village of Tszae next day. Owing, however, to most unfavourable weather, we were forced to remain over another night. On the 23rd, we all reached Tszae at about three P.M., the boats which conveyed us being furnished by the officials. We here found quarters for the night, and next morning started in the Government boats for Hakodadi, but head-winds prevented us accomplishing any distance, and we were obliged to return again to Tszae. The day following the wind continued from the same quarter, and we rested on shore; but being short of food for so many months, we applied to the officers accompanying us for some provisions. Some few vegetables and two pheasants were provided, but owing to the bad weather no fish could be had. We consequently asked for a bullock, as there were many in the place ; but the officials informed us that they could not comply with our request without communicating with the officers of the Prince of Nambu, in whose territory we then were; they promised, however, to give us an answer at ten A.M. We learned privately that they were able to furnish us with a bullock. Owing to Japanese obstinacy, or whatever it might be, the officials brought forward one excuse after another, and in fact by deliberate lying kept us without beef until late at night : consequently we were the whole day with very little food. I entirely lay the blame of this on the Hakodadi officers, and these very men were sent for the purpose of rendering assistance. On the whole, the conduct of the officials was certainly not what could have been expected from agents of the Imperial Government of Japan, which professes such amity and friendship towards foreigners. Leaving the coast of Nambu on the morning of the 26th, we arrived safely at this port the same afternoon.

A fire took place on the premises of Messrs. Allmand and Co., in the Foreign Settlement, on Monday the 22nd February, when the English and French guards distinguished themselves by their early arrival at the scene, and by the prompt manner in which they exerted themselves to protect the premises. Their presence was very necessary, for facts show that there were thieves about. The comprador lost $1,500 in cash, and property of his own worth, $3,000. The cash and also a gold watch are supposed to have been stolen. Mr. William Wilson, who also distinguished himself by his active assistance, sustained some injury by his clothing catching fire. The burns were, however, not serious.

Arrangements have been made for the scavenger-work of the Foreign Settlement, at an expense of $1.35 per month on each house. In addition, $2,130 have been collected for the purchase of fire-engines, and annual subscriptions promised for the expense of the fire brigade to the amount of $1,255. The Imperial Insurance Company have been requested to procure three engines with their appurtenances.

CHINA.

SHANGHAI.

The dates are down to the morning of the 9th March. The English mail of 10th January arrived out on the 3rd March. Sir Harry Parkes, K.C.B., has assumed the Consular Charge ; Mr. Markham resuming his post of Vice.

On the subject of a Survey of the Settlement, the *Friend of China* says :—

In our last issue we published certain correspondence with the Municipal Council, on the subject of a survey of the British Settlement. This, Messrs. Kingsmill and Knevitt offer to do for, in round figures, something like £2,500, or £5. 10s. per acre. As thus:—We take the settlement to measure, within the limits mentioned, say 4,000 feet by 5,000 feet. This gives the area, reckoning 7,260 ft. to a mow, as 2,800 mow ; which, at three taels, equals 7,400, or [say the sterling figures before mentioned. Now, considering that only about the half of this area is built over, a dollar and a-half for measuring a line of 100 feet in length seems a trifle too much, and we would suggest the advisability of advertising in England for tenders to do the work. We undertake to say that three young surveyors in England would readily undertake the job for an average of £500 a-piece ; and if an advertisement went home next mail, we might have a qualified man and two assistants out by sea within six months, or by October next—quite early enough. If such three could not measure and lay down 600 acres within the following three months they would not know much of their business. Messrs. Kingsmill and Knevitt want about £5. 10s. per acre. We think that the half of this is sufficient ; and we ought to know something of surveying.

The convict David Williams, whose execution had been fixed for the 1st of March, succeeded in evading justice. On the evening of the 29th of February he was taken from the English jail to the room occupied by the American Marshal. In order to arrive at this room he had to walk under the drop of the gallows erected for his execution. He did not, however, appear in the least degree moved, and during the evening repeatedly asserted that he was ready for death, and would "die game." He eat and smoked, and about nine o'clock went to bed. The marshal and jailor remained all night with him, taking it by turns to watch. The jailer noticed that about half past five in the morning the prisoner suddenly commenced to breathe very heavily, and on going to ascertain the cause, he found a pool of blood under the man's head. He thought that a blood vessel had burst, and accordingly reported the matter to the deputy consul, and obtained medical assistance. On examination, however, it was found that a knife had in some way come into the prisoner's possession, and that with this he had succeeded in making an incision of considerable depth in his throat, severing the principal vessels. No means were left untried to restore him to consciousness, but he died in about an hour from the time that the jailer noticed the change in his breathing.

For some time past the crimes once so common have again diminished in frequency. However, the centre of the English settlement became the scene of an outrage which for brutality and audacity could not well be excelled. Mr. Dore, the superintendent of the naval store, had been dining at one of the foreign hongs, and about ten P.M. was returning with a native servant to his house at the head of the Maloo. When he arrived at the junction of Park-lane with the Maloo, immediately opposite a low public-house known as "Our House," he stooped down to obtain a light for his cigar. While stooping he was shot in the body, the ball (a spherical one) entering about three inches below the right breast. No attempt was made to rob him, although, as usual, there was not a policeman within sight or hearing. A foreigner who happened to pass a few minutes afterwards, was begged by the China boy to come to his master's assistance. The unfortunate gentleman was carried as soon as possible to the London Mission hospital, and thence to his own house, where he died.

At a meeting of the North China branch of the Royal Asiatic Society, the following resolutions were passed :—

Present.—Drs. J. Henderson, F. C. Sibbald and J. Johnston, Rev. R. J. Thomas, and Messrs. T. Hanbury, R. A. Jamieson, E. Lawrance, R. Hart, R. F. Gould, A. Wylie, J. M. Hockly, O. R. Crockett, and R. S. Gundry. Dr. Henderson, having been requested to take the chair, briefly explained the object of the meeting, which was to re-establish the North China Branch of the Royal Asiatic Society.

After some discussion, it was proposed by Dr. Sibbald, and seconded by Mr. Hanbury,

"That the North China Branch of the Royal Asiatic Society be revived, and for that purpose due notice be given in the local papers, inviting the original members of the others wishing to join, to meet at some place and time appointed, to make arrangements with regard to the appointment of office-bearers, revision of rules, &c."

This resolution having been carried, it was proposed by Mr. Hanbury, and seconded by Mr. E. Lawrance,

"That with a view to carrying out the resolution of Dr. Sibbald, a meeting of the former members of the society, and those desiring membership, be convened in the library on the 9th inst., at 8.30 P.M."

A vote of thanks to Dr. Henderson for presiding having been proposed by Mr. Lawrance and seconded by Dr. Sibbald, the meeting separated.

A second proclamation has been issued by the Futai respecting the terms of land at Soochow. He states by this that the question of the eligibility of foreigners to purchase land in the interior had been referred to the English Ambassador, and by the latter to Earl Russell. The Futai quoting the despatch from Mr. Hannon to the Shanghai Chamber of Commerce, gives

Digitized by Google

the following passage:—"With regard to the second point—viz., prohibition to open hongs or other buildings, and to reside permanently in the interior, I have to state that the twelfth article of the treaty of Tien-tsin upon which the claim of these privileges rest, is to the following effect:—Art. XII. British subjects whether at the ports or at other places, desiring to build or open houses, warehouses, churches, hospitals, or burying grounds, shall make their agreement for the land or buildings equitably, and without exaction on either side."

The *North China Herald*, on this subject, says:—"That the Futai has, accurately speaking, right on his side we cannot deny. The wording of the English translation is the version by which, in all cases of dispute, we are bound, but this fact does not affect the soundness of our conclusion that, so far as the Futai and his advisers are concerned, little sympathy exists between foreigners and the native authorities, and little desire is felt by the latter to render foreign relations more intimate. The Futai dwells on the fact that foreigners provided with passports are permitted to travel in the interior, but denies that any permission to acquire real property is tacitly involved in this concession. For some reason or another the Futai has come to the conclusion that it will be to his advantage to conciliate foreigners."

SOOCHOW.

The *North China Herald* gives the following as the latest from Soochow:—

By recent advices from Soochow we regret to learn that the four men, Dolle, Martin, Petit, and Easton, who were asleep on board the *Firefly* at the time of her capture by rebel agents, on the 14th of November, have been foully murdered either by the imperialists or the rebels. The balance of probability inclines towards regarding the latter as the perpetrators of this dastardly act, but we cannot as yet determine the question with absolute certainty. The facts, so far as they have hitherto been elicited, are as follow. When Major Gordon was on his way to Yih-shing, he passed through Wu-sih, on the 24th Feb., to a village about a mile into the country, where an old woman volunteered to show him a spot at which she asserted four foreigners had some time previously been decapitated, burned, and then buried. Gordon immediately proceeded to the place indicated by his informant, where he found lying on the surface of the ground a penknife, and a waistcoat pocket containing a handkerchief marked with Martin's name. On digging a few feet four corpses were found, answering as far as could be ascertained to the description of the four men. The flesh which remained was charred, but the size of the bones and the colour of the hair showed conclusively that the victims had been foreigners, and that they were, in all probability, the ill-fated prisoners seized on board the *Firefly*. That at least one of the men whose remains were discovered belonged to that party was put beyond a doubt, as on one of the bodies a waistcoat was found, from which the pocket mentioned above had evidently been torn. The remains were collected and sent to Shanghai as aids in whatever further investigation may be deemed necessary. The date of their execution may be ascertained with accuracy from the fact that, on the wall of a house near the grave, was found scratched the date "Dec. 11th, 1863." As, therefore, Wu-sih surrendered on the following day, it must have been either on the evening of the 11th or on the morning of the 12th that the execution took place. A report is current that Easton's servant escaped from Chan-chow a few days before Christmas, and discovered from some Wu-sih refugees whom he met on his way to Shanghai that his master had been beheaded by order of Chung Wang. Major Gordon states that the Futai gave orders for the burial, but has not satisfied himself who was guilty of the murder. We have, ere this, learned to look without surprise on any proof of malignity or treachery on the part of the Futai. We are not, therefore, disposed to dismiss from our minds all suspicion as to his guilt in the matter, though want of evidence compels us to bring in a verdict of at least "not proven." But if the rebels were, in truth, guilty of this act, on the Futai's head be it. In simple justice we are bound to remind our readers that no case has hitherto been instanced and satisfactorily proved in which foreigners were badly treated in the country held by the insurgents. Whether this forbearance on their part arose from motives of policy, or whether it was dictated by the principles of humanity inculcated by the religion once professed by the rebel leaders, may remain an open question. Whichever it may have been, the slaughter of the Wangs was to the Chinese mind sufficient to justify the execution of the four foreign prisoners; since we must remember the atrocity committed by the Futai was, by Chung Wang, of course ascribed to Gordon. We have thus discovered another instance in which the Soochow massacre has borne bitter fruit; and can only regret the more deeply that, although consequences so dire have followed from its having been attributed to an English officer, that officer gives countenance to the suspicion in the eyes of the Chinese, by continuing to co-operate with one so steeped in treachery as is the Futai.

At the date of the latest advices from Soochow, news had been received to the effect that Gordon was successful in his attack on Yih-shing on the 2nd inst., but no particulars had arrived. Ching was to have assaulted Kia-shing-fu on the 5th inst. The destitution prevailing at Wu-sih still continues, and is only partially alleviated by the efforts made by the local officials and the benevolent in Shanghai. Human flesh is said to be constantly on sale in the markets. Some few Shanghai merchants have agreed to do what they can towards relieving the distressed country people, and have accordingly portioned out the months of the ensuing spring and early summer amongst the richer members of the guilds. Yang-Ta-Kee, the well-known Ningpo banker, has undertaken the provision of rice for the first month, and has sent large parties into the surrounding districts to inquire into the wants of the inhabitants. The Futai has also remitted the embargo on the export of rice from Soochow, in favour of those who may choose to purchase it for benevolent purposes. The Taotai Woo had lately visited Soochow, and had had several interviews with the Futai.

KIUKIANG.

We (*North China Trade Report*) have mentioned on a previous occasion that the Futai intended to deport to their homes the inhabitants of Kiang-si whom he found among the rebel garrison that surrendered at Soochow. This intention has been put into execution in the heartless manner usual with the Chinese. Our correspondent advises us that on the 11th inst. the s. s. *Nora Creina* arrived at Kiukiang with two lorchas in tow, bringing 1,100 of these unfortunate people. They were landed on the same afternoon; but no provision had been made for their arrival, and they were obliged to shift for themselves. Many of them, too weak to search for shelter, lay down upon the bund to pass the night. Eight or ten corpses were found in the morning, and many of the others were lying in a dying state. Several also died during the voyage. The local authorities have paid no attention whatever to these unfortunates, beyond burying the dead. It seems questionable humanity to send away starved wretches without making provision for their being attended to upon their arrival at their destination. Unless it were intended to afford them some aid in regaining their homes, it would have been better to have allowed them to remain at Soochow, where they would have died of starvation quite as comfortably as on the bund of Kiukiang.

NINGPO.

The anticipation of the Che-kiang Futai that the rebels would evacuate Hang-chow does not appear likely to be realised. On the contrary, according to the latest advices, the old energy of the latter was reviving, and the Imperialists were in so critical a position that a retreat on Sao-tsan was not improbable. The garrison of Yu-hong, by a vigorous sortie, had succeeded in capturing fourteen of the Fauti's stockades, and M. D'Aiguebelle, who lost a number of men by desertion at new year time, was said to be thinking of re-crossing the river. This unsatisfactory state of affairs is, in a great measure, attributable to the insane jealousy of the Futai, in preventing the Franco-Chinese force from acting independently, or even from opening fire on the city when they had placed guns in position, in close proximity to the wall. The delay naturally gave the rebels confidence, as they would attribute it to fear of the result of an attack. There is a probability of Colonel Cooke's Anglo-Chinese contingent advancing to the front.

HONG KONG.

Dates are down to the 15th March. The English mail of 26th January arrived out on the 14th march. Sir Macdonald Stephenson was in Hong Kong to ascertain the practicability of constructing lines of railway in China. The *China Mail* on the subject says:—

The idea of having railways in China will most likely be favourably received long after a line has been opened from Shanghai to Soochow, a project said to be on the eve of maturity. A country that has been so famous in the past for the excellence and number of its canals and for

Digitized by Google

the employment it was able to provide for them must, *prima facie*, be a tolerably suitable country for railways. It is more than two years since the design of having a railway between Peking and Tientsin was first mooted; the idea has not been lost sight of, though it was shelved at the time; while that of a line between Hankow and Canton has always been the favourite one in the South. Railways make trade as well as divert it into new channels, and though the last-named plan would drain away the commerce, or a large part of it, which has at present its outlet by the Yang-tsze, it would also lead to new fields and increased facilities for business. The Canton of old would revive and come forth with far more than restored health, and Hong Kong would become a more bustling mart of trade than it is now. As a political move, nothing could suit a large empire like China so well as swift communication. It would not only overawe rebellion and maintain peace in the land, but the people of different provinces would have intercourse with each other and with foreigners, and the very best relations would be maintained at once in domestic and foreign affairs. We believe that the Hankow and Canton line is soon likely to receive the attention of scientific and experienced men. The funds could be raised both here and at home should a survey be favourably reported upon. The British Government are willing, we believe, to countenance and assist the scheme in every way short of guaranteeing the shares, and the mercantile firms here are likely to receive the proposal very favourably.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	. . .	6 months sight.	6s. 6d. to 6s. 6½d	6s. 6d. to 6s. 7d.
At Foo-Chow-Foo (per dol.)	.	6 ditto	...	...
At Canton, At Hong Kong, At Macao	. . .	6 ditto	4s. 11d.	5s. 0d. to 5s. 1d.
At Singapore	. . .	6 ditto	4s. 11½d. to 4s. 11½d.	4s. 11½d. to 5s. 0½d.
At Manila	. . .	6 ditto	4s. 8d.	

At Shanghai: Bills on India, Rs. 308 to 310 per 100 taels. At Hong Kong: Rs. 233 to 235 per $100. Bar silver at Shanghai, 110. Hong Kong, 4 prem. Mexican Dollars at Shanghai, 76; and exchange on Hong Kong, 25 discount.

The Circular of Mr. Sharp says:—

GOLD.—Of this bullion we have received during the last fortnight from San Francisco and Australia about five and a-half lakhs of dollars' worth: this includes a very considerable sum brought forward in Chinese passengers' parcels.

SILVER.—About a lakh and a-half, has been received and we hear of no transactions at present.

DOLLAR CURRENCY.—Seven hundred thousand dollars have been received during the fortnight; the amount by French mail not having yet come to hand. The amounts sent away are in total very little over two and a-half lakhs. Clean coin are at an almost nominal price at present.

DISCOUNTS AND MORTGAGES.—Two or three lakhs of short paper have been discounted at ten per cent. Merchants have as usual taken their own paper on more advantageous terms for small sums.

MALACCA STRAITS

SINGAPORE.

The advices from this quarter are to the 23rd March. The London mail of the 10th February reached on the 17th March, but the Messageries steamer, with the Marseilles mail of the 17th February, had not made her appearance.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BLAKISTON—On the 22nd April, at Benhall Vicarage, Suffolk, the wife of the Rev. Horace Mann Blakiston, of a son.

BRAND—On the 22nd April, at the Cedars, Upper Tooting, the wife of Harvey Brand, Esq., of a daughter.

CAINE—on the 6th March, at Swatow, the wife of G. W. Caine, H.M.'s Consul, of a daughter.

CAMPBELL.—On the 17th April, at Elleralie, Streatham, the wife of Patrick Campbell, Esq., of a son.

ELLISSEN—On the 11th April, at 9, Warrington-terrace, Maida-hill West, the wife of A. Ellissen, Esq., of a son.

HARRISON—On the 17th Feb, at Amoy, the wife of A. J. Harrison, of Imperial Maritime Customs, of a daughter.

HOGG—On the 13th April, Mrs. Joseph Hogg, at St. James's-street, Piccadilly, of a daughter.

SARGEAUNT—On the 22nd April, at Berrylands, Surbiton, the wife of W. C. Sargeaunt, Esq., of a son.

TOWSE—On the 23rd April, at 13, Albert-road, Regent's-park, the wife of Robert Beckwith Towse, Esq., of a son.

VACHER—On the 21st April, at Belmont House, Lee, the wife of W. H. Vacher, Esq., of a daughter.

WADMAN.—On the 17th April, at Park House, Staugham, Sussex, the wife of G. Wadman, Esq., of a son, stillborn.

MARRIAGES.

ATKINSON—HUNTER.—On the 1st March, at St. Paul's Cathedral, Hong Kong, by the Rev. J. H. Gray, M.A., Consular Chaplain, Canton, Augustus William Henry Atkinson, Lieut. 99th Regt., Private Secretary and A.D.C. to his Excellency the Governor of Hong Kong, second son of Thos. Atkinson, Esq., M.D., Inspector-General of Hospitals, to Pauline Rivis Hunter, eldest daughter of William C. Hunter, Esq., of New York.

HEYDE—EGGERS.—On the 21st inst., at Bremen, at the Cathedral, Ferdinand Von der Heyde, of Singapore, to Adelheid Eggers, of Bremen. No cards.

RAMSAY—CRAWFURD.—On the 23rd April, at Holy Trinity Church, Brompton, by the Lord Bishop of Hereford, assisted by the Rev. E. Baskerville Mynors, George Dalhousie Ramsay, Esq., son of the late Sir Alexander Ramsay, Bart., of Balmain, in the county of Kincardine, to Eleanor, youngest daughter of John Crawfurd, Esq., of 4, Elvaston-place, Queen's-gate.

WONG-KIU-TAK—YING.—On the 15th Feb., at St. John's Cathedral, Hong Kong, by the Rev. J. Stringer, assisted by the Rev. J. R. Wolfe, Wong-Kiu-Tak to Yeunga Ying (baptised name Lydia).

DEATHS.

BOJE—On the 9th March, at Hong Kong, Edward Boje, aged 22 years.

WARRENS—On the 28th Feb., at the Civil Hospital, Charles Warrens, Engineer of the steamer Sir Jamsetjee Jeejeebhoy.

FRANKS—On the 13th April, at Streatham-common, Bernard, the infant son of Joseph F. and Catherine S. Franks, aged three months.

GREENFIELD—On the morning of the 10th April, at 15, Whitehall-place, Hume Greenfield, Esq., Assist.-Secretary Royal Geographical Society, in the 36th year of his age.

LEWER—On the 7th March, at Whampoa, Robert Lewer, surgeon, aged 42.

ROSS—On the 28th Feb., at Hong Kong, James Gordon, son of Mr. Alex. Ross, aged 3 years and 1 month.

ROBERTSON—On the 2nd March, at the Civil Hospital, Hong Kong, George Robertson destitute seaman.

SMALL—On the 8th March, at the Civil Hospital, Hong Kong, W. P. Small, seaman of brig Fah-kee.

SMITH—On the 7th March, at Hong Kong, Alexander Smith, Police Sergeant Dockyard (apoplexy), aged 29 years.

STEPHENSON—On the 8th April, after a few days' illness, at 10, Rochester-square, Camden-town, deeply regretted by all who knew him, James Stephenson, Esq., late of Hong Kong, aged 48. Friends will kindly accept this intimation.

WAGNER—On the 12th March, at the Civil Hospital, Hong Kong, of hydrophobia, Samuel M. Wagner, shipwright, &c., aged 40 years.

WAGNER—On the 5th March, at the Civil Hospital, Hong Kong, Wm. Wagner, destitute seaman.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: Since the date of last report the teamen have evinced a little alarm at the lateness of the season, and have become slightly easier in their terms for Congous. There were several orders on the market, and the result was a little business at a decline of 2 taels on previously ruling rates. Buyers generally are very cautious, as even the reduced quotations exhibit no margin in the prices current in London at date of last advices. In scented teas and Canton greens the transactions have been small. No additional supplies of country greens have come forward, neither are any more operations reported. The settlements of the fortnight are reported as under:—Congous: 7 chops, say 6 chops black leaf Pekoe flavour at 24½ taels to 26½, and 1 chop black leaf full Pekoe at 33½; also 450 ch. and 200 half do., Canton packed, at 17 to 18. Scented Caper: 900 boxes good middling at 18. Scented Orange Pekoe: 1,100 boxes good middling, at 24½. Canton Gunpowder: 700 boxes and 100 half-chests fair to middling at 18 to 20. The stock remaining on the market: Congous, 38 chops; Scented Caper, 19,000 boxes; Scented Orange Pekoe, 4,000 boxes; Canton Gunpowder, uncertain; Country Greens, 3,500 packages.

FOOCHOW.—The demand during the fortnight has been rather animated, and settlements of Congous have been made to a fair extent at rates fully equal to last quotations. Latterly, however, buyers have exhibited less desire to purchase, but the teamen are firm, and will not entertain any reduction, The following are the settlements of the fortnight:—Congous: 7,000 chests and 6,500 half-chests, at 8 to 22 taels. Souchong: 700 chests and 300 half-chests, at 17 to 19 taels. Pekoe: 200 chests, at 19 to 20 taels. Oolong: 800 half-chests, at 13 to 15 taels. Scented Teas: 3,000 boxes, at 20½ to 22 taels. The comparative supplies to date stand thus:—

	1863-64.		1862-63.
Congou and Souchong..	605,500 ch.	..	602,800 ch.
Oolong	176,700 hf.-ch.	..	211,100 hf.-ch.

The comparative stocks stand thus:—

	Now.		Same period last year.
Congou..	10,000 ch.	..	7,100 ch.
Souchong	2,000 ,,	..	none.
Pekoe	200 ,,	..	1,400 ch.
Oolong	1,200 hf.-ch.	..	2,500 hf.-ch.
Scented..	1,060 bxs.	..	1,000 bxs.

SHANGHAI.—The total settlements and re-shipments for the present season to date amount to 385,700 chests, against 284,700 do. corresponding period last season. Green Teas: The finer description of Fychow and Moyune have been inquired for, but the firmness of holders has been so great that the business done has been small. Some few parcels of Shanghai packed Hoochow leaf have been settled at extreme rates, and quotations for all descriptions are fully a tael higher than last mail The settlements of the fortnight are stated at 2,500 half-chests. Fychow and Moyune at 40 to 42 taels, and 1,000 half-chests Shanghai packed at 30 to 35 taels.

HANKOW.—No transactions are reported during the fortnight. The stock remaining on the market consists of 10 chops common Oonahms, which are held at 12 to 19 taels, but which being the refuse of the season, no one cares about buying. The total export of the season to date consists of 679 chops, or 362,100 chests—against 279,400 chests corresponding period last season.

KEWKIANG.—In black teas there is no business to report. The settlements for the fortnight of green teas are reported as under:—8,500 half-chests Moyune, at taels 33 to 40¾; 1,800 half-chests mixed, at taels 29 to 33½; 500 half-chests Fychow, at taels 34½; 550 half-chests Kewkiang packed, at taels 33; total half-chests, 11,050. These prices show no alteration in rates. The stock remaining unsold is stated at 25,000 half-chests. Very little more is expected from the country this season.

YOKOHAMA.—Settlements for the month amount to about 1,000 piculs, taken at about previous rates. The unsold stock is estimated at 1,150 piculs. Common, $8 to 12; common to fair, $14 to 17; fair to good; $18 to 25; good to fine, $26 to 29.

RAW SILK.—SHANGHAI.—During the early part of the fortnight, more disposition to purchase was manifested, and 600 bales, principally Yuenfaas and No. 3 Tsatlees were settled at former quotations. The unfavourable advices of the home market by the 11th Jan. mail, combined with an advance in the rate of exchange, has latterly entirely checked the demand; on the other hand, no supplies have come forward from the interior, and stocks being much reduced, holders are very firm. The receipts of the fortnight from Japan amount to 158 bales. The total receipts of the present season to date amount to 38,000 bales, against 67,590 bales last season, and 74,300 bales the season before. The unsold stock is 4,300 bales now, against 2,500 corresponding period last season, and 12,400 the season before. The following are the latest quotations:—Tsatlees, No. 2 chops, 430 to 440 per picul; 3, 415 to 425;

Digitized by Google

market, 3, 405 to 415; 4, 390 to 400; 5 and com., 375 to 385; Taysaams, 1 and 2, 390 to 420; 3 and infe., 340 to 380; Yuenfa, 1 and 2, 405 to 425; 3, and infe., 375 to 395; Hainings, 375 to 420.

MACAO.—Some small sales of Cumchook at $390 have been made for the Straits, leaving on the market 5 piculs of inferior Loong-kong held at $420, and some 30 piculs Cumchook and Kow-kong for which $390 and $360 respectively are demanded.

YOKOHAMA.—Settlements for the past month are about 100 bales, making the total to date 13,600 bales, against 19,500 bales; leaving a stock of 150 bales against 600 bales last year. Throughout the month the market has been extremely dull; scarcely any arrivals; excepting about 100 bales which came in during the past two or three days, and future supplies are still enveloped in great obscurity. The steamer will take only 38 bales.

DRUGS, &c.—Cassia Lignea, $16½ to 17, stock 1,500 piculs. Cassia Oil is quoted 230 to 235, but no supplies come forward and there is no stock. Cassia Buds are quoted 47 to 48—no sales reported—stock 80 piculs. Star Anniseed quoted 22 to 22.50, but no supplies. Anniseed Oil 160 to 170—no sales, stock 10 piculs. Rhubarb, scarce, at 60 to 70. Gamboge, no stock, quotation 40 to 45. China Root, no transations, stock small, quotation 3.50 to 3.75. Galangal, no business done, stock 500 piculs, quotation 3.50 to 4. Vermilion has advanced to £48 per box. Cassia, nominal at 4.50 stock 100 piculs.

CAMPHOR.—HONG KONG.—The whole stock on hand at the time of the departure of last mail has been cleared at $16¼ to $16¾ per picul and the market is at present bare, with exception of a few very small lots in the hands of Chinese. Further supplies from Formosa are shortly expected.

RAW COTTON.

CANTON.—The sales of the fortnight are reported at 1,214 bags Shanghai at taels 23.2 to 24, and 650 do. Ningpo at taels 23.8 to 24.7. Stocks unsold 1,337 bags Shanghai and 550 do. Ningpo.

HONG KONG.—The demand noticed in last report has been maintained throughout the fortnight, on the part both of foreigners and natives. The receipts have been small, and rates have advanced $1 to 2 on previous quotations. Holders are firm and expect an advance. In the absence of further advices from Europe, they seem inclined to wait the arrival of the mail. The transactions of the fortnight are reported at about 10,000 pls., the stocks unsold being about 21,000 pls. The quotations are:—Shanghai, $32 to 35.50; Ningpo, 34 to 36; Japan, 37 to 38, according to quality. The stock in the hands of both native dealers and manufacturers is very low, and a good demand exists for shipment to Canton.

SHANGHAI.—Prior to the arrival of the London mail of 10th January the demand had become languid, and difficulty was experienced in effecting sales, except at prices which holders were not inclined to or could not accept. The advices of the Liverpool market of the 9th January, reporting an advance in prices of ⅛d to 1d. per lb. for East India, and 1d. per lb. for other sorts, and the stocks proving so little in excess of the estimated amount, a reaction took place in this market, and considerable settlements of Hankow and Up-River cotton were made at tls. 22 and tls. 24 per picul. Shanghai Staple is quoted tls. 20 to tls. 22 per picul according to quality and condition.

NINGPO.—Supplies arrive scantily and appear exhausted.

YOKOHAMA.—A steady business to be transacted, and prices have advanced to $280. Supplies are but moderate. The exports since 1st July have been as follows:—To Shanghai 1,432 bales. Hong Kong 16,819 do. England 23,114. U. States 342 do. Total 41,707 bales, against 6,227 bales corresponding period last season.

OPIUM.

NEW PATNA.—Clearances during the first part of the last fortnight were made freely at $512.50 to 515 per chest, latterly there has been little doing, owing to scarcity of stock, and prices are now quoted at 535 per chest (cash), and to arrive 490 per chest.

NEW BENARES.—Prices have remained very steady at $500 to 505 per chest, and latterly has been in but moderate demand.

MALWA.—There is an extremely small stock now in the market, and mostly of an inferior description; prices are now $710 per chest, at which rates sales have been made, against 685 to 690 last advised.

TURKEY.—Stock said to be much reduced, and prices have ruled from $510 to 515 per picul.

CHINA IMPORTS.

COTTON YARN.—The annexed quotations for this article show a slight decline upon those current when the last mail was despatched, and the sales effected in Hongkong during the fortnight amount to 140 bales, and 84 bales of damaged Twist sold by auction. In Canton there have not been any sales, and prices remain unchanged. Grey Shirtings: Have been in but limited request, and prices are scarcely so firm. Sales amount to 2,500 pieces, and 1,200 pieces moved off by public sale. These goods show a decline in the Canton market of 10 cents per piece, without sales. White Shirtings: The value of these goods remains unchanged, and the sales of the fortnight aggregate 4,500 pieces. T-Cloths: Meet with hardly any inquiry at the hands of the native dealers, and the only sales effected of these goods during the fortnight consist of damaged Cloths, which have been moved off by public auction to the extent of 2,300 pieces. Some 5,500 pieces have also been taken by foreigners. The value of these goods has declined materially in Canton. White Spotted Shirtings, dyed do., Brocades, White and Coloured: The business transacted in these goods during the fortnight is confined to the sale of 1,200 pieces of the first-named description at the rates previously current. White Brocades show an advance of about ten cents per piece upon last quotations, but other kinds remain as before. All fancy goods show a material depreciation in value in the Canton market. Damasks: Without change in value, or sales to notice. Chintzes: Have met with some inquiry, and sales of 2,000 pieces are reported for the fortnight. Handkerchiefs have also been in request, and the sales since the date of last circular amount 2,600 dozens.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Without material change to notice in value, the sales which have been effected during the fortnight amount to 700 pieces of the first-named description of cloth. Of Medium Cloths some 40 pieces have changed hands. 120 pieces Spanish Stripes sold in Canton. Long Ells: Are quoted slightly lower for the inferior qualities imported, but HH goods remain unchanged in value, and the sales effected in this market during the past fortnight are reported at 500 pieces, and 300 pieces damaged goods disposed of at public sale. Camlets: An average amount of business, at a slight advance in value, has been done in these goods since the date of last circular, and the sales amount to 560 pieces. The sales in Canton amount to 100 pieces. Lastings remain without change in value, and the sales of the past fortnight amount to 200 pieces. In Canton these goods have advanced 50 cents to $1 per piece, but without sales. Blankets Have again met with moderate inquiry, and have been placed in this market to the extent of 660 pairs.

METALS.—Iron, Flat, &c.: The demand for iron in this colony during the fortnight has been confined to round bar, of which description about 500 piculs have changed hands; prices of all sorts remaining unchanged. A small sale of iron wire, amounting to 30 piculs, is also reported. There are not any sales to notice from Canton, and prices remain unchanged. Lead: The quotations of lead both here and in Canton still continue extremely low, and the sales of the fortnight in this colony are put at about 1,600 piculs, of which some 1,100 have been taken by foreign purchasers. In Canton 2,000 piculs have changed hands at previous rates. Tin: 778 slabs of tin have changed hands during the fortnight at previous rates. Tin-Plates: Show a slight decline in value in this colony, where the sales since the commencement of the month amount to 300 boxes. Steel: The sales effected during the past fortnight amount to 350 tubs.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: Feb. 24, Albuera; 25, Merse. From Liverpool: 22, Victoria Cross. From Glasgow: 20, Burman From Newport: March 7, Idas. From Newcastle: Feb. 22, Mandarin; March 2, Neville. From Sunderland: Feb. 24, Western Continent, and Seaton.

At FOOCHOW.—None.

At HONG KONG.—From London: Feb. 29, Flying Spur. From Liverpool: March 9, Julia Ann. From Cardiff: Feb. 29, Trio and Maria Bartlett; March 8, Denmark. From Sunderland: March 2, Hyderssa. From Newcastle: 6, Otto; 11, Wilhelm. From England: 5, H.M.S. Scylla. From Bordeaux: 2, Bouqueyran. From New York: 3, D. Fex.

At MANILA.—From Liverpool: March 5, Aureliana. From Glasgow: 7, Chase.

At SINGAPORE.—From Newcastle: March 16, Margaret Campbell. From Cardiff: 21, Suez. From Bordeaux: March 7, C. la Londa. From Rotterdam: 7, Candati. From Hamburg: 20, Blacher.

At BATAVIA.—From London: Carl Julius. From Liverpool: Fop Smit.

At BANGKOK.—None.

DEPARTURES.

From JAPAN.—For London: Feb. 3, Cymbeline and Mary Shepherd; 17, Cissy; 22, Macedon. For New York: March 1, Benefactor.

From SHANGHAI.—For London: Feb. 27, Thomas and Rebecca, From Liverpool: 20, Antelope; 24, Bentinck and Polmaise; 25, George Ruxton; 26, Blackburn; 29, Macassar; March 3, Berdinkha. From New York: Feb. 23, Mercara.

From FOO-CHOW.—For London: March 6, Robert Henderson.

From HONG KONG.—For Liverpool: Feb. 25, Crest of the Wave and Nancy Brysson; March 7, Patrician; 11, Vanguard. For England: 8, H.M.'s Encounter.

From MANILA.—For Liverpool: Feb. 24, Burdeos y Habana No. 1; 26, J. A. U.; March 2, Conception; 5, Cervantes (via Cadiz). For New York: 3, Surprise.

From SINGAPORE.—For London: Feb. 17, Avonale.

From BANGKOK.—None.

LOADING.

At JAPAN.—For London: Abbotsford, Anglo-Indian, Meppel, W. W. Smith, Auld Reekie, Milbrook, and Ann Adamson. For New York: Osborne.

At SHANGHAI.—For London: Birtie, Samuel, Spirit of the North. For Liverpool, Advance, Netherby, Express, Lauderdale, Glengairn, Mayflower, Simoda, and Fort William. For New York: Cornelia, Volunteer, Eva, and Egean.

At FOOCHOW.—For London: Daybreak.

At HONG KONG and CANTON.—For London: Black Watch, Queen's Own, and Canaan. For Liverpool, Black Prince, and Berwickshire Bristow. For New York: Sophie.

At SINGAPORE: None.

At BATAVIA.—For Rotterdam: S. Vanlieel, and Albrecht Beyling. For Amsterdam: Australie, Willem Daniel, Brederode, Catherine, G. F. Lessing.

At BANKOK.—To Europe: None.

AT SINGAPORE.—For London: Eleanor. For Bordeaux: Jarva. For New York: Marzburg and Reynard.

FREIGHTS AND CHARTERS.

JAPAN.—To England, silk, £6, and £6. 10s. to £7 for cotton and tea.

SHANGHAI.—Tonnage is in good demand for suitable vessels for coasting purposes, but the inquiry for Europe is small; to America it is somewhat better. The following are the rates:—To London, £3. 15s. To New York, £3. 15s to £4. 7s. 6d.

FOO-CHOW.—To London, £5.

HONG KONG.—Rates remain good, although there are a large number of vessels in the harbour; there is a brisk demand for the rice ports, and some inquiry for London, at £4. 10s. to £5.

MANILA.—The last charter was for Liverpool, at £5. 15s. for Unclayed Sugar, and £6. 5s. for Hemp.

Digitized by Google

BATAVIA.—Tonnage is much required, and vessels arriving are at once taken up. The rates to Europe are equivalent to £5. 5s. per ton.

BANGKOK.—To Hong Kong, 55 to 60 per picul, inquiry moderate.

SINGAPORE.—Vessels are in less demand for coast, but for Europe freights are advancing. The following are the rates to London:—tin, £3; sago, sago flour, gambier, &c., £3. 10s.; pepper, hides, gutta percha, &c., £4. 10s.; measurement goods, £4. 10s. for 50 cubic feet.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—20th Feb., Kosmo, from Hamburg to Singapore; 24th, Australia, Amsterdam to Batavia, Margaret Campbell and Juliet, from Newcastle to Singapore; March 1, Diana, Cardiff to Singapore; 3, Baros, Amsterdam to Batavia; 4, Willem Daniel, Amsterdam to Batavia, Bride of the Seas, Sunderland to Shanghai, Galilei, Rotterdam to Batavia, Fop Smit, Liverpool to Batavia, Grondwet, Newcastle to Sourabaya.

From CHINA, &c., to the CONTINENT.—Feb. 10, Norwood, from Hong Kong to Liverpool; 13, Queensbury, Shanghai to Liverpool; 17, Annie Duthie, Hong Kong to Liverpool; 18, H.M.S. Pearl, Singapore to England; 20, La Plata, Macao to Falmouth; 27, Thomas Dryden, Shanghai to Liverpool; March 1, Constantia, Hong Kong to Liverpool; 15, Mary Shepherd and Nelly, Japan to London.

From CHINA, &c., to UNITED STATES.—Feb. 26, Silver Craig, Shanghai to New York; 27, Neuhoff, Amoy to New York; 29, Mecklenburg, Shanghai to New York.

CASUALTIES.

JAPAN.

The Dutch barque Ceres, from Hong Kong, bound to San Francisco, put into Nagasaki on the 23rd of December, in distress.

SAIGON.

The British barque Alicia reports the arrival in Saigon, previous to her departure, of the crew of a vessel which had been lost on the banks, at or near the entrance of the Saigon River. Her name was not ascertained. When the Alicia was coming down the river she passed a boat containing other shipwrecked mariners, who stated that their vessel, the Madras, had been lost a short distance from Saigon.

The Alicia, when near the Macclesfield Bank, was passed by a vessel under topsails and topgallant sails, with mainsail hauled up, running S. She was apparently a Clyde built ship, painted black, with a long white poop, patent-reefing topsails, short mastheads. As she passed she hoisted a signal intimating that she was leaking badly.

COMMERCIAL POSTSCRIPT.

We have no later dates to hand since our issue of the 16th. The telegrams of the incoming mail were duly received, and the letters will be delivered on the 28th.

SILK.—Messrs. Waithman's Circular gives the following:—The silk market continued very firm for a day or two after the departure of the last mail, and some few parcels of China Silk were sold at prices even higher than quotations; but the advance of the Bank rate to 7 per cent., which took place on the 16th instant, again checked business, and we have since had a quiet market, though prices on the whole have been well maintained. Deliveries from 1st to 23rd inclusive—China, 2,450 bales; Japan, 1,158; total, 3,608 bales. Tsatlee: No. 1, 23s. to 23s. 6d.; 2, 22s. to 22s. 6d.; 3, 21s. to 21s. 6d. Mibash: No. 1, 22s. 6d. to 23s.; 2, 21s. 9d. to 22s. 3d.; 3, 21s. to 21s. 6d.

ARRIVALS NOT INCLUDED IN TABLE.—April 22, at Marseilles, from Saigon, Napoleon III.; 25, at Cowes, from Batavia, Prins Carl; 26, at Liverpool, from Shanghai, Montmorency; 24, at Texel, from Padang, Herman. At Plymouth, from Manila, Manila, from Foo chow-Foo, Albrecht Oswald; 21, at Deal, from Batavia, Prins Carl; 25, off Queenstown, from Manila and Bahia, Flora.

DEPARTURES.—From off Torbay, from Singapore, Victoria; 23, from Greenock, for Hong Kong, Dumbarton, steamer; from Queenstown, for Hong Kong, Clara; from Shields, for Shanghai, Edith; 25, from London, for Manila, Conchita; 26, from Liverpool, for Singapore and Hong Kong, Oceanica; from London, for Hong Kong and Canton, Prince Alfred; for Kanagawa, Medina; 20, from off the Start, for Batavia, Petronella; 21, from off Plymouth, for Batavia, Julia; 25, from Shields, for Shanghai, Jeannie Douglas; 22, from Sunderland, for Shanghai, Esperanza; 24, Sabina; 27, from Liverpool, for Singapore, Hong Kong, and Shanghai, Arab; from London, for Cardiff and Hong Kong, Orion; 20, from Sunderland, for Hong Kong, Beaufront; 25 from Deal, for Singapore, Louise, Kroon Prinses v. Sweden; 27, from Deal, for Singapore, Joan (str.).

SPOKEN.—Strathallan, Shanghai to London, April 5, 25 N., 35 W.; Pet von Maulx (?) (Dut. ship), Southampton to Batavia, March 22, 2 N., 22 W.; Lord Lyndhurst, Hong Kong to Liverpool, March 30, 16 N., 35 W.; Albrecht O'Swald, Foo chow-Foo to London, April 4, 22 N., 35 W.; Annie Wood, Shanghai to New York, Feb. 22, 23 S., 30 E.; Montmorency, Shanghai to Liverpool, April 1, 16 N., 37 W.; Henriette Cornelis, Hong Kong to Liverpool, March 15, 35 S., 21 E.; Oithona, Shanghai to London; Herald, Foo-chow-Foo to London, Feb, 12, 35 S., 20 E.; Thomas Dryden, Shanghai to London, Feb. 24, 23 S., 70 E.; Royal Mint, Foo-chow-Foo to New York, March 8, 33 S., 32 E.; Wilhelmina, Dutch barq., Batavia to Rotterdam, 58 days out, 35 S., 19 E.; Aurora, from China, April 9, 51 N., 11 W.; Donna Maria (Span. barq.), Macao to Habana, March 4, 13 S., 8 W.; Jannetje, Rotterdam to Batavia, April 17, 36 N., 12 W.

LAID ON.—At London, for Kanagawa and Nagasaki, Velocidade for Batavia and Sourabaya, Heilige Liduina. At Liverpool, for Batavia and Sourabaya, Oceaan, for Penang, Fairy Belle.

The Admiralty have invited tenders for the conveyance of the following Government stores from Woolwich to Hong Kong, viz.:—66 tons shot and shells in boxes and 249 tons loose shells, 5 tons combustibles, 99 tons gunpowder, and 39 tons light measurement stores.

LIVERPOOL, April 26.—The Hoang-Ho of this port, Carrington, from the Clyde to Singapore, with a general cargo, which put in here April 11, after getting on shore on the Saltees in the night of the 7th, had been making 12 inches of water per hour after coming off the reef on the morning of the 8th, and a portion of her main keel forward was found broken; the cargo has been discharged, apparently in good order.

At ST. HELENA, March 29.—The Orion (schr.) arrived here from Macao, reports having been boarded and overhauled by an armed screw steamer, March 13, in lat. 34 S., long. 15 E.

CAPETOWN, March 21.—The Sappho, of Greenock, Hildreth master, from Shanghai for London, with a cargo of tea, got on shore on the beach while entering Table Bay March 15, and became a total wreck; all hands saved by the lifeboat. The wreck has been sold, with her cargo, for £545. The Confederate Alabama, three months from Singapore, arrived in Table Bay March 20.

The Conqueror, for Japan, was still in Simon's Bay by last advices.

OFF ASCENSION.—March 28, Maria Louise Antoinette, from Java.

OFF ST. HELENA.—March 26, Pak Wan, from Foo-chow-Foo.

AT ST. HELENA.—March 11, Montmorency, Maxwell, from Shanghai, and sailed for Liverpool; 14, Taffarette, Dereix, from Canton, and sailed for Havre; Atlantic, Sherman, from Singapore, and sailed for New Bedford; 16, Etoile, Lachaud, from Penang, and sailed, 21, for Belle Isle; Juno, Nicolai, from Banjoewangie, and sailed for Amsterdam; 19, Rockliff, Drew, from Penang, and sailed, 20, for London; Isaac du Costa, Klein, from Tjilatjap, and sailed, 20, for Rotterdam; 20, St. Michel, Fradin, from Singapore; 21, Emma, Arentzen, from Singapore, and sailed for Copenhagen; 22, Doelwyk, Hoffman, from Batavia, and sailed, 23, for Rotterdam; 23, Orion, schooner, from Macao, and sailed for Hamburg; 24, Ridderkerk, Teerlink, from Batavia, and sailed 26, for Rotterdam; Helvetien, Boysen, from Manila, and sailed, 26, for Falmouth; 25, Spanker, Candlish, from Singapore, and sailed, 26, for Liverpool; 27, Castilian, Pike, from Manila, and sailed, 28, for New York; 28, Thetis, Rhodin, from Shanghai, and sailed, 29, for New York; 29, Dolphin, Gollards, from Hong Kong, and sailed for Liverpool.

At TABLE BAY.—Feb. 24, Tun-sin (str.), Rowe, from London, and left, 29, for Mauritius and China; March 3, Margarita, Mas, from Manila, and sailed, 9, for Cadiz; 18, Gov. van Swieten, v. Fagg, from Kanagawa.

At NATAL.—Feb. 24, Robin, Gammon, sailed for China; March 4, Conrad, Claasen, for Singapore.

THE JAPANESE AMBASSADORS IN PARIS.

The new Embassy left Alexandria, on the 9th inst., in the *Peluse*, and arrived at Marseilles on the 22nd. The party is unusually large, comprising thirty-three persons. There are three Ambassadors of various ranks, the first being a young Daimio, not more than twenty three or twenty-four years of age, handsome—as some think—remarkably intelligent, and of very distinguished manners. The rest of the party present no special characteristics, and look as like those who were in London during the Exhibition of 1862 as one pea is like another. The Envoys are accompanied by two counsellors or secretaries of legation, two first and two second secretaries, two attachés, four interpreters, two ushers, two masters of the ceremonies, and fourteen servants. The Embassy is also accompanied by an interpreting secretary belonging to the French Legation in Japan. On their arrival at Marseilles they were of course received with the honours due to their rank. Eight carriages were placed at their disposal, in which they were conveyed to the Grand Hotel, and as they passed Fort St. John they were saluted with ten guns. An immense crowd assembled to see the Ambassadors pass along the quays, and in the Cannebiere the streets were lined with the troops of the garrison. They were soon afterwards visited by M. Fanjoux, Secretary-General to the Prefecture, General d'Aurelles de Paladine, the mayor, and other functionaries. The illustrious representatives of the Tycoon did not appear at all fatigued by their voyage, for they passed the greater part of the evening on the balcony looking at the crowd which thronged the street. The next morning they returned the visits of the authorities and in the afternoon drove out in open carriages along the Prado and the quays, accompanied by the Mayor, M. Mure de Pelanne, Consular Agent for Foreign Affairs, and M. Famin, Chancellor of the Consulate. They did not evince surprise at what they saw, but were evidently delighted with the panoramic view from the Prado, as well as with the number of vessels in the port. In the evening the Embassy went to the Grand Théatre and witnessed the performance of the opera "Si j'étais Roi." The front of the theatre was illuminated on the occasion, and the Ambassadors were received at the entrance by the mayor and other authorities. They occupied the Prefect's box, and their suite the Mayor's.

On Sunday morning the Ambassadors and their suite, with the exception of one member, who was too ill to travel and has been left at Marseilles, arrived in Paris and took up their abode, for the present at least, at the Grand Hotel, the director of which went to the railway station to conduct his illustrious visitors to their temporary home. A grand suite of rooms, with a separate entrance court, has been set apart for the accommodation of the Embassy, and many curious eyes are directed towards that quarter of the Grand Hotel, which at the present

Digitized by Google

moment and for some time past has been overflowing. The French are quite proud to find that the Japanese do not disdain their cuisine, but that, on the contrary, they find *cotelettes à la jardiniére, filets de sole au vin blanc*, and *suprême de volaille* quite to their taste, and Bordeaux, Burgundy, and champagne very nice sauces to their meats.

The new Ambassadors have not been introduced to the splendours of the Tuileries, but they have commenced the tour of the outward sights. On Monday they were taken to see the new Jardins d'Acclimatation in the Bois de Boulogne, which are becoming very fashionable, and really present a charming place of recreation; and if my information be correct, they were present last evening at the opening, for the season, at the Chateau des Fleurs in the Champs Elysées, where *les belles fleurs* in their ravishing costumes, with their bewitching smiles and extraordinary evolutions in the dance, must have astonished and perhaps delighted the younger portion of the Embassy more even than the bees, the beavers, or the ostriches in the Bois de Boulogne. Of course we shall soon be inundated with accounts, accompanied by sauce *a la Francais*, of the observations and notes of the Eastern visitors on men, women, and manners in Paris; in fact, the gentlemen who supply the world with elegant nothings, and exhibit their light philosophy in the miscellaneous columns of the papers, from the *Petit Journal*—which is now printing, I am assured, 170,000 copies daily, and only owning to 130,000 in order to be able to raise the total 10,000 a day or week before the acme is reached, to the *Grand Journal*, printed on a sheet about the size of that of the *China Telegraph*, but folded only once and presenting four pages, each double the size of those of the *Times*—have commenced already. They tell us, with that curious air of serious folly which marks the Parisian journalist out amidst his brethren, that the Japanese appear, by a study of their physiological peculiarities, to partake of the Tartar, Chinese and Malay races. They are, we are gravely told, an exceedingly brave people, but not cruel; clever and shrewd, without cunning; well-informed in all kinds of knowledge, especially astronomy; they are taught from their infancy reverence for their parents, for nobles, and princes. In Japan no beggars nor drunken persons are ever to be seen, and on that account they entertained no very high opinion of the English when they visited London. Their writing goes from the top of the paper to the bottom. In the social scale, the various elements take rank as follows:—Princes, nobles, priests, soldiers, officials, merchants, and labourers. There is a sad omission from this very philosophical and novel account of the Japanese: the writer omits to state that they are of a yellowish brown complexion, and that they do not wear chimney-pot hats, wide-awakes, or glengarries; that knickerbockers are unknown among them, and that they do not play at dominoes; but all this we shall learn doubtless as time rolls on, and as matter is required to fill up the Great and the Little Journals. The only thing we are likely to wait longest for here is an account of the objects of the Japanese Embassy, and of its success with the Court of the Tuileries. Something may even ooze out upon these points in time, and I shall take care to keep you posted on the subject.

The China Directory for 1864. Hong Kong: Shortrede and Co.; London: F. Algar, St. Clement's-lane.—The fifth annual volume of this work is now to be had of the London agent. All who have felt the value of its predecessors will hasten to furnish themselves with the new issue. Merchants and shippers of goods should be made aware that, besides every kind of information as to the officials of the Far East, whether native or European, as to Tariffs, Weights and Measures, Rates of Postage, down to Chair-hire, they can learn from the *China Directory* the name of every European resident at any town or port of either the Celestial Empire or Japan.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, APRIL 22.

The King and the Prince of Orange have left this city and returned to the Hague. His Majesty on his departure handed to the Burgomaster of Amsterdam the sum of 2,000 fl. for distribution among the poor. The health of the King of Wurtemberg being so much improved as to justify the medical opinion that there is no immediate danger, the Queen has returned to the Hague from attendance on her royal parent.

Both Chambers of the States-General have resumed their parliamentary duties after the Easter vacation. The business hitherto done by them has been chiefly confined to their working in sectional committees. In the First Chamber official notice was received of the death of two of its members (Messrs. van der Oudermeulen and Quintus), and new writs were ordered to be issued. A large number of Bills were sent up from the Lower Chamber. Messrs. van Beeck Vollenhoven, Beerenbrock, Hartsen, and Eysinga, were elected to form a committee for the preliminary examination of the Bill on the East India Finances. Amongst the papers received were a Report on the Cultivation of Cinnamon and Coffee in Ceylon; one on the Budget of Netherlands India for 1863; and a third on the State of the East India Colonies in 1861. The Second Chamber re-opened on the 19th inst. Mr. Yssel de Schepper took the oaths and his seat. Among the new Bills brought in was one for the naturalisation of eleven foreigners, among whom are Mr. H. Meister, of Netherlands India, Mr. G. H. Miesegoes, of Samarang, and Mr. H. A. Bernstein, of Ternate.

Mr. J. Messchert van Vollenhoven has been appointed Burgomaster of Amsterdam for the ensuing year, commencing on the 15th inst.

The following 24 first-class vessels have been chartered by the Netherlands Trading Company to convey cargoes of produce from Java to the undermentioned ports:—*Drie Gebroeders*, Capt. van Tubergen; *Ystroom*, Capt. Hansen; *Nicolas Witsen*, Capt. Portengen; *Louise*, Capt. Buys; *Bantam*, Capt. Claasen; *Jacoba Cornelia*, Capt. ———; *Honey Bee*, Capt. Valk; *Huidecoper*, Captain Reynders; *Brouwershaven*, Capt. Huyzer; *Zephyr*, Capt. Wemmers; *President Plate*, Capt. Harten; *Staatsraad van der Houven*, Capt. Heimericks; *Nova Zembla*, Capt. Mommes; *Souberg*, Capt. Swart; and *Bezoekie*, Capt. Reckers,—all for Amsterdam. *Philips van Marnix*, Capt. Ruyven; *Kanagawa*, Capt. Ouwehand; *Batavia*, Capt. Prange; *Hendrik Ido Ambatch*, Capt. Bye; *Henriette Gerardine Susanne*, Capt. Sissingh; *Cornelis Anthonie*, Captain Bouten; *Alblasserdam*, Capt. Hoen; and *Kortenaer*, Capt. Schuchard,—all for Rotterdam; and *Johannes Lodowyk*, Captain van der Waal, for Schiedam.

A detachment of supplementary troops, consisting of twelve non-commissioned officers and 150 rank and file, under the command of Capt. W. R. Tergau, of the East India Infantry (returning to duty from leave of absence to this country), and accompanied by Lieut. Renford van Vankelburg, of the E I. Cavalry, and Lieut. A. J. Kalff, of the E I. Infantry, have marched from the E.I. Depot at Harderwyk for Nieuwe Deep, where they embarked on board the chartered transport *Gerard Pieter Servatius*, Capt. J. Wamsteker, for Batavia.

A telegram has been received at the Colonial Departmen dated Batavia, March 14, containing the following:—"Demang Lehman taken prisoner and hanged at Martapoera."

On the Westerdoks Dyke, near the pilot's office here, a mast has just been erected for the display of storm signals. The Municipal Council of Rotterdam has just voted the sum of 250fl. for similar apparatus in the Leuvehaven. These Dutch signals differ somewhat from the system in use in England, and appear to be more simple and practical. They consist of a cylinder (forming a square (□) when seen at a distance), a cone (△), and a ball (○). When the cone is hoisted alone it means "Look out! bad weather is expected;" the cone over the cylinder means "Gale from N.W.;" when made under it, "Gale from S. and S.W.;" and the ball alone, "Storm from West."

The Indian Association at the Hague has just distributed to the members the printed catalogue of their library, which consists of works almost exclusively relating to the East India colonies, and is perhaps the most perfect of its kind to be found in any country. Among many valuable modern works is a large collection of all the pamphlets and smaller works from the beginning of the seventeenth century down to the present time, arranged in chronological order, some of them exceedingly scarce, and not to be found in any other collection in Europe.

Orders have been given to the naval authorities at Vlissingen to prepare the first-class screw steamer *Leeuwarden*, of 16 guns, now lying off that dockyard, for immediate service. It is understood that she will be commissioned on the 1st of May, and that she is to reinforce the squadron in the East Indies. The commanding officer has not yet been named, but from her rating it will be a captain-lieutenant.

By advertisement in several journals, the Colonial Minister

Digitized by Google

draws the attention of capitalists to the fact that, in the month of November next (day not yet fixed), the Government of Netherlands India will dispose of the following sugar plantations by sealed tender, in conformity with the conditions published in No. 118 of the *Staatsblad* for 1863 :—1. The plantation called Tjomal, in the district of Pamalang and Residency of Tagal; and, 2, the plantation Bandjardawa, in the same district and Residency. The contracts to run for a period of ten years from the planting season of 1864 to the harvest of 1874. The minimum quantity of sugar-cane to be planted each year to be 400 *bouws*, of 500 □ Rhineland roods each. The contractor to take possession of the works and buildings on the 1st April, 1865, and to pay the amount within a month from that date. A guarantee will be given to the contractor that he shall always have sufficient water to drive the wheel of the crushing mill. The produce to be delivered into the Government warehouses at Pekalougan. The contract will be given in preference to the bidder that offers to deliver to the Government on the usual terms the greatest number of piculs of sugar for each *bouw* of land.

The Minister of Finance warns the public against putting letters for Japan into the Post-office without paying the postage, which, he says, experience shows is often done. He adds that such letters are always forwarded as ship letters when an opportunity offers, but that as a considerable period must elapse even in the best of cases before they can arrive at their destination, he recommends people who have correspondence with Japan to prepay their letters, and send them *via* Singapore as the quickest route.

Lieutenant E. l'Honneré of the East India Army, now on leave of absence in this country, is permitted to retire from the service with a pension, being incapacitated for further active service on account of his health.

The King has granted permission to Mr. H. L. van Bloemen Waanders, officer of the East India Civil Service, late administrator of the tin mines at Marawang in Banca, and now in this country on leave of absence, to retire from the service at his own request with a pension, commencing on the 1st May, 1864.

The following Protestant clergymen have been appointed chaplains and preachers in Netherlands, India :—Rev. J. T. van Dorp, of Hoornaar, Rev. P. van der Meulen, hitherto chaplain in the Dutch settlements on the Coast of Guinea, now on leave of absence in this country, and Rev. F. Hoog, of Hoogoliet.

Mr. A. Loudon, member of the Council of Netherlands India, has received the royal permission to accept and wear the decoration of officer of the Order of the Legion of Honour, conferred on him by His Majesty the Emperor of the French.

The naval Lieutenants G. M. Schuurman and J. C. Egter, both serving in Netherlands India, have been permitted to retire from the service, and the officer of administration in the squadron in Japan, Mr. C. J. Court, lately returned to this country by private ship, is placed on half-pay.

PASSENGERS OUTWARD.

Per *Anthony van Hoboken*, Capt. Hazewinkel, from Rotterdam to Batavia; Capt. P. A. Collard, E. I. Army, wife and family, Mrs. Gilbert and two children, Miss S. Lammers, and Mr. Arntzenius.

Per *Quintett*, Capt. Sleyboom, to Batavia; Mr. and Mrs. Schuurman and two children.

Per *Petronella Catharina*, Capt. van der Veen to Japan; Rev. H. S. Balem, wife and family, Mrs. Grivel.

Per *Antonio Petronella*, Capt. Vorendyk, from the Texel to Sourabaya; Mrs. Willemse and two children.

Per *Vertrouwen*, Capt. Vos, from Amsterdam to Sourabaya; Mr. and Mrs. F. C. de Wit and daughter, Miss D. Raaymakers.

Per *Provincie Drenthe*, Capt. de Boer, from the Texel to Samarang: Mr. G. C. Termichelen.

Per *Nederland and Orange*, Capt. Bowmeester, from Rotterdam to Sourabaya: Mr. H. C. Voorhoeve, jun.

Per *India Packet*, Capt. Diepering, from Amsterdam to Batavia: Captain and Mrs. Hoogekerk, E.I. Army, Mr. P. Bloem, E.I. Civil Service, Miss Bloem, and Miss Pen.

COMMERCIAL.

COFFEE.—The Company's sale of 82,000 bags went off a trifle lower than their last sale in March. The whole quantity found willing purchasers, the decline being about 1 cent. The market is in a healthy condition and there is a lively demand, especially for bright descriptions of Java, about 5,000 bags of which have been disposed of since the sale, by private importers. The Company's sale of Ceylon, on the 12th inst., went off as follows:—

224	bags of native,	pale greenish,	42	to 42¼ cents.
27	„	do. triage,	23½	„
13	„	do. sea damaged	22	„

SUGAR.—Purchasers come forward very freely, and a decided improvement has taken place since Mr. Gladstone's Budget was known here The sales have amounted to 15,000 kranjangs. The market for refined. was in a very excited state, and immense purchases were made at successively rising prices.

RICE.—Of rough grain there are no dealings to report, and the market is not quite so firm as it was. There is reason to believe that many holders are inclined to realise their stocks, and would not refuse lower offers. In cleaned descriptions there continues to be a fair demand for the execution of consumptive orders, and prices are well supported.

SPICES.—Nutmegs are again in great request, and all disposable parcels have been bought up for shipment at 73 cents for No. 1, and 66 for No. 2. Pepper is also very lively, and several parcels have been taken at 22 cents in bond.

METALS.—Banca Tin continues low. A few parcels have been taken at 68¼fl., at which figure there are sellers. In Copper nothing has been done, prices nominal.

INDIGO.—The demand for Java holds on, and more than 100 chests have been sold at full prices.

TOBACCO.—The value of Java is well supported. The result of the sale at Rotterdam on the 13th inst. was as follows:—597 bales mark Limburg, from 18 to 28 cents, average 23; 646 bales L in a triangle, of which 281 bales sold at from 11½ to 24½ cents, and 365 bales bought in at 19½ to 23 cents, but subsequently sold by private contract. The present stock of Java is 8,861 bales.

P. S.—The following have just been sold by private contract:—1,350 bags of Java coffee, ex *Merchantman* and *Cornwallis*, at 44 to 46½ cents, and 1,289 kranjangs of Java sugar, No. 16, per *Princess Amelia*, for arrival, at 41½ fl. At a public sale of 182,500 Manila cigars, 16 lots sold at from 13 to 62 fl., and 9 lots bought in at 50 to 61½ fl.

Parliamentary Intelligence.

HOUSE OF COMMONS.

FRANCE AND CAMBODIA.

(April 18th.) Viscount ENFIELD asked the Under-Secretary of State for Foreign Affairs whether it was true that a treaty had been concluded between France and Cambodia (or that portion of Cambodia which is tributary to Siam), the provisions of which tended to an entire exclusion of all foreigners from that country with the exception of the French; and, if so, whether Her Majesty's Government had taken, or intended to take, any steps to secure to British subjects equal advantages with those obtained by France in that country?—Mr. LAYARD said that a treaty had been concluded between France and Cambodia, but he had not seen it, and was not able to state exactly its terms. Yet he had reason to believe that in that treaty there were provisions which would imply that exclusive privileges were to be given to French subjects over those of other nations. This matter had been brought under the notice of the French Government, and Her Majesty's Government had received an assurance from the French Minister for Foreign Affairs that if there were provisions which bore that interpretation, they had been put into the treaty by inadvertence, and that it was the desire of the French Government that that treaty should bear the most liberal interpretation, and should give French subjects no privileges which were not equally extended to the subjects of all other nations.

BURNING THE DEAD IN INDIA.

(22nd.) Lord STANLEY had seen it stated in the Indian newspapers that an order had been issued by the Lieutenant-Governor of Bengal prohibiting the immemorial native custom connected with the native religion of burning the dead on the banks of the Hooghly. He wished, therefore, to ask the Secretary of State for India whether it was true that the Government of Bengal had issued an order prohibiting the burning of dead bodies on the banks of the Hooghly river: whether the terms of that order, and the reasons on which it was based, had been known to him; and, if so, whether there was any objection to make them public. Sir C. Wood said that no despatches had been received on that subject, and the only information he possessed was derived from private sources. The cholera had been exceedingly prevalent at Calcutta lately, and the greatest possible alarm had been created there in consequence. The question was therefore taken into consideration of what was to be done to check the spread of the disease, and an order was issued to prevent the throwing of dead bodies into the Hooghly. Anything more disgusting than the sight of the dead bodies floating up and down that river could hardly be imagined, and it was thought most desirable to prevent that practice. With regard to the burning of dead bodies, he did not believe that any order on that subject had been issued; but there was, he thought, a proposal that means should be provided for the burning of dead bodies at a short distance from Calcutta. He had reason, however, to know that, if the objections to it were as strong as was represented by some persons, that proposal would not be persevered with.

THE CIVIL WAR IN CHINA.

(22nd.)—Mr. LIDDELL, in rising to move the resolution of which he had given notice, deprecating further interference on the part of this country in the civil war in China as impolitic and unnecessary, hoped the indulgence of the House would be extended to him, saying it would be necessary to occupy their attention some time, having to go over a considerable period, and bring before them a mass of details. He had no such stirring incidents to present as might be found, perhaps, in the history of the quarrel between Germany and Denmark, but the question was one in which the material interests and honour of England were largely involved. It might be said his motion had reference to events gone by, and that the interest connected with them had ceased. But although, to use a metaphor, the piece had been played out in China, although the curtain had fallen on the performance, the actors still remained on the stage, and it was competent for the House to express an opinion as to how they had played their parts. He should have to refer to the past, but their attention must not be diverted from the future. On our policy in China much depended. We had a very large stake in that country. Our position there was very peculiar, and it depended entirely on our policy for the future whether we should secure or imperil that stake—whether we should render our trading relations beneficial alike to England and China, or whether we should have to maintain our position there at an incalculable cost. The history of the Anglo-Chinese expedition was very simple. The first idea of forming a European force for the Emperor of China originated in the autumn of 1861. It was to be

Digitized by Google

composed of powerful vessels, well armed and manned, under the command of an English officer of experience; its two objects being to establish the Imperial authority in the Yang-tze-kiang River, and to suppress piracy and smuggling in the waters of China. The progress of the rebellion had been very rapid, and the Chinese Government eagerly embraced the plan of forming that force. Mr. Lay, the Inspector-General of Customs, being then in England on sick leave, was selected for the purchase and fitting of the vessels. Authority was given to Mr. Lay by Prince Kung for that purpose; and each of the custom-houses in China contributed its quota towards the very large outlay. In his letter of instructions to Mr. Lay, Prince Kung mentioned three objects to which he should apply himself:—1. The purchase of the vessels and guns; 2. The engagement of officers, seamen, and others; and 3. The retention of a sufficient sum of money for salaries, wages, &c. In consequence of receiving that letter Mr. Lay proceeded, as the agent of the Chinese Government, to purchase the vessels and make the necessary arrangements, and he at once placed himself in communication with Captain Sherard Osborn, an officer of large experience in China—a very competent person, possessing, he believed, the confidence of Her Majesty's Government. He was selected to command the fleet, and an agreement was drawn up between Mr. Lay and Captain Osborn in reference to the command he was about to assume. The agreement between Mr. Lay and Captain Osborn was entered into in England, but the name of the Emperor of China, or that of his minister, Prince Kung, did not appear in the document, and so far from the agreement being adopted by the Chinese Government it was ignored by Prince Kung, who never even acknowledged its receipt. When the House heard the terms of the agreement they would not be surprised that it was ignored by Prince Kung. The terms contained in that agreement were as follows:—

"1. Osborn agrees to take the command of the European-Chinese navy for a period of four years, and stipulates that there shall be no other European naval commander-in-chief. 2. Osborn, as commander-in-chief, is to have entire control over all vessels of European construction, as well as native vessels manned with Europeans, that may be in the employ of the Emperor of China, or under his authority of the native guilds. 3. Lay will procure from the Emperor such an authority as may be necessary to cover Osborn's acts as the commander-in-chief of the European-Chinese navy. 4. Osborn undertakes to act upon all orders of the Emperor which may be conveyed direct to Lay, and Osborn engages not to attend to any orders conveyed through any other channel. 5. Lay, upon his part, engages to refuse to be the medium of any orders of the reasonableness of which he is not satisfied. 6. Osborn will appoint all officers and men on board the vessels of the force, subject, however, to the approval of Lay, as the representative of the Emperor."

Let the House consider what was the meaning of those words, and what would have been the effect of that treaty had it been carried out. The meaning of those words was, to establish a complete dictatorship over the naval operations of China in the person of Mr. Lay. The effect of the agreement, if carried out, would have been that every port, every estuary in China, would have been at the mercy of the fleet which was under the command of Captain Osborn, and the whole of the commerce in Chinese waters would have been under his control. Those gigantic powers could not, in his opinion, be safely entrusted to two private individuals, who were practically unrestrainable, and their possession of such power would have been incompatible with the existence of the native Chinese authorities. When it was remembered that Mr. Lay as Inspector-General of Customs, had the whole of the customs' revenue of China at his disposal, it would be perceived that that gentleman had created for himself a post of no ordinary responsibility. It was not surprising that Prince Kung should have ignored that agreement. It was sometimes well in such cases to apply the *argumentum ad hominem*, and to consider how we should act if such a state of things could by possibility be applied to ourselves. Supposing that a distinguished stranger were to present himself in this country, and, claiming an interview with the Prime Minister, were to tell him that the administration of naval affairs by the Board of Admiralty was infamously mismanaged, and that the revenues of this empire were recklessly squandered by the Chancellor of the Exchequer, and then supposing that that stranger were to propose that the control of the navy and the revenue should be entrusted to him free from the control of the noble lord and his colleagues, receiving instructions only from Her Majesty, and that he should himself best judge as to what those orders should be, if the noble lord were to listen to such a proposition he would fail in his duty to his Queen and his country; and so, if Prince Kung had accepted the agreement that was offered to him, he would have been a traitor to the Emperor of China. The Prince, however, did not acknowledge the agreement, and when Captain Osborn arrived in China about April last, he found a pressing letter awaiting him from Mr. Lay, urging him to proceed at once to Peking. On his journey to that city Captain Osborn had reason to perceive that affairs were not quite in the shape in which they had been represented to him in England, and even at Shanghai attempts had been made by the local authorities to induce the seamen on board his vessels to enter on board native ships. He also received from Mr. Lay a letter of instructions from Prince Kung, and the House would perceive the difference there was between those instructions and the terms arranged between Mr. Lay and Captain Osborn in England:—

"It has been settled that the post of Chinese commander-in-chief of the steam fleet now purchased shall be filled by the high officer selected by the Chinese Government, and that Captain Osborn, C.B., a British subject, shall be assistant-commander-in-chief, for a period of four years. The affairs of the fleet are to be managed by the said commanders-in-chief in a friendly spirit of co-operation. While Captain Osborn assists the Chinese Government in the command of the fleet, he will take the instructions of the governors general and governors as to the employment or distribution of the force. In all operations he is always to confer personally with those officers before either undertaking or staying these, and is to accept the Chinese decision as final."

Captain Osborn saw that, were he to accept service upon these terms, he would be placed under the orders of local governors and mandarins, instead of having only the Central Government to look to as he had expected. The gallant officer felt that to take service upon those terms would be to insure a failure of operations, or to require him to engage in operations which might possibly be disgraceful, and would not be creditable to this country. (Hear, hear.) He, Captain Osborn, refused to accept service on those terms, and he was right in so refusing. (Hear, hear.) Indeed, throughout all these transactions Captain Osborn had behaved as a man of honour. (Hear, hear.) That his conduct had been straightforward and sagacious must be admitted, but Captain Osborn had been deluded—not intentionally, but still deluded—by Mr. Lay, for no one who had read the account of these transactions could fail to perceive that Mr. Lay had greatly exceeded his power, and had persuaded Captain Osborn and himself that he had an authority which in fact the Chinese Government never intended to confer, and which ought never to be given to any foreigner. It would be well to know what was the opinion of our envoy in China upon the subject, and, therefore, he would read a few sentences from Sir F. Bruce's despatches. Sir F. Bruce wrote:—

"Mr. Lay mistook his position, and overrated his influence when he resolved on starting his flotilla without having previously ascertained that the terms agreed upon with Captain Osborn would be accepted."

It was but fair to the Chinese Government that he should state what they had done for Mr. Lay, after having assumed powers which were never conferred upon him and having squandered money placed at his disposal. They allowed him £1,000 a month for the expenses of his establishment during his residence at Pekin, in addition to a salary at the rate of £8,000 a year from the 1st of May, 1863, to the month of March next, and they presented him with £2,000 as a gratification on leaving their service. He did not think that they had any right to charge the Chinese Government with having acted falsely or perfidiously throughout the affair, but he regarded the conduct of Mr. Lay as open to grave censure from his having mistaken his position and exceeded his authority. He must, however, trace the course that the Government had pursued in connection with this expedition. There were several legal objections, at the time of Mr. Lay's application, to the enlistment of men in this country, and to the equipment of vessels for the service of the Emperor of China. There was the Foreign Enlistment Act staring Government in the face, and there was also Sir John Bowring's Act. An angry discussion upon the subject took place at the Colonial, the Home, and the Foreign Offices, and he remembered that the right hon. gentleman the Home Secretary characterised the application as a very unusual one. Earl Russell himself was alarmed on account of the Neutrality Ordinance. He had noticed in the pape only a short time since the case of George White, who was engaged the capture of the *Firefly*. He was arraigned at Shanghai, first of all for piracy; and, secondly, for a breach of the Hong Kong Ordinance. He was found guilty upon the latter charge, and sentenced to two years' imprisonment, and he had since expired in confinement. The noble Duke, whose departure from official life they all lamented, had said, however, that the Ordinance had ceased to take effect in 1858. Two Orders in Council were issued, one on August, 30, 1862, and the other on January 9, 1863, the latter having reference to the whole of our army and navy, the officers in both departments being invited to take service under the Emperor of China. All this was done without any application to Parliament, and in all probability Parliament would never have heard anything of the matter but for the curiosity of some of its members. He regarded this as the crowning act in a line of policy which had for its object the creation of a British protectorate in China. (Hear, hear.) He maintained that the Government must, from its conduct, have been held responsible for the success or the failure of the expedition. Sir Frederick Bruce, our Ambassador at China, in one of his despatches, says:—

"Had the Chinese voluntarily accepted the squadron, the *onus* of the difficulties it would have encountered would have rested on the Chinese Government; but the burden would have been thrown on Her Majesty's Government by the Chinese, and with justice, had it appeared that this flotilla, exclusively British in its character, directed by British officers and agents, and imposed by British pressure, was acting under a Chinese flag, which the Chinese Government, contrary to its wishes, had been compelled to hoist on board the ships."

Had it succeeded—had Captain Osborn in the course of his duties been embroiled in any conflict with subjects of foreign nations, and had these subjects appealed to their respective consuls, Her Majesty's Government would have been answerable. On the other hand, if failure had been the result, did the House believe that Captain Osborn would have been left to his own resources? Sir Frederick Bruce had given the following opinion upon the conduct of Her Majesty's Government in reference to this matter:—

"If it was considered necessary that the flotilla should be taken out of the hands of the Government which paid for it, and the exclusive control over its operations vested in its foreign commander and the foreign agent employed in procuring it, these conditions, of so singular a nature, ought to have been submitted and agreed to before the vessels were allowed to sail for China."

A harder rebuke, and one more merited, had, probably, never been administered to a Government at home by a Minister abroad. His complaint was that the Government had trusted to the mere *ipse dixit* of Mr. Lay as the proof of authority which, in reality, never had been conferred upon him; that in all their negotiations in reference to this fleet they had entirely ignored the presence of our Minister; and that they had trusted to the diplomacy of Mr. Lay in a matter involving great responsibility. In reviewing the Anglo-Chinese expedition he thought the Government should be congratulated upon its failure. (Hear.) All the parties concerned had had a fortunate escape. The Emperor of China was fortunate in escaping from the *imperium in imperio* which it was the intention of Mr. Lay and Her Majesty's Government to have established at Pekin; Captain Osborn had fortunately escaped, owing to the exercise of his own sagacity, from being involved either in transactions which would have redounded but little to his credit or in certain failure; and Her Majesty's Government had had a fortunate escape from those embarrassments and complications which the position they had chosen to assume would inevitably have entailed upon them. Mr. Lay had been dismissed by the Emperor of China, and Captain Osborn had now returned home. But there was something more in the dismissal of Mr. Lay and in the rejection of Captain Osborn's services than met the public eye. While the Emperor

Digitized by Google

of China, through his representatives, was enlisting the services of English officers and men to fight his battles, the representatives of foreign Powers of Pekin had got round the Chinese Government, and whispered into their ears some such words as these:—"England is a selfish Power. England does nothing except to promote her own interest. She has overrun India. Take care how you allow her a hold of China." Private members knew nothing of Cabinet secrets and intrigues, but they knew that Russia aimed at an extension of her eastern empire, that France always looked to play first fiddle, and that America, whose eastern policy he admired, because it was conciliatory and peaceful, was perfectly insane in her jealousy of this country. The representatives of these Powers would never sit with their arms folded at Peking, and see English supremacy paramount in China; and if Mr. Lay had succeeded in installing himself as First Lord of the Admiralty, with the Customs' revenue in his pocket, that would have been a long way towards the establishment of British supremacy. (Hear, hear.) It was said that the dismissal of Mr. Lay, and the rejection of the services of Captain Osborn and the British fleet, were the signs of retrogressive policy in China. That was the language of the Protectorate party in this country. He could imagine that this party, who talked of regenerating China by European influence, were deeply disappointed at the failure of their promises and expectations. But so far from agreeing that this act was a sign of retrogression, he thought it was the healthiest symptom he had yet perceived of Chinese vitality. This rejection of foreign interference was a certain sympton that the Chinese nation were at last awaking to a sense of their own degradation in cringing and whining for aid from foreigners for the management of their internal affairs, especially from a nation which had done more than any other to destroy the central authority of the Chinese Government. (Hear, hear.) He ventured to predict that unless we contented ourselves with purely peaceful trading operations, abstained from interference, and insisted only upon the strict fulfilment of treaty obligations, we should yet have considerable trouble in China. (Hear, hear.) In the motion he was about to propose he asked the House to say that further interference in the civil war in China was impolitic and unnecessary. He should no doubt be told that the Government had not interfered. Now, he did not want to split straws about the meaning of words. What he meant by interference was the system initiated by Admiral Hope and General Staveley of affording material aid to the Imperialists. This aid was both direct and indirect. First, Her Majesty's forces had been employed as an army of reserve to assist and support the Chinese forces. (Hear, hear.) Towns had been garrisoned, positions occupied, siege guns lent, and ammunition and supplies to any extent had been supplied. This question of supplies was a very serious one, and touched one of the highest constitutional functions of this House. They had been lately engaged in voting money for the army and navy. For whose service was this money voted—for the service of the Queen of England or for that of the Emperor of China? (Hear, hear.) In May last, Lieutenant-Commander Bosanquet, writing from Ningpo, said:—

"Great efforts have been made and assistance afforded by Her Majesty's Government in this neighbourhood, both as to supplies of munitions of war, drilling troops, and otherwise, but I am afraid without effect. The last supply of munitions brought by me from Shanghai, and handed over to the Taoutae by Captain Dew, viz., 1,000 Tower muskets, 100,000 rounds of ball cartridge, besides guns and other stores, I ascertained, too late to remonstrate, have been handed over to the Taoutae and his undisciplined troops, which is almost throwing them away." (Hear, hear.) If this had occurred in one case it must have occurred in many; and he believed that an unlimited amount of stores, guns, and war munitions had been furnished to the Chinese troops for the purpose of carrying on their military operations. This was indirect aid. He would now refer to the direct aid which was afforded. Last year a good deal had been heard about the intention of the Government to establish a thirty-mile radius around the treaty ports of China, and especially Shanghai. Now, he thought that the difficulty of protecting the settlement was sufficiently great, considering the embarrasments to which a joint protectorate gave rise. But if we were to occupy and hold against all comers this radius of thirty miles, it amounted simply to a military occupation of the country—(hear, hear); and this very Quixotic undertaking could only be carried out by a large addition to our military force. (Hear.) The only excuse alleged for this extraordinary policy was the necessity of defending the interests of trade. But in a paper recently laid before Parliament, signed by the President of the Chamber of Commerce of Hong Kong, and dated the 22nd of October, 1863, he found this passage:—

"The great majority of the respectable commercial classes (foreign) in this country strongly disapprove of the present action of our authorities; and many persons, even, who at an earlier period gave all their influence in opposition to the maintenance of neutrality, have seen reason materially to modify their opinion. The commercial body, for the most part, have no faith whatever in the regeneration of China by such foreign aid as is now afforded; nor do they believe that hearty co operation in introducing the foreign element into the various branches of the Chinese public service can be expected from any native officials, beyond, perhaps, the few men at Peking within the personal influence of foreign Ministers. . . . . It may not be too late to withdraw from Shanghai with either safety or honour, but there can be no difficulty in restraining the energy of our military chiefs within the defined thirty mile radius round that city and settlement; and the extension of the system of protected areas round the other treaty ports would, in the general opinion of foreign residents in China, be a most serious mistake, and one much to be deprecated."

(Hear, hear). After this he hoped it would not be said again that the policy of the Government had been adopted in the interests of trade. (Hear, hear.) He maintained that our trade had never been attacked, and he challenged the hon gentleman (Mr. Layard) to furnish an instance in which the property or the person of a British subject had been injured by the Taepings. In reference to this question of the thirty miles' radius, Sir Frederick Bruce stated that he had reluctantly consented to undertake the defence of that extent of territory in deference to the opinion of the naval and military authorities. The House knew very well that naval and military men took professional views on these matters, and he did not think they ought to be the judges of what the policy of Her Majesty's Government in China was to be. But this protection had not been confined to a thirty miles' radius; for the two towns which had recently been guarded under the orders of General Brown, were sixty miles from Shanghai. He had also to call the attention of the House to the fact that the instructions given to our officers in China were complicated and difficult to be understood. Officers on half-pay had been allowed to take service under the Chinese Government, and to act in the field; but officers were detached from their regiments to discipline the Chinese soldiers. This latter class of officers were, however, forbidden to go into the field; so that if the place in which they were instructing Chinese troops were attacked they must not lead their own men. Those shilley-shalley orders were enough to lead to embarrassment and disobedience on the part of our officers. (Hear.) He now came to what he called the direct aid—that aid which had been given under an order in Council enabling English officers to take service absolutely under the Chinese Government. That order had been cancelled lately; but he wanted to know distinctly from the Government in what position Major Gordon and Major Cook had stood; for in the papers he found it asserted by Captain Sherard Osborn that the former had no commission from the Emperor of China, and, with respect to the latter, there was the record of an observation made by a very intelligent officer to the effect that the sooner he (Major Cook) got his commission from Peking the better. The opinion of our own Ambassador in China was that the course which we had adopted with regard to giving the Chinese this assistance was attended with serious embarrassment, arising from jealousies among the different nationalities represented in China, and that the most effectual means of assisting the Chinese would be to leave them to their own resources. (Hear, hear.) He now asked the House who were the men whom we had assisted with our English officers, and what had been the consequence of our assisting them? Captain Sherard Osborn gave a very strong opinion of the unscrupulous character of Futai Le; and he need scarcely remind the House that the name and presence of English officers had been identified with transactions at which English honour and English humanity revolted. (Hear.) They had heard of the siege of Soochow, and the massacre of 30,000 persons which followed it; and they must remember that, on the fatal night that preceded the commencement of the massacre, Captain Gordon, with one of the rebel chiefs, concocted the means by which the gates of the town were to be opened to the Imperialists. It was true that he left the town before the following day, and, his troops being bribed in all likelihood he was perfectly powerless; but, at the same time, his name was unhappily associated with those events; and our unhappy connection with such unhallowed proceedings was a retribution on England for her abandonment of the principle which ought to have guided her in her dealings with China. He had another miserable event to notice. There was in the Blue-book an account given of the execution of certain prisoners of war. An eyewitness stated that eight prisoners, naked and tied to stakes, were tortured and mutilated from midday to five o'clock in the afternoon, and were afterwards decapitated with a blunt sword. Last year this occurrence was brought to the attention of Earl Russell by the Bishop of Victoria, and the noble lord immediately sent out to inquire into the accuracy of the report. Sir F. Bruce intimated its perfect truth, and said he should use his best endeavours to put a stop to the infliction of such barbarous punishment, though he had to contend with the difficulty that they were sanctioned by law. He would not waste time in vague declamation, but he wanted the House of Commons and the people of England to understand that the infliction of a slow death, preceded by torture, was the mode of punishment resorted to according to law by the Chinese soldiery alongside whom we were fighting (Hear, hear.) An Order in Council had been cancelled, but that would not cancel the memory of the horrors he had described. The noble lord at the head of the Government had, when too late, expressed regret at the doings at Soochow, but that would not go far in removing from the minds of Englishmen the indignation and disgust which the recital of these atrocities had produced. (Hear, hear.) Since the previous debate on the affair at Soochow two remarkable circumstances had occurred. The Futai, the hero of Soochow, had been held up to public estimation in China, and had received honours and decorations from his Sovereign for the part he played in the capture of that city; and, what was more extrordinary still, Major Gordon had returned to his service. (Cheers.) He wished to hear from the Government whether that return to the service of the Futai had received their sanction—(hear, hear), and whether in the persons of our officers we were to continue to identify ourselves with the proceedings of the Chinese armies and officials. (Hear, hear.) What was the Government we were supporting so warmly in China? The Mantchoo dynasty was of foreign origin, and was hateful to the people whom it ruled. It was founded some 200 years ago in massacre and violence, and it had been maintained ever since by extortion. Persons selected for the service of the Government were chosen in the first instance by public competition, but their official salaries were miserably small, and they were instructed to eke them out by the sale of justice and the oppression of the people. They amassed in this way sums of money with which they purchased promotion, and at length, after years spent in extortion, they retired to consume their old age in debauchery and sensuality. (Hear, hear.) Could anybody wonder that, under such a system, anarchy should prevail, or believe that any amount of physical force or of foreign aid would suffice to put down rebellion against such a Government? (Hear, hear.) The rebellion was said to be on its last legs, but, though it might be trodden out for the moment, it would be sure to be renewed at some not very distant time, for there were embers constantly smouldering in China which at any instant might burst into a flame. But he wanted the House to consider what would happen if the Taipings were ejected from their strongholds. The great tea and silk districts were in their hands, and had been so for some years. Yet the supplies of silk and tea had been punctual, uninterrupted, and gradually increasing. (Hear, hear.) We had turned the minds of the Taepings against us. They knew that their ejection from their strongholds would be due to the material aid afforded to their enemies by England, and they said we had broken our pledges to them, while they had fulfilled their obligations to us. It was not improbable that, when deprived of their strong places, they might spread themselves over the tea

THE CURTAIN UPLIFTING.

Bit by bit, as time rolls on, and events, those best correctors of speculative theories, make themselves recorded, first one corner and then another of the curtain that shrouded the policy of the Japanese Government lifts up, till we can discern those who have either been pulling the cords or strenuously resisting the efforts making by others to expose the whole of the stage to the public gaze. Every successive glimpse we get of the machinery now at work on the political boards of the Island Empire of the Far East confirms our former opinion, that the parties now at conflict on the question of the mode and place in which intercourse with the foreigner is to be carried on, are the TYCOON and the MIKADO on the one side, and the Daimios on the other. Neither party is desirous of annihilating a commerce that has assumed such important dimensions. The TYCOON, for certain reasons, is desirious of removing its principal seat from Kanagawa—possibly from political motives mainly, as it may there have been found too near to Yedo, for reasons which Englishmen can but guess at, such is still our ignorance of the system by which the Government of Japan discharges its functions. On their side it becomes more manifest that those powerful Satraps, the Daimios, who have to raise their own revenues, are anxious that the trade should be thrown open almost entirely, so that each one would have his own port, where the supplies he requires could be received, and his produce shipped, under his own eye and for his own profit. This is, we learn, the view adopted by Col. NEALE, who finding that the restrictions on the silk-trade were continued, and grew even more and more annoying, has officially and formally represented to the Gorojio, or Council of State, what must be the inevitable consequence of their persisting in such a course of policy; and has reminded them that there is nothing in the treaties to prevent foreigners from entering into trade conventions with the Daimios, who are thoroughly disposed to sell their produce to the highest bidder —that is, to the foreign merchant. Her Majesty's Representative has, at last, by the obstinate folly of the TYCOON'S Government, been enabled to bring the grand question on the board, and to take the first important step towards the complete emancipation of trade in Japan. On this point we cordially endorse the sentiment of a Kanagawa contemporary, that "so long as trade remains in the hands of the Tycoon's Government, and is confined to two or three ports as at present, it will be hampered, and regulated, and limited to suit the views of the government; and all our expectations as to what should result, according to our experience of commerce and political economy elsewhere, will be disappointed in Japan." The present and the preceding mail, indeed, happen to furnish most convincing tests of the feeling prevalent at the two extremes of Japanese social existence in reference to the foreigner. The last mail told us of the kindness of the Prince of MATSUMAI'S officers to the shipwrecked crew of the *Egeria*. This mail shows us a Japanese fisherman bestowing the most generous and sympathetic aid on the solitary survivor from the hapless *Star of Peace*; while, opposite Hakodadi, we find the officers of the Tycoon treating shipwrecked Russians with barbarous indifference and surliness.

THE DEBATE ON CHINA.

THE debate which took place in the House of Commons on the 22nd was the most practical on record, at least so far as this Session and the last are concerned. Mr. LIDDELL really proposed to condemn the policy of Government, while other speakers have always fallen short of this. We need hardly say that all the speeches in the world are comparatively useless unless a result is attained. It is to be regretted that the motion was not brought to a division, owing to the number of members present dropping down to thirty. Our readers will be astonished at this *vis inertiæ*; but when subjects on India or the Far East are attempted in full, it is invariably the fate of them. If any member introduces India or China he has a poor chance of being heard at any length. If he will "cut it short," he can bring his motion to a decisive issue; but, unfortunately, the further the scenes are separated from us the more necessary is it to give the details. These details are generally dry and not appreciated by the House at large, and consequently they drop off to avoid voting on a subject they do not understand. Mr. LAYARD'S defence of the Government was chiefly founded on facts. The evidence of Mr. MICHIE, of the firm of Messrs. LINDSAY and Co., was very important item in the defence, and had the House gone to a division there can be no doubt but that the Government would have been victorious. We are glad to see that the conduct of Captain SHERARD OSBORN and Major GORDON received such unqualified approval; and, oddly enough, the one for refusing to take service under the Chinese local mandarins, and the other for continuing in it. To the uninitiated this will appear a paradox, but if they will read Mr. LAYARD'S speech they will see it is consistent. Such are the exigencies of war. This debate has brought out most satisfactory evidence of the harmony existing amongst the foreign ministers in Peking, which is a distinct answer to those who predicted that Ministers at Peking would produce a state of intrigue similar to that in Turkey. That it has not been so is owing to the good judgment of the respective Ambassadors, and we trust that this state of things will not be jeopardised, during Sir F. BRUCE'S leave of absence, by his *locum tenens*, Mr. WADE. Both Mr. LIDDELL and Mr. LAYARD made some inaccurate statements, showing that they are not attentive readers of the *London and China Telegraph*, which is in our eyes of course a heinous crime.

DECLINE OF THE TAIPING REBELLION.

A cursory glance at the rise and progress of this extraordinary rebellion shows that it attained its culminating point two years ago. From the time the scaly monster was hatched in the south, and wound its desolating way through a thousand miles of the richest lands in China, until it reached its northern limit, upwards of twelve years had elapsed, when it was checked in its progress by British policy and valour, which, after two years' struggle, has broken its back at Foochow, and threatens its rapid extermination. At that time the increasing rebel hordes overran the greater portions of the provinces of Kiang-soo and Che-kiang, of which Shanghai and Ningpo are respectively the outports open to foreign trade. The latter-named city was in their possession, and their line of march encircled the former, while they commanded the riverine and maritime territory from Nanking southwards for a distance of at least five hundred miles. Towards the interior their sway extended to the borders of the Poyang Lake over the chief silk districts, and for a time they were the rulers *de facto* of several millions of people. Since then they have been driven from the sea-board and all the chief cities, excepting Nanking, Changchaou, and Hangchow, while the territory and population under their subjection are not one-third the former number and area. It is a long time since we have received any authentic accounts from the first-named city—which has been their head-quarters for eleven years—but the scraps of intelligence which have reached foreign ears describe a horrible state of affairs, from fear and famine. A reign of terror exists among the chief Taipings, who have lost their trust in each other; and the TIEN-WANG himself is afraid of treachery among his followers, who are fast losing faith in him or his cause, and are ready to desert or betray him at the first safe opportunity to themselves. Apparently, the time has approached when the Imperialists, by ordinary humane concessions to the vanquished, could secure the allegiance of all, as exemplified in the voluntary adhesion of the Soochow leaders and their men, when guaranteed their lives through the pledge of GORDON, which the FUTAI so treacherously betrayed. But

DEBATE ON CHINA.

(*Concluded from page* 231.)

and silk districts, burning and destroying wherever they went; and, if so, we should only have our own policy to blame. (Hear, hear.) He now came to the motion which he had put on the paper, and which declared that further interference in the war in China was impolitic and unnecessary. It was impolitic for the various reasons he had stated, and it was unnecessary because our trade had never been attacked. (Hear, hear.) What he wanted the House to declare was that, if our diplomatists, envoys, and political agents were to leave things alone, our trade in China would go on smoothly and satisfactorily. (Hear, hear.) The presen moment was a turning point in Chinese affairs:—

"There is a tide in the affairs of man which,
Taken at the flood, leads on to fortune."

The present moment was a turning point, because, the Chinese having rejected the dictatorship of Mr. Lay and the services of an English fleet, our Government might recede from the difficult and dangerous position which they had improperly attempted to assume, without any appearance of fear, or without any sacrifice of prestige, if that word could be applied to any honours we had gained in China. (Hear, hear.) He did not ask the House to pass a censure upon the Government, though he thought their policy had been erroneous in many material respects; but he earnestly invited them to join with him in dissuading the Government from a further continuance in a course which he believed to be unprecedented in the past, as he hoped it would be found without imitation in the future. The hon. gentleman concluded, amid general cheering, by moving, "That, in the opinion of this House, further interference on the part of this country in the civil war in China is impolitic and unnecessary."

Mr. LAYARD said his hon. friend had on more than one occasion brought the question of China before the House, and he had done so with considerable ability. (Hear, hear.) He also willingly admitted that the opinions of his hon. friend, in consequence of the close study he had given to the subject, well deserved the consideration of the House. (Hear, hear.) For the first time the hon. gentleman had to-night concluded his speech with a motion, and it was only right that the House should be at once informed of the course which the Government intended to pursue with respect to that resolution. The forms and rules of the House precluded him from moving the previous question, but the Government would support the motion for going into Committee of Supply, to which the resolution of his hon. friend might be regarded as an amendment. They would do so because, whatever the words of the resolution might be, the intention of his hon. friend, as explained in his speech, was that the policy hitherto pursued by the Government should be reversed, and that a course entirely different should be adopted in its stead. He thought he would be able to show that if such a motion as that were carried, and the debates of that House went out to China, the effect might be so disastrous that he believed no Government and no House of Commons would take on itself the responsibility of passing such a resolution. He would now call attention to our position in China. The question was one of enormous importance, and the interests at stake were of vast magnitude. He knew that in that matter some persons were of opinion that Her Majesty's Government were something like the ogres read of in children's books, who had no other object but to scatter misery and destruction in all directions, and he must say he had read with surprise a speech made to his constituents in the autumn by the hon. member for Bradford, in which brutality such as made his blood run cold was laid to the charge of the Government, making him almost begin to think that he was as bad as the Taipings. But he appealed to the hon. gentleman to discuss that subject with him fairly and calmly—to lay aside all the accusations of wilful atrocity which he had accumulated on the heads of the Ministry, and to look on the question merely as a question of policy. The only desire of the Government was that British interests in China should be maintained, and maintained in a manner consistent with right and honour. Many years ago our commerce with China was entirely in the hands of the East India Company. Then those who carried on that commerce were under a certain control, their operations were restricted to one port, the trade was limited, and there was no difficulty in dealing with the Chinese Government. That system of monopoly, however, was abolished, the trade was thrown open, and, as the result, a large number of adventurers rushed to the East, over whom there existed no control. The consequence was that this country was involved in several long and costly wars with China. There ensued, indeed, almost a chronic state of war on our part with China. That position of affairs was brought to an end by the celebrated Treaty of Tien-tsin, or Peking—that most important instrument ever concluded by this country with any Eastern nation. It completely changed our relations with China. Previously our intercourse had been confined almost entirely to communication with the provincial authorities. When we gained a victory the Central Government was led to believe we were beaten; when we exacted an indemnity, it was told that "the barbarians" had been bribed. But when that treaty was made, we and other European nations were enabled to have a minister resident at Peking, and direct relations were opened with the Chinese central Government. Anybody who read the papers lately laid on the table would be struck with the change that had taken place in that respect. Instead of the former chronic state of war, we were in a state of peace with China such as was utterly unknown before. We were never more free from war with that country than at this moment; and those relations with it were now carried on which, when he sat below the gangway, he had always wished to see established, and which the hon. members for Rochdale and Bradford ought also to desire to see established — relations that, instead of leading us into wars through mere local quarrels, put a stop to wars by placing us in direct diplomatic intercourse with the seat of Government. If we now had any grievances to complain of a correspondence passed between Sir F. Bruce and Prince Kung, which was carried on almost in the same way as a correspondence between two European Courts. In fact, we treated China almost for the first time as a civilized Government. He was amused the other day to find that an order was given by Prince Kung for the translation into Chinese of a work on international law for the use of the Chinese Foreign Office and the benefits of its young diplomatists. That marked an extraordinary change in the relations of Western nations with China, and the rise of a state of things which he had long been anxious to see, because it gave the only hope of maintaining peace with that country. He said that if a tithe of the questions now arising in China had arisen fifteen years ago, they would have produced war upon war with her; whereas they were all settled now by diplomatic notes. Our great difficulty had been to restrain our consuls and different officials in the ports of that country. He did not wish to cast blame on those gentlemen who possessed great ability and experience in the public service; but they had been brought up in the old school, and had been in the habit, if they had a grievance, to insist at once on redress, without a reference to head-quarters, and sometimes without a good case. Sir F. Bruce had, however, restrained the consuls in many instances, requiring them to communicate with him in order that he might make representations where that course was necessary to the Court of Peking. After the treaty of Tien-tsin various ports were opened for commerce in China. But it must be remembered that China was in an exceptional position. He did not think that that put her out of the pale of the law, or justified them in treating her differently from any other nation; but, after all, they had to deal with an Eastern people, with different laws and a different civilisation from our own. His hon. friend said, as was true, that their modes of punishment were barbarous, and such as we could not submit to—that we could not allow British subjects to be cut in two or exposed to torture. Now, a large number of Englishmen and other Europeans had resorted to the treaty ports. These persons had a certain right to be governed by the laws of their own country; and out of that arose what was called the extra-territorial jurisdiction in China—that was to say, each of the ports had a settlement beyond the Chinese quarter, in which Europeans lived, and were subject only to the law of their own country, administered by the consuls. Thus sprung up a number of these almost independent settlements; and that system, together with the humiliation which the Chinese Government underwent by wars and by the taking of Peking, greatly weakened the central authority, and rebellions broke out. One important rebellion was that of the Taipings. He could scarcely call that a civil war. The Taipings were admitted to be a horde of mere marauders by everybody but the hon. and gallant member for Aberdeen. ("No," from Colonel Sykes.) Merchants, missionaries, soldiers, sailors, all parties were agreed as to the fact that the Taipings had no form of government, that they did not aim at establishing any kind of administration, but were a mere set of plunderers, spreading ruin and devastation everywhere they went. There was not a doubt as to that. Having at last overrun a large portion of the central provinces, the Taipings came down to the neighbourhood of Shanghai. It was all very well for gentlemen resident at Hong Kong, under the protection of the British fleet and British troops, to pretend to debate what was the policy which the Government ought to pursue in regard to Shanghai—a very different place from Hong Kong. (Hear, hear.) But let him quote to the House the opinion expressed by the British subjects living at Shanghai itself on that point. [An hon. Member.—"How long ago?"] He thought it was three years ago. (Hear, hear.) That opinion appeared in a blue-book laid on the table, he believed, in 1862, and, although it had been cited before, yet so entire a misunderstanding seemed to exist on the subject that he hoped he might be allowed to read it to the House again. When the Taipings approached the neighbourhood of Shanghai, our merchants there were in the greatest alarm, and the Chamber of Commerce met and passed a series of resolutions. The hon. gentleman proceeded to read the resolutions in question, which declared that the meeting felt strongly the advisability of our Government sending a regular force to protect the residents of the settlement, and prevent the recurrence of panics utterly destructive of trade; that the understood policy of Her Majesty's Government to defend the settlement and city of Shanghai from the rebels had led to a vast accumulation of population and wealth there; that that accumulation of wealth offered a greater temptation to the Taipings to go and plunder the place, more especially after what had happened at Hangkow, the rebels being also flushed with the capture of Ningpo; and that the meeting cordially agreed that a considerable permanent addition ought rapidly to be made in the force of troops sent there. Suppose they had allowed the Taipings to enter Shanghai, the place would have been sacked, trade would have been utterly destroyed, and a terrible massacre would have taken place. ["No!" from Colonel Sykes.] He would show that presently. But let him ask the House if Government, notwithstanding the representations of the Chamber of Commerce of Shanghai, of consuls, missionaries, and others, had allowed the Taipings to enter Shanghai, and had its commerce been destroyed, what would have been the opinion of the House and the country of the conduct of Her Majesty's Government? One of three things had to be done; to leave the defence of Shanghai in the hands of the Chinese themselves, to defend it with our own troops, or to assist the Chinese by giving them English officers in order to discipline their forces. The Government had to choose one of these three modes of action. To have left Shanghai in the hands of the Chinese would have been virtually to abandon it to the Taipings. Had we taken to ourselves the defence of Shanghai we should have had to send a large English army to the place, and would not the House have complained had the Government sent more troops there? They took the third course. It was by far the cheapest and most advantageous. They had reduced their troops there to the *minimum*, and the object was to allow not English officers only, but foreign officers also, to take service under the Chinese, to endeavour to organize and discipline the Chinese troops so as to enable them to defend Shanghai. That was, he contended, a most reasonable policy, and one which would least involve this country either in expense or in her relations with China. It now became a military question how Shanghai should be defended. It was discussed by Admiral Hope, Brigadier Stavely, and others. It was thought necessary that with regard to Shanghai there should be a thirty miles radius, and instructions, which would be found in the blue book, were given that British officers should not go beyond that radius. In some instances that radius had been exceeded. In one case General Brown thought it necessary to exceed the thirty miles' radius. He wrote to this country and gave his reasons, and what did the Government do?

Digitized by Google

They thought the case entirely exceptional, and, in excepting his explanation, they adhered to their orders that the thirty miles' radius should not be exceeded. The instructions were particularly clear. What Government said was this:—Officers on half pay might take service with the Chinese Government, and go beyond the thirty miles' radius; but so long as men were in the service of Her Majesty they should not in any case exceed the thirty miles' radius. No conflicting instructions were given. In order to allow British subjects to take service under the Chinese orders in Council were issued. They were issued after mature deliberation, and a good deal of the correspondence took place on the subject; but, after taking the advice of Sir F. Bruce and the commanding-officers, and communicating with other Powers, we decided to allow English officers, men of character and skill, to take charge of the Chinese troops, with the view of exercising some restraint over them, and thus preventing those horrors which it was the custom of Chinese troops, when under the command of Chinese officers, to commit. No doubt, there was great inconvenience in allowing British officers to take service under the Chinese Government. That was fully taken into consideration, but it was considered better to encounter that inconvenience, and have the Chinese army well disciplined, than allow that army to be broken up, and let Shanghai fall into the hands of the Taipings. Major Gordon was a very distinguished officer, a man of great ability, and the accounts of what he had done in China were highly creditable to him. He enjoyed the high opinion of Sir F. Bruce, not only as a man of ability and skill, but of humanity. He would not go over the history of Soochow. No doubt it was a very horrible case. His noble friend at the head of the Government had, on a former occasion, condemned it in appropriate terms. In fact, everyone who had spoken on the subject had done so. He was not there to justify it. But he must warn the House against exaggerating these things. They had had a recent instance in Japan connected with the bombardment of Kagosima. He was not going to justify the Futai; but the 20,000 said to have been massacred proved entirely a myth. The Chinese papers were not remarkable for diminishing the horrors of any event they might have to describe. The first account of this alleged massacre appeared in the Chinese papers, and the *China Mail*, of January 1, within a week after that account had appeared, published the following:—

"Since we wrote last week upon the fall of Soochow further accounts tend to show that the slaughter of the besieged was not carried out to the extent which was on all hands expected. Indeed, from what we can learn there was little more, comparatively speaking, than a show of bloodshed sufficient to stamp Ching's troops with the character of conquerors. It is not unworthy of notice, with regard to the Imperial troops under the Futai, that, notwithstanding the number of 'Eye-Witnesses' by which they were constantly surrounded, and the demand which existed in the news market, if we may so speak, for reports about Imperial cruelty, 'sanguinary atrocities,' and so on, no instance of cruelty, except that o Taitsan, was ever adduced against them; and in that case the Chinese commander was remonstrated with. . . . The Futai in the hour of victory certainly forgot himself, and disgracefully broke faith with Major Gordon, but the indiscriminate slaughter of old and young at first vaguely reported does not prove to have followed as we confess to have expected. There is reason to believe that foreign influence went far to restrain the barbarities of the Imperial troops; and, therefore, it is advisable that foreign assistance should not be too hastily withdrawn."

His hon. friend had asked what Major Gordon's position was. He continued to act under the Futai, and he must say he did perfectly right. The reasons he gave for doing so entitled him to the highest credit, and justified the good opinion entertained of him by those who knew him. He had remonstrated and protested against the conduct of the Futai, but he went on to say if he had, thinking only of his own reputation, thrown up his command, the troops to a man would have gone over to the Taipings, the Chinese would have been defeated, Shanghai would have been sacked, and an enormous amount of British property would have been destroyed. He thought that Captain Gordon was quite right in the views he took. (Hear, hear.) His hon. friend had asked what was the position which Captain Gordon now occupied. The answer was that Captain Gordon was no longer in the service of the Chinese Government, because when Her Majesty's Government learnt the disgraceful act of treachery that had been committed they immediately repealed the order in Council which gave permission to British officers to take service under the Chinese Government. His hon. friend had accused Her Majesty's Government of not only giving the Chinese Government the assistance of British officers, but also of supplying them with arms and ammunition. The fact was that some old stores had been supplied to the Chinese Government, and had been paid for, except a trifling balance, so that there had been no loss to the country on that account. His hon. friend had dwelt at considerable length upon the circumstances attending the expedition of Captain Osborn and his flotilla, but there really was very little in the statement he had made. The British Government had nothing to do with the flotilla, and were not in any way answerable for it; and after the passage which his hon. friend had quoted from Sir F. Bruce's despatch, disclaiming all interference in the matter, and avowing a conviction that the Government at home had not made themselves responsible for the proceedings of the flotilla, it was surprising that any attempt to mix up the British Government in the affair should be persevered in. The real history was that Mr. Lay came to this country stating that he had authority from the Chinese Government, and it was not the business of the British Government to inquire into the nature of the au hority. If they had inquired into that, and then had said nothing, they would have been told that they had acquiesced in those instructions, and had virtually approved them: but they abstained from all interference. They knew that in the Chinese seas and rivers there were swarms of pirates, which it was for the interest of British commerce should be got rid of; and it appeared that the Chinese Government, instead of relying, as heretofore, upon the British squadron for that purpose, had determined to obtain a fleet of their own to carry out that object. If they had been able to effect that object, it would have been a great advantage to this country, as it would have relieved our ships from the task of suppressing piracy in the Chinese waters, and the fact that Captain Osborn was to command the squadron was a guarantee that the purpose intended would be attained. Accordingly, Captain Osborn did go out, but when he got to Peking he found that Mr. Lay had exceeded his instructions and gone beyond the authority he had received, directly or indirectly from the Chinese Government. What did Sir F. Bruce do then? No one could have behaved with more straightforward candour or with greater impartiality than Sir F. Bruce, and he determined not to interfere in the matter. He accordingly requested the United States Minister to settle the question, and to communicate with the Chinese Government, and the result was that the negotiations thus carried on were brought to a satisfactory conclusion. The Chinese Government behaved with great liberality to Captain Osborn and Mr. Lay, but refused to accept the flotilla upon the terms proposed to them, and the ships were sent home to be sold. There was nothing in the whole of these transactions to warrant any condemnation of Her Majesty's Government for any part they had taken, but, on the contrary, Mr. Burlinghame, the United States Minister, spoke in his despatches in the highest terms of the course that had been pursued. Nothing could be more honourable than the conduct of Sir F. Bruce. (Hear, hear.) In one of his despatches Sir F. Bruce wrote:—

"The belief that I, as British Minister, would respect the rights of the Chinese, and that I would not force the flotilla upon them from selfish political considerations, induced my colleagues to abstain from interfering while the subject was under discussion, and thereby secured for the flotilla a deliberate and unfettered consideration on the part of the Chinese Government; and I am certain that this course was more favourable to the success of the scheme, had success been possible, than any other that could have been adopted. It appeared to me, also, that I should not have been justified in taking a more active part, for I had reason to believe that your lordship had no cognisance of the undertaking of so novel a character entered into by Mr. Lay by Captain Osborn; and the absence of instructions was to me a significant proof that Her Majesty's Government had no intention of being a party to, or responsible for, the arrangements under which the operations of the flotilla were conducted."

Nothing could be plainer than these words. His hon. friend had talked about the Government intending to assume a protectorate of China; but the suggestion was really so absurd that it was almost impossible to reply to it in sober seriousness. To talk about intrigues on the part of the British Cabinet to obtain the exclusive control of the Chinese empire was unintelligible, because even if such intrigues could be contemplated they must fail, as the representatives in China of France, the United States, and other Powers would exercise a vigilant control to defeat them. Upon that subject, however, he must say a few words more. He was not in the habit of attending to anonymous scribblers, and he had seen an article in a China newspaper, alleging that this expedition was a speculation on the part of the British Government, that Sir F. Bruce had endeavoured to force it upon the Chinese Government, and that the Chinese Government was so indignant that for a whole year Sir F. Bruce was not permitted to enter the presence of Prince Kung. Such statements were too ridiculous to need contradiction, but when gentlemen signed their names to their communications it was as well to notice any statements which were made in that manner. There was a gentleman well known to the world, a professor at Oxford, Mr. Goldwin Smith, who, in a letter to a newspaper, used the following expression:—

"In the case of China a step has been gained, though at the expense of a great dishonour to the nation. The Chinese have detected and frustrated the design of our Government in sending out mercenaries ostensibly to serve the Emperor of China, but with secret instructions to seize the supreme command. This great England of ours has been placed by her rulers before the world in the position of a pickpocket caught with his hand on a handkerchief, and exposed to the jeerings of the crowd. But the filibustering policy has received a serious check, and the order in Council inciting British soldiers and seamen in the name of their Sovereign to sell themselves as mercenaries to a barbarian prince has been withdrawn."

If Mr. Goldwin Smith had not reduced his authority to the lowest level, it would be necessary to answer such a statement, coming from a professor of history; but did any hon. gentleman believe that Captain Osborn went out to China with secret instructions to seize upon the country and to obtain a complete control over it? He was sure that if his hon. friend sat upon the Treasury bench and he (Mr. Layard) were to make such a statement, the impression created by it would be that the person who uttered it was a fit object for confinement in Hanwell Asylum. But the truth was Captain Osborn was in a position to make his own terms, but in a manner becoming a gentleman and a British officer—(hear, hear); he abandoned the undertaking, which might have been a source of great profit to himself, and returned to this country. Could anyone say that Captain Osborn's conduct had been that of a buccaneer or a filibuster? (Hear, hear.) With regard to Mr. Lay, he did not wish to say anything unfavourabe, but he believed that Sir F. Bruce was correct in saying that Mr. Lay had exceeded his instructions, and had misunderstood his position. Mr. Lay was a man of great capacity, of large views, and great ideas. (A laugh.) He could hardly see cause for laughter in that statement, for he believed that Mr. Lay had done much for the advancement of China. (Hear, hear.) His efforts in the revenue department had been extraordinary; but in this instance it must be admitted that he made a mistake. But in that mistake he did not receive the support of the British Minister, and he actually complained that he had not received that support. The policy of the Government had been to avoid all interference in the civil war, if such it could be called, that was going on in China, so long as the combatants did not approach the treaty ports. If the order of the Government had been disobeyed, and our officers had gone beyond the thirty miles' radius, it was through misconception or from special causes, but the Government had never sanctioned such expeditions. His hon. friend had not been quite correct in his statement, because the silk trade had been stationary for the last three years, though our trade had increased in almost every other branch to an enormous extent. In Shanghai, in 1845, the imports and exports connected with the British and foreign trade amounted to £2,571,033; in 1850, £7,449,360; 1853, £11,217,420; 1856, £17,911,280; 1860, £23,589,417; 1861, £25,961,019; 1862, £37,531,359. The tonnage of vessels at Shanghai in 1861, inwards and outwards, was 827,000, while in 1862 it had increased to 1,447,000. The results of the trade at some of the principal

Digitized by Google

ports in China was exhibited in the following figures, representing the imports and exports:—Canton, £6,473,261; Amoy, £1,056,510; Swatow, £1,988,043; Foochowfoo, £5,965.425; Hankow, £6,189.952 (showing an increase of £3,011,482 over previous year); Shanghai, £58,604,550. In addition to these amounts there had been considerable trade at Tientsin and at the other open ports, of which the particulars had not been given. Their imports and exports, however, amounted to £2,341,589; making a grand total of £60,946,139. He was afraid lest the statistics might prove wearisome to the House, but they were necessary for the purpose of showing that the policy of the Government had been successful and justifiable, and he was certain there was not a respectable merchant in China who would not have been horrified if that policy had been reversed. Sir Frederick Bruce, on the 30th of April, 1863, speaking of Shanghai, said:—

"The growth of Shanghai is wonderful; its population is estimated at 1,500,000, and it bids fair to become soon the most important city of the East. The Chinese flock to it on account of the security it enjoys, and the silk manufacture, which was destroyed by the Taiping occupation of Soochow and Hungchow, is taking root at Shanghai. It is a subject of great satisfaction to me that our resolution to save Shanghai from the destruction that menaced it at the hands of the Taiping hordes has not only been productive of great benefit to trade, but has afforded a safe asylum and an escape from ruin to so large a body of the industrious and respectable native population."

(Hear, hear.) He believed, therefore, that Her Majesty's Government might fairly take credit for the policy it had pursued with regard to Shanghai. The policy of the United States had been held up for admiration, and recommended to Her Majesty's Government for imitation. He thought it quite right that our policy should be judged by that of other nations. He would, therefore read a despatch from Mr. Burlingame, which would enable the House to see for themselves what the opinion of the American Minister was upon their conduct:—

"Mr. Burlingame to Mr. Seward.

"Legation of the United States, Pekin, June 20, 1863.

"In despatch No. 18, of June 2, 1862, I had the honour to write 'if the treaty Powers could agree among themselves to the neutrality of China and together secure order in the treaty ports, and give their moral support to that party in China in favour of order, the interests of humanity would be subserved.' Upon my arrival at Peking I at once elaborated my views, and found, on comparing them with those held by the representatives of England and Russia, that they were in accord with theirs. After mature deliberation we determined to consult and co-operate upon all questions. . . . . In all our conversations Sir F. Bruce, with great force, urged the adoption of a co-operative policy in China, and, as the representative of the largest trading power here, said he was willing to lead in a liberal direction. Indeed, so striking were his views, and so in contrast to what had hitherto been the English policy, and so in accordance were they with the policy strongly urged by me before I came to Peking, that I expressed a warm desire that he would present them to his Government that they might become the basis of our future co-operation. . . . Upon this frank avowal of the policy of England, it would be impossible to refuse co-operation. The Russian Minister and myself both concurred in the view that the position of Sir Frederick was just what we desired, and we hailed with delight its avowal. The French Minister, Mr. Berthemy, agrees with us. Being a broad and experienced statesman, he at once saw the advantages which would flow from the casting down of all jealousies, and by a co-operation on every material question in China. . . . The policy upon which we are agreed is briefly this—that while we claim our treaty right to buy and sell and hire in the treaty ports, subject, in respect to our rights of property and person, to the jurisdiction of our own Governments, we will not ask for nor take concessions of territory in the treaty ports, or in anyway interfere with the jurisdiction of the Chinese Government over its own people, nor ever menace the territorial integrity of the Chinese Empire. That we will not take part in the internal struggles in China beyond what is necessary to maintain our treaty rights. That the latter we will unitedly sustain against all who may violate them. To this end we are now clear in the policy of defending the treaty ports against the Taipings, or rebels, but in such a way as not to make war upon that considerable body of the Chinese people by following them into the interior of their country. In this connection, while we feel desirous, from what we know of it, to have the rebellion put down, still we have become to question the policy of lending Government officers to lead the Chinese in the field, for fear of complications among ourselves, growiug out of the relative number to be employed, &c. That while we wish to give our moral support to the Government, at the present time the power in the country which seems disposed to maintain order and our treaty rights, we should prefer that it would organise its own people, as far as possible, for its own defence, taking only foreigners for instruction in the arts of peace and war, and these, as far as possible, from the smaller treaty Powers. To maintain the revenue laws of the Government, to relieve the treaty Powers from the burdens attending the suppression of piracy along the coast, the Chinese Government has been persuaded to purchase several war steamers, and to man them temporarily with foreigners. This fleet is coming out under the command of Sherard Osborn, and is manned chiefly by English sailors, with the understanding that it is a temporary arrangement. . . . While Sir Frederick Bruce shall remain, or while the policy now agreed upon shall be maintained, no harm can come from it. That the indemnity may be collected and accounted for, and that the Chinese Government may have a fund to maintain a national force, organised upon European principles; that the local authorities may be checked in their corrupt practices, and a uniform system for the collection of the revenue maintained, it is agreed on all hands that the present foreign Custom-house system is the best as yet devised, and as it has been administered by Mr. Lay entitled to our support. Indeed, it is alone through such instrumentalities that we can hope to advance the cause of civilisation in China."

That was the policy which the English Government had uniformly adopted with reference to China, and it was the policy they were now called upon to reverse. (No, no.) Hon. members might say, "No," but their language would imply that desire. His hon. friend was mistaken in imagining that the jealousies he had described really existed in China. It was not true either that the merchants in that country were adverse to the policy we had adopted. Mr. Michie, one of the partners in the well-known firm of Lindsay and Co., a short time since journeyed from Shanghai to England, through China and Russia. (Hear, hear.) Would any member have ventured ten years ago to predict the possibility of such a journey? The fact, also, that telegraphic communication had been established spoke volumes in favour of the policy of her Majesty's Government—a policy which he believed would be regarded with favour by every well-wisher of China. When he heard that Mr. Michie was in this country he submitted a series of questions to him, and this is what he said in reply:—

"I have no reason to think that if the Taipings had taken possession of the treaty ports they would have established order and good government, respected our treaties, or protected our trade. My whole knowledge of the Taipings leads me to an opposite conclusion." His hon. friend the member for Aberdeen (Colonel Sykes) had no personal knowledge of the Taipings, and he (Mr. Layard) hoped he never would. (A laugh.) "Even if they had the will, I esteem them incapable of organising a civil government. They have held Nanking for eleven years, with little or no molestation for several years; but it is still only a fortified camp, absolutely without trade or population. The interior of the city is a desert. Having had the privilege of accompanying Admiral Hope in his expedition up the Yang-tze-kiang, in 1861, I became acquainted with his views regarding the Taipings. He endeavoured to establish friendly relations with them, and in March, 1861, obtained permission for Lieutenant-Colonel Wolseley, Vice-Consul Hughes, Rev. Mr. Muirhead, and myself to reside in Nanking for a week, in order to become acquainted with the Taiping chiefs. Colonel Wolseley reported his impressions in his interesting "Narrative of the Chinese War in 1860." The impressions of Mr. Hughes and myself, and I think also Mr. Muirhead, are reported in the Parliamentary blue-book of 1861. During the whole of that year Admiral Hope was indefatigable in his endeavours to keep on good terms with the Taipings, and in December he again paid a visit to Nanking, accompanied by Sir Harry Parkes, to remonstrate with the chiefs for the violations of agreements of which they had been guilty. In the same month the treaty port of Ningpo was captured by the Taipings, and I know, by personal conference with Admiral Hope, that up to that time he had not abandoned the idea of giving the Taipings a fair chance of showing their ability and disposition to establish an administration under which it would have been possible to carry on trade. How these experiments failed is well known, and it is a significant fact that Sir James Hope, the last friend the Taipings had among British officers, with the exception of one of our consuls, who years ago committed himself to Taiping advocacy on theoretical grounds, should have been the first officer who took the responsibility of leading a British force to the field against them, which he did with energy and determination in the spring of 1862."—Now Admiral Hope was a man of the most enlarged and liberal views—(hear, hear); no one could have a more enlarged and liberal heart—(hear, hear), and yet he was obliged to give up the Taipings, and was the first to lead an army against them. (Hear.) "The course pursued by Sir James Hope towards the Taipings ought to be a convincing proof to impartial minds of the impracticability of maintaining relations with the rebels in China. I need not say that my own opinion on the subject is very strong, and has been for the last five years. I am not aware of any influential firms who were in favour of allowing the Taipings to take possession of any treaty ports, although, no doubt, many were pleased to see Admiral Hope's experiment tried at Nanking and Ningpo. Nor am I aware that any influential firms entered into commercial relations with the Taipings. The agents of European firms who have been engaged in the transport of produce to and from the interior have, no doubt, come into contact with Taiping troops, and have had to negotiate with them for the passage of goods. A certain class of traders have carried on an extensive and lucrative trade with the Taipings in munitions of war. This traffic is considered disreputable. Munitions of war can only be entered by smuggling and making false declarations,—for example, gunpowder has been passed through the Custom-house under the name of Bibles—(laughter), and rifles and bayonets under the name of umbrellas—(renewed laughter); and to disarm the suspicions of the Custom-house officers these packages have occasionally purported to be consigned to missionaries and others. For the sake of accuracy I should also mention that some business has been done with the Taipings in opium and cotton goods, and that they have at times had tea and silk to sell, which has either been seized by them or abandoned in terror by the owners. The British merchants most largely connected with China are in favour of the British Government giving such assistance to the Chinese Government as will enable them to keep the Taipings out of the treaty ports; nor do I think there is any difference of opinion as to the advisability of pushing our assistance to the ultimate crushing of the rebellion. The *modus operandi* may have been questioned, and I know some merchants have considered that the Government might with advantage have gone a step further than it has done. But all feel and acknowledge the difficulty and delicacy of the position. The suppression of the rebellion would be deemed an inestimable blessing by all—natives and foreigners; and if peace again reigns in China the means of access we now possess to the interior of the country, and the amount of European enterprise that is in readiness to be let loose, would inaugurate an era of commercial expansion that would be without parallel in history. I don't think there are any merchants of influence in China who would like to see the Government withdraw all assistance from the Chinese, for that would cause anarchy. The great majority, however, have been in favour of the plan pursued, as being the most economical to this country and the soundest in policy, not compromising the British Government more than necessary, and teaching the Chinese to help themselves. (Hear.) It would be disastrous to British trade in China to withdraw from relations with the Chinese Government, and disastrous alike to the Chinese Government and people. It would be a breach of faith with all the merchants and others who had invested large sums in China on the faith of treaties and permanent relations with China. (Hear.) The employment of officers of rank and character has, moreover, done more than anything else to check the rise of that dangerous class of military adventurers in China. (Hear.) The Chinese Government will certainly employ foreigners of some sort, and in the absence of anything better they will accept men of

Digitized by Google

the worst characters. Our commerce with China has increased, and is increasing, under the policy at present pursued by our Government. I doubt if it would have improved more under any other policy. That our trade has increased at all under the incubus of the rebellion I take to be an earnest of what it might grow to when that incubus is removed." (Hear, hear.) He took that reply to be the most remarkable and complete testimony that could be given of the success of the policy pursued by Her Majesty's Government, coming as it did from the representative of one of the most eminent firms engaged in the China trade. (Hear, hear.) But the Government were now asked to reverse that policy. Well, then, what policy was to be put in its place? They had heard lately that it was not for the opposition to suggest a policy. It was very easy to criticise and protest; but if the Government had done wrong they who said so were bound to point it out, and show how they could set themselves right. But he had not heard any suggestions of that kind. The opponents of the policy pursued by the Government in China would not, he presumed, admit the Taipings into the treaty ports; would they ask the Government to do so? He had heard some gentleman, he believed the hon. member for Rochdale, defend that policy. Some said we ought to withdraw from China, we ought to have factories along the coast, and allow our people to trade with certain fixed stations. He had asked a member of one of the largest Chinese firms if that policy were possible, and what would be the result, and that gentleman replied that they (the merchants) would at once invest £100,000 in well-armed steamers, which would engage in smuggling, and would carry on their trade by force. (Hear, hear.) And a paper had been actually established at Shanghai, called the *Chinese Recorder*, and paid in order to advocate the policy that each merchant should be allowed to make his own arrangements with the Chinese authority on the spot, and should buy exactly what the latter agreed to take—he having, of course been bribed—and that there should be no diplomatic relations between this country and China. He would not trouble the House to read the answer which had been published in the *China Mail*; it was to be found in the blue-book; but that answer was so complete that it led, he believed, to the suppression of the *Chinese Recorder*. The *China Mail* showed that that policy would lead to a system of buccaneering along the coast; that the large firms would purchase vessels of the kind required; that the very small firms would go to the wall; and that the result would be to involve us in a war with China. (Hear, hear.) No gentleman in that House would recommend a course of action of that kind, or say that we ought to reverse a policy which, like all other things, had faults, but which, on the whole, had been attended with the most marvellous success. (Hear, hear.) He had shown how the most marvellous superstructure of trade had been raised upon that policy—a trade amounting to something like £60,000,000, most of which was British. Another policy might be successful; but it might also fail to succeed, and no Government would take upon itself the responsibility of reversing their system merely upon a theory brought forward by an hon. gentleman who could not have materials at hand to form a correct judgment. The policy of Her Majesty's Government had been approved by merchants in the East; it had been approved by missionaries, by naval and military authorities, by Sir F. Bruce, and by Mr. Burlingame—(hear, hear)—and he trusted it would receive the approval of the House. If it were in his power he would move the previous question, but as he was not able to do so he thought the best way of meeting the motion of his hon. friend, since he could not agree to it, was to conclude by moving that the Speaker do leave the chair. (Hear, hear.)

Mr. W. E. FORSTER said the hon. gentleman had not at all met the question which had been brought before the House in so convincing a speech by the hon. member for Northumberland. (Hear, hear.) The Under-Secretary told them about the immense quantity of tea and silk which we get from China, but he had never met the real question, which was not whether we should or should not withdraw from the protection of Shanghai and the treaty ports, and of British life and property in China. There was no member of the House who wanted the Government to do that, although they might have doubts whether we should have begun that protection by opening the treaty ports at all. (Hear, hear.) But the question before the House was whether we were to sanction the Government going on interfering in the civil war for the purpose of putting down the rebellion. (Hear, hear.) He did not wish to make any charge against his hon. friend the Under-Secretary; they knew they had not the Chief of the Foreign Department in that House; and his hon. friend might often find his great abilities taxed in defending a policy which he had not originated. But what he complained of was that the policy of Her Majesty's Government was not only not right as regarded China, but it was not fair as regarded that House. From Session to Session the House had not been informed of what was doing in China and of the intervention which was taking place there. Last year his hon. friend told the House that the measures which were contemplated would not violate the principle of neutrality. ("Hear, hear," from Mr. Layard.) Why, they broke through every principle of neutrality ever professed by any country. (Hear, hear.) In this civil war the English Government began by professing neutrality, but at the beginning of 1862 this principle was departed from. Up to this time Sir F. Bruce declared that it would be not only impolitic but hopeless to meddle in the war, because he had no hope of the Chinese Government. No country, he wrote, could present a darker picture than China, and he added that the Emperor was powerless to resist the progress of the insurrection whenever it concentrated its forces. Suddenly, a change came over Sir F. Bruce. He was struck by the success of a disciplined force under Colonel Ward, and he suggested that a military organisation would be most useful in the present distracted state of China, and recommended the loan of ten thousand muskets. Upon the receipt of this letter, Earl Russell wrote back, and said that the rational course for us to pursue was to defend our own trade, protect the treaty ports, and encourage the Chinese Government to arm a sufficient force of artillery, infantry, and cavalry, to overcome the rebels and reduce them to subjection. Well, then, his hon. friend wrote to the Secretary of the Admiralty and to the War office, in which he spoke of the measures to be taken against the Taipings, the great want of the Chinese being a disciplined force and gunboats. It was suggested that some work upon international law should be translated into Chinese for the benefit of the Chinese Government; but if his hon. friend maintained that there had been no departure from the principle of neutrality here, he ought certainly to read that volume himself. English officers were allowed to enter the Chinese service, the Chinese were enabled to obtain ammunition, and our troops were stationed so as to help the Anglo-Chinese force at a distance. It was said that the Government had nothing to do with the employment of this force. But, after the dismissal of General Burgevine, General Staveley wrote in one of the despatches to say that he had appointed Captain Holland to the temporary command; and on another occasion General Brown told the European consuls that Major Gordon's connection with him as a British officer was such that he must support him. It did not appear that the experience of facts had proved to the Government, what they should have known from theory, that they could not allow British officers and British skill to be used by foreigners without incurring responsibility, and that they could not, in short, afford material assistance in carrying on war without taking the consequences. (Hear, hear.) Last year his hon. friend had treated the House not quite fairly on the subject of the flotilla, in saying that the object of the flotilla was to put down piracy, "and for that object almost alone." Now, before that time a memorandum had been sent by Mr. Lay to Earl Russell, stating what the real objects of this flotilla were. These objects, as he stated them, were twofold. The first was "to re-establish Imperial authority upon the Yang-tse, and commercial security upon the inner waters." (Hear, hear.) Now, this was not piracy; it was just the sort of intervention which the English Government ought not to attempt. The second objection was to suppress piracy between the open ports. If his hon. friend was not aware last year of the extraordinary memorandum of agreement between Mr. Lay and Captain Osborn, he ought to have been, and the Government should never have allowed such a breach of neutrality and of the Foreign Enlistment Act, as the sailing of a fleet from this country to assist a foreign Government in putting down a rebellion, without knowing all the arrangements which had been entered into. As it was, Captain Osborn went away with the blessing of the Chancellor of the Exchequer, given to him publicly at the Geographical Society. ("Hear, hear," and a laugh.) His hon. friend said it was extremely unfair to charge the Government with a design to make Mr. Lay dictator of China. He did not charge them with this, but he did charge the Government with great negligence in not being aware that this must have been the case if Captain Osborn and Mr. Lay had carried out their agreement. He would then have had control of a force with which no one in China could have contended. Reverting to the object of the flotilla, it was evident that Prince Kung, at all events, did not think it was meant to suppress piracy alone, because he expressly stated that he expected that the flotilla would sweep away all rebellion. It would be difficult to lay down any definition of the word "filibustering" which would not be applicable to the course in China. He did not apply this term to Captain Osborn, whose conduct had been most noble. He had made a mistake in putting himself in such a position, but he had resisted temptation, and had saved the Government which had, he might almost say, sent him out, from consequences which the country would probably have rued for many years. Mr. Lay recommended his project to Earl Russell on the ground that it would "in no way compromise Her Majesty's Government, while it possesses at the same all the advantages, without the inconveniences, of direct aid." It was in vain to expect to have the advantages without the inconveniences of war. If the Government gave material assistance to a Power they must take the consequences. Well, was the present policy to go on or not? The Foreign Secretary said some time ago that if that policy failed graver questions must arise. It had failed in two cases, and would the Government tell the House whether they had now entirely given up the notion of carrying on a private war? The Under Secretary for Foreign Affairs denied that there had been any interference except for the protection of Shanghai. But Soochow could not have been taken except by English aid. The whole subject of employing foreigners was considered by the legations of the foreign Powers to be unwise, likely to lead to the grossest injustice, and to be a cause of danger. [Mr. Layard: We have suspended it.] Yes, but the Government had only lately suspended it. There might be an argument in favour of the conquest of China. It, no doubt, offered a temptation to ambition, but it would be the most costly business ever undertaken by this country. It was, moreover, impossible to look back at the policy of Her Majesty's Government without feeling that this country was in a great measure the cause of the anarchy that prevailed in that country. The noble lord at the head of the Government could scarcely look back at what has happened without feeling that the policy he had so energetically pursued had so far weakened the central authority in China as to render possible the rebellion that had occurred. The noble lord now probably thought that he was called upon to restore order in China, but he repeated that it was too great a business for this country to undertake. There was no alternative between conquest and non-intervention. If the Government tried to get certain advantages without the inconveniences of war, they would, notwithstanding, have war on their hands, and would be obliged after all to make the conquest. This, however, would not be done unless the Government succeeded in misleading and deluding the people.

Mr. FERRAND said he had heard the noble lord at the head of the Government protest against the atrocities perpetrated by European Governments, but he doubted very much whether the atrocities perpetrated in the whole of Europe for the last twenty-five years equalled those which had been perpetrated under the authority of the English Government in China. The noble lord tacitly encouraged the opium trade for the purpose of forcing a quarrel on the Chinese. From the year 1834, when the noble lord began to persecute the Chinese Government, his policy in China had been unjust, cruel, and dishonourable. The hon. gentleman then quoted extracts from speeches of the late Sir R. Peel and the Chancellor of the Exchequer condemnatory of Lord Palmerston's policy in China; and was proceeding to give the House a history of our hostilities with the Chinese, when

An HON. MEMBER drew attention to the fact that there were not forty members present; and, there being only thirty-five when the Speaker counted, the House stood adjourned at a quarter past eight o'clock.

Digitized by Google

for that sanguinary act we might now have been announcing in these columns the opening of the gates of Nanking to his victorious disciplined troops. It is to be hoped that he is not too late in the field, with that end in view. Eshing being evacuated, the next rebel stronghold we expect to be captured is the city of Chang-chaou, situated on the grand canal some thirty miles beyond Soochow, which in all probability will have the effect of securing the towns east of Nanking, so that he could march unopposed by any formidable body of insurgents upon its southern walls, where the fortifications are most vulnerable. Moreover, it is reported that the city is now completely invested, on land and water, by Imperial troops, who have for months stopped all external supplies of food by native dealers, and munitions of war by foreign contraband traders; while all the renegade volunteers have decamped, like rats from a drowning ship. Under these circumstances it is not likely that the TIEN-WANG'S remaining adherents, tainted with dissension, could maintain a long stand against a vigorous assault of the disciplined Chinese, led by GORDON and his foreign officers, who have hitherto had no opportunity of exhibiting their prowess before the walls of the ancient capital. For such an event they awaited the co-operation of OSBORN'S Anglo-Chinese fleet to make a combined attack on Nanking by river and land, and carry the place by a *coup de main*. This chance, however, has been frustrated through the unskilful and egotistical diplomacy of LAY. Nevertheless, we look forward with confidence to the attainment of this success by the Chinese alone under the generalship of GORDON, should no further act of treachery dissuade him from throwing up his command. In anticipation of such an event we may safely conclude that the monstrous heresy of Taipingism, which once set the Christian world in a flame, is rapidly sinking into the oblivion of impostures; and the regeneration of China by the establishment of a "Heavenly Kingdom of Great Peace," is but "a mockery, a delusion, and a snare."

THE HONG KONG MINT.

THE absence of Sir HERCULES ROBINSON from his seat of Government has caused some little delay in the completion of the arrangements for the Hong Kong Mint. We stated in December last that a site had been recommended for the building at Cow-loong; but that point, it appears, could not be definitively settled till the return of the GOVERNOR. As Sir HERCULES got back to his post early in February, we shall probably learn by the next mail that the spot on which the establishment is to be located has been officially determined on. Here at home all the preparations are proceeding steadily and rapidly. The iron frame-work, roofing, &c.—from the manufactory of Messrs. RANKIN and Co.—will be shipped from Liverpool early next month; to be followed at the latter end of the month by the heavy portion of the material. The rolling-mill, engines, &c., will go out in July; and September will probably see the despatch to China of the very last portion of the requisites, whether as regards the building or the apparatus. Mr. INGLIS, foreman of engineers in the establishment of Messrs RANKIN, has been selected to go out and superintend the fixing and putting together of the various parts of the iron-work. The building itself will consist of iron and granite, and will occupy about three acres, so that the choice of a site may well demand consideration. Plans of all the woodwork required for fitting up the interior have already been forwarded to Hong Kong, with instructions to have everything prepared, so that no delay may occur on the arrival of the materials for the external frame of the edifice. The building has been so planned that the Master of the Mint will have under his eye at one view whatever is going forward in every part of the establishment; for which desirable purpose great facility was afforded by the fact that all the processes of the Mint are to be conducted on the ground floor, while the upper part of the building will be appropriated for the residence of the Master. Captain KINDER, who, as our readers already know, has been appointed to the office of Master of the Hong Kong Mint, will take his departure from England, accompanied by his wife and family, the moment matters are so far advanced as to render his presence at his post of any service. The other officers of the establishment have not yet been nominated, but they will probably be selected in time to proceed with the Master.

STEAMERS, &c., FOR CHINA.

The paddle-wheel steamer *Dumbarton*, which we have before noticed as building by Messrs. Denny and Co., Dumbarton, for Messrs. Gibb, Livingston, and Co., China, tried her speed between the lights on the Clyde, and ran the distance in 65 minutes, being equivalent to a speed of over 14 miles.

The paddle-wheel boat by the same builders for Messrs. Jardine, Matheson, and Co., has been launched and named the *Glengyle*. She will shortly proceed to her destination under the command of Captain Sullivan. The *Glengyle* is 290 feet length, 38 feet beam, 15 feet depth. Her tonnage is 2,040 tons B.M.; and her engines will be of 400 H.P.

Another screw steamer has been launched for Messrs. Trautman and Co., of Shanghai, and others, from the yard of Messrs. Blackwood and Gordon, Port Glasgow. She is named the *Ta Pang Nyo*. Length, 220 feet; beam, 29; depth, 14; and her register tonnage about 600 tons, with engines of 150 H.P.

THE DEBATE ON CHINA.

(THE TIMES.)

Mr. Liddell's speech upon China last night is a very good example of that style in which the question does not so much signify so as the matter be good and the manner agreeable. It certainly is a most readable speech, and it recals to the memory various episodes of Chinese history, and results of our relations with China, that we ought not to forget. But there is an important difference between such speeches and the real business of a Cabinet or a Legislature. It is that the question for a statesman is generally present, and to be met by an immediate decision. It is not whether such a course was good or bad, or whether the good or the evil had preponderated in a given period; nor is it the question what we want to have, or what we ought to do, for the next twenty years. It is what we ought to do to-day. It is sometimes, indeed, as in the present instance, even more imminent; for we can only advise upon information already out of date, and for a state of things which will arrive faster than our advice. This is the last week in April. It will not be till the third week in June that our Minister in China will receive any despatches that may now be sent from this country, or the newspapers containing the debate of last night. But it is absolutely impossible for mortal man to devine what the state of things will be at Shanghai or elsewhere in China at that date. Towards Midsummer-day, however, our representatives in China will receive the latest expressions of our political intentions in this country, and the rules on which they are to act under whatever emergency. Come what will, Mr. Liddell is prepared to tell them what they must do. More prescient, more decided than any oracle, he will not leave them in doubt, or suffer them to weigh their responsibilities. Even though the Taipings are at the gates and the harbours are invested with pirates, though the mixed European communities around them are full of treason and conspiracy, they are then to be positively forbid further interference in the civil war. Parliament says so, and they must abide by it. Now, we have far too good an opinion of Mr. Liddell to suppose that this is really what he means, or that he has reflected on the practical application of his resolution. It is only a thesis. The subject of the speech is the Anglo-Chinese alliance. The resolution is only a peg to hang the speech upon.

Not only do we agree with almost every word that Mr. Liddell says as regards the past, but we are prepared to be more comprehensive in our criticism; for, instead of singling out certain particular "interferences," we will say at once that everything we have done in China, or omitted to do, has led to ill consequences, or failed outright, or has been otherwise condemned by the result. In the first place, our not going near China for ever so many centuries contributed to a very exclusive system there, in which the bad preponderated. When we had at last commercial communication with the country the Chinese themselves, who ought to know best, found us such a nuisance that they kept us at arm's length. We bought tea and sold opium, both injurious in excess. We smuggled, bribed, corrupted officials, and had to do with pirates. The monopoly of the Company had its evils, and the opening of that monopoly to all the world let in a flood of other ills, and worse ills, as faithfully set forth by Mr. Layard last night. No doubt, too, our missionaries, or the missionaries of other nations, did no end of mischief by giving instruction and teaching doctrines which the Chinese had just wit and malice enough to misunderstand and misuse. All writers hold us partly answerable for the rebellion—not but what there have always been rebellions in China. When we suffered in silence we had the usual fate of silent sufferers; when we resisted we provoked opposition, and ended by weakening the Imperial authority. The free ports became new centres of agitation, hotbeds of disaffection, and smuggling depots. They attracted the scum of all nations, who, certain of our protection, did as they listed, and dragged us into scrapes. When the rebellion spread into our neighbourhood we permitted the fugitive Imperialists to take refuge under our wing, and so found that we had to support a load of misery, and either see them perish under our eyes by famine or by foe, or do something to save them. All our interferences have been equally, though variously unfortunate—that is, they have failed of the good they aimed at, or done some unintended evil. Mr. Lay and Captain Osborn planned an Anglo-Chinese armament, which was to be free to act, and responsible to public opinion for its action. It fell to the ground because Prince Kung wanted to place it under the Governors of provinces, who would be sure to mismanage the force, and apply it to bad uses. On the other hand, Major Gordon did that which Captain Osborn would not do, and is now held answerable by Mr. Liddell for the massacres, mutilations, and other horrors committed by his Chinese colleagues and superiors. If both these courses had their faults, it was comparatively safe to supply arms and ammunition; but the result has been, Mr. Liddell says, to let them fall into hands that know not how to use them. If we left the Chinese to deal themselves with the pirates, it became a war of pirates with pirates, in which the Imperialists were occasionaly worsted. If we took the pirates in hand ourselves, we had occasionally to do strong things. If we attempted to co-operate with the Imperialists, we had the benefit of both their weakness and their wickedness. In a spirit of pure aggrandisement, as Mr. Liddell intimates, we have claimed the military

Digitized by Google

occupation of our suburbs to the distance of thirty miles. But, not content with this, our soldiers have gone out sometimes as much as fifty miles. This is a proceeding very familiar to the readers of military history; indeed, it is impossible to hold a line in actual war without occasionally going beyond it; and if a foe is to be stopped you must have the option of meeting him half way. But the result has been fighting. As for the belligerents themselves, Mr. Liddell makes out the Imperialists first so good that we ought never to have had a quarrel with them, then so bad that we ought to thank the Taepings for destroying them. Mr. Liddell has certainly made out his case; but then he has made out too good a case. He has proved far too much. He has proved that we can neither sit still nor move this way nor that way without doing harm. The only conclusion is that we must not be deterred by any amount of harm if we only believe that we are doing less harm by one course than we should by another, or by no course at all.

The case is one, we submit, which is not to be met by general rules, much less by rules far more stringent and unbending than those for our dealing with settled communities. If anybody were to propose in the House that further interference on the part of this country in European wars is impolitic and unnecessary, he would certainly have a good deal to say for his advice, yet we all see that the next two months might easily bring a crisis in which we should forget or disregard it. We have interfered not only in the wars, but in the civil wars, of the Continental nations, with results good and bad; and for all our continual protests, we, or our children, will do the like again, for occasions will arise to break our strongest resolutions. But as regards China it is far more difficult to lay down a law of the Medes and the Persians than as regards Europe. If, as people say, we have contributed to the weakness of the Government and the dissolution of the Empire, that circumstance appeals to our humanity to mend the mischief we have done. We have definite political relations with the Imperial Government which we cannot at once repudiate on the plea that the rebels have something to say for themselves. These rebels are not orderly belligerents, but cruel and destructive marauders; a mere crowd of robbers and murderers, consisting of all who prefer robbing and murdering to the chance of being themselves the victims. We can never be sure for a day that such a body will not put us in a position to defend ourselves, and we defend ourselves in the most effectual way, by carrying the war into their own camp. At all events, we are chargeable with the police of the sea, unless we would hear continually of ships and crews sailing from our ports never to come back again. But the police of the sea comprises the security of the rivers and the coasts, which we can never call secure if we are forbidden to use our arms. Grant that there is room for pacific counsels, and that Parliament and the British public may easily show their preference of the bloodless way of settling quarrels; that is very different from an absolute prohibition. We think this a case for the golden mean. Let our representatives in China be desired to maintain an armed and resolute neutrality, in the interest of order and peace; but, considering the weakness and violence between which they are placed, let it be known that they are prepared to resist the violent and to befriend the weak, if necessary.

THE CURIO COLLECTOR AT PEKING.

(To the Editor of the *China Telegraph.*)

DEAR SIR,—Referring to the "curious" correspondence, copied from the *Friend of China*, in your last impression, I have deemed it my duty as an intimate friend of Mr. Andrews, to call the attention of Her Majesty's principal Secretary of State for Foreign Affairs to the subject, and have received a reply from the Under-Secretary (Mr. Layard) to the effect that my letter will be brought under the consideration of Her Majesty's Government, so that we shall see whether the ruling of our Minister at Peking is correct.

The only error that I can see in the *Friend of China* report is the terming Mr. Andrews a curiosity "dealer," as he never sold anything he obtained. He would be more properly called a "collector;" and this is of importance to him; for as a "dealer" he would come under the denomination of "trader," and for which he has been excluded Peking, while as a "collector" he contends he was not such; and this is the point to be decided. If the Imperial Bank of China gets its concession to establish a bank at the capital, the question will be set at rest, for "trade," and that a good one, must necessarily follow, without which I should like to know what use an embassy is at Peking?—Yours faithfully, F. H.

London, E.C., April 26, 1864.

KING V. KING AND DENT.—In this case a rule *nisi* had been granted for the dissolution of the marriage on the ground of the respondent's adultery with the co-respondent. The petitioner had since presented a petition for an order with respect to settlements of property. The Queen's Advocate and Dr. Swabey appeared for the petitioner; Mr. Edward James, Q.C., and Dr. Spinks for the respondent. The Court now made the decree absolute. With regard to the sum of £4,000 put into settlement by the petitioner, it decreed that the life interest given to the respondent should be extinguished. It made no order as to a reversionary interest of the respondent in a sum of £3,000, to which she was entitled upon the death of her mother. It also declined to order the petitioner to make a provision for the respondent's maintenance.

THE Hon. T. C. Bruce has issued an address to the electors of Portsmouth, wherein he offers himself to fill the vacancy caused by the retirement of Sir Francis Baring.

A SELECTION of China and Japan curios, the property of Mr. Thomas Baker, lately resident in China, were sold by Messrs. Christie, Manson, and Co., on the 19th inst.

Monetary and Commercial.

The Imperial Bank of China, announced in our issue of the 11th, has been changed to the Imperial Bank of China, India, and Japan, in order to embrace the entire circle of business from London to Japan. It is also intended to extend operations to Australia, when the India and China branches are satisfactorily established. The capital has been increased from one to two millions, and the shares are in demand at 3 premium. If properly conducted, there is ample room for all its contemplated action, and although the directors place Australia as the last to have attention, we may remind them that no bank has been established in London for that country for about ten years. The prices of the shares of London-Australian banks may be quoted as an index of the profitable nature of the business. We understand that Mr. Henry Turner, late Manager of the Agra Bank at Hong Kong, has accepted the appointment of Manager in London. The directors, by selecting officers who have practical knowledge of business in India and China, will cut short their preliminary expenses very materially.

A company has been formed for the working of the concession lately granted to Mr. Robinson for running steamers in Java. The field is well known as a lucrative one, and with the advantages of a subsidy of £27,000 per annum, and the experience of one of the directors of the P. and O. Company, there is every prospect of the undertaking yielding large returns to the shareholders, and certainly every possible security that the company will not end in failure. It is a *bona fide* opening, and the subsidy from a cautious Government like the Dutch, is perhaps the best security. The prospectus will be found in another column.

A company has been formed in London for the purpose of importing oil from Burmah. In order to carry out this, it is necessary to carry out a process of distillation on the spot. This has already been done by an enterprising private merchant, who unfortunately died shortly after the establishment of his works. The producing powers of the country are undoubted, and with the reduction in the cost of transit by shipping only the good or refined oil, a large profit will result on the current prices ruling in this market. The directors are gentlemen of local experience and influence. A prospectus, with full particulars, will be seen in another column.

The second ordinary general meeting of the shareholders of the Bank of Hindustan, China, and Japan is called for the 2nd of May, when the directors will recommend a dividend.

A meeting of the Singapore Gas Company will be held on the 29th inst., to receive the report of the directors and the balance-sheet.

The directors of the Agra and United Service Bank (Limited) have convened a special meeting of the shareholders for the 7th of May, to confirm the agreement for the amalgamation with Messrs. Masterman and Co.; to change the company's name to the Agra and Masterman's Bank (Limited); to appoint Mr. Edward Masterman, Mr. William Peters, and Mr. Frederick Mildred, directors; to increase the number of the board to not more than 18; and to increase the company's capital to £3,000,000 by the issue of 20,000 new shares of £50 each. It is proposed—

That 10,000 of such new shares shall be offered to the holders of the original £100 shares, in the proportion of one new £50 share to every two original £100 shares held by them respectively on the 15th May, 1864, at a premium of £30 per share, to be paid, together with £25 per share, within six calendar months, by such instalments as the directors shall appoint, with liberty to the shareholders to pay up the £30 and £25 per share in advance. That the residue of the 20,000 new shares, together with such of the 10,000 as shall not be applied for by the holders of the original shares, may be disposed of by the directors as they think most beneficial to the company. That the capital created by the new shares shall be considered as part of the original capital, and two of the new shares shall be equivalent to one original share.

It is understood that the Postmaster-General has extended, the postal contract of the Pacific Steam Navigation Company of Liverpool, for a period of seven years, dating from April, 1865. In addition to the payment from the Home Government for the conveyance of the British mails, the company enjoys postal subsidies from the various local Governments along the whole line of coast from Panama to Valparaiso and Chiloe for the conveyance of the local mails.

The directors of the Bank of London have called a meeting for the 9th of May, to propose an increase of capital by the issue of 2,000 new shares at the price of 120, or 70 premium per share. They will be allotted rateably to the present proprietors in the proportion of one share to every three at present held.

At the meeting of shareholders of the Oriental Bank Corporation held on the 21st, the report, which we noticed in our last, was adopted.

The CHAIRMAN (Mr. Harry George Gordon) commenced by declaring a dividend of 5 per cent. and a bonus of 7 per cent. for the half-year, making 19 per cent. for the year, or £4. 15s. per share, payable on and after the 23rd May, free of income-tax. This was the largest divi-

Digitized by Google

dend the corporation had yet declared—(hear, hear)—and he need not say what a pleasure it was to the directors to be able to announce so large a division of profits. It ought, however, to be stated, that these large profits had arisen from an exceptional year in Indian banking, and they had also to bear in mind, though some of his friends pooh-poohed the idea, that banking competition in that country was becoming excessive. Consequently, although they had largely extended the business of the bank, the profits had not advanced in the same ratio. It would not be wise, therefore, to calculate upon always maintaining the same high rate of dividend. It was not necessary for him to go into any glowing description of the prospects of the bank; there was in the present accounts a gratifying increase in every item of their business, and they must rely on what they knew of the past as a criterion for judging of the future. He concluded by moving the adoption of the report.

A SHAREHOLDER asked if current charges included any bonus to the officers of the bank. He thought, when the position of the bank was so favourable, the officers, by whose assistance the profits were made, should share in that prosperity which they had assisted to bring about. (Hear.)

The CHAIRMAN replied in the negative, but intimated that he and his co-directors were always ready to acknowledge the efficiency and valuable aid of the staff, and promised to take the subject into consideration.

Thanks were then voted to the auditors, and 50 guineas each awarded to them for their services. The directors and auditors retiring by rotation were re-elected.

The CHAIRMAN stated that the directors had come to the determination, in consequence of the increasing business of the bank, to raise the balance of the additional capital authorised in July, 1854. The original capital was £1,000.000. The shareholders had authorised an increase of £500.000, of which only £250,000 was raised, and, it was now proposed to call up the other £250.000, making the total capital £1,500,000. He could not state the details until they received the requisite authority from the Treasury, which was expected in a few days, but he mentioned the fact in order that the shareholders might not, by parting with their shares in the meanwhile, lose any advantage to which they were entitled. The usual vote of thanks to the chairman and directors concluded the proceedings.

The amount of bullion by the P. and O. Company's steamer *Delhi*, from Southampton on the 20th inst., was, in gold: To Alexandria, £84,000; to Suez, £60; to Galle, £3.000; to Madras, £1,040; to Calcutta, £5,000. In silver: To Madras, £3,750; to Hong Kong, £4,390; to Foo-chow-Foo, £850; to Shanghai, £10,450; to Sydney, £1,000. Total: In gold, £93,100; in silver, £20,440.

ARTICLES OF IMPORT.

TEA.—Low and dusty kinds of Congou have realised former prices to a fair extent. Good common has been less in demand, and prices are ¼d. per lb. lower, being now quoted 1s. to 1s. 0½d. per lb. Fair flavory kinds continue very difficult of sale, and prices have ruled in favour of buyers. There has been a moderate demand for Kaisow kinds, from 1s. 8d. to 1s. 10d. Fine to finest remain without alteration. Common to fair black-leaf kinds remain dull of sale at former prices; good qualities, from 1s. 4d. to 1s. 6d., have been freely offered, and both at public sale and privately have been sold about 1d. per lb. lower. The grades from 1s. 8d. to 1s. 10d. per lb. have been firmer, and some sales made at rather better prices. Fine to finest have been wanted for export at fully former prices. Tayshans show no alteration. The new-make from Canton have sold freely at an advance of d. to 2d. per lb. Oolongs show no change. Souchongs are only saleable in small parcels at former prices. Flowery Pekoes remain much as before. Scented teas, except the finer qualities, have been heavy of sale some large parcels having gone at a reduction at public sale without reserve; common Orange Pekoes at 1s. 1d. to 1s. 2d., and fair capers at 11½d. to 1s. Uncoloured Japans have been sold to a fair extent at fully former prices. The public sales of Indian tea have gone very heavily at a considerable decline for some descriptions, especially those wanting strength. In green teas there has been a fair amount of business at about previous prices for Moyune kinds, but Ping-Suey have been difficult of sale at former prices; the deliveries for export continue large. Canton-make, of good to fine kinds, remain in demand at former rates, but common to fair are still difficult of sale.

SILK.—*See Latest.*

SUGAR.—Immediately after our last report transactions of fair extent took place, partly on speculative account, and extreme rates were paid; since the opening, however, little general disposition to purchase has been shown by the home trade, and although holders from their continued firmness have succeeded in obtaining an average advance of 6d. to 1s. per cwt. on the bond prices of last week, the business done has been of only moderate amount, and the market generally has a rather quiet appearance. Of private transactions reported we can record, 17,000 bags Clayed Manila at 37s. 9d. to 40s. and 43s. 1½d., the latter at the old duty of 12s. 8d., and 10,000 bags Unclayed, price kept secret, also for arrival, a cargo of 500 tons at 40s. (duty 12s. 8d. to be allowed), and 150 tons Clayed at 31s.

COFFEE.—The demand is very limited, and in the sales of Colonial lower prices have been submitted to. Ceylon: 1,320 casks, 730 barrels and bags Plantation, at public sale, went off without spirit at a decline of 1s. to 2s. per cwt., and part was bought in, the rate for the portion sold being as follows:—fine ordinary to low middling 78s. to 81s. 6d.; middling to good middling 82s. 6d. to 85s.; fine 86s. to 92s. Of 234 casks, 1,628 bags Native, the bulk was held for the previous value, and withdrawn, the part realised being good ordinary 70s. 6d. to 71s.

RICE.—In public sale, 3,952 bags Rangoon, 2,435 bags white Bengal, and 5,451 bags cargo sort met few or no offers, and were withdrawn, but part of the latter has since been taken at 8s. 3d. A cargo of 1,000 tons Nakrenzie, arrived off the coast, has been sold at 9s. 9d. for the Continent.

COTTON.—Early last week the demand became languid, and prices gave way ¼d. to ⅜d. per lb., but the favourable accounts from India have since produced a reaction, and in the business done this decline has mostly been recovered. On the spot, 5,300 bales have been sold, middling to fully fair western Madras, 18¾d. to 20d., middling fair and fair Tinnivelli 18d. to 19¼d., fair Coconada 18d. to 18¾d., and fair to fully fair China 17d. to 17½d. Sales for arrival:—1,230 bales western at 18¾d. Aug., 19d. to 19¼d., July and Sept. deliveries, 19¼d. to 19⅜d. Dec., 19⅜d., Jan. shipments, guaranteed fair; 2,200 bales China, at 17d. August, 17¼d. to 17⅜d. June to August deliveries, 17d. Jan. shipment, guaranteed fair; 400 bales Japan, at 18d. March shipment, guaranteed fair: 100 bales Kurrachee, at 15¾d. Jan. shipment, guaranteed fair: 200 Sawginned, at 19¼d., August delivery, guaranteed fair: total, 4,100 bales. For arrival at Liverpool:—500 bales China. at 17½d Jan. shipment, guaranteed fair.

CAMPHOR.—Lower, and very inactive: small sales have been effected privately within our quotations; 166 chests China and 100 tubs Japan at auction, retired.

CASSIA LIGNEA.—Firm, but quiet, with very limited business. Buds: Moderate private transactions upon previous terms.

COCOA NUT OIL.—This market, which was strong, at the date of our last, has since become less and less firm, and prices are now fully 10s. per cwt. lower. Business has been limited: 859 casks Cochin, 711 casks Ceylon, 23 casks Sydney, 43 casks Madras, 29 casks Singapore, and 20 casks Zanzibar at auction; a limited proportion placed.

DRUGS.—Cubebs: Continue quiet, and without business. Dragon's Blood: Flat; 5 boxes at auction, retired. Galangal Root: Has improved 1s. per cwt., and 173 bags at auction, mostly sold at 21s. to 23s. per cwt. for fair to good. Rhubarb: Held with great firmness, but no business doing. 69 chests at auction, all retired.

GUMS.—Benjamin: Siam again much dearer; 82 cases sold at auction at £45. 10s. per cwt. for fine tear; £38. 5s. to £42. 5s. for first quality in block; £24 to £32. 5s. second; £26 fine seed in block; £19 to £19. 10s. dark; £13s. 15s. to £14. 15s. small seed and dust in block; and £10. 5s. dust in block. Sumatra quiet; and of 140 chests, only a small proportion placed at £5 to £5. 7s. 6d. middling dark thirds, and 32s. 6d. low fourths. Damer: Continues steady; and of 368 cases at auction one-third sold at 42s. 6d. per cwt. for fair picked yellow. Gamboge: Very scarce and dearer; of 35 cases at auction, half sold at £8. 17s. 6d to £9. 5s. per cwt. for middling pipe.

GUTTA PERCHA.—Very quiet; 6 tons at auction all retired.

INDIA RUBBER.—There is still inquiry, but little if any trade: 59 baskets Penang at auction retired.

HEMP.—Manila: This market has been very inactive, with most limited business upon barely the former terms: 649 bales at auction partially sold at £34 to £35. 5s. per ton for middling to very fair roping.

HORNS.—Buffalo have realised fully the previous value; and of 72 tons Madras, and 3 tons Singapore at auction, two-thirds sold at 31s. 6d. to 32s. per cwt. for 2 to 2¼ lb. average, and 24s. to 26s. 6d. for 1¼ to 1½ lb.

JAPAN WAX.—Rather lower; 150 boxes sold, good saucer 69s. to 70s., block 59s. 6d.

OILS.—Anniseed: Our unaltered quotation recently obtained: a moderate quantity sold. Cajaputa: Buyers at the quotations; 2½d. demanded by sellers; 2 cases at auction retired. Cassia appears to be entirely neglected at present terms of 9s. 6d. Cinnamon: Five cases at auction sold at 2s. 2d. to 2s. 4d. per oz. for good. Mace and Nutmegs: Nothing doing; Nutmeg Paste selling slowly at 1d. per oz.

SAGO.—Firm; and of 874 boxes at auction, two-thirds sold at 24s. per cwt. for good small. Pearl remains quiet, and without business of importance.

SPICES.—Cloves: Zanzibar steady, with limited trade privately upon fully former terms: 12 casks Penang, and 12 casks Amboyna at auction, all retired. Mace: Quiet: 11 cases Singapore, and 6 cases Batavia at auction, all retired. Nutmegs: Some inquiry for small shipping qualities at previous moderate prices, at which there are few, if any sellers. No auctions held, and very little business done privately. Pepper, Black: Without at all receding in value has become very quiet, with a greatly reduced extent of transactions. Of 5,520 bales Penang at auction a small portion only sold at 3⅜d. to 3⅝d. per lb. White: Quiet, but without change in value; of 269 bags Singapore at auction two-thirds sold at 5⅜d. to 5⅝d. per lb.; and of 169 Penang one-fourth (damaged) sold at the previous worth.

TERRA JAPONICA.—Cutch, Pegue: Remains very quiet; scarcely anything doing privately; and 3,165 bags at auction, all retired. Gambier: Remains very firm at previous value on the spot for block, and for arrival rather more money has been obtained. Cubes quite 1s. per cwt. higher. Of 819 bales Cubes at auction, half sold at 27s. to 27s. 6d. Good stroke of business done.

MISCELLANEOUS.—Galls: All kinds, Bussorah, China, and Japan, very scarce, and in continually increasing demand. We quote Japan and China 70s. to 100s. per cwt. Musk is unsaleable upon former terms; and of 65 caddies at auction, only one-sixth placed at 25s. 6d. to 30s. per oz. for middling to good Tonquin, and of 4 tins grain, one fine sold at 52s. Rattans continue very firm, and 8,513 bundles Singapore at auction sold at 3s. 10d. to 8s. 9d. per 100. Sapan Wood continues firm, with consumptive inquiry; fair business done privately, and of 40 tons Manila at auction, half sold at £8 to £9. 12s. 6d. per ton, and ten tons Siam sold at £11. 15s. Sticklac: Siam very quiet, and 257 cases at auction were all retired in the absence of biddings, at the previous currency; very small sales effected privately. Turmeric: No China here; Java generally held for more money, and of 165 bags at auction, a few only sold at 19s. per cwt. for fair. Vermilion scarce and wanted; no auctions; trifling sales privately at the higher quotation of 2s. 10d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod, £9. 10s. to £10. 5s.; hoops, £11 to £11. 5s.; sheets, single £12 to £12. 5s.; Staffordshire bars, £10 to £10. 5s.; rails, £7. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 9¾d. per lb.

Digitized by Google

TIN.—112s. for block; 113s. for bar. Tin plates, best charcoal, I.C., 31s. per box.

LEAD, &c.—English pig, £21. 15s. to £22; W.B. £23; shot, patent, £24; sheet, £22. 10s.; spelter, £21. 5s. to £21. 10s.; zinc, English sheet, £26. 10s.: quicksilver, £9 to £9. 5s.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

Outward freights continue very low, there being but little export business doing, and ships on the berth are difficult to fill up in consequence. Vessels are in request for coals from the outports to Hong Kong and Shanghai. Homeward freights are active, and small vessels are wanted from Japan.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or

Digitized by Google

measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42, and £1. 18s. For Shanghai: £52, and £2. 3s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £30, and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

The Helvetia (Oldenburg barque), Menke, which arrived at New York 31st March, from Manila, experienced a gale from N.E. on the 23rd March, in lat. 38 N; lon. 73 W., during which she stove bulwarks, stanchions, covering boards, cabin skylight, doors, &c., lost galley, boats, and split sails, &c., the sea making a clean beach over her and filling the cabin. On the 29th March, while at anchor in the lower bay during the N.E. blow, she came in collision with the Dagma (Norwegian barque), and received some slight damage.

ST. UBES, April 10.—The Magnus (Swedish brig), Noring, from Macao, for Bremen, with a general cargo (mostly cassia), put in here yesterday dismasted. She has been well surveyed, and will have to discharge her cargo to step new masts.

The William Mitchell, Bryce, from Shields, for Shanghai, put into Lisbon, April 17, leaky forward.

The Aalborg, Tecker, from Copenhagen, for Amoor River, which put into Rio Janeiro, 9th March, leaky, was discharging there on the 24th March, in order to repair.

HAMBURG, April 19.—The Helene, barque, of Altona, Knudsen master, bound to China, and having on board a quantity of gunpowder for Singapore, has been seized in Altona Harbour by the Commissioner of the Allies, and a number of troops put on board. The sailing of the above vessel has been prohibited in order that she may not fall into the hands of the Danes.

ROTTERDAM, 20th April.—The Henriette, Visser, from Batavia, which arrived at Brouwershaven yesterday, had lost bowsprit and foretopmast-yard, by collision with the Camillus, Coss, from Rio Grande to Queenstown, which sunk, 31st March, in lat. 45 N., lon. 31 W., and not in Brouwershaven Roads, as before reported.

ROTTERDAM, 22nd April.—The Zephyr (s.s.), from London, has been in collision with the Rudolph (Dutch barque), from Java, in the Helvoet Canal, and caused considerable damage to the stern of the latter.

The Sappho, from Shanghai, for London, has been wrecked while entering Table Bay.

At ST. HELENA, 1st March.—Peep o' Day, Fentie, from Foo-chow-Foo, and sailed. 2, for New York; 2. J. H. Ransom, Chapman, from Shanghai, for London; 4. Virginia, Lewis, from Hong Kong, and sailed, 5, for Liverpool; 1. Royal George, Bell, from Shanghai, for Liverpool.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK CO. execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The Dry Dock (opened in March, 1859) admits two Vessels at same time, being 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock, of larger dimensions, on the same premises, will next year be completed and available for the heaviest Screw-steamers.

There is extensive wharf, warehouse, and other accommodation adjoining, together with the usual conveniences for the discharge, re-fitting, and coaling of Vessels; also, Lathes and every appliance for the repair of Iron Steamers.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 25, Poultry, London, E.C.

WILLIAM CLOUGHTON, Managing Director.

New Harbour, Singapore, March, 1864.

THE BURMESE OIL DISTILLERY (Limited).

Incorporated under "The Companies Act, 1863."

Capital £100,000, in 10,000 Shares of £10 each.

First issue, 5,000 shares.

A minimum dividend of 7½ per cent. per annum guaranteed on the paid-up capital for the first three years.

£1 per share payable on application, and £1. 10s. on allotment, and calls not to exceed £2. 10s. per share, at intervals of not less than three months.

It is not proposed to call up more than £7. 10s. per share; but as more capital may be required for extending the works, it is intended to issue further shares, one half pro rata amongst the shareholders, at par, and one half to the public, the premium on the latter to form part of a reserve fund.

DIRECTORS.

John Ogle (Messrs. Ogle and Co.), Calcutta and London, Chairman.

PROSPECTUS.

The description of oil called "Petroleum," lately discovered in Pennsylvania, which has already grown into a trade, employing millions sterling in Europe and America, and is now all but universally consumed for luminating purposes, has been known and used by thousands of tons annually for at least 400 years in the Burmese Empire, where it is obtained of a uniform and very superior quality.

Crude "Petroleum," or "Earth Oil," though burned by the poorer natives of Burmah, has never been used out of that country for the purpose in consequence of its impurities, which can only be removed by a peculiar mode of distillation—it has, however, been shipped to and distilled in England, and a portion of the refined oil has been returned to the East Indies.

The trade thus carried on has entailed large losses to the importers of the crude oil, while distillers have derived large profits; as scarcely one-half can be converted into fine oil, the residue being comparatively of little value in England, but costing the same for packing, freight, insurance, &c., which amount to from £12 to £15 per ton; whilst in Rangoon, Moulmein, &c., this residue is as valuable as the crude oil itself, for coating the bottoms of native boats, as a substitute for grease, tar, &c.

To obviate this, and extract the fine oil on the spot, the lease for ten years, from 1st March, 1861, of a piece of land in Rangoon, comprising about 30 acres (a portion of which has been let for £120 per annum), admirably situated on the banks of the River Irrawaddy, was taken at a rental of £300 per annum, and on it a factory, with stills, steam power, superheating apparatus, saw mills, and every other appliance for working upwards of 100 tons of oil per week, erected by an engineer sent expressly from England, and wharves, cooperages, stores, &c., were built.

This property has, in consequence of the death of the resident proprietor—which took place just as he had completed the "work"—been offered to this Company.

The present owner, who resides in England, will make over the lease, factory, and plant (with option of purchasing the freehold at £6,000) for the sum of £20,000, one-third of which he will take in fully paid-up shares, and has guaranteed, to the satisfaction of the Directors, a minimum dividend of 7½ per cent. per annum on the paid-up capital for the first three years, feeling confident the profits will exceed 25 per cent.; the refined oil being saleable at very high prices for burning, painting, &c., in Calcutta, Madras, Bombay, Australia, and all over the East.

The consumption of Calcutta alone is sufficient to absorb the production of the factory for some time to come; whilst the duty of 10 cents per gallon lately imposed on Pennsylvanian oil by the American Government is a direct bonus of £5 per ton on this oil, and has opened an improved market for it in England and France capable of taking off any surplus quantity.

The Directors have a competent manager and an engineer who will at once proceed to Rangoon, and have the advice and assistance of an eminent mercantile firm there who have undertaken to act as agents for the Company.

There is no paid promoter in this Company, and the preliminary expenses will be strictly confined to necessary outlay.

One-fourth the capital has been privately subscribed by the directors and their friends, and the remaining shares will be allotted with due consideration to priority of application.

Prospectuses may be obtained from the bankers, brokers, solicitors, or manager, at the offices of the Company, where plans of the land and distillery may be seen, and the Articles of Association inspected.

THE BURMESE OIL DISTILLERY (Limited).

APPLICATION FOR SHARES.

(To be retained for the Company.)

To the Directors of the Burmese Oil Distillery (Limited).

Gentlemen,—I request you will allot me ..... shares in the Burmese Oil Distillery (Limited), on account of which I have this day deposited with the bankers of the Company £1 per share, as directed by the prospectus; and I agree to accept this or any less number you may allot me, subject to the conditions of the Articles of Association; and I hereby authorise you to enter my name on the register of members.

Signature .....

HONG KONG.—A young Man, having to return to the above port by September, desires an ENGAGEMENT for himself and wife during the journey (overland or sea immaterial), to attend on a gentleman and lady; or the wife to take the charge of children. Salary no object. Address G. S., post-office, St. Matthias-road, Stoke Newington-green, N.

DOCKS.

PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 236 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1861.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAFRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £631,000. Reserve Fund, £250,000.

The Bank negotiates and collects bills and grants drafts, payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route, terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

JAMES HENDERSON,
COMMISSION MERCHANT, TIEN-TSIN, CHINA,
AGENT FOR THE "LONDON AND CHINA EXPRESS."

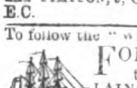
For Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO Direct.—The very fast-sailing barque WILLIAM AND JANE, A 1, 410 tons register, ROBERT BRUCE, Commander, now loading in the West India Export Dock. This vessel will now stand in Lloyd's Register continued A 1 five years. She has just had new decks and large repairs, and been re-coppered in the river.

For Freight or Passage apply to the owners, SUART and SIMPSON, 2, Clement's-lane, Lombard-street, London, E.C.

To follow the "William and Jane," with quick despatch.



FOR COLOMBO and COCHIN, the nearly new clipper barque ELIZA LAING, A 1 eleven years, 441 tons register, T. LAING, Commander, now loading in the West India Export Dock. This fast-sailing Vessel, built under special survey in 1862, is strongly recommended to Shippers of fine goods. Has good accommodation for Passengers.

For Freight or Passage apply to SUART and SIMPSON, Clement's-lane, Lombard-street, London, E.C.

MANILLA Direct (guaranteed first ship, and sailing under the Spanish flag), the splendid, new, Spanish clipper ELISA, A 1 at Lloyd's for ten years, 431 tons register, FRANCISCO RIVERO, Commander; loading in St. Katharine's Dock. This vessel has been built expressly for the Manilla line, and offers an excellent opportunity to shippers requiring despatch.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helen's, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the celebrated British clipper MARY MILDRED, 3 T. French Lloyd's, 460 tons register; C. J. FINE, Commander; lying in the London Docks. This beautiful vessel has superior accommodation for passengers, and sails very fast.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

HONG KONG and WHAMPOA.—Notice to Shippers.—The magnificent new clipper DILKHOOSH, A1 twelve years, has nearly all her cargo engaged, and will be despatched in a few days.

Apply to GEORGE DUNCAN and Co., 2, East India-avenue, Leadenhall-street, E.C.

FOR HONG KONG and WHAMPOA, direct, with quick despatch, the well-known British-built ship CAMBALU, A 1 13 years, 499 tons register, loading in the London Docks. This fine vessel has good accommodation for passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

To follow the "Sydney Eggers."—With immediate despatch.

DIRECT for HONG KONG and WHAMPOA, the splendid clipper ship SOVEREIGN OF INDIA, A 1 ten years, 774 tons register, WALTER SCOTT, Commander; loading in the East India Docks. This beautiful vessel, built in 1861, has just discharged a cargo of tea from Shanghai, and will be found an excellent opportunity to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.

HONG KONG and WHAMPOA, the splendid Clyde-built clipper ship SYDNEY EGGERS, classed A 1, twenty years, in the Liverpool Underwriter's book; 870 tons register; JAMES RICHARDSON, Commander; loading in the East India Docks. This magnificent vessel built on the Clyde in 1859, made her last passage to Bombay in seventy-nine days, is noted for her great speed and sound delivery of cargo, and will be found an excellent opportunity for shippers of fine goods.

Apply to RAYDEN and REID, 12, King William-street; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street.

With Quick Despatch.

FOR YOKOHAMA and NAGASAKI, the celebrated Aberdeen clipper VELOCIDADE, A 1 thirteen years, 289 tons register, JOHN WYRILL, Commander, lying in the West India Docks.

For Freight apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

INDIA AND CHINA.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Heroes of Alma ...	W.I.D.	May 2.

THE NETHERLANDS INDIA STEAM NAVIGATION COMPANY (Limited),

For performing the Mail and Intercolonial Steam Packet Service of the Dutch Possessions in the Eastern Archipelago, under contract with the Government at Batavia, to commence from 31st December, 1865.

Capital £300,000, in 15,000 shares of £20 each, one-fifth of which is reserved for subscribers in Java, remainder now offered for subscription in England and Holland.

Deposit, £1 per share, with an additional £2 per share to be paid up on allotment.

It is anticipated that not more than £14 per share will require to be paid up.

Three months at least between each call, and no call will exceed £3 per share.

Incorporated under the Joint-Stock Companies Act of 1862, whereby each shareholder's liability is limited to the amount of his shares.

HONORARY DIRECTORS.

His Excellency Baron Bentinck, Minister of State, Envoy Extraordinary and Minister Plenipotentiary of His Netherlands Majesty in London, 20, Lowndes-square.

His Excellency J. J. Rochussen, Minister of State, and late Governor-General of Netherlands India, The Hague.

DIRECTORS.

James Bonar, Esq. (Messrs. Small and Co.), Leadenhall-street, London.

Rear-Admiral William H. Hall, C.B., F.R.S., Director of the Peninsular and Oriental Steam Navigation Company.

Bartholomew H. Hartley, Esq., Leadenhall-street, London. Director of the Marine Insurance Company and of the British and Irish Steam Packet Company.

Richard B. Martin, Esq. (Messrs. Martin and Co.), 68, Lombard-street, London.

John Wm. May, Esq., Knight of the Netherlands Lion, Great Saint Helen's, London, Netherlands Consul-General.

H. Oliver Robinson, Esq. (Messrs. H. O. Robinson and Co.), 12, Leadenhall-street, London.

(With power to add to their number, either in Holland or England)

MANAGING DIRECTOR.

H. Oliver Robinson, Esq., A. Inst. Civ. Engrs.

COMMITTEE OF SUPERVISION AT BATAVIA.

Five of the shareholders among the mercantile firms in Java; two to be nominated by the Directors here, and three to be elected by their co-shareholders in Java.

MARINE SUPERINTENDENT AT BATAVIA.

Captain S. Van Hulsteyn, shipowner, Batavia.

ENGINEER SUPERINTENDENT AT BATAVIA.

Mr. Alexander Brown, late Marine Engineer in the Netherlands Government Service.

PROSPECTUS.

This Company is formed for the purpose of working the valuable contract recently granted for ten years, commencing the 1st January, 1866, by the Governor-General of Netherlands East Indies, at Batavia, to Mr. H. Oliver Robinson, for the performance of the Mail Steam Packet Service of the Dutch possessions in the Eastern Archipelago, and for the Steam Navigation generally of those seas. A printed translation of this contract may be seen at the offices of the Solicitors of the Company.

The Steam Service under the contract will consist of four principal and three secondary lines of Steam Navigation to and from the principal ports and islands of the Eastern Archipelago, centering at Batavia, and including the connection with the Peninsular and Oriental and French Mail lines at Singapore.

The subsidy on the mileage will amount to £27,000 per annum as a minimum

The Government gives a loan, free of interest, of £83,330, to be repaid in eight equal instalments, commencing in the third year of the contract, viz., 1868.

The Government guarantees to the contractor all its own traffic in freight and passengers, which amounted in 1862, independently of the subsidy, to £68,044. The tariff is fixed for the whole period of the contract, and the rates are liberal.

A contract mail steam service to nearly the above extent has been in regular and successful operation for several years, and expires at the end of 1865.

The traffic receipts of the present contractor, independently of the subsidy, were, during the last few years, as follows, viz.:—

In 1859...	£78,200	In 1861 ...	£108,600
In 1860 ..	101,660	In 1862 ...	132,785

The dividends declared by the Company of the present contractor during the last two years have been at the rates of 15½ and 16 per cent. respectively, after providing for insurance and a large reserve fund to replace capital.

The undertaking of the Netherlands India Steam Navigation Company (Limited) is therefore to carry out and develop an established steam traffic of the most profitable character, and which is necessarily a monopoly, as no opposition line, deprived of the support of the Government, could prove remunerative.

Subscriptions have been obtained in Java for 742 shares of 1,000 guilders each, equivalent to 3,091 shares of £20 each, and amounting to £31,820, in a Company proposed to be formed for working the new contract. The first instalment on these subscriptions has been paid. The names embrace nearly all the leadings merchants and traders in Netherlands India, who employ the steamers, and are more especially of value as manifesting the confidence of the colonial public in the undertaking, and the creation of a local interest in its success.

The modifications which it has been found desirable to make in the scheme submitted to the Java subscribers will render it necessary that an option should be given them of becoming shareholders in the Netherlands India Steam Navigation Company (Limited), as now constituted, and it is confidently anticipated that they will readily do so, and 3,000 shares will therefore be reserved for them accordingly.

The consideration to Mr. Robinson for his interest in the contract will be shares in the capital of £300,000, or any future increase thereof or addition thereto, in the proportion of one share out of every ten shares that may be issued or placed, and also a percentage upon the excess of the net profits above 15 per cent. on the paid-up capital. One-half of the shares so given will be permanently held by him.

An entirely new fleet of steamers, of the most perfect adaptation to the traffic and climate, is in course of construction.

From the dividends yielded by the present service, as mentioned above, and from the superior adaptation and economy of the steamers that will be employed under the new contract, a steady increase of traffic and proportionate dividends may be fairly anticipated.

Interest at the rate of 5 per cent. per annum will be paid on the deposit and calls until 31st December, 1865, when the Government subsidy commences; and the charge on the revenue of the Company created by such payment will be defrayed out of the annual profits of the Company.

In the event of no allotment of shares being made, the deposit-money will be returned in full, but without interest. If more shares are applied for than are allotted, the surplus of the deposit-money will be applied to the payment due on allotment.

Prospectuses and forms of applications for shares may be obtained of the brokers, and at the offices of the Company.

THE NATIONAL FINANCIAL COMPANY

(Limited) invite SUBSCRIPTIONS for SHARES in the ALBERT INSURANCE COMPANY (Limited), for Fire and Marine Insurances.

Incorporated under the Companies' Act, 1862, whereby the liability of each member is strictly limited to the amount of his Shares.

Capital £1,000,000, divided into 20,000 Shares of £50 each.

First issue 10,000 Shares.

Deposit on application £1 per Share, and £4 on allotment.

No call to exceed £5 per Share, nor to be made until the expiration of three months from the incorporation of the Company, nor at intervals of less than three months.

It is not contemplated, however, to call up more than £5 per share beyond the deposit and payment on allotment.

DIRECTORS.

Messrs. Mercer and Mercer, Mincing-lane.

AUDITORS.

Messrs. Johnstone, Cooper, Wintle, and Co., Lothbury.

SECRETARY (pro tem.)

H. L. Gentile, Esq.

TEMPORARY OFFICES.

No. 12, King's Arms yard, Moorgate-street, City.

This Company is established in order to afford to the agents and connections of the Albert Life Assurance Company, founded in 1838, an opportunity to combine the transaction of fire and marine insurance with that of life assurance.

The Albert Life Assurance Company has a share capital of £500,000 fully subscribed, and has an income from premiums of upwards of £220,000 per annum, and during the last three years has issued new policies of assurance to the amount of £2,573,979, the premiums upon which amount to £108,556.

FIRE DEPARTMENT.

The agents, policyholders, and shareholders of the Albert Life Company necessarily form a connection of the most influential character for a Fire and Marine Insurance Company.

The annual increase in the wealth of the country and in that description of property known as "insurable property" has suggested the formation of several new fire insurance offices, but the Directors of this Company believe that in very few instances has a fire company started with the same chances of success as attend the introduction of this.

The Company will have the advantage of the co-operation of a trained and perfectly organised system of agents; and the Directors submit, therefore, that there is a certainty of securing, almost at once, a large and profitable business.

The Chancellor of the Exchequer having intimated his intention to reduce the duty one-half on stock in trade, a large additional number of fire insurances will, no doubt, be effected by persons who have hitherto been deterred from insuring for the full value of their stock by reason of the heavy duty.

The following table shows the present value of the shares of those Fire Companies which are in alliance with Life Companies:—

Name of Office.	Shares.	Paid on each Share	Annual Dividend Paid.	Present Market price per Share.	Present Premium.
	£.		£6½ p.ct.		
Sun	100	£10 0	& bonus	£220 0	2,100 p. ct.
Union ...	200	20 0	£65 p.ct.	280 0	1,300 p. ct.
County ...	100	10 0	£40 p.ct.	86 0	760 p. ct.
Imperial ...	500	50 0	£36 p.ct.	360 0	620 p. ct.
Liverpool & London..	20	2 0	£24 p.ct.	11 10	475 p. ct.
London ...	25	12 10	£20 p.ct. £10 p.ct.	45 0	433 p. ct.
N. British Royal Exchange...	100	6 5	& bonus	19 0	204 p. ct.
	100	100 0	£14 p.ct. £14 p.ct.	30 0	200 p. ct.
Atlas... ...	50	5 15	& bonus	14 0	143 p. ct.
Law	100	2 10	£11 p.ct.	5 0	100 p. ct.

MARINE DEPARTMENT.

Notwithstanding the recent establishment of several marine insurance companies, and the extensive business they have acquired, there is ample room for the safe and profitable employment of capital in this direction. The vast increase in the shipping interest of the United Kingdom, together with the growing feeling in favour of the security afforded by joint-stock companies as compared with private underwriters, points to the opening which exists for this department of the Company's operations.

The services of an able and experienced underwriter will be secured, and a large business can at once be obtained for the Company.

The following statistics of a few of the present marine insurance companies show the present value of the shares of those companies, and the highly successful nature of such business:—

Name of Office.	Date when Established	Shares.	Paid on each Share.	Present Market Price per Share.	Present Premium.
			£ s.	£ s. d.	
Marine	1836	100	18 0	96 0 0	£433 p. ct.
Ocean Marine	1859	25	5 0	19 10 0	290 p. ct.
London	1720	25	12 10	48 0 0	284 p. ct.
Thames and Mersey	1860	20	2 0	6 17 6	244 p. ct.
Indemnity	1824	100	50 0	147 0 0	194 p. ct.
Alliance	1824	100	25 0	50 0 0	100 p. ct.
London & Provincial	1861	20	2 0	4 0 0	100 p. ct.
Commercial Union .	1861	50	5 0	9 10 0	90 p. ct.
English & Scottish	1863	100	5 0	6 0 0	20 p. ct.
Lond. & Caledonian	1863	25	5 0	6 0 0	20 p. ct.

In the event of no allotment being made, the deposit will be returned in full. Should a less number of Shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance (if any) returned to the applicant.

Forms of applications for shares may be obtained from the National Financial Company (Limited), 12, King's Arms'-yard, Moorgate-street, E.C.; or the Brokers or Solicitors of the Company.

FORM OF APPLICATION FOR SHARES.

To the Directors of the ALBERT INSURANCE COMPANY (Limited).

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot me, and I agree to pay the deposit on allotment, and to sign the Articles of Association of the Company when required, and I authorise you to insert my name on the Register of Members for the number of shares allotted to me.

Solicitors—Messrs. NEWBON, EVANS, and Co., Nicholas-lane; Messrs. EDWARDS and Co., Westminster.

Brokers.

Messrs. FIELD, SON, & WOOD, 9, Warnford-court, Throgmorton-street; Messrs. ROBINS & BARBER, 29, Threadneedle-street, E.C.

Secretary (pro tem.)—T. SHORT, Esq.

Temporary Offices—At the Offices of the Credit Mobilier (Limited), 80, Lombard-street.

PROSPECTUS.

The IMPERIAL BANK OF CHINA, INDIA, AND JAPAN is established to meet the increasing demand of the commerce of those countries for additional Banking accommodation.

When it is considered that the total paid-up capital of the Joint-Stock Banks doing business in China and India is represented by the inadequate sum of £6,000,000, whilst the aggregate of imports and exports with Great Britain alone amounted in the year 1862 to a total of £70,000,000, it will be apparent that there is an ample field for a new undertaking of this nature.

Great Britain imports from China and Japan an annual average of upwards of seven million pounds of silk, and about one hundred and twenty million pounds of tea.

The rapid increase of trade between China, India, and the United Kingdom is shown as under:—

Years.	Total Trade between India, China, and United Kingdom.
1854	£33,643,000
1862	70,540,000

The commerce between India and China has also increased during the past twenty years from three to fifteen millions sterling.

The balance of trade with China and India is paid in bullion—chiefly silver—of which the export value was in 1863, £8,263,011.

The Imperial Bank of China, India, and Japan has been established on the basis of similar institutions, the success of which the following table will exemplify, and it is believed at least equal results will mark the progress of this Bank:—

Name of Bank.	Paid up per Share.	Present price per Share.
Agra and United Service	£50	£145
Chartered Mercantile of India, London, and China	25	70
Chartered of India, Australia, and China	20	41
Hindustan, China, and Japan	25	40
Oriental	25	66

The Imperial Bank of China, India, and Japan, will transact all operations connected with those of a Bank of Issue, Deposit, Discount, and Exchange, in China and the East; and as soon as necessary arrangements can be completed, the business of the Bank will be extended to the Australian Colonies.

The directing and controlling authority will be in London. Branch Banks will be formed in the first instance at Shanghai, Hong Kong, Bombay and Calcutta, and at such other places as may from time to time be deemed advisable. The Branches will be under the control of the London Board, aided by the supervision of an Inspector-General. The authorisation of the Government at Pekin has been solicited to allow the Specie Notes of the Bank to be received in payment of Customs Duties, and an official correspondence is now being carried on by the Bank with Pekin for that object.

The growing necessity and desire for the introduction of railway and telegraphic communication in China will render necessary extensive financial operations, which the Bank will be favourably situated to undertake.

No fresh Applications for Shares will be received.

THE IMPERIAL BANK OF CHINA, INDIA, AND JAPAN (LIMITED).

The following Circular has this day been sent to each Applicant for Shares in the Imperial Bank of China (Limited):—

THE IMPERIAL BANK OF CHINA, INDIA, AND JAPAN (LIMITED).

Temporary Offices, 80, Lombard-street.—22nd April, 1864.

SIR,—I am instructed to inform you that, in consequence of the great encouragement held out to the proposed Imperial Bank of China (Limited), since the Prospectus has been issued, the Directors have found it absolutely necessary to enlarge the basis and sphere of operations.

With this object they have determined upon increasing the Capital of the Bank to Two Millions, in 40,000 Shares of £50 each, and issuing 20,000 Shares instead of 10,000, as originally announced; the title has also been made more comprehensive, viz., "The Imperial Bank of China, India, and Japan (Limited)."

I am further requested to enclose you the amended Prospectus, and to place at your disposal the option of confirming or withdrawing your application for shares, but in consequence of the very large number of Shares applied for (upwards of 92,000), no additional applications can be entertained.

The Board Meeting for the purpose of Allotment, stands adjourned to THURSDAY, the 28th inst., your decision must, therefore, be received at this Office not later than WEDNESDAY, 27th inst., at 12 o'clock; all such as are not then received will be considered as withdrawn.

I am, Sir, your obedient Servant, THOMAS SHORT, Secretary (pro tem.).

THIRTIETH ANNUAL GENERAL MEETING OF SHAREHOLDERS
OF THE
AGRA AND UNITED SERVICE BANK
(LIMITED),

Held at the Bank, 27, Cannon-street, E.C., on Saturday, April 2, 1864.

GEORGE GORDON MACPHERSON, Esq., Chairman, in the Chair.

The notice convening the Meeting and the following REPORT and STATEMENT of ACCOUNTS were read:—

The Directors have to submit to the shareholders the audited accounts for the year ended 31st December last, and to report that, after making ample provision for all bad and doubtful debts, the net profits of the Bank for the year amounted to £242,909. 12s. 6d.

Out of this sum the Directors have declared, free of income-tax, two half-yearly dividends at the rate of 10 per cent. per annum each, and have added to the last of these a bonus of £4 per share, thus making a return for the year of 18 per cent. on the paid-up capital of one million sterling.

From the balance remaining the Directors have refunded to reserved fund account the sum of £7,341. 2s. 4d. taken from it last year, and, in consideration of the greatly extended business of the Bank, have carried to credit a further sum of £25,000, thus raising the fund to £225,000. They have also passed the sum of £5,000 to superannuation fund, and £15,000 to building fund, carrying forward £10,568. 10s. 2d. to credit of profit and loss account for the current year.

Since last annual meeting the Directors have purchased desirable premises in Sydney, and have secured land at Shanghai, Kurrachee, and Madras, in view to the erection of suitable buildings for the branches of the Bank at those ports.

The present Auditors being eligible for re-election, in terms of the deed of settlement, offer themselves accordingly.—By order of the Board,

MACKINTOSH BALFOUR, General Manager.

(No. I.)—BALANCE-SHEET, DECEMBER 31, 1863.

G. B. DALBY, Chief Accountant.

We have examined the preceding statements (Nos. 1, 2, and 3) with the books, vouchers, and securities, at the head office in London, and with the detailed returns and balance-sheets signed by the auditors of the several branches, and we hereby certify to the correctness and satisfactory character thereof.

London, March 16, 1864. W FARR, J. HILL WILLIAMS, } Auditors.

The following resolutions were duly moved, seconded, and carried unanimously:—

"1. That the Report and Statements which have been read to the meeting and previously circulated to the Shareholders in Europe, be adopted.

"2. That George Gordon Macpherson, Esq., Colonel Henry Doveton, James Sydney Stopford, Esq., and James Thompson, Esq., be re-elected Directors.

"3. That John Hill Williams, Esq., and William Farr, Esq., D.C.L., F.R.S., be auditors for the present year.

"4. That the thanks of the Shareholders be given to the Board of Directors for their careful control of the Bank's affairs; to the General Manager, Mr. Mackintosh Balfour; to the London Manager, Mr. William Shipman; and to the Local Committees and Managers of the Branches, for the satisfactory manner in which they have conducted the business of the Bank for the past year; and to the Auditors, for their efficient supervision of the accounts.

"5. That the thanks of the meeting be given to the Chairman for his able conduct in the chair."

G. G. MACPHERSON, Chairman.

THE AGRA AND UNITED SERVICE BANK (LIMITED).

Consultations daily from 10 to 3 and 6 to 8.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.
—INSTANT RELIEF.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress and induced to take an healthy action by applying this healing Ointment and taking these purifying Pills. It soothes all distempers of, and extracts all morbid humours from the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs can sensibly be eased and shortly cured by Holloway's never failing Ointment which represses excessive, and stimulates sluggish vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of the cooling Ointment will give comfort and a persistence in its use will effect a cure.

THE FRENCH MAILS.

The following telegram has been received by the Messageries Imperiales in Paris :—

The *Bengal* has spoken the Messageries Imperiales steamship *Imperatrice*, 760 miles from Aden. Her shaft had broken down, but had been repaired. She was making six knots per hour, and expected to arrive at Aden on the 30th of April. Her mails have been transshipped in the *Bengal*, and will arrive here with the next P. and O. mail about the 13th inst. She brings 214 passengers.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Syria, from Southampton, May 4.—To Singapore: Mr. P. L. Blyth. To Hong Kong: Mr. H. D. Margesson, Mr. C. Smale. From Marseilles, May 12.—To Penang: Mr. Jno. Lamb. To Shanghai: Admiral Steen Bille and Secretary. To Hong Kong: Mr. and Mrs. Neilson, Mr. Barnes Dallas. From Suez.—To Hong Kong: Mr. J. M. Borntraeger, Mr. G. Hubbe.

CHINA.

SHANGHAI.

Having been informed that shipments of sporting guns and ammunition are included in the following notification, we publish it again for the guidance of shippers :—

CUSTOMS NOTIFICATION.

Office of Maritime Customs, Shanghai,
Tuesday, 9th June, 1863.

The following is a translation of a Notice posted at the Custom House by the order of his Excellency the Superintendent of Customs.

H. TUDOR DAVIES, Commissioner of Customs.

HUANG, SUPERINTENDENT OF CUSTOMS, INTENDANT OF CIRCUIT, &c.

A Special Proclamation.

It is laid down in the Regulations appended to the Tariff, that munitions of war are contraband, and that import and export trade therein is prohibited; and thus it is only when specially imported for Chinese Government officers, under Government authorisation, that the contraband character of such commodities is removed.

Therefore after the dates mentioned below, all munitions of war, brought to Shanghai, will be regarded as, and treated as contraband, unless the importer has *in the first instance* obtained a *Permit to Import*. This document will be issued by the Customs, on receipt of instructions from H. E. the Governor; and will state distinctly that a certain merchant is authorised to purchase on behalf of His Imperial Chinese Majesty's Government, at a certain place, a certain quantity of munitions of war.

All munitions of war brought here, save under this permit to import, will be seized and confiscated, and the plea that they are intended to be eventually taken to Japan or elsewhere will be by no means admitted.

As however the distance between China and the various foreign countries is not uniform, I, on the 4th day of the 4th moon (the 21st May) addressed communications to the Consuls of the Treaty Powers, to the effect "that *after the expiry of a term of six weeks*, commencing on the 4th day of the 4th moon, the date of my communications, munitions of war, for which no Customs permit to import has been issued, brought to Shanghai in vessels which have come from Hong Kong, or any Asiatic or Australian port, or in vessels which, coming from other parts of the world, have touched or anchored at Hong Kong, or any Asiatic or Australian port, shall be regarded as contraband and seized and confiscated: and that *after the expiry of a term of seven months*, munitions of war brought to Shanghai in vessels which coming from any European, American, or African port, have not touched or anchored at Hong Kong, or any Asiatic or Australian port, shall be regarded as contraband, and seized and confiscated."

In addition to the communications which I have already addressed to the Consuls of the Treaty Powers, I now publish this proclamation for the information of all whom it may concern.

T'ung-Chih, 2nd year, 4th moon, 19th day.

HANKOW.

A meeting of merchants has been held here for the purpose of inquiring into the reasons alleged by A. Macpherson for the detention of the Shanghai Steam Navigation Company's steamer *Huquong*. There were forty-five gentlemen present, and all the leading firms in China were represented.

The Chairman (Mr. John Mackellar) explained the object of the meeting, expatiating upon the annoyance arising from the detention of the *Huquong*. He requested Mr. Breck (U. S. Consul) to read the correspondence on the subject. Mr. Breck read the correspondence consisting of—

1st. A letter from the Acting Commissioner of Customs, of the 15th February, enclosing a copy of Tidewaiter Gray's report of the alleged insults offered to him by John Peterson, Assistant engineer of the *Huquong*, and demanding written apologies from the same.

2nd. Tidewaiter Gray's statement enclosed. In which he affirms that Mr. Peterson had abused the Custom House and all its officials, while he (Mr. Gray) was on board the *Huquong* in the execution of his duty.

3rd. A letter from the Acting Commissioner of Customs of the 16th February stating that it was by his authority that the Custom House officers had been withdrawn from the *Huquong*, and as a matter of course the shipment and discharge of cargo then ceased.

4th. Affidavits of officers on board the *Huquong*, denying Tidewaiter Gray's statement.

5th. Mr. Tidewaiter Gray's statement on oath before the U. S. Consul.

The Chairman asked if any gentleman, having heard the correspondence, had any observations to make.

Digitized by Google

Mr. J. T. Hudson proposed the following resolution to the meeting :—

"Resolved, that this meeting do consider the detention of the *Huquong* unjustifiable under the circumstances." Seconded by Mr. Townend, and carried *nem. con.*

Mr. Jerdein proposed the following resolution :—"Resolved that, in the opinion of this meeting, the Commissioner of Customs acted without carefully weighing the facts of the case, and at the same time exhibited a want of judgment in the detention of the *Huquong*, which has resulted not only in great inconvenience to the consignees and shippers, but to the public generally, who had availed themselves of that opportunity to write their homeward mail." Seconded by Mr. D. C. Williams, and carried *nem. con.*

Mr. Innes then proposed as follows :—"Resolved, that this meeting are of opinion that the Acting Commissioner of Customs not only showed a want of judgment, but exceeded his authority, in detaining the *Huquong*, inasmuch as that vessel did not break the American treaty, or the Yang-tsze regulations." Seconded by Mr. Lloyd, and carried *nem. con.*

Mr. J. H. Evans turning the attention of the meeting to the question of redress, proposed the resolution :—"Resolved, that a representation be made to H.B.M.'s Consul, showing the very serious injury that such acts are calculated to inflict on the interests of this port, and praying for his interference in such manner as he may deem best, in order to secure protection to the community from such acts in future." Seconded by Mr. Ramsey, and carried *nem. con.*

Mr. Hardy then proposed as follows :—

"Resolved, that a Committee be formed consisting of the Chairman, Mr. Wetmore, and Mr. J. H. Evans, to wait on H.B.M's Consul, and to carry out the meeting's last resolution." Seconded by Mr. Deuce, and carried *nem. con.*

Mr. Littledale thought that the Commissioner was not responsible, but that the Taoutai was responsible for the detention. Did the meeting know if the Taoutai knew of and authorised the detention ?

Mr. Breck said that the Taoutai did not know, but sent for the Commissioner and ascertained the fact. The Taoutai only know that the vessel was detained on account of a squabble between the inferior officers of the Customs and of the *Huquong*. That the Commissioner had not the usual advantage of falling back on the Superintendent of Trade, as he (Mr. Breck) had himself received a letter from the Taoutai, informing him that the matter lay with the Commissioner of Customs, as the Commissioner had been appointed from Peking to manage such business.

Mr. Little wished to know on whose authority the vessel was eventually cleared.

Mr. Breck did not know.

Mr. Josephs proposed that a copy of these resolutions, and of the proceedings of the meeting, be forwarded, to the Chamber of Commerce at Shanghai and to the Inspector-General of Customs at Shanghai. Seconded by Mr. Cheshire, and carried *nem. con.*

Mr. Menzies proposed a vote of thanks to the Chairman. Mr. Evans seconded it. Carried *nem. con.*

HONG KONG.

On the new postal regulations the *China Mail* says :—Some amusing scenes occurred at the Post-office last mail, owing to the inauguration of the new arrangement, whereby the use of postage stamps has become compulsory. Of course, those having a large correspondence to post regularly were prepared for the change, and had their measures taken accordingly, and the discomfiture was therefore chiefly among private correspondents with their one or two letters. In order to make sure of the letter being posted, in the absence of the usual chit-book check, each man went to the office in person, and the scene was somewhat exciting. The first difficulty was with the shroff who sells the stamps. This public servant's leading weakness, it was proved, is a steady unwillingness to admit that any dollar is of full weight. He holds up each of these coins that come before him, and informs the applicant for stamps what value he is prepared to affix to it. The latter person being in a hurry to have his letter posted, and not wishing to amuse the bystanders by a dispute about the alleged deficiency, takes what he can get for the light dollar. If, as usually happens, he requests the change to be given him in stamps, the shroff or compradore entrusted with the sale of these has to cast up a calculation and adjust the value of the stamps returned so as to suit the amount of change requisite. The next difficulty consists in finding out the weight of each letter, which is not so easily done in the present dearth of implements for the purpose ; after this the price forms a separate subject of inquiry, and one thing only remains, viz., to find out the proper pigeon-hole into which the letters are to be put. The public are, perhaps, rather slow in finding out these things ; and, as people had generally allowed their servants to post their letters, there was the most profound ignorance shown on all hands with regard to this point. Men might be seen running about demanding of each other the required information, and comparing notes as to what was best to be done. Of the different stages of the postal process this was the most trying, and taxed the ingenuity most severely. But, of course, all these labourers met their reward, by thoroughly initiating those who endured them in the profound mysteries of posting letters. The coinage is easily arranged beforehand, as the new ten-cent piece cannot be denied ; it will be easier still to get satisfaction when the coming dollar shall have made its appearance. The matter of weight and price is probably a study, but it is one well worth going into, and a little practice will soon render one perfect.

The Post-office here, though very well managed, is scarcely up to the requirements of the place, and it is greatly to be desired that more hands and larger premises be provided. A Post-office should facilitate the despatch of letters, but here it rather impedes it. Decent people, as a rule, pay attention to all legal enactments, but the sending of letters by private hands is a thing at which the most scrupulous would never hesitate.

The practice of returning to the senders all letters insufficiently stamped is most objectionable. It is simply offensive, in the first place, to open a man's letter, but it is worse than offensive to cause him to have his correspondence, or any portion of it, delayed for a week or a fortnight. The opening of under-stamped letters may be avoided by each sender putting his name outside in case of accidents, but the practice of detaining correspondence in any way is surely entirely unnecessary, as a fine can be imposed here and charged to the sender's account, at least where the latter is known.

The Quarterly Tea Meeting in connection with the Rev. Dr. Legge's congregation was held in the School-room. Tea being over, the Chairman (Dr. Legge) introduced Captain Hedger, who addressed to the meeting a few humorous and instructive remarks on what he had seen and heard of Christain worship in foreign lands. Short addresses were then made by Mr. Keyworth, Rev. Mr. Lech, Mr. Cox, and Mr. Denison, in the course of the evening. Hymns were sung in the intervals by the audience ; and a pleasant and profitable evening having been spent, the meeting closed about half-past ten.

The New Dock at Aberdeen promises to be a fine work, and will be capable of taking in the *Warrior* itself should that renowned vessel ever visit these shores. The Admiralty, it is perhaps not generally known, are extending their assistance to the energetic proprietor in the construction of a second dock ; and they are doing so on very liberal terms. The depth already attained is about twenty-two feet, and the length will be considerably over that of the existing dock. The soil proves to be of harder material than had been previously excavated, so that the prospects of success may be considered fair. The part requiring most ingenuity will be about the entrance, and the trouble entailed will depend upon the kind of bottom that may be found, a matter which has not yet been precisely ascertained.

On the 9th and 10th of March a series of garrison sports took place here. The following were the leading sports. First day : Naval scrambling, running, high jumps, Minden Cup race, Lanarkshire Plate do., Hong Kong Plate do., the Indian Star do., putting shots, the sack race, and the Victoria Cup do. Second day : Race for the champion's belt, throwing the hammer, hop, step and jump, short scurry race, mile do., throwing a cricket ball, and Indian wrestling. The best run race was a race got up among gentlemen belonging to the colony. Twenty-eight names were put down for five dollars each, the winner to pocket the stakes. Nineteen out of the twenty-eight started, the distance being one hundred yards. The lead was taken by Davidson (Messrs. Deut and Co.'s), and was kept the whole way. Harris (2-20th) and Tanner (99th) were respectively second and third, Baldwin being fourth. When we mention that the distance was run in ten seconds and a third it will be seen that the race was a good one. Ten yards per second is a rate of progression not often attained.

From a return just published by Captain Frederic Brine, of the Royal Engineers, we find that, up to the present date, the

Digitized by Google

number of vessels presented or sold by foreigners to Japanese has been thirty-seven ; five of these were vessels of war, one of which was a present from Queen Victoria and one a present from the King Holland, who also sold the Japanese three more at $100,000 each. The number of merchant vessels sold to the Japanese within the last three years has been thirty-two ; the highest price obtained was for the *Ly-ee-moon* ($195,000), sold by Messrs. Dent and Co. Other steamers have brought such prices as the following :—*Jinkee* $150,000 (Messrs. Gibb, Livingston and Co.) ; *Yang-tsze*, $145,000 (Messrs. Dent and Co.) ; *Shantung*, $135,000 (Messrs. A. Heard and Co.) ; *Fiery Cross*, $130,000 (Messrs. Jardine, Matheson and Co.) ; *England*, $128,000 (Mr. W. S. Lindsay) ; *Kumsing*, $125,000 (Messrs. Thomas Hunt and Co.) ; *Lancefield*, $115,000 (Messrs. Jardine, M. and Co.) ; *Shanghai*, $115,000 (Messrs. Wilkinson and Co.) ; *City of Hankow* and *Shunlee*, $100,000 each (Messrs. Dow and Co). The Tycoon bought ten of the thirty-two merchant vessels, and the Prince of Satsuma five. Six or seven of these ships are no longer afloat, having been lost at sea or burned at Kagosima, others have got out of repair and are doing nothing. The entire cost of this fleet has amounted to $2,481,800 ; and for the ships-of-war supplied by the Dutch in 1858, $300,000. There have also been offered for sale besides, 12 British, 3 American, 1 Russian, and 1 Prussian, screw-steamers ; 8 British paddle-steamers, 1 American brigantine, and 2 British schooners ;—total, 28 vessels. The Japanese have also three schooners built out of wrecks of foreign vessels, one of which is from the wreck of the late Russian frigate *Diana*, that foundered rounding Cape Idsu when on her way from Simoda on the 23rd December, 1854. The guns of the *Diana* are now in the new fort at Hakodadi.

The following letter is on the subject of railways in China noticed in our last :—

(To the Editor of the *China Mail*.)

CANTON, *March* 4, 1864.

Dear Sir,—Your last issue gave, in mournful numbers, the lamentations of some "Old Cantoner" for the desolations of this city, and the decline of trade. Yet there was a beam of cheerful content and loving attachment to this ancient settlement glimmering through them which was commendable.

In another column of the same paper, which contains the poetical lamentations over Canton's departed glory, are editorial remarks concerning a railway from Canton to Hankow. Although but a few lines are devoted to the subject they are true and timely. It is an object deserving the attention of both Chinese and foreign Governments, the Chinese people and foreign residents.

The 1st question which suggests itself is this. Is it practicable to construct a railway on the proposed route? Are there no insuperable obstacles of mountain ranges, rivers, or yearly freshets? From personal observation I can assure you there are none. It has been supposed that the mountain range running east and west between Canton and Hunan provinces was a barrier that would effectually prevent all attempts to connect the two provinces by a railway. I am happy to inform you that such is not the case. The pass or gap in the mountain range named See-ue Leng, is only twenty-eight miles in length, from the head waters of Canton North River, to the head of boat navigation on the Say-ung River, which empties into Tong Teng Lake, not far south of Hankow. This pass has a gradual ascent on the north and south sides, but so low that small streams flow parallel with the stone-paved road which runs through it. The grade is much less than that of many hills in England and America, which have been levelled by railway engineers.

2nd. Will the road pay after it is built? This question is much more problematical than the first. But if the number of travellers up and down the route, the produce that would be exported, and the goods imported by it, should be only what are now carried in Chinese boats, I am confident it would pay the outlay and expenses. The actual existence of such an unheard-of, safe, and speedy communication between Hankow and Canton, including all the intermediate places, would open new streams of trade, develop more largely the resources of the country, and induce many a villager and mountain peasant to purchase a railway ticket.

3rd. Who shall build the railway? Chinese coolies and workmen, of course, superintended by foreign engineers and interpreters. Who built Shameen, and changed a mud flat into one of the most beautiful and healthy places in China for the residences of foreigners? Thousands of poor Chinese day-labourers were delighted to have a share in that job for a few pennies a day. Thanks to the zeal, skill, and energy of Sir Harry Parkes, Carl Brunsted, Esq., and their associates, who planned and carried out the work to completion. Who have built the fine granite docks at Whampoa and Hong Kong? Who have built the roads, bridges, and princely dwellings on the hill-sides of Victoria? Chinese workmen, taught and directed by foreign overseers. In like manner can it be with this railway from Canton to Hankow. No want of labourers and diggers.

What we have now between Canton and Hong Kong for the transfer of passengers and produce are several fine steamers for passengers, specie, silks, and other valuable merchandise; while a dozen or twenty Chinese cargo-boats transport the heavier goods, rice, fuel, and lumber. On this railway there would be the crowded passenger cars and heavily loaded freight trains. A happy day will it be for Canton when the first spade is struck in the ground to begin the proposed railway. Happy day for all the inhabitants two hundred miles on either side of the route, eight or nine hundred miles to Hankow. Idlers and half-starved coolies would find constant employment and good wages.

The day of Mandarin tyranny over foreigners in Canton has passed away. The Cantonese of to-day are not the same as those of 1854. They are willing to listen to propositions for improvement, although they do not always see the best way to adopt them.

The mention of the subject in your paper gives me pleasure, and I trust it will be taken up and carried through by those versed in such matters. There is not a single railway in China. Canton needs it quite as much, and more, than Shanghai. The Yang-tsze may suffice for her great highway and commercial avenue. Those mammoth steamers plying to and fro on its waters have stolen from Canton her ancient rights and possessions. They must be regained by the swifter locomotive, which shall draw back to their former outlet the productions of Hunan, Hupeh, and Sz-chuen provinces. Would it not be a great loss to Canton and Hong Kong if the present steam communication between them was cut off? The advantages to all concerned are too many to be given up. And have they not been increasing every season, notwithstanding the Hankow competition? Let the rapid increase of the Chinese population of Hong Kong answer. Now is the time for Canton and Hong Kong to take hold of this matter in earnest, and not let it cease till it has become a substantial *bona fide* railway. Deliberate, consult, organise, talk, "proceed to business," and push on the work until we see in the advertising columns of the Hong Kong dailies a notice somewhat like this :—

CANTON AND HANKOW RAILWAY COMPANY.

Until further notice, the express train for Hankow will leave the depot at the North City Gate punctually at 8.30 A.M. and 5 P.M., stopping half-an-hour at every district and department city on the route. Through tickets may be purchased at the office in New China-street (Old Factory site), or at the superintendent's office in Hong Kong. Passengers' luggage will be in charge of the baggage-master, who will furnish a ticket in exchange for each article put under his charge. Freight trains leave at 6 A.M. and 6 P.M. Refreshments provided at the stopping places of the express train.—By order of the directors,

CHUN AWIN, Agent for Canton.

MALACCA STRAITS.

SINGAPORE.

The dismantling of Fort Fullerton had been confined to the removal of a few guns, which are to be placed in position on Pearl's Hill, where some earthworks are now being constructed. The site of the fort had been applied for by the Municipal Commissioners, who propose to connect both sides of the river by a bridge, thrown over near its mouth, securing a fine broad carriage way from the Esplanade direct into the sea-wall frontage on the business side. This sea-wall frontage has a road of fine proportions, and is being lined by a row of handsome godowns.

Her Majesty's steam frigate *Pelorus*, which arrived on the 12th March, brought the chief mate of the British brig, *Fame*, or *Fawn* (it is given both ways), charged with shooting a seaman belonging to the said vessel. The brig, under the command of Captain Macdonald, was bound from Mauritius to New Zealand, having a crew disposed to be insubordinate. On one occasion a scuffle ensued between the chief officer and one of the crew, which led to the offence charged. The brig, subsequently, touched at St. Paul's, and seeing the frigate passing showed signals of distress. An inquiry ensued, and the result was that the mate was brought in a prisoner, with the second mate and three of the crew of the brig as witnesses. A petty officer and three men of the *Pelorus* were placed on board the brig to navigate her to New Zealand.

We announce with deep regret, says the *Straits Times*, the death at Malacca of Mr. Tan Kim Sing, one of our greatest public benefactors. Though a Chinaman, he identified himself thoroughly with the welfare and prosperity of the settlement. Mr. Kim Sing was trustee of the Institution Schools, the Townhall, and the gasworks.

Mr. Williams, chief mate of the British brig *Louisa*, of this port, went ashore on Sunday, the 6th March, and left the Prince of Wales tavern in the evening with the intention of going off to the vessel in a China sampan, but nothing had been since seen or heard of him.

PENANG.

We take the following from the *Penang Gazette* of March 19 :—"H.M.'s steamer *Prince Arthur*, Captain Baker, from Singapore on the 10th and Malacca on the 12th inst., arrived here on the 14th, and sailed the following day for Maulmain.

The French barque *Louise Collet*, for Havre, *via* Rangoon, sailed on the 15th inst., with the following cargo :—

Pls.		
7.03	Tin.	
" 669.87	Black Pepper.	
" 102.25	White do.	
" 100.30	Rattans.	

The British barque *Devonvale*, for London, sailed on the 16th inst., with the following cargo :—

The dry weather still continues, and with it a very high atmospheric temperature, which makes it very oppressive to those residing in the plain. This drought has now lasted upwards of three months, the few partial showers which have, at rare intervals, fallen during that time have had very little effect indeed on vegetation, or at all contributed to our personal comfort. On Thursday evening, there was every appearance of a very heavy fall of rain in the province, accompanied by lightning and thunder, which we fully expected would extend to this island; unfortunately the wind changed and the rain clouds were rapidly dispersed, affording us the benefit of the merest sprinkling, not sufficient to lay the dust on the roads. It is to be hoped we shall not be much longer without a good supply of rain, and we anticipate that the end of this month will see its advent.

Since the above was written, we learn that on Thursday evening a heavy shower fell in the south of the island which lasted four hours.

From our observations up to this time we think that the tree which has suffered most from the drought is the Pinang or betelnut. This is curious, as the Pinang is an indigenous tree. Several batches in the jungle are completely scorched up. One effect of the drought has been to push forward the flowering season of the fruit trees. We are promised an abundant crop of durians and other fruits, and some very young trees of the former show a large quantity of blossoms.

OPENING OF WESTERN CHINA.

A Parliamentary paper has been published giving the memorials which have from time to time been given in our journal. We extract the last one and the reply thereto from Government, which, we regret to see, shelves the question. It is due to the various Chambers, and also to the memory of the late Lord Elgin, to publish the despatch in which his lordship expresses the adverse opinion which Sir Charles Wood attributes to him. We append a list of the memorials which have been forwarded :—

MEMORIAL FROM THE HUDDERSFIELD CHAMBER OF COMMERCE TO VISCOUNT PALMERSTON.

The Memorial of the Huddersfield Chamber of Commerce, sheweth, that in the year 1860 a memorial was addressed to your Lordship by this Chamber praying that Her Majesty's Government would cause such surveys to be made as would expedite and facilitate the making of a commercial road or railway from the port of Rangoon across British Eastern Pegu, and the south-eastern territory of Burmah towards Esmok and the Western Chinese Provinces.

That your memorialists, after having obtained further information, are now still more forcibly impressed with the importance of opening up a direct route of commercial communication with the provinces of Western China, whose productions of silk, cotton, wool, and tea, well suited to English markets (and the cultivation of which might be indefinitely increased if a convenient outlet could be formed), might thereby be readily exchanged for British manufactures to the advantage and development of the commerce of the country.

That recent events (such as the American civil war) have shown that existing markets, furnishing important raw materials, and receiving British manufactured goods largely in exchange, are liable to be deranged so as to interfere seriously with the operations of important branches of industry in this country, which renders it of great importance that all proper effort should be made to facilitate the opening of new markets to the wants and enterprise of British manufacturing and trading interests.

That the recent Treaty of Commerce concluded with the King of Burmah, by which British merchants are allowed liberal trading facilities in that kingdom, is regarded by your memorialists as a favourable step, if properly availed of, towards a commercial contact with Western China.

That the Emperor of the French, having gained a footing in Cochin China, is fully alive to the advantages of his newly-acquired position there, and contemplates using the route by the river Kamboja to open up French commerce with the Western Chinese provinces, in competition with the British trader. This circumstance makes it highly desirable that Her Majesty's Government should endeavour to render available the superior position and shorter route possessed by this country so as to secure a full share of advantage in commercial intercourse with the new markets now presenting themselves in Western China.

That your memorialists learn through the public journals that the authorities of Calcutta have contributed a sum of money to the Rev. Mr. Bixby (an American missionary) to enable him to explore, during the approaching dry season, some of the Burman Shan States; also that Dr. Marfels (a German) is instructed to proceed by another route in the direction of the same states, and also that Captain Fitzroy, of the Royal Artillery service, is commissioned to explore from Pegu in still another direction.

That your memorialists, however, beg most respectfully to submit to your lordship that the proposed exploring journeys by these individuals are not what the manufacturing, shipping, and mercantile interests of this country have so earnestly and so generally appealed to your lordship to have effected; nor can the reports of such individuals be satisfactory on so important a question as the practicability of opening the West of China commercially by the most direct route.

Your memorialists, therefore, earnestly pray that your lordship will be pleased to cause instructions to be forwarded to Her Majesty's Viceroy and Governor-General of India forthwith to cause a thorough survey of route from Rangoon through Pegu and the South-eastern corner of Burmah to Kiang-hung on the Upper Kamboja River, to be entered upon by a sufficient party of surveyors and engineers acting under the directions of a chief engineer of eminence, whose report might be calculated to give satisfaction to Her Majesty's Government, and to the manufacturing and trading classes of this country. (Signed)

THOS. P. CROSLAND, President.

MR. BARING TO MR. CROSLAND.

India Office, January 28, 1864.

Sir,—I am directed by the Secretary of State for India in Council to acknowledge the receipt of the memorial of the Huddersfield Chamber of Commerce addressed to Viscount Palmerston, praying that the Government of India may be instructed to depute a qualified engineer to survey the country between Rangoon and Kiang-hung with a view to the eventual construction of a road, as may be found best, between those two points; and I am to inform you in reply that, in accordance with the opinion expressed by the late Viceroy, Sir Charles Wood is not prepared to sanction the measures suggested by you.—I am, &c.,

(Signed) T. G. BARING.

OUR AID TO THE IMPERIALISTS TO BE STOPPED.

(THE TIMES.)

History has sometimes paused incredulously over stories of great cruelty, such as those alleged against Genseric and his Vandals, who are said to have collected their prisoners at the gates of the African cities which refused to surrender, and to have slaughtered them there, leaving the carcasses to fester in the sun, that the stench might carry plague into the towns. Modern civilisation has refused to believe that even a barbarian could pursue a policy of such ruthless inhumanity. Yet, really, the contemporary acts which are reported to us every day make it very doubtful whether we ought to reject any tradition as improbable simply because it records an act which would have been more than usually atrocious. The highly-educated Prussians have just been throwing shot and shell among the women and children of a defenceless town, without caring to take the trouble of giving the accustomed notice of what they were about to do. The free and enlightened Americans have been slaughtering without mercy all who were found in a fort taken by assault. To-day we have news that a people whose government is founded entirely upon reason, and whose literature and religion only exist to combine with a system of pure ethics, have just been roasting to death over a slow fire four European prisoners. After all, if a man should happen to find himself in a defenceless city it would seem to be a matter of small difference to him whether the army at the gates might call itself Vandal, or Prussian, or American, or Chinese. We have, perhaps, no great right to throw up our hands and eyes, while all the representatives of Christendom are dawdling away moments that pass heavy with deaths, and exclaim, "What detestable wretches these Chinese are!" Yet the descriptions of the present doings of these Chinamen must not be passed entirely without notice. Perhaps they scarcely exceed in extent, and not very greatly even in degree, what is being done by other civilised belligerents; but they have this peculiarity, that Englishmen are in some respects mixed up with the parties who are thus emulating each other in atrocity, and that the victims and the abettors are sometimes men of our own kith and kin.

The *Firefly*, in which the four Europeans who are now discovered to have been roasted to death were found, was surprised at night by a party of "foreigners" in the service of the Taipings. The "foreigners" carried the steamer up through the intricate and narrow channels that lead to the Imperial Canal, and the prisoners were landed and handed over to the leader of the Taiping banditti. Here, at the foot of a pagoda, these unhappy men were bound with sharp bamboo thongs, and slowly burnt to death, their charred bodies being cast into the earth, where the fragments were found by Major Gordon as he passed by the place, acting in the service of a Chinese master. The steamer was afterwards overtaken and destroyed by the Imperialist soldiers, but not until the Taipings had removed her machinery to a place of safety, where, by the aid of the "engineer officers" in their employ, they propose to make it available for another hull. These facts have a startling significance apart from the distressing circumstances of the death of the four Europeans. They show that the civil war in China has arrived now at that stage which was expected and dreaded by our Government, and that Europeans are actually fighting against Europeans in these inhuman and demoralising contests. There is Major Gordon, a British officer of high character, marching in the pay of a Chinese Satrap, who had already made him the unwilling agent of a most sanguinary perfidy. There is Colonel Cooke, who is not, we believe, a British officer, but who seems to be a skilful soldier, and who is employed in the same mercenary manner. Opposed to them there are "foreigners" capable of surprising and managing a war steamer, and "engineer officers" capable of adapting machinery to the hull of a sailing vessel. These are the active leaders on both sides in a war carried on with episodes in which the inhabitants of cities are massacred and prisoners tortured to death. Who the Europeans are who have taken service with the Taipings we do not know; but we do know that Major Gordon is a man of unsullied reputation for truth and humanity, and it is greatly to be regretted that such a man should be found serving under such conditions in a war which has assumed a completely Asiatic phase. The uncouth names which appear in our correspondent's communication give little intimation of the character of the district which is rendered desolate by this civil war. The great country where millions are starving and where, as is affirmed on respectable authority, dried human flesh is offered for sale as food, is or was the garden of China. The cities which are now solitudes, so ruined that an army passes through them to encamp beyond, because they cannot supply quarters for the troops, were the great historic cities of the old civilisation. All that the Chinese had of art and excellence was to be found in Soochow and Hangchow, and the best and happiest populations of China lived and laboured in the silk

Digitized by Google

districts around. Hangchow, which was the ancient capital of China, was in modern times the storehouse and the mart for the produce of their plains of mulberry-trees and garden-grounds. In the caves and grottoes of the neighbouring limestone hills the fantastic superstitions which have grown parasitically upon the Chinese State philosophy had their shrines, their temples, and their great gilded gods. There is not much worth studying in Chinese art, where grotesqueness takes the place of beauty, and where wasted ingenuity and objectless labour only create a feeling which ought not to be a pleasure; nor is there any very worthy subject of inquiry in the various Chinese religions, which are but different husks of a philosophy not new to the West; but whatever there was of art, literature, and religion was to be found here, where everything that had life is now fainting or raging in the agony of death, and where everything that had the mark of industry is being trampled into desolation. We are not about to call Europe to the rescue. It is too great a matter for us to meddle with to any good effect. The only chance we had of doing good was that of interposing a strong European contingent, acting with direct authority from the Imperial Government. This has failed, and all we can now do is to withdraw our officers, to leave the Chinese to their own devices, and to spare them the aggravation of European assistance and ourselves the disgrace of any part or lot in this bad matter.

We must not, however, overrate the importance even of events so shocking to our human feelings as these are. We will hope that when our correspondent writes that "the little flesh that can be cut from the emaciated bodies of the dead is eagerly taken for food by the miserable survivors," he but repeats an exaggeration of a sufficiently terrible reality. But, even it this were literally true, the authorities at Peking would probably hear the news with great philosophy. They would reflect that the destruction of a few cities and a few millions of lives and of a few hundreds of square miles of cultivation can have no material influence upon the political influence of the great Empire of China. We are apt to forget that China is as large as Europe, and do not remember that it is as possible that the destruction of a province may be a matter of indifference at Peking as it is possible that the burning of a European city may be a cause of joy at Berlin, or the desolation of a district may be a triumph at St. Petersburg. China is large enough to endure a great deal of this without becoming so marrowless as to fail in the purposes of European commerce. Our only duty is to defend ourselves in the exercise of our lawful avocations in China, and to discourage the interference of foreigners in the quarrels of the natives. We have done what we could to stop this carnage; but apart from suggestions of humanity, the tendency of these civil convulsions is to increase the power and influence of the Western nations. Shanghai has already risen if not to the rank, yet to the position of a free, independent city. It shelters a million and a half of Chinamen who have brought their capital, their industry, and their skill there, and will not be tempted away. It has a municipal Government, that collects a revenue and employs an armed force which, although now embodied under the modest name of police, may be readily made efficient to the defence of the place against assailants from without as well as against disturbers within. The Consular Courts are gradually acquiring the sanctions necessary to authorize them to deal justice throughout the city. Shanghai is now practically independent of Peking except in the matter of Customs' dues. In the unexampled rise of this enormous settlement we may, perhaps, read the future history of the relations of the West with China. There are other places almost as convenient for purposes of trade as Shanghai. There are other points where a commercial settlement will be flocked to by the Chinese as to a city of refuge, where population and trade will collect wealth, and where wealth will be able to hire guards. The Chiefs both of the Imperial and the rebel party are by every excess they commit driving their people and our people to combine for a mutual protection. They are thus bringing about a cohesion we never could have ourselves accomplished, and are raising upon the vantage points throughout the Empire settlements which will be stronger than military posts, and much more durable than military conquests.

THE INDIA AND CHINA BANK MONOPOLY.

(To the Editor of the *Morning Post.*)

SIR,—To those who have closely watched the prevailing public excitement in favour of investments in shares of the old and new joint-stock banks, it must have appeared somewhat singular that, whilst almost every section of the globe, and nearly every corner of the United Kingdom, have been ransacked and pitched upon for the formation of new banks, British India, one of the richest fields for banking in the world, should have been comparatively neglected. And yet this circumstance, so pregnant with meaning, may perhaps be accounted for. Although apparently secure in the enjoyment of their monopoly, the directors of the existing Indian exchange banks have striven to the utmost of their power, and with a zeal and devotion worthy of a better cause, to divert public attention from their own lucrative field of operations. Witness, for instance, the number of banks and other companies connected with North America, South America, Australasia, the continent of Europe, and Scotland, which Mr. William Walter Cargill, M.P., and Mr. Harry George Gordon, of the Oriental Bank Corporation, have recently joined as directors. And who can doubt that their motive has simply been to divert public attention from British India, China, and the East? And who cannot but admire with what striking and signal success their consistent and determined, though ill-judged, policy has hitherto been pursued?—the result being that, with the exception of the Land Mortgage Bank (which, as its name implies, is not in reality a bank professing to transact exchange, discount, and remittance business, but a simple trust and loan association), there has not been, during the recent mania, a single new bank started in London for British India. That the same monopolising policy will continue to exclude home capitalists from this noble field of banking and exchange operations is, however, doubtful.

The wonderfully-successful progress within the last 10 years of the Indian exchange banks, which are all constituted on the principle of "limited liability," would seem to indicate that there is ample room for the introduction of similar institutions. A glance at the salient features connected with some of them will prove the truth of this assertion, without fear of any contradiction from those parties who mistakenly consider themselves interested in opposing the introduction of additional banking capital into India.

The Oriental Corporation was the first Indian bank established in London, and it is well known that the directors, from the circumstance of the liability of the shareholders being then unlimited, had to contend with many difficulties for about 10 years, after which (in 1851), an amalgamation was brought about with the Bank of Ceylon, which was at the time not in a thriving state; but inasmuch as it was in possession of a Crown charter of incorporation conferring the (to an Indian bank) inestimable privilege of limited liability, and also that of issuing bank-notes, and carrying on business in the British colonies eastward of the Cape of Good Hope, the junction was eagerly sought for, and completed at the Treasury, under the able and clever management of Mr. Harry G. Gordon, the present chairman of the corporation. After the charter was thus obtained a career of extraordinary prosperity ensued, and has continued, to the vast benefit and great enrichment of the proprietors, to increase, in an almost uninterrupted and unprecedented manner, up to the present time. The dividend and bonus just announced amount, on a capital of £1,260,000, to 19 per cent. per annum, free of income-tax, and the reserve funds stands at the high figure of £252,000. The £25 shares command the high price of £67, equal to 168 per cent. premium. The net profits were £193,178 and £248,919 in 1862 and 1863 respectively.

The history of the Agra and United Service Bank (Limited) is one of a not less wonderful character than that of the Oriental. Commencing at Agra in 1833, more like a small London loan society than anything else, the directors and managers have succeeded within the last few years to net, on a capital of £1,000,000, very large profits, as will be seen from the following returns, viz:—

In 1861	the net profits were			£160,000
„ 1862	„	„	„	173,815
„ 1863	„	„	„	242,909

The dividend for 1863 was at the rate of 18 per cent. per annum, free of tax, and the reserve fund now figures at £225,000, while the market value of the £50 shares is £150 per share, or 200 per cent. premium. The branches of this bank now extend over several of the principal ports and cities of India, China, and Australia; whilst at the same time, availing of a privilege which, with the exception of the Scinde Bank, they alone seem to possess, they are transacting a large and remunerative local business in London and Edinburgh, which will doubtless be greatly stimulated by the amalgamation with Messrs. Masterman, Peters, Mildred, and Co. Of a certainty, therefore, the progress of the Agra Bank—especially since the chief office was transferred to London in 1857—has been of a most remarkable, if not marvellous character, ranking as it now does amongst the noblest banking institutions of the country.

The Chartered Bank of India, Australia, and China does not lag much, if at all, behind its older competitors. The £20 shares in December, 1862, were selling at £19. Now they stand at £42 per share, or 110 per cent. premium, which is a wonderful rise within 18 months. The net profits during the last three years ending 31st December have been as follows:—

1861	£37,500
1862	70,792
1863	101,102

showing that their net earnings have been nearly trebled in three years. The reserve fund is £105,000, and the dividend for 1863, on a capital of £644,000, was 12½ per cent., free of tax. This bank commenced business in February, 1858, and has therefore only been seven years in working operation.

The Chartered Mercantile Bank of London, India, and China have, in 10 years, done equally well, the last dividend having been net 20 per cent. per annum on a capital of £500,000, and they have accumulated a reserve fund of £100,000. The £25 shares are selling at £70 per share, or 180 per cent. premium.

The Scinde, Punjaub, and Delhi Bank Corporation bids fair to become a prosperous concern, the shares (£7. 10s. paid up) being saleable at £12. 10s., equal to 66⅔ per cent. premium; and the Hindostan Bank shares (£25 paid) command £37. 10s., equal to 50 per cent. premium.

And yet, in the face of these extraordinary instances of great, unexampled, and still steadily increasing success, we are told, forsooth, that banking is likely to be overdone in British India. In reply to this insinuation of these would-be monopolists of Indian banking and exchange business, I would ask, how does it happen that the banks of Bengal and Bombay are at the present moment doubling their respective capital stocks? And it may also be suggested that, whilst native cultivators can afford to pay the shroffs, or native bankers, 5 per cent. per month, or 60 per cent. per annum, and still amass considerable wealth, that the field for the profitable and safe employment of banking capital in India is practically unlimited, and that Mr. Gordon and his brother monopolists, in combining to prevent the further introduction of British capital to aid in the development of her vast resources, are seriously damaging the interests, present and prospective, of their own shareholders, and proving themselves to be the worst enemies of our Indian empire. G. H.

April 16, 1864.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).

The second ordinary meeting of proprietors was held at the London Tavern, on the 2nd May, to receive the report of the directors and declare a dividend; Mr. J. N. Daniell in the chair.

The CHAIRMAN said it was very satisfactory to the directors to present, and he hoped it would be equally so to the shareholders to receive, the accounts now placed in their hands. Although their working had been for twelve months, it had been only in a homœopathic degree from the commencement, first because their capital had been only paid up in small portions from three months to three months; and, secondly, because it was necessary to organise the establishment in India, and to find and send out properly qualified persons to work it. The consequence was that the bank could scarcely be said to have been in operation more than six months, and under those circumstances he thought a dividend at the rate of 5 per cent. was satisfactory. As the capital was paid up and they became in a

Digitized by Google

position to carry on operations the business had progressed rapidly. Since the 31st Dec. it had increased largely, and they were now as fully established as if they were a bank of four or five years' standing. They had acquired as good a position in India as any bank there, and all their transactions were carried on at the same rates as those of the oldest and most favoured banks in that country. The expenses at head office and branches, for salaries, direction, travelling expenses, stamps, rent, &c., £19,376, would appear to the shareholders, as it had at first to the directors, a very large sum. (Hear, hear.) But it was to be borne in mind that they had had to form their establishment in India, and to secure the services of persons duly qualified they had to pay heavily, though not so heavily as some of the older banks. Rent, too, was very high in India, and all the other expenses necessary in forming such an institution were great, and, having closely gone into the matter, the directors were satisfied that every economy consistent with efficiency had been exercised. They had now an establishment in full working order, capable of carrying on without extra cost a much larger business than was represented in the present accounts; that larger business was flowing in, and he had no doubt that at the next meeting they would be enabled to show a much more favourable result. It would not do for them to go to inferior places, or to employ inferior people; they had to make themselves known, and make their position, which he believed they had done. In conclusion, he moved the adoption of the report.

Mr. SPOONER seconded the motion.

In reply to questions,

The CHAIRMAN stated that the shares still in hand would be disposed of at the most favourable moment, and the premium, whatever it might be, would be carried to the reserve fund, for the benefit of the company. There was an arrangement that they should be issued at £2 premium; but the shareholders might rest assured that by means which he excused himself from explaining more particularly, a larger amount than £2 a share would be carried to the credit of the company. The bank premises were not freehold, but held on a sixty-five years' lease. They stood in the accounts at £9,000, but they were worth £20,000. They had been offered £18,000 for them. He believed before long they would be found too small for the business of the bank, and in that case would be disposed of at considerable profit.

The report was adopted unanimously. The dividend at the rate 15s. a share, payable on the 5th of May, was confirmed.

The resolutions and report will be found in another column.

RECEPTION OF THE JAPANESE AMBASSADORS.

PARIS, Wednesday Morning.

The Emperor received the Japanese Ambassadors yesterday.

In reply to their speech, his Majesty said:—"I am grateful to the Tycoon for having felt the necessity of giving explanations as to the difficulties attending the execution of the treaty, and also as regards the attack upon a French officer. I sincerely desire to see an extension of our relations. For this end the Japanese Government must, before all, cause international laws to be respected, and be convinced of the understanding between the European Powers to defend their honour and interests in distant countries."

THE JAPANESE AMBASSADORS IN PARIS.

We gave in our last some particulars of the Japanese Ambassadors in Paris. We now add some items which have appeared in Paris papers:—

As we have the Japanese Ambassadors here, we are naturally interested in knowing any details of their private life. It is, therefore, with singular pleasure that I announce to you that to the numerous habits of civilisation which travellers have discovered among them, the fighting of duels may now be added. They fight, however, after a fashion of their own, but one more deadly than ever was devised by the unkindest second, who put up his own man, or allowed the other side to stand, in a furrow or against a tree. When two Japanese quarrel—as two of the staff did at Marseilles last Monday—they put two papers, on which are inscribed "life" and "death," into a hat, and draw lots. The one who draws the latter fatal word goes home and shoots himself, without benefit of docter or second. This, indeed, is duelling *a outrance!* Why, one had better have gone out with Ross, who used to kill swallows with a pistol ball, or have taken your chance at twelve paces in front of the modern Mahon, Carysfort. Happily, last Monday the chiefs of the mission detected and forbade this duel before the paper had been drawn from the fatal hat.

Apropos of strangers, should you like to know the names of the Japanese Ambassadors? As a specimen of spelling, their nomenclature is not without interest. Ykedachi-Knigo-no-Kami is the leader of the band, and I am assured, by one who "knew him at home," that he is a charming diplomatist. Then comes "numero-deux," Kowadsu-Idsuns-Kami, who is second in command; and then—I really think I must borrow the phraseology of the late Mr. Tattersall—"Lot 3 is Kowada-Sagamino-Kami, in perfect training, and likely to make a good ambassador." I will not add my old friend's other question—"What will any gentleman give for him?"—because the price of foreign ambassadors, at least those from afar, is never settled till they themselves have been through the mill, or, to speak more diplomatically, have "had their worth tested by society." An admirable test, doubtless, but who shall judge the judges? A friend of mine, meeting some of the darkies to-day on the stairs of the Grand Hotel, saluted them in their native tongue, and the effect was a sort of panic. They detected "agents of public security" from Jedo, and were taken with alarm accordingly. You see their mission is not nearly such good fun as that of the happy assistants at the polite "Conference" now sitting in Whitehall. Should nothing come of that assembly round a green-baize table, the assembled Ministers having been to Court, dined with the Premier, assisted at the "Derby," dined again at Greenwich, and passed two months of great enjoyment, will, nevertheless, return, and, having announced to their respective Governments that their mission is a failure, will be "decorated" and dismissed to their pleasant homes. Not so my friends of the "Premier," of the Grand Hotel, "with five windows looking on the Boulevards"—I quote the bills. If they fail in their mission, they will be sent up the country, to make what the Americans call "pants" out of black silk—that is, the hemp-picking of Japan—and if they succeed they will be asked to kill themselves off at once, to save trouble, for fear they should tell in Japan that France and England are not perfectly barbarous. When I meet, while calling on my friends at the Grand Hotel—I have one now far beyond human "attendance," he is, I think, "1,109" au sixième—a Japanese on the stairs, I think of the future of his mission. I saw Lord Clarendon coming out of the Bristol the other day, and felt no alarm; but the Oriental, I picture him to myself failing utterly and becoming a tailor, or succeeding, being obliged to kill himself to save the hangman from unpleasant interference.

One of the members of the Japanese embassy died at Marseilles. The ambassadors, on receiving information of this incident, sent instructions that the hair of deceased should be cut off and brought to them; that no priest should accompany the funeral, that an ordinary coffin should be used, and be enveloped in fine linen before inhumation. They also ordered the site for the tomb to be purchased in perpetuity, and announced their intention of shortly forwarding the model of the mausoleum to be erected.

THE ARMSTRONG GUNS IN JAPAN.

(To the Editor of the *Army and Navy Gazette.*)

SIR,—You have been so considerate as to suggest, in your last number, that it is probable I have something to say upon the reports concerning the Armstrong guns at Kagosima. I will refer in the first place to the following passage from a letter written by Captain Hunter, now commander, and previously gunnery lieutenant, of the flag-ship *Euryalus*, dated Yokohama, February 18, 1864. This letter has found its way to me within the last few days by chance only, for I have not the honour of any acquaintance with Captain Hunter or his friends. Alluding to the 110-pounder guns, Captain Hunter writes as follows:—"My opinion, and also that of the gunnery lieutenant, is, that for long range they are most successful. The 100-pounder as a pivot gun is superior to the 95 cwt. solid 8-inch gun, but as broadside guns between decks we do not like them; the smoke is too great. Rear chock carriages with such heavy guns are very slow in working, and the decks dreadfully cut up. The common shell is one of its great efficiencies, the bursting charge is so great. At Kagosima one vent-piece of the pivot gun broke, and a piece went up to foreyard, but no one was hurt, and it was the fault of the captain of the gun not putting the tin cup in. If the gun is understood, and worked properly, it is very successful. The 40-pounders we found answer exceedingly well, for, coming out of the place, we planted common shell with pillar fuzees wherever we wished a range of 3,800 yards. Five steel vent-pieces broke, but another replaced them immediately, and no harm was done. These guns work very easily, are very true, and the drill is very simple." It will be observed that Captain Hunter satisfactorily explains the only instance throughout the squadron of the failure of a 110-pounder vent-piece. He tells us that the captain of the gun forgot to insert the tin cup. I need hardly say that such an omission is evidence of very imperfect training, for, when the men are sufficiently drilled, every act necessary to be performed in the use of the gun becomes a matter of habit, and not one of recollection. As to the injuries sustained by one of the 110-pounder carriages, and referred to in the official reports, it will be apparent that such injuries have nothing whatever to do with the gun. In fact, the report states that "the carriage was an old one (having been originally fited for a 68-pounder), and would probably have suffered nearly as much had a smooth-bored gun been fired from it at the same elevations." Captain Hunter objects to the rear chock carriages used with these guns as broadsides guns; but this again has nothing to do with the merit of the gun. I have never recommended, nor even countenanced, the use of the 110-pounder gun upon a rear chock carriage. The recognised practice is to mount such guns upon the regular naval slide carriage fitted with the usual compressors, and the decks are sure to be cut up where this practice is departed from. Upon the subject of the jamming of the 110-pounder vent-piece nothing is said either by Captain Hunter or in the official report from the flag-ship. The *Euryalus* carried five 110-pounders, but the casualty of jamming appears to have occurred to none of them. In the smaller vessels, which carried altogether three 110-pounders, we find by the official reports that this defect was experienced; yet, from the same source, it appears that on board the *Coquette* "the high-gauge tin cups [of the 100-pounder] did not fit, thereby causing unnecessary delay after every round, in having to wedge the vent-piece out. The high-gauge tin cups never fitted, and all the low-gauge cups were expended. The gun worked in every other way very satisfactorily." The cause of the jamming of the vent-pieces in the smaller vessels seems thus revealed, and shown to be an error of supply, and not the fault of the gun. The only other defect of the 110-pounder mentioned in the official reports is communicated by Captain Boxer, of the *Racehorse*, who finds more serious fault with the gun than any other officer of the squadron. Not only does he complain of the jamming of the vent-piece, but he also says:—"Great difficulty was found in getting the 110-pounder to go off from the quantity of rain falling, which so thoroughly wetted the vent-piece and ran into the interior of the chamber that it was found necessary to unload the gun three times to replace the cartridges which had got wet." It is difficult to conceive why Captain Boxer's gun should have exhibited a liability in regard to rain from which every other gun of the squadron appears to have been exempt, although all were exposed to the same conditions of weather. Captain Boxer's complaint of the gun missing fire requires no notice. He can scarcely intend to suggest that it missed fire because it was an Armstrong gun. If he omitted such obvious precautions as were necessary to keep the carriages dry no further explanation is needed of the guns missing fire. You are aware, Sir, that I have always admitted that the 110-pounder is the least satisfactory of my guns. The difficulties of breech-loading increase with the size of the gun, and it is doubtful whether the vent-piece and screw arrangement can be made as successful for the 110-pounder gun as for the smaller natures. I maintain, however, in accordance with Captain Hunter, that "if the gun is understood, and worked properly, it is very successful."—I am, &c.

Shoeburyness, April 27. W. G. ARMSTRONG.

LONDON, FRIDAY, MAY 6, 1864.

TRADE IN CHINA.

THE commercial reports from Her MAJESTY'S Consuls in China, for the year 1862, have been presented to Parliament, and embrace some interesting details on the trade of the empire, and on the commercial capabilities of the several Consular districts, with remarks thereon by Sir F. BRUCE.

TIEN-TSIN.—The imports carried on under foreign flags at this port in 1862 were goods of the value of £2,215,946, in eighty-seven vessels, of 21,921 tons. The exports, £155,643 in the same vessels. The duties collected were £28,802. The principal imports were British and American cotton and woollen goods, metals, window glass, watches and clocks, opera glasses, and opium. The report of Mr. Acting Consul GIBSON on the trade of this port is a most full and interesting one. He tells us that small steamers, nearly all of which hoist British colours, are now chiefly employed, and prove by far the most convenient class of vessels for the local traffic. The city of Tien-tsin stands about sixty-five miles from the village of Taku, upon a river which, owing to its insignificant depth of water and tortuous course, is extremely difficult of navigation. At the mouth of this river (Peiho) there is a bar which renders it unsafe for vessels drawing more than eleven feet six inches of water to enter the Taku anchorage; while outside in the Gulf the weather is often so boisterous and the swell so high that vessels cannot discharge their cargo for several days together. The convenience, therefore, of a class of vessels able not only to clear the bar but to carry their cargoes right up this sixty-five miles of river navigation, to the very gates of the merchants' godowns, is very great. Two such vessels have run regularly this year between Tien-tsin and Shanghai, and several others have made occasional trips at moderate intervals. The foreign goods which arrive here are mostly re-exports sent up from Shanghai. The vessels which trade at Tien-tsin are, therefore, in most cases engaged in a coast trade; probably not more than one or two vessels arrive here in the whole course of the year from Europe, India, or America direct. A few vessels, it is true, enter and clear from this port for Hong Kong direct; but these constitute the only exceptions. There is another circumstance to be noted with reference to the character of the shipping at Tien-tsin. Not only are the great majority of the vessels which enter this port employed in a purely coast trade, but a very large number of these vessels, though foreign-built, foreign-owned, and navigated under a foreign flag, are engaged in carrying native not foreign produce. The produce of Southern China is transported largely to the North in foreign bottoms, and, conversely, the products of Northern China are largely transported to the South in foreign bottoms. Thus foreign vessels are not restricted to the carrying trade in foreign products and manufactures; they are, under certain tariff regulations, which will be more particularly referred to hereafter, permitted to participate in the carrying trade in native produce. This privilege freely accorded by the Government of China, is of high and increasing value. The junks are gradually disappearing from the highways of commerce. The more enlightened Chinese merchants no longer patronise them. A south-country junk makes but one voyage to Tien-tsin in the course of a whole year; the cargo cannot be insured, and the chances of her going to the bottom in bad weather as compared with the chances against a foreign vessel under like circumstances are great. Native merchants are now perfectly well aware of the enormous disadvantages involved in the employment of junks, and rarely entrust valuable cargoes to them when foreign shipping can be procured. Thus the competition of foreign vessels, coupled with the operations of the insurance offices, is rapidly driving the junk off the face of the ocean. The trade in British woollens, the Consul tells us, makes no progress. The quantity of opium consumed in the city of Tien-tsin, judging by the number of smoking houses, must be enormous. A good deal is made about Shensi, but this native opium requires to be mixed with the stronger Indian drug to render it palatable to the Chinese consumer. 3,613 chests of Indian opium were imported here in 1862. The domestic trade of this district in home cotton manufactures is still considerable. The foreign cottons are cheaper than the native, look much better, and under certain circumstances are even more profitable; but the latter nevertheless are still extensively used. I have now before me (writes the Consul) samples of native cottons of the following sorts:—A white fabric, one foot two inches, English, in width; its retail price 1½d. a foot; a blue cotton, one foot two inches in width, price 1¾d. a foot; and a very coarse white cotton, one foot three inches, English, in width, price 1¼d. a foot. When the difference in width is taken into account, the foreign cottons are about one-half cheaper than the native; but native cottons wear better, and are, therefore, still generally preferred by the country people whose avocations are of a rougher description than those of the town population. Thus two yards of foreign cotton can be purchased for, say 9d.; and will go as far towards making a jacket as three and a-half yards of native cotton, which, assuming the quality to be equally good, will cost about 1s. 3d.; but a jacket of the latter will wear twice as long under bad treatment as a jacket made of the former. Since foreign cotton became so common among the people of this district, a vast number of dye-works have been established. In these dye-houses the white and unbleached cottons of Manchester are dyed light blue or black. Nearly the whole population, male and female, belonging to the middle and lower orders living in towns, wear these home-dyed foreign cottons. Unbleached and pale ash-coloured cottons are universally put on for mourning. The quantity of foreign printed goods used in upholstery within this district must also be enormous. The domestic trade in woollens is limited. Russian cloth is a good deal employed in upholstery. English cloth, blue and grey, is worn in the shape of jackets by such people as can afford to buy it. In winter these jackets are lined with fur. As padded cotton jackets are equally worn in winter, and a great deal less expensive, woollen ones are rarely purchased by poor people. Wealthy persons prefer to wear the beautiful native silks. The salt trade is strictly a Government monopoly, and sells after paying duty at 6d. a lb., for abominably coarse and dirty stuff. It is to be regretted, therefore, that British salt cannot be brought into competition. The tariff regulations applicable to the coast trade in native produce carried on by foreign merchants are just and moderate. The rate fixed is a duty of 5 per cent. *ad valorem* at the port of shipment, and a further 2½ per cent. at the port of discharge. Foreign ships and merchants are permitted, under these very moderate conditions, to participate in the native trade of China. The duties fixed by the tariff are fairly levied, and no reasonable complaint can exist under this head. The 2½ per cent. transit duty, however, on goods entered for an inland market has been the cause of some irregularity, but it is only fair to state that every effort has been made by the Superintendent of Customs, and with a large measure of success, to set the matter right. Mr. GIBSON says there is no doubt but that excellent coal exists in several localities in the north of this province, and that even the mining he saw in force at Huens-hua-fu, prosecuted with a little more energy, would turn out great quantities of coal suitable for the use of steamers. The ordinary coal consumed by people in their houses, a hard shaley variety, is altogether unfit for steam purposes; but good steam-coal has been found both in the hills west of Peking and in the neighbourhood of Huens-hau-fu. The coal mines further eastwards, in the direction of Jehol, are reported to be productive; the quality of the coal is said to be good; it burns freely, being very bituminous, but throws off a great quantity of smoke, and is therefore not very well adapted for the use of steamers.

Digitized by Google

There is water carriage the whole way between the Jehol mines and Taku. The coal can be laid down at the latter place for seven or eight dollars a ton. In the absence of better, this coal would fetch at Taku ten or twelve dollars a ton.

NEW-CHWANG.—The first is by Mr. T. T. MEADOWS, Consul at New-chwang—a district which embraces the whole of Manchooria, as bounded by the Yellow Sea and the Chih-li Gulf on the south; by Corea on the south-east; by the Russian territories on the east and north; and by Mongolia on the west; and it also embraces the eastern portion of Mongolia. We cannot forbear quoting the very practical remarks which Mr. MEADOWS makes on the duties of the Consul in China:—

"In this country (he observes) Her Majesty's Consuls are charged with the exclusive civil and criminal jurisdiction over British subjects ashore and afloat, not only in their relations to each other, but to the Chinese populations, and to the subjects of other States settled at the ports. These duties, apart from the judicial labours which they directly cause, bring with them, on the English Consul at each port, a considerable amount of international discussion with the territorial authorities and with the Consular representatives of Occidental States, which cannot, in anything like a similar degree, come on Her Majesty's Consuls in countries where they exercise no judicial functions. The Consuls here do not and could not by any, the fullest and minutest, accounts of the past amount of shipping and of goods, increase the future amount of that shipping by a ton or of those goods by a bale. On the other hand, by sparing their powers for the prompt and full discharge of those other duties to which I have above referred; by striving to get justice done to their countrymen, and by taking care that they do justice to others; by seeing that they have the virtual enjoyment of their treaty rights; and by preserving and promoting, as much as possible, peaceable, if not friendly, relations between them and the people of the country,—the Consuls can really do something to increase British trade, by thus establishing and maintaining the conditions of peace, justice, and order under which alone trade can flourish. It is to such labours that I have had to devote myself since I came here, to open the Consular district by establishing the Consulate in May, 1861; and these labours, in an utterly strange region, and somewhat disorderly locality, have fully taxed my working strength from that time to this."

Mr. MEADOWS thinks that this port can compete with Nicholayevsk, at the mouth of the Amoor, as far as regards the introduction of foreign manufactures into the Sungari Valley. The Amoor is closed to navigation for seven months, and the Leaou for four and a-half, whilst this river, besides being perfectly free from ice for seven and a-half months, is remarkably easy of access. The navigation closes about the 10th or 15th of November. The great export of the port is pulse and pulse cake, and the oil expressed from them. In the season of 1861, 34 occidental vessels visited the port; in 1862, 86; and last year double that number was expected. The greater safety and cheapness of the transport by the foreign vessels cannot fail to add an impulse to the other causes of the colonisation of the Mongolian plains. The value of the imports in 1862 was estimated at 442,000 taels, amongst which shirtings and other cotton fabrics, opium, and rod iron are the principal. The exports were estimated at 335,642 taels.

CHE-FOO.—Sixty-nine British vessels, of 25,090 tons, imported merchandise of the value of £231,328, and exported goods of the value of £105,156. The number of vessels of all flags that entered the port in 1862 was 178.

HANKOW.—At this port Mr. Gingell (since deceased) tells us that foreign relations with the Chinese people and with the authorities continue on a favourable footing. The value of the trade of the port in 1862 reached £6,189,952, being an increase of £3,011,482 over 1861. The treasure imported was 3,417,894 taels, and of opium, 1,133 chests. The export of tea was 28,846,533 lbs. 1,462 vessels, of an aggregate of 290,536 tons, arrived and departed.

KIU-KIANG.—Mr. Consul Hughes states that he has been unable to obtain accurate statistics of the trade of the port, but furnishes some interesting information. The steamers and other vessels which arrive at Kiu-kiang from Shanghai, commonly, but by no means invariably, proceed to Hankow. American-built steamers are preferred; they carry cargo on deck, and therefore load and discharge with greater speed, facility, and safety. Paddle-wheel vessels are superior to screw-steamers for the navigation of the Yang-tze. The former make better way against the current; and, in the event of touching the ground, the reversing of the paddle-wheels is found to be more effective than that of the screw. About twenty steamers now ply regularly on the river, and the number this season will be probably much increased. The great staple of the export trade of Kiu-kiang is tea; the green tea coming from the Moyune (Woo-yuen) districts, distant, by water, about 280 miles; and the black tea from Ning-chow, distant, by water, about 250, by land, 90 miles. The following is an approximate estimate of the export for the year 1862:—Green, 14,373,933 lbs.; black, 7,757,560 lbs.; unprepared leaf, 530,400 lbs.; total, 22,661,893 lbs. Paper and china ware are the exports next in importance.

FOO-CHOW-FOO.—Mr. Sinclair reports that the arrivals at this port were 207 vessels, of 97,585 tons, bringing goods valued at £2,169,525. The exports, in 206 vessels, value £3,195,901. The duties collected, 1,381,770 taels.

AMOY.—Mr. Consul Pedder points out that the foreign vessels arriving at Amoy have decreased in the last three years, having fallen from 77,765 tons to 70,598; the British tonnage is about stationary, at 84,000 tons; but only a small portion of this tonnage can be said to be engaged specially in the trade of Amoy. The value of the imports in British vessels fell from $5,324,791 in 1860, to $3,592,000 in 1862; and the exports from $3,673,646 to $2,100,000. It is believed a large smuggling trade is done outside the port. The whole number of arrivals in 1862 were 484 vessels, measuring 154,417 tons.

SWATOW.—The entries of British shipping were 130 vessels with cargo, and 33 in ballast, total tonnage, 62,965. 85 vessels, other than British, entered the port. The value of the import trade in British vessels was $3,589,686; by other vessels, $1,829,362. The total exports were $3,143,960. Mr. G. W. Caine, the Consul, says:—A much larger quantity of ground was set apart at the end of the year for sugar plantations, which will in a year or two double the present export of sugar from hence. The total increase in the value of the trade in 1862 over 1861, was $1,689,023. The steady advance in the trade of this port, both in imports and exports, augurs well for its durability. Every year shows a large decrease in the junk trade at this port. The Chinese prefer chartering vessels which can make several voyages in the year, to the unwieldy junks which can travel only with a fair wind.

TAMSUY—FORMOSA.—Mr. G. C. Braune states that fifteen British vessels, of 2,746 tons, entered with goods valued at $273,765, and sixteen vessels, of 3,036 tons, left with goods valued at $204,222. Twenty-seven foreign vessels, of 6,176 tons, entered, and the same number left, but the value of their cargoes could not be ascertained. Mr. Braune enters into some discursive remarks on the disputes which have arisen in conducting the camphor trade.

CANTON.—Mr. D. B. Robertson the Senior Consul in China, reports on the trade of this port, that the prospects are satisfactory in spite of the effect produced by the opening of the Yang tze river:—The import trade for 1862 was to the value of £2,412,515, a decline of half-a-million on the previous year's return. The cause of this is attributed to the deficient cotton supplies. Of opium there was an import of 3,913 piculs, against 1,363 in 1861. In tea the exports were 31,894,031 lbs., showing a decrease of 7,580,826 lbs. In raw silk there was an increased shipment of 357,396 lbs.; of thrown, 2,552 lbs.; and of coarse, 78,392 lbs. The export trade had increased in value in 1862 by half-a-million sterling. The shipping returns in 1862 were 723 vessels, of 253,146 tons; of these, 154 were in ballast.

There are no reports given for Shanghai and Ningpo.

TELEGRAPHIC COMMUICATION WITH INDIA.

The following telegram has been received at the India Office:—

"May 2, 1864.

"Colonel Stewart requests me to inform Sir Charles Wood that the cable was landed at Fao on the 29th of March. Its junction with the Turkish line was effected on the 8th of April. Telegraphic line between Irak and India is now completed—works nicely. Communication between Bussorah and Kurrachee takes place in five minutes. Two English steamers ply on the Tigris, a third one expected from Kurrachee to convey correspondence till completion of the Irak line. Persian line will be completed in July."

THE COLLINS' RUSSIAN OVERLAND TELEGRAPH *VIA* BEHRING STRAITS.

(*New York Herald.*)

WASHINGTON, April 7, 1864.

Mr. Collins has returned to Washington, after nearly two years' absence in Russia and England. Negotiations for right of way, and the construction of a telegraph across Asiatic Russia, Russian America, and British Columbia, so as to connect Europe with America by way of Behring Straits, having been brought to a satisfactory conclusion, under very favourable terms, now await the final action of Congress.

We understand that Mr. Collins will soon present the plan to Congress, in view of the co-operation of our Government.

It is due to Great Britain and Russia that their liberal grants and concessions in aid of a purely international work of this nature—an enterprise fraught with incalculable advantages to the United States and the world at large—should command promptly generous aid from us.

It certainly devolves upon our Government to second this great enterprise, and more especially now since Russia and Great Britain have met

Digitized by Google

he question in a liberal international spirit, and cleared it of all question as to right of way, so as to connect London and St. Petersburg with New York.

There never was an enterprise presented to the consideration of Government that pleaded more eloquently than this. It is the last link in a telegraphic chain that is to bind not only Europe and America, but Asia and Africa as well, in one living and speaking unity.

From BATAVIA.—At FALMOUTH: Fredrika. At CHANNEL: Ceres.

From PENANG.—At LONDON: Nipisiquit, Rockliff, and Edinburgh Castle. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

The advices from the East received by last mail are favourable to shipowners. In China the amount of tonnage is large, but there is abundant employment in the country trade. At Manila and Batavia there is quite a dearth of British shipping. Homeward charters are being obtained here from Maulmain and Java. In outward freights there is no improvement to report, as the tonnage on the different berths is still large, and there is but little doing in export business. The demand for coal ships for China is slacker, several charters having been recently entered into.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42, and £1. 18s. For Shanghai: £52, and £3. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £30. and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight in the Sydney Eggers and Sovereign of India for the following Government stores from Woolwich to Hong Kong, viz.:—66 tons shot and shells in boxes, and 249 tons loose shells, 5 tons combustibles, 99 tons gunpowder, and 39 tons light measurement stores.

CASUALTIES.

LIVERPOOL, April 26.—The Hoang-Ho, of this port, Carrington, from the Clyde to Singapore, with a general cargo, which put in here April 11, after getting on shore on the Saltees in the night of the 7th, had been making twelve inches of water per hour, after coming off the reef on the morning of the 8th, and a portion of her main keel forward was found broken; the cargo has been discharged apparently in good order.

Digitized by Google

ST. HELENA, March 29.—The Orion (schr.) arrived here from Macao, reports having been boarded and overhauled by an armed screw steamer, March 13, in lat. 34 S., long. 15 E.

CAPETOWN, March 21.—The Sappho of Greenock, Hildreth, master, from Shanghai for London, with a cargo of tea, got on shore on the beach while entering Table Bay, March 15, and became a total wreck; all hands saved by the lifeboat. The wreck has been sold, with her cargo, for £545.

The Confederate steamer Alabama, three months from Singapore, arrived in Table Bay March 20.

The Herman, Bart, from Amsterdam, for Padang, put into Portsmouth April 27, with master dead.

The Promise, English steamer, from New York for China, put into Rio Janeiro March 21, with loss of foremast.

OFF ASCENSION.—March 28, Maria Louise Antoinette, from Java.

OFF ST. HELENA.—March 26, Pak Wan, from Foo-chow-Foo.

AT ST. HELENA.—March 11, Montmorency, Maxwell, from Shanghai, and sailed for Liverpool; 14, Taffarette, Dereix, from Canton, and sailed for Havre; Atlantic, Sherman, from Singapore, and sailed for New Bedford; 16, Etoile, Lachaud, from Penang, and sailed, 21, for Belle Isle; Juno, Nicolai, from Banjoewangie, and sailed for Amsterdam; 19, Rockliff, Drew, from Penang, and sailed, 20, for London; Isaac da Costa, Klein, from Tjilatjap, and sailed. 20, for Rotterdam; 20, St. Michel, Fradin, from Singapore; 21, Emma, Arentzen, from Singapore, and sailed for Copenhagen; 22, Doelwyk, Hoffman, from Batavia, and sailed 23, for Rotterdam; 23, Orion, schooner, from Macao, and sailed for Hamburg; 24, Ridderkerk, Teerlink, from Batavia, and sailed, 26, for Rotterdam; Helvetien, Boyson, from Manila, and sailed, 26, for Falmouth; 25, Spanker, Candlish, from Singapore and sailed, 26, for Liverpool; 27, Castilian, Pike, from Manila, and sailed, 28, for New York; 28, Thetis, Rhodin, from Shanghai, and sailed, 29, for New York; 29, Dolphin, Gollards, from Hong Kong, and sailed for Liverpool.

At TABLE BAY.—Feb. 24, Tun-sin (str.), Rowe, from London, and left, 29, for Mauritius and China; March 3, Margarita, Mas, from Manila, and sailed, 9, for Cadiz; 18, Gov. van Swieten, v. Fagg, from Kanagawa.

At NATAL.—Feb. 24, Robin, Gammon, sailed for China; March 4, Conrad, Claasen, for Singapore.

According to last advices H.M.S. Conqueror, for Japan, was still in Simon's Bay.

At MAURITIUS.—Mar. — Tun-sin (str.), Rowe, from London, and left, 19, for China.

Secretary—A. E. PELLY, Esq.

Temporary Offices—17, Brown's-buildings, Exchange, Liverpool.

PROSPECTUS.

The Eastern Exchange Bank (Limited) is formed to supply a want which has been long felt, and its value will be immediately recognised.

Although Liverpool enjoys an immense export and import trade, and is the port through which the valuable manufactures of Lancashire and Yorkshire pass, it has not a single Bank connected with the Mediterranean, the East Indies, China, or Australia.

The exports of British and Irish produce and manufactures to the above countries for the year 1863 amounted to about forty millions, and by far the greater portion was shipped from Liverpool, whilst the produce received in return into Liverpool was of a value of upwards of sixty millions, making a total of one hundred millions sterling.

Whilst London has upwards of fifty Banks, with branches in different countries, established for the purpose affording every facility in Exchange transactions, there is no Bank of this description, with its head-quarters in Liverpool, connected with the East.

The profitable nature of Exchange business is well known, and the practice which has become so general of attaching Bills of Lading to Bills of Exchange renders this the safest description of Banking business.

Some evidence of the safety and profitable character of the business is afforded by the present values of the undermentioned Banks, whose chief sources of profits are in connexion with Exchange operations.

	Paid up per Share.	Present Price.
Agra and United Service Bank	£50	... £145
Chartered Mercantile Bank of London, India, and China	25	... 70
Oriental Bank Corporation	25	... 69
Chartered Bank of India, Australia, and China	20	... 41
Bank of Australasia	40	... 74
Imperial Ottoman Bank	10	... 21
Bank of New South Wales	20	... 57

The Eastern Exchange Bank (Limited) will have its head-quarters in Liverpool. Branch Banks will be formed, in the first instance, at Alexandria, Bombay, Calcutta, China, and Australia, and as the business develops, at other places.

The Directors of the Eastern Exchange Bank will make arrangements for London business, constituting a first-class London Banking Agency on mutually advantageous terms.

The business of the Bank will chiefly consist in negotiating mercantile bills of exchange, granting drafts, in negotiating and collecting bills payable at places where the Bank has Branches or Agencies. It will issue circular notes and letters of credit, will undertake the purchase and sale of securities, the receipt of dividends, and effect remittances between the several places, including London, at which its Agencies and Branches will be established.

The Bank is founded under "The Companies Act, 1862," whereby the respective liability of each Shareholder is limited to the amount of his Shares.

There will be no fee for promotion; the remuneration of the Directors will be fixed by the Shareholders at each annual meeting; and the preliminary expenses will be confined to indispensable outlay.

The Articles of Association lie at the Office of the Solicitors for inspection.

Applications for Shares must be accompanied with a Banker's Receipt for £1 per Share.

In case the amount so paid should exceed £3 per Share on the number of Shares allotted, the surplus will be returned; but if it should fall short, the balance must be paid within seven days after notice of allotment, or in default, the allotment will be cancelled and the deposit forfeited.

If no allotment be made the deposit will be returned in full.

Applications for Shares may be sent through the Solicitors or Brokers of the Company, from whom Forms of Application may be had.

FORM OF APPLICATION FOR SHARES, TO BE RETAINED BY THE BANKERS.

EASTERN EXCHANGE BANK (Limited).

First Issue, 50,000 Shares.

To the Directors of The Eastern Exchange Bank (Limited).

Gentlemen,—Having paid to the Bankers of the above-named Company the sum of £ , I hereby request that you will allot me Shares in the said Company, and I agree to accept such shares or any smaller number that may be alloted to me, and to become a member of the Company; and I authorise you to place my name on the Register of Members in respect of the Shares to be allotted to me, and I agree to be bound by all the conditions and regulations contained in the Memorandum and Articles of Association of the Company. I further authorise you to forward by post to my address as below the Certificate for any Shares which may be allotted to me.

Dated this day of 1864.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK CO. execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The Dry Dock (opened in March, 1859) admits two Vessels at same time, being 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock, of larger dimensions, on the same premises, will next year be completed and available for the heaviest Screw-steamers.

There is extensive wharf, warehouse, and other accommodation adjoining, together with the usual conveniences for the discharge, re-fitting, and coaling of Vessels; also, Lathes and every appliance for the repair of Iron Steamers.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 25, Poultry, London, E.C.

WILLIAM CLOUGHTON, Managing Director.

New Harbour, Singapore, March, 1864.

The Bank negotiates and collects bills and grants drafts, payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route, terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted wit two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS.—All kinds of Fevers are most successfully treated by purifying the blood and invigorating the nerves. Holloway's Pills happily effect these two objects with celerity and certainty, they cool the system, relax the skin, and mitigate the thirst. They relieve the head, tranquillise the heart, and induce sleep. Their beneficial action is equally apparent in typhoid and inflammatory fevers, these pills extirpate that origin and root of all fevers—bad blood, and substitute for it a clean, renovating, health-generating fluid, in face of which no fever can exist. Holloway's incomparable Pills increase the appetite, and improve the digestion; therefore while repelling disease they are really restoring strength, giving tone to the nervous system, and energy to the mind.

Bankers.

THE BANK OF ENGLAND. | THE ALLIANCE BANK.

Solicitors—Messrs. FLUX and ARGLES.

General Manager—JOHN OUSELEY, Esq.

At the SECOND ORDINARY MEETING of the Shareholders in this Company, held at the London Tavern, Bishopsgate-street, on Monday, the 2nd of May, 1864, the following report was presented:—

SECOND REPORT OF THE DIRECTORS TO THE SHAREHOLDERS, MAY 2, 1864.

The Directors have the pleasure of presenting to the shareholders the accounts of the Bank for the year ending Dec. 31, 1863, duly audited.

The gross profits of the Bank amount to £36,662. 8s., from which, after deducting £7,458. 5s. 6d. paid as interest on current accounts and fixed deposits, and £19,376. 11s. 7d. on account of current expenses from the commencement of the Bank, there remains the sum of £9,827. 11s. 1d. as net profit.

In compliance with the terms of clause No. 121 of the Articles of Association, the Directors have written off £500 against preliminary expenses account. They recommend that £7,500 be applied to the payment of a dividend of 15s. per share, being at the rate of 5 per cent. per annum on the capital as from time to time received; and that £1,000 be added to the reserved fund, which, with the £2 per share premium on the new issue of shares, will amount to £21,000, leaving a balance of £827. 11s. 1d. to be carried forward to profit and loss new account.

The dividend, if approved by the shareholders, will be payable on or after the 5th of May, free of income-tax.

The Hong Kong Branch of the Bank was not opened for business until the 1st October, and the Shanghai Branch until December last.

The Directors have the satisfaction to announce that the general business of the Bank has made rapid progress, particularly within the last few months, and they look forward with confidence to the future.

The Directors who retire are Mr. Wm. Harrison, Mr. R. Spooner, and Mr. W. F. Baring, and being eligible for re-election, they offer themselves accordingly.

The Auditors, Mr. Jas. Goodson and Mr. F. W. Spooner, also retire, and being eligible, offer themselves for re-election.

J. N. DANIELL, Chairman.

We have examined and compared the accounts transmitted from the branches to the London office, and have traced the due acknowledgment of all bills and drafts, both out and home.

All vouchers for payment have been produced to us, and we have ascertained that the securities and monies of the Bank are in order as represented.

The balance-sheet and statement of accounts are correct. The books have been well kept, and the system of accounts is good.

F. W. SPOONER, } Auditors.
JAMES GOODSON, }

The Secretary having read the advertisement convening the meeting.

The seal of the Company was affixed to the register of transfers.

The Report and Statement of Accounts were taken as read.

The following Resolutions were moved, seconded, and carried unanimously:—

1. That the Report and Statement of Accounts of the Directors be received and adopted.
2. That a Dividend of 15s. per share be declared, payable on and after the 5th inst.
3. That the retiring Directors, Richard Spooner, Esq., William Frederick Baring, Esq., and William Harrison, Esq., to be re-elected.
4. That the retiring Auditors, James Goodson, Esq., and F. W. Spooner, Esq., be re-elected.
5. That the remuneration to the Auditors for their service during the past year be £50 each.
6. That the cordial thanks of the Meeting be given to the Chairman and Directors for their successful management.

J. N. DANIELL, Chairman.
J. OUSELEY, General Manager.

The French mail due here on the 5th inst. was received this day, as announced in our last issue.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Massilia, arrived May 11.—From Shanghai: Mr. Cobb. From Hong Kong: Mr. and Mrs. Parker, infant and servant, Mr. Thorne, Mrs. and two Misses Hunter, two children, and servant, Mr. and Mrs. Percival, three children, and five servants, Col. Neal, Messrs. Glover, D. Lapraik, Luce, and Cryder, Mrs. Stone, Captain Hall, Messrs. Jones, Flores, and Brinego. From Singapore: Mr. McLean. From Penang: Mr. and Mrs. Kuni, and three children.

To Southampton, per Delhi, expected to arrive May 17.—From Shanghai, Mr. Lewis. From Hong Kong: Mr. J. Bayley, Messrs. J. Scott, T. Bennett, H. Skey, and H. Fry. From Singapore: Mr. Cheever, Mr. Strath. To Gibraltar, from Hong Kong: Mr. Carasco.

By last Bombay mail, to Southampton, per Delta, arrived May 11.—From Hong Kong: The Lord Bishop of Victoria.

PASSENGERS OUTWARD.

Per P. and O. steamer Syria, from Southampton, May 4.—To Singapore: Mr. P. L. Blyth. To Hong Kong: Mr. H. D. Margesson, Mr. C. Smale. To Calcutta: Asst. Surg. W. D. Smythe, Mr. and Mrs. J. P. Casey, Mr. and Mrs. Bennett and infant, Mr. J. Pomeroy. To Madras: Ensign C. B. Cooke, Capt. E. G. Tremlett, Messrs. W. Boultbee and F. R. Ryan, Miss Alice Bayley. To Ceylon: Mr. W. Gaskell, Mr. Leechman, Mr. J. Bream, Mr. Moir, Miss Towell.

From Marseilles, May 12.—To Singapore: Mr. Paul Pickenpeck. To Penang: Mr. Jno. Lamb. To Shanghai: Admiral Steen Bille and Secretary. To Hong Kong: Mr. and Mrs. Neilson, Mr. Barnes Dallas. From Suez.—To Hong Kong: Mr. J. M. Borntraeger, Mr. G. Hubbe. To Calcutta: Capt. G. C. Ross. To Madras: Rev. W. G. Hooper. To Ceylon: Messrs. C. Tatham, John Brown, and C. H. Ledward.

Per P. and O. steamer Ceylon, 20th May, from Southampton.—To Singapore: Mr. and Mrs. Ricketts and child. To Hong Kong: Rev. W. A. Rutherford, Mr. Kilby. To Shanghai: Mr. F. Whitmore. From Marseilles, May 28.—To Singapore: Mr. and Mrs. von der Heyde. To Shanghai: Mr. Broadbent. To Hong Kong: Mr. F. Muselius.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Sir Rutherford Alcock, K.C.B., Her Majesty's Minister Plenipotentiary in Japan, accompanied by Lady Alcock and suite, arrived by the *Argus* from Nagasaki on the 2nd March, and has taken up his residence at Kanagawa for the present. His Excellency had been waited upon by some members of the Gorojio who, "we understand (says the *Commercial News*) hail with great satisfaction the return of a minister whom they have always distinguished by the highest marks of confidence and esteem." There was a report that his Excellency means to proceed soon to Yedo, and to reside there for a while. The French Imperial steamer *Semiramis* left on the 11th March, conveying Colonel Neale, the late Chargé d'Affaires, as far as Shanghai, on his way to England.

The following important intelligence had been current for some time at Kanagawa, for it was first mentioned about the 24th February, but up to as late a date as the 18th March, the matter still remained in doubt. It was scarcely credited that Tsiosiu would have so committed himself. The statement made was, that on the Japanese 12th month 24th day (Feb. 1st) Tsiosiu fired upon one of Satsuma's steamers (said to be the *Sir Charles Forbes*) in the Straits of Shimonoseki, killing forty officers and burning the steamer to the water's edge. Affairs at Miako are greatly complicated, owing to the troubles with Tsiosiu. The Daimio tries to exonerate himself from blame by relying upon Ongasawara's celebrated order for the expulsion of foreigners, an order which he contends has not been rescinded. Satsuma is greatly exasperated, and is preparing to punish him for his dastardly act. The Government, however, is not content to allow Satsuma all the honour of capturing the haughty Prince, so will probably join in the expedition. It is likely that the Princes of Etchizen, Tosa, and Sendai will be sent to capture Tsiosiu's territories, and make a free passage through the Straits for the Government.

Mats' daira Shiringaka, the old Prince of Echizen, who, though he has vacated the chieftainship in favour of his son, is yet a man of considerable influence, has presented the following memorial to the Emperor and the Tycoon :—

Western foreigners of the present day differ greatly from those of former times. They are much more enlightened and liberal. While other nations are united in bonds of friendly commerce, Japan, standing apart in her solitude, has not known the changes of heaven's course, and has lost the friendship of the world at large. There is no greater disgrace to our country than this. Hence, to shut up this country and drive out the barbarians were a positive evil. Moreover, there are five great and powerful continents, and if all Japan were united, it would be an unequal contest, to attempt to expel the barbarians. How much more when the country is not of one mind, would Japan be shivered to pieces like a roof-tile. Furthermore, treaties have been made, and if without cause on the part of the barbarians, we should attempt the expulsion, the most serious result would be that we could not keep our good faith inviolate. The now talked of expulsion of the barbarians is a notion of those who do not know them; and our country would be destroyed. Let us by commerce conform to this law of changes in the world, and Japan also will become wealthy. Besides, all this talk about sweeping barbarians from the country and shutting up Japan and confining our attention to the protection of our own sea-coast, is no way to promote the dignity of the empire. Although there is so much said at Kioto about driving out the barbarians, I don't think the Emperor really reckons on success in the attempt. It would be impossible unless we navigate the seas.

The so-called corrupt religion of the Western Ocean is a different thing from the Christianity of former times. Were Japan to adopt and practice it, I am of the opinion that no sects would arise to ruin or damage the country.

This, however, would depend upon the laws of our country. If the people of Japan become assimilated to the foreigners' manners, it must be because the government here is inferior to those of other countries.

Let us stand up by the side of the five countries, and like them build many large vessels of war, and here and there along our coast erect forts, and let us inaugurate a flourishing commerce by our own vessels—not giving our useful articles to other nations, but those we do not need. Let us transport American goods to England, and French goods to Russia, and selecting the best of these commodities for ourselves while we carry on this exchange of products, we shall naturally become a rich and powerful country in the midst of the seas.

When we have become strong enough to attack others, we shall have firmly established our own coast defences. As the power of the empire

Digitized by Google

becomes more and more confirmed, a friendly intercourse with other nations having been long established, destruction and overthrow cannot come upon us for ten thousand generations. If, perchance, good faith should be violated by another nation, the wrong would be theirs, and we could at once destroy them. Truly this would be a different affair to the expulsion of foreigners at the present time. This would not make all the Treaty Powers our enemies at the same moment. For, if one or two nations should violate their good faith, the enemy being small, it would be easy to destroy them.

Though these things are so, the Imperial Government is not administered upon this principle. There is but one aim there. Hating the Western barbarians, the Emperor regards them as brutes, and says, "Drive them out! Drive them out!" Though he regards them as brutes, they are, nevertheless, enlightened. At the present time, they firmly maintain friendly relations with each other, and it is clear that it is a great mistake to confound ancient with modern times. From the beginning mankind had not been unlike one another. If the views that prevailed at the capital were sound, Wan Hwang and Confucius were barbarians, and ought they not to have been exterminated?

Moreover, after all is said, the Tycoon's officers continued to hold friendly intercourse with foreigners, through fear of them. They were greatly scheming, and had no idea of opening commerce for the ben of the Japanese people. For this cause, the times have become what they are

And now, with all respect for the Imperial authority, I beg to say, that neither the views of the Celestial Court (the Emperor), nor the acts of the Tycoon, being in accordance with the principles of heaven, they have brought troubles upon us. To know these things, and not remonstrate against them, is not the part of a faithful servant of His Imperial Majesty. Saying this, I shall never change the opinions herein expressed, but as I value the lasting welfare of the empire, I shall persist in presenting these views, as a servant of His Majesty is in duty bound to do.

With all respect and reverence, I present my remonstrance against the loss of virtue on the part of the Celestial Dynasty and the Tycoon's Government, and if not listened to, I shall continue to do so while I live.

Here is the true representation of the opinions of one principality, and I have not persuaded any other prince to adopt and forward my views. But though one, two, or three other principalities have come to entertain these views, yet from the first the Imperial Government has been desirous to expel foreigners. Although I have on every occasion when at the Capital, presented these views, yet the Imperial Government has not embraced them. Now, the foregoing are opinions which one principality will hold till death. I purposed to go to the capital, but as the Commander-in-Chief (Shioongun) has returned from thence, I cannot but present this communication to his officers.

The present Prince of Echizen (the writer's son) was going to Yedo but is detained by a pain in his feet. Moreover, as I do not know when I shall go up to the capital (if the Tycoon says "to day," I am ready to-day, or whenever it may please him), and since my retainers are all in readiness, should there be any danger in the vicinity of the capital, I am determined to run to the ruts of the Emperor's cart-wheels,* and, therefore, I present this memorial.

The *Japan Herald* of the 18th March contrasts the present political condition of the Foreign Settlement with what it was twelve months since, when the Japanese Government had given official warning that it could not guarantee the residents against attack, and the English Admiral had stated that neither could he protect them. Our contemporary concludes:—"In such bright tranquillity are we now in this month of March, 1864, in Yokohama, that not one dull sound disturbs us; it is true a great portion of the British squadron still remains in our harbour, but at the present moment seems as innocent of mischief as a pet lamb. Business, it is true, in one of our great staple exports, silk, is unusually dull; but even as we write intelligence comes in of larger supplies, and that superior quality, beginning to arrive; whilst of our new staple of cotton extensive supplies continue almost to meet the increasing demand, amounting during this changeful period to upwards of 53,000 bales. No news has transpired of the conference at Kioto. At Yedo all is reported quiet; the Ronins having been effectually weeded out."

Now that the Japanese traders are tolerably sure the foreign relations of the country will continue unaltered and that peace will be maintained, they are likely to trade more actively than they did during the last half year. From some points of view it would appear that the last year has been one of progress, notwithstanding the undecided and threatening state of affairs which prevailed during the greater part of that period. The shipping certainly exhibits a decided improvement over that of the year 1862, the departures for that period being 97 vessels of 35,496 tons, against 168 vessels of 61,260 tons in 1863. The arrivals during 1863 were, according to nationality—British, 100 vessels, of 34,790 tons; American, 40 vessels of 21,102 tons; Dutch, 13 vessels, of 3,464 tons; Prussian, 8 vessels of 2,310 tons; French, 7 vessels of 2,156 tons; and 2 Russian vessels of 598 tons. The actual value of the trade done at the port during the eventful year of 1863, did, according to our own calculations, observes the *Commercial News*, exceed that of the previous year by, perhaps, from three to four million dollars. The values declared at the Custom House, however, show a marked decrease in the trade of the port during 1863, as compared with the previous year; but it is evident that these declarations of value are fictitious and unreliable. They give the average price of raw silk, raw cotton, and tea, at $210, $8, and $9 per picul, respectively; of shirtings at $2 per piece; and of wines, $1 per case! And in this way the total trade of the year amounts to $5,017,000 for exports; and to $1,600,000 for imports. These figures may certainly be doubled, and, perhaps, trebled for the approximate true value—the export of raw silk alone being equal to at least eight millions of dollars. The export of our new staple—raw cotton—amounted in 1863 to nearly 47,000 bales, against 4,616 bales in 1862. Metals, which were declared at a million and a quarter dollars in 1862, were comparatively neglected during the last year, and have not yet regained their former position in the market.

The new Hatoba was opened for traffic in the first week of March; and the local Government had also signified its willingness to grant a site for a hospital, and sites for engine-houses, as applied for by the foreign fire brigade. The following are the regulations for the Hatoba, as communicated to Mr. Consul Winchester:—

We have the honour to inform you in writing that the Hatoba and Examination-house will be opened on the 29th inst. for the examination of import and export goods, and the receiving of the duties thereon; for which the following rules have been established, viz.:—

Inward manifests, receipts of ships' papers, and other documents, may be delivered either at the Custom-house or at the new Examination-house, as such may be found most convenient.

N.B.—Permits for the clearing of vessels will be granted at the same place where formerly those for the entering were given.

2. The new Hatoba being smaller than the old one, the goods to be landed or shipped cannot be brought into the Examination-house before permits shall have been obtained.

3. No convenience can be made of both Hatobas for goods mentioned in one permit.

4. Permits for purchasing rice and corn, and for the shipment of articles for private use, will not be granted at the new Hatoba; these must be obtained at the Custom-house as heretofore.

N.B.—The shipment of goods will be granted at both Hatobas *ad libitum*.

We request that you will acquaint your countrymen with these regulations.

With respect and consideration,

OKUBO KUNO KAMI.
KOMAI DAIGAKU.

The 27th of the 1st month (8th March, 1864).

There had been amateur theatricals at the United Service Club, and the community had at hand another source of amusement in Professor Risley's Circus, the preparation of which was almost completed.

A subscription set on foot for the benefit of Joseph Corbett, the sole surviver of the ill-fated *Star of Peace*, reached the amount of $282½, of which £5 has been remitted to Corbett's wife; £54. 17s. 6d. had been vested in a bill in Corbett's favour—$250; which, with $23 paid to Corbett previous to his departure, and $9½ paid for his board, accounts for the whole sum.

An Englishman named Honeycombe had been found guilty by the Consular Court of plundering at the late fire at Messrs. Allmand's, and sentenced to nine months' imprisonment with hard labour at Kanagawa, or in the Colonial Gaol at Hong Kong, "as may be found convenient."

NAGASAKI.

From this port we hear of a brutal outrage committed on an Englishman, a Mr. Sutton, who has been so badly wounded that his life is in danger. A Japanese two-sworded official aimed a blow at his head, which he parried with his arm, and was severely cut in consequence.

YOKOHAMA.

The following is from the *Japan Herald* of March 12:—

We mentioned a few weeks since that we had found our article of July 25 on the trade of this port had been sent to his Government by the British Chargé d'Affaires, and by it had been thought worth the publishing in the Government *Gazette*, from whence it had been copied into the columns of *The Times*. We now find that it has been again copied from *The Times* into several of the most important of the provincial papers. Encouraged by this extensive recognition of the value of statistical remarks upon our trade, we purpose to take up the thread where we then dropped it, which we shall continue to do from time to time. We cannot permit the opportunity to pass without tendering to our commercial friends our acknowledgment for the ready liberality with which they al-

* The Emperor rides in a cart drawn by bullocks, and the phrase means "*run to the Imperial presence.*"

Digitized by Google

ways place open to us those documents and information without which those returns could not be made with any degree of confidence in their accuracy.

We will take up for review in the present number the two staple exports, silk and tea, leaving over our remarks upon the other principal staple, cotton, and the smaller exports, and also upon the import trade, for future issues.

The result of the silk trade for the last six months of 1863, or, as it is generally denominated, the first six months of the season 1863-1864, presents a striking contrast with the former six months. When we published our last review of the trade of this market, we were in hopes that, the political panic having blown over, business would resume its wonted course and go on swimmingly. The appearances of the season had been all that could be desired, and we therefore cherished reasonable expectations of an abundant crop and increased transactions for the future.

The month of July opened the season auspiciously. The new produce was coming down freely, and was readily bought up; the only remark that was made at the time was that the new Silk bore signs of having been reeled off less carefully than in former seasons, and of having been, as it were, hurried off to market, which circumstances were explained by the high prices which were then prevailing and which the dealers were eager to secure without loss of time.

In the beginning of August a report came from the Japanese dealers that the importation of Silk from the interior into Yokohama, was about to be considerably restricted. This rumour, although disbelieved at first, proved to be quite correct. At the latter end of the month the importation into Yokohama was strictly limited to 50 Japanese bales of 60 catties a day.

Strong complaints were forthwith made by the foreign houses to their Ministers and Consuls, and remonstrances were addressed by the latter to the Japanese Government; the native dealers themselves took also active measures to get this obnoxious restriction removed, but it was not till the end of September that the Japanese could be induced to withdraw their illegal interference. In the beginning of October the arrivals from the country were, to all appearance, as free and unrestricted as they had been in former times, but this improved state of things did not last long. Means of intimidation were resorted to at Yedo and other places in the country with a view to deter the native dealers from intercourse with the foreigners; threatening placards were posted up here and in the interior, and finally a good many native merchants were murdered for the sole reason of their having done business with the foreign houses at Yokohama. The native dealers of Yokohama could not but feel, or affect to feel, the results of these harsh measures; several of the largest firms shut up their establishments and left the place altogether. The arrivals of Silk became again less and less, and from the end of November to the expiry of the year, they may be said to have been virtually interrupted, the transactions of the months of December being limited to the existing stocks which were getting gradually exhausted.

Thus were upset the hopes which had been indulged of a flourishing business and extended transactions in Silk. The exports from the 18th July to the 31st December 1863 amounted to only 11,531 bales, against 14,480 bales in the corresponding six months of 1862, showing a diminution of 2,949 bales instead of an expected increase.

It is impossible not to see in the fluctuating and fitful state of the Silk trade during this six months the deliberate action and baneful interference of the Japanese Government. We must do our Ministers and Consuls the justice to say that they did all they possibly could do by energetic remonstrances and cogent representations to resist such glaring and repeated infringements of one of our most important treaty rights. But the Japanese authorities, opposing dilatory ways and a system of *vis inertiæ* to honest arguments, succeeded by slow steps, but sure, in working out an end which is by this time a mystery to no one.

Trade cannot flourish when it depends upon the stealthy and mysterious action of a Government which has once openly avowed its intention of driving us out of this place; and the *resume* of the commercial events of the last half year may be taken as a certain augury of future results, unless means be devised to put matters, once for all, on a satisfactory footing, in strict accordance with the provisions of the treaty.

Reviewing the course of the tea market, we have only to repeat our first six months' report, and to add that very little change in the quotations and stocks took place in the latter part of the year.

In January an advance of $1 to $2 was submitted to, prices then standing about thus: Common, $14 to 20; medium, $21 to 28; fine, $29 to 33. Business then began to fall away, and, notwithstanding that the teamen showed some inclination to submit to some decline, no great demand existing, but little business was done.

February and March.—Small business was done during these months, but principally for the American markets.

April.—In consequence of the disturbed aspect of political affairs, the Japanese merchants took alarm, and, eager to work them off, consented to very considerable reduction; indeed at this period the changes were so great and so frequent that quotations were not obtainable.

May and June.—These two months ended the season with a slight improvement in business; stocks light and appearing likely to continue so until confidence in political matters be restored.

July.—Political affairs and the change of the season have all induced great fluctuations in this commodity. During the panic amongst the Japanese the prices fell considerably, but early recovered upon small stocks and slow arrivals. Quotations were as follows:—Common, $8 to 16; good common, $16 to 18; fair to good, $19 to 22; fine, $23 to 26.

August.—Medium and fine teas again slightly advanced. Teamen were but little inclined to give way in their demands; prices standing:—Medium, $20 to 25; fine, $26 to 28.

September, October, November.—Business was rather easier during these three months, and very little change took place. Quotations were:—Good common, $13 to 18; medium, $19 to 24; fine, $24 to 28.

December.—Fair business was done early in this month, with a slight advance, viz., fine, $29 to 32, but became very slack during the last week, owing principally to the high rate of exchange and the Christmas festivities.

On comparing the prices ruling at the close of the year with those of the same period of 1862, we find a fall of $2.50 per picul on common kinds—of $1 upon fine kinds, and a rise of $2 per picul on medium kinds.

We refer to our standing tables for information as to the details of the past season's campaign.

CHINA.

TIEN-TSIN.

A correspondent's letter, of March 12th, to the *Journal of China* says:—

We have had a splendid winter here, with not a single drop of rain, and only two light falls of snow. There is no news of any importance since my last. Our Consul has been appointed Consul for the King of Denmark, and Mr. Mackay is appointed Inspector of Customs for Newchwang. He is to be relieved by one who is on his way here overland from Chefoo.

The navigation of the Peiho at Taku has been opened since the 16th of February last. Any steamers could have come in, discharged, and taken in cargo, there being no floating ice any where, the tides having been unusually high. This is important for the public.

From Newchwang, the report is dated 27th Feb.:—

The passing winter has been very mild, allowing the arrival of a large amount of produce. We understand the present high prices are owing to the producers holding upon their own account. Should we have but few arrivals in shipping, however, we may speedily expect more favourable rates, and freights, at the opening of the port, should rule rather high.

Our present stock of imports is not large, and the amount introduced into the interior and the Corea during the past season was but small, and, so soon as trade fairly recovers, we may expect a good demand, and, we hope, at very favourable rates.

The country, so far, has been perfectly tranquil—communications with all parts being open. The mandarins have been unusually active during the winter in keeping order.

After the closing of the port, a Rifle Volunteer corps was formed, the whole of the foreign community enrolling themselves as members.

The whole mass of ice upon the surface of the river now rises and falls a great many feet with the tides, and lanes are forming some miles from the bar. Our last was dated the 3rd ult., and business continued uncommonly dull until the China new year, when an improvement took place, both in im-

Digitized by Google

ports and exports; but we are sorry to say that the latter are far too dear to think of touching.

CHEFOO.

By the steamer *Island Queen* we have received advices from Chefoo to the 12th March. The weather mild and pleasant, and business improving. A good trade was looked for during the ensuing season. The programme and rules of a race meeting to be held in April does credit to the enterprise of the foreign residents. This is the first occasion on which races have been got up at Chefoo, and we congratulate the promoters on the length of the programme.

SHANGHAI.

The English mail of the 26th January, and the French mail of the 17th, arrived out on the 21st March. The dates are up to the 26th.

The attack on Mr. John Power Dore which we have already noticed, we regret to state, terminated fatally. At the inquest no clue was obtained as to the murderer. The shot was fired, accidentally or intentionally, from near a public-house in the settlement, and it would be well for the municipal authorities to cause all such houses to be removed from localities in the midst of the settlement. The lives of residents should not be exposed to the acts of rowdies in their drunken brawls. The deceased had a large number of horses, which were sold at the following prices:—Hadji 8,000 taels, Lawyer 1,600, Bravo 500, Smallhopes 100, Mandarin 400, Mrs. Gamp 450, Mr. Gamp 855, Sugarstick 150, and Honi Soit 575.

In addition to which there were also sold:—Waggonette and pair 1,100 taels, Whitechapel horse and harness 290, four wheeled dogcart and pair 410.

The following is in reference to the *Tsatlee*:—On Sunday morning the captain of the steamer *Tsatlee*, whose capture by pirates was reported in the *North China Herald* of the 12th inst., arrived in Shanghai, and made a statement as to the circumstances of the seizure. It would seem that on Monday the 7th inst. the engineer was found by the captain in a state of intoxication, and was accordingly ordered out of the steamer. He did not make his appearance during the remainder of the day. At about 1 A.M. on Tuesday morning the captain, who was lying asleep in his cabin, was awakened by finding a man standing over him, and holding him down, while another held a revolver to his head and threatened instant death if any noise were made. The captain remained still, and felt that the steamer was in motion. No difficulty could have been experienced in starting her, as she always lay with steam up, and merely moored to a buoy. The captain was kept a close prisoner until daylight of Tuesday, when his captors promised to release him and put him ashore so soon as they should arrive at a place sufficiently distant from Shanghai. This promise was not kept, and, accordingly, when, on Wednesday evening, the steamer arrived near Ka-shing-fu, the captain was still a prisoner, the mate having been compelled to steer. Ching had, meanwhile, seized the stockades outside Ka-shing. It was, therefore, rendered necessary to rush past his camp. A barricade had, however, been erected under water, and, in endeavouring to pass one of the stockades at full speed, the boat struck on this and remained fast. A European in the camp hailed her, and, not receiving any answer threw a line of boats across the creek behind her, so as to cut off her retreat. A strong body was then ordered on board. The crew now promised to release the captain on condition that he would represent them as a party of excursionists. This he promised to do, but when the Chinese officials made their appearance, he explained the entire affair. Ching, of course, immediately seized the steamer and the men. The former still remains in his hands, but the latter are, we understand, on their way to Shanghai. From what the captain overheard while on board, he gathered that a sum of 65,000 taels was to have been paid for the steamer on delivery to the rebel authorities at Ka-shing. The engineer and other men implicated in the active part of this transaction are tolerably well known to fame and the gaolors of the respective prisons in Shanghai. We trust to see them properly cared for on their arrival. The punishment of death may, under the American law, be awarded to four of them who claim American protection, while the Englishmen (also four in number) have rendered themselves liable to fine and imprisonment. We should be sorry to see the extreme penalty of the law inflicted on any of these men, who, after all, have been but tools in the hands of others; but, as a warning is much needed, we hope that the Consuls will exert the power vested in them in any manner short of actual capital punishment.

Our advices from Soochow extend to the 17th of March. We learn that Ching has pushed his works up to within three hundred yards of the wall of Ka-shing. On the 14th inst., Ching, after having made a practicable breach, advanced with his men in gallant style, but, owing to the shortcomings of the Futai's brother, Li-san-ta-jen, he found it impossible to enter. Li, it seems, had failed to provide bridges, as he had previously arranged to do, and it was, therefore, impossible to cross the creek which surrounds the city. It is said that at present there are three Wangs resident in Ka-shing, and that the wealth of the place is enormous. The walls are completely surrounded, ingress and egress being alike impossible.

From Ningpo we learn that a club is about to be started at that port. H.B.M. gun-boat *Cockchafer* has had a brush with pirates in the Chusan Archipelago. She left Ningpo on the 24th February, and after a short cruise discovered a French brig on shore. On going to the assistance of the latter, she found on board, besides the crew of the brig, a number of men taken off the *Ella Brache*, which had been wrecked on the Matelota reef. Having returned to Ningpo with these men, she started again, and on the 28th encountered three piratical junks, who opened fire as soon as the gun-boat hove in sight. After a smart engagement of about an hour's duration, the junks were obliged to give in. The prisoners (thirty-six in number) stated that some few months before they had seized two Portugues lorchas and a French brig laden with arms. When captured by the *Cockchafer*, two thousand bayonets, fifty-two swords, several stands of arms, and a large number of double-barrelled guns were found distributed between the three junks.

Our Hang-chow correspondent reports a brilliant affair which came off on the 3rd, between the Franco-Chinese contingent and the rebels within the city. Since receiving his letter we have learned that the French were two days afterwards repulsed by a vigorous sortie on the part of the rebel garrison, and were in consequence compelled to retire on Shao-shing. No reliable information has arrived, but, so far as we can discover, there would appear to be little doubt that the Imperialists have met with a serious reverse. The attack described by our correspondent was made on an advanced post which had been stationed in one of three forts mutually commanding each other, situated at an inconsiderable distance from the wall of Hang-chow. An attempt was made to surround one of these forts, and after a few hours' hard fighting the occupants were completely hemmed in, and, an assault having been made, the garrison was routed. The rebel loss was estimated at three hundred men. The casualties on the side of the contingent were:—Killed, one officer and four men; wounded, six officers and eight men. As soon as the first fort was taken, the remaining two were evacuated.

The criminal classes have not been idle. Although a thief was shot by one of the Custom-house assistants during the night of the 10th, another individual managed, on the evening of the 13th, to effect an entrance into the Custom-house quarters, and to carry off a clock. A correspondent also informs us that, on the evening of the 11th, a man was seen on the roof of a godown in the middle of the English settlement, endeavouring to tear away the tiles. He, however, contrived to escape before steps could be taken to secure his capture.

A meeting of the members of the Shanghai Rowing Club was held on the 12th. The report laid before the meeting was most satisfactory. Three resolutions of general interest were proposed and carried, viz., that the rowing season for 1864 commence on the 26th March; that the colours of the club be light blue; and that a regatta be held after the departure of the second mail in May.

The weather, which has been clear and bracing, has undergone a sudden change, and is now damp and foggy, as usual in Shanghai at this period of the year. The thermometer averages from 41 deg. to 43 deg. during the day, and ranges between 32 deg. and 36 deg. and night.

The *Friend of China* on the criminal Buckley says:—The United States Minister at Peking having confirmed the judgment of the Consular Court, Buckley, the murderer of Capt. McKinnon, was yesterday taken to the American Consulate from the British Consular Gaol, and formally told that, on Friday, the 31st March, he would be hung by the neck till he was dead. On being asked why the sentence of the

Digitized by Google

law should not be passed on him, Buckley, we hear, raised several objections, one being that he denied the jurisdiction of the Court; the only allegiance he ever gave to America, he said, being to serve under the banner of Filibuster General Walker in Mexico. As to the report that he had shot several men at San Francisco, he denied it; nor was it a revolver that he used here, it was a Deringer. We can hardly believe that he added, 'it was well for others at the International that night he did not carry a revolver, for, if he had, he might have potted more than one.' Buckley, who was in handcuffs, and brought down in a chair, looked haggard, though still defiant. His suicide is specially interdicted."

A correspondent of the *Friend* complains of the treatment of second class passengers on board the Messageries Imperiales steamer *Tigre*:—

"The gauge either the managers of this company, or the management of their agents on board the Commissaires, have put upon the appetites of their passengers of the second, only allows them two meals per day, or rather parts of two, consisting of, at 10 A.M., dry bread and tea, and five or six stale eggs between seven or eight of us, followed by sometimes the remains of a fowl or the skin of a duck stew, finished with in the first saloon. At 5.30 P.M., or thereabouts, hot water, remains of duck skin stew again, washed down by a cholera mixture they call vin ordinaire (we name it vin extraordinaire), the entertainment concluding with dry bread and a little dryer cheese."

The men-of-war in port were gaily decorated with flags, and a salute fired from the Prussian frigate *Gazelle* and British steam frigate *Leopard*, in commemoration of the 66th natal day of the King of Prussia.

The following *resumè* of the Imperial and Rebel engagements is from the *China Mail*:—

The most prominent feature in the fortnight's intelligence is the state of the rebel cause and the movements of Major Gordon in connection with it. That officer, since his return to action from the town of Quinsan, has captured one city, Yih-sing (or E-shing, as spelt in our last summary of news), and, since we last wrote, he has received the surrender of two more—viz., Li-yang and Kintang. His march from the city of Yih-sing, on the Taehoo lake, was in a westerly direction, towards Li-yang, after which he proceeded northwards to Kintang, the garrisons of both places shaving their heads in token of submission. His object is to isolate Nanking, and already he is met by messengers from the camp of Tseng-Kwo-fan.

These operations have been somewhat extensive, and have been performed without bloodshed; the movements have all been rapidly executed, forty miles in one day having been accomplished between Yih-sing and Li-yang. The rebels at the latter city, after having submitted, proceeded to make arrangements for returning to Kwangsi (in the south of China), which they say is their native province. It is even reported that the Chung Wang himself, the leading military genius of the rebellion, "the figting King," as he is called, is collecting his property in Nanking with a view to retiring to his home. He feels as unequal to the task of opposing Gordon as he felt on a former occasion at Soo-chow, when it will be remembered he left the city with a considerable force for service on the other side of the Tae-hoo lake. He is now in Nanking preparing for the worst. It is even said that his sword has fallen into Gordon's hands.

With the fall of Soo-chow the chief difficulties in Gordon's way appear to have vanished. It is reported that the rebels are lively near Kiang-yiu and Fooshan, and also that they have retaken the latter city. Imperialist General Ching had suffered a repulse at Kia-shing just as he was recalled by the Futai to protect Soo-chow an alarm having spread that the rebels were within 20 miles of Taitsang.

That the most heartrending destitution has long prevailed in Taiping districts is now known, from the scenes witnessed by Major Gordon and his officers in the course of their march through rebel territory. The absence of all but military government no doubt conduced to the miserable condition of the people, the silk that was raised being appropriated, to the extent of one-fourth, if not one-half, by the Taiping authorities. No doubt it found its way into the foreign market all the same, and so gave rise to the cry that there was no diminution in the supplies of silk, and that, therefore, the country was flourishing. The cry of the Taipings ravishing the silk districts so often held up as a bugbear to everybody, was intended for home use; no one attached serious importance to it in China, except poor Burgevine, who actually urged it upon the rebels as *modus operandi*. As for the fabled bales of silk stacked mountain high in Nanking, and which Osborn's sailors were to loot when they took the city, we shall hear no more of them; the rebels do not hoard their silk but sell it for money, or, better still, for fire-arms. Abundant proof now presents itself that rebel rule has been one of the most grinding tyranny. This fact was presented long ago, but there were reasons why many people should not see it.

The screw-steamer *Sea King* had arrived from Sydney, after an unprecedented passage of twenty-four days. This vessel was chartered by the English Government to carry troops to New Zealand. She left Woolwich on November 15th, made a passage of seventy-three days to Auckland, where she lay for nineteen days. She then proceeded to Sydney, whence after a stay of twelve days she started for this port.

HONG KONG.

The English Mail of Feb. 10 arrived out on the 25th March. The dates are down to the 1st April. The weather had been very unhealthy, owing to damp, heavy fogs and a low temperature; the thermometer falling at night to 44.

The site for the Hong Kong Mint is thus noticed:—"The site chosen for the mint is probably the best that could have been selected. It will be obtained by filling in that bay adjoining East Point, and to the north of the Wong-nei-chong. The space filled in cannot amount to much less than eighty acres, and the protection-wall will have to be about five hundred yards in length. The building will give a very effective appearance to a locality that was never before prepossessing in its aspect, while the presence of a military guard may possibly tend to keep order in a somewhat lawless neighbourhood. In other words, their being on the spot will act as a moral support to the local police. Now that the Praya and numerous godowns are finished in the same neighbourhood, East Point is changing its appearance for the better, and this new Mint will complete the change."

Attention has been called to the grievance entailed by the withdrawal of the guarantee chops at Fuhchau by the commissioner, thus forcing the use of the bonded godowns lately built. The commissioner was partly exonerated from blame, seeing that the merchants agreed unanimously that the godowns should be built, and afterwards refused to use them. It concludes that, as illustrated from this case and the post-office grievance amongst ourselves, "high officers should never resent."

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 5d. to 6s. 6d.	6s. 6d. to 6s. 7d.
At Foo-Chow-Foo (per dol.)	6 ditto	...	...
At Canton, At Hong Kong, At Macao	6 ditto	4s. 10d.	4s. 11d. to 5s. 1d.
At Singapore	6 ditto	4s. 11d. to 4s. 11½d.	4s. 11d. to 5s. 0½d.
At Manila	6 ditto	4s. 8½d.	4s. 9d. to 4s. 10d.

At Shanghai: Bills on India, Rs. 305 to 310 per 100 taels. At Hong Kong: Rs. 228 to 227 per $100. Bar silver at Shanghai, 110. Hong Kong, 4 prem. Mexican Dollars at Shanghai, 76; and exchange on Hong Kong, 25 discount.

The Circular of Mr. Sharp says:—

GOLD.—The aggregate amount received since last report has been three and-a-half lakhs of dollars' worth, and the sum total sent away, including the *Orissa's* cargo of the 15th instant, and excluding that to leave by the *China*, amounts to two lakhs and three-quarters. The market has been benefited oy the fall in Rupee bills.

SILVER.—The shipments inwards and outwards during the fortnight have been pretty much upon a balance, and amount to about three quarters of a lakh on either side.

DOLLAR CURRENCY.—We have received 360,000 dollars, and sent away during the last two weeks 557,000 dollars. The dealings in clean coin have been on a limited scale, but a very small demand existing for shipments to the North.

DISCOUNTS AND MORTGAGES.—Mortgages for a term have been effected at 12 per cent., and money has been invested upon first-class securities at 9 and 10 per cent.

EXCHANGE.—The amount of commercial paper as usual at this season has been small, and the support given to the market for some weeks past by the supply of Bank bills from an influential quarter have been withdrawn, the rate has gone in favour of the seller. Owing to the absence of the *Lightning's* cargo of drug the demand for Rupee remittance has been lessened.

JAVA.

Our dates from Batavia are to the 31st March. A commencement has been made at Samarang with the erection of a railway station. Dr. Bernshein has returned from his trip to Halmahera, where he had been sent by the Government on a voyage of discovery. He reports the inhabitants as very docile and obliging, and has collected a number of interesting objects. He is to return in a few weeks, and will proceed to New Guinea on a similar mission.

A new Government resolution has decreed the establishment of an entrepot at Cheribon, on the same footing as the others at the principal ports of the island.

Samarang has again been inundated. With the exception of the capture of the notorious rebel chief Demang Lehman, there is no news of any importance from Banjermassing.

TIMOOR.—In addition to the stormy weather in December and January, there had been a hurricane at Koepang from the 1st till the 6th of February, and which was so violent that the oldest inhabitant does not remember ever having seen such bad weather. In the midst of this storm, signals of distress were continually observed from an English ship, which anchored in the outer roads on the evening of the 1st of February. Said ship was the *Water Lily*, Captain Towers, from Shields, with coals for Japan, and had been out 173 days. The captain, who had left the ship the day after her arrival, could not reach the shore owing to the

Digitized by Google

heavy surf, nor could he return on account of the heavy sea running, so that he was four days, with three of his crew, without any provisions in the boat, knocking about at sea, before he succeeded in landing on the North-east coast of Koepang. This was the reason of the signals from the ship, on board of which was also the wife of the the captain, and who, uneasy respecting the fate of her husband, and careless of the high sea and the heavy surf, left the ship in search of him in a boat, accompanied by two young children and a couple of sailors. When this boat reached the shore, which was not done without imminent danger, and from which the authorities sent men to help her through the surf, it was found that the captain had been forced by urgent circumstances to leave the ship in such weather. Part of the crew was in a state of mutiny, and the cook had threatened to throw him overboard. The whole crew were suffering from scurvey in its worst stage; the chief mate had broken his arms, and the second was dying of consumption. The necessary assistance was afforded the captain to restore order on board, and the sick men were sent to the hospital at Koepang.

BANCA.—The yield of tin in the island during 1863 was, according to an official statement, 95.981,14 piculs, being 25.296'80 piculs more than in 1862.

STRAITS OF MALACCA.

SINGAPORE.

The European mail of the 26th February did not reach Singapore till the 3rd April. Dates are down to the 9th April.

The event of the fortnight was the sale, on the 5th of April, of Government, excise, farms, and market rents. The result was unfavourable, in so far that though some of the farms realised an advance, the whole sale shows a falling off of $1,800 per month, or about £4,500 on the next year's revenue. The total amount fetched was $35,620, the several items being as follows:—Opium, $25,000; spirit, $6,500; pawnbrokers, $2,040; toddy and bang, $590; Ellenborough market, $260; Singapore town do., $770; Kampong Glam do., $460.

Her Majesty's steamer *Conquerer*, Captain W. G. Luard, bound to Hong Kong, arrived on the 3rd April. The crew of the British ship *Fortuna*, and sixteen of the crew of the British barque *Moneka*, were committed by the Marine Magistrate on 29th March, to eight weeks' imprisonment in the House of Correction with hard labour, for refusal of duty.

By advices received from Labuan, it appears that the steamer *Thunder* had put in there short of coals, coaled, and proceeded on her voyage to China on the 12th.

The following steamers have also coaled at Labuan: H.M.S. *Scylla*, Courteney, Singapore to Hong Kong; *Thunder*, Rodgers, Singapore to Hong Kong; *Bahama*, Rowe, Bangkok to Hong Kong; *Stirling*, Henderson; H.M.S. *Leven*, Knevitt.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FRASER—On the 29th ult., at Truman's Brewery, Mrs. Alexander Fraser, of a daughter stillborn

HELMS—At Sarawak, on the 14th March, the wife of L. V. Helms, Esq., of a daughter.

MINTO—On the 19th March, at Hong Kong, the wife of G. N. Minto, of Whampoa, of a son.

PAGE—On the 5th inst., at Broxbourne, Herts, the wife of F. M. Page, of a son.

PEDDER—On the 7th February, at Tien-tsin, the wife of James N. Pedder, of a son.

RICHARDS—On the 24th ult., at Glendon Lodge, Southsea, the wife of W. M. Richards, Esq., late H.M.'s Naval Storekeeper, Hong Kong, of a son.

SMITH—On the 28th April, at Stanley Villas, West Brompton, the wife of George Smith, Esq., of Shanghai, of a daughter.

WEST.—On the 9th inst., at 15, Frampton Park Villas, Hackney, the wife of James West, late of Shanghai and Hankow, of a daughter.

MARRIAGES.

CAMPOS—FLADGATE.—On the 23rd ult., at the Quinta do Monte, by the Abbade of S. Jaoa da Foz, in conformity with the rites and ceremonies of the Roman Catholic Church, and afterwards at the British Consulate, and by the Rev. E. Whitteley, at the British Episcopal Chapel, Antonio d'Almeida Campos, K.C.C., Chevalier of the Military Order of Tower and Sword, and Portuguese Consul at Liverpool, to Margaret Ellen, eldest daughter of John Alexr. Fladgate, of Oporto. No cards.

DENTON—MULFORD.—On the 24th March, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial Chaplain, Edward Denton, farrier to Messrs. Jardine, Matheson, and Co., to Mary Ann Mulford, of Kingston, Somersetshire.

GODDARD—MOORE.—On the 28th ult., at Lymington parish church, by the Rev. B. Maturin, A.M., John Redloe Goddard, Esq., of Her Majesty's Consulate, China, to Emily, eldest daughter of Mr. E. H. Moore, Solicitor, Lymington, Hants. No cards.

HOWARD-BARNS.—On the 27th April, at St. Marylebone Church, Capt. Henry Troughton Howard, late of China, to Catharine Ann Barns, daughter of Mr. William Barns, of Exeter.

WOODWARD—JELLY.—On the 19th March, at Trinity Church, Shanghai, by the Rev. R. Hamilton, Robert Hanslip Septimus Woodward, to Charlotte Ellen Jelly, both of Shanghai.

DEATHS.

ADRIANCE—On the 5th March, at Amoy, Miss Caroline Adriance, of the American Reformed Dutch Mission.

BOWKER—On board the Nizam, from Shanghai to Singapore, aged two years, Cosley, son of John T. F. Bowker, Esq., of Shanghai.

FALMOUTH—On the 1st May, at her residence, in Whitehall-gardens, Anne Frances, Countess of Falmouth.

HOUGHTON—On the 27th April, of whooping cough, aged seven months, Herbert MacGregor, youngest child of Henry J. Houghton, 33, Gordon-square, W.C.

HYDE—On the 5th May, at his residence, Impington, near Cambridge, Orlando Hyde, Esq., aged 53.

RICHARDS—On the 27th Feb., at the Royal Naval Hospital, Simon's Bay, invalided from the Japan Exhibition, Edward Thicknesse Richards, Second Lieutenant Royal Marine Light Infantry, aged 21.

ROSS—On the 20th March, at Hong Kong, Jane, infant daughter of Alexander Ross, shipwright, aged 11 months.

ROBINSON—On the 21st March, at the Seamen's Hospital, Hong Kong, William Robinson, seaman of British barque Bristow.

THOMAS—On the 24th March, at the London Mission, Shanghai, Caroline, the wife of the Rev. R. J. Thomas.

COMMERCIAL REPORT.

CHINA IMPORTS.

Cotton Yarn: The quotations annexed for the higher numbers show a slight decline upon those given in last Circular, and the sales of the past fortnight amount to only 160 bales. Grey Shirtings: Prices again show in some instances a trifling decline, and the total sales effected in this market, both to Chinese and foreign purchasers, amount to 19,000 pieces. In the Canton market the sales amount to 1,000 pieces without change in value. White Shirtings: Without material alteration to notice in quotations, have found buyers to the extent of about 10.000 pieces. T-Cloths have again been in very limited request amongst the native dealers, the sales to whom amount to about 3,000 pieces, which with 6,000 pieces taken on foreign account complete the transactions reported during the past fortnight. White Spotted Shirtings, Dyed do., Brocades White and Coloured: The sales effected during the past fortnight amount to 1,250 pieces of Figured Shirtings, say 500 of white and 750 of coloured; prices remaining without change; neither have there been sales of Brocades reported. Damasks: There have not been any sales of these goods. Chintzes: The value of these goods has declined slightly, and the business of the fortnight is put at 1,800 pieces sold. Handkerchiefs: Have met with moderate inquiry, and the sales of all kinds are estimated at about 1,500 dozens.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths: There have not been any sales of Spanish Stripes reported either in this market or in Canton during the fortnight, and prices at both ports remain as before quoted. Long Ells: In this Colony the value of these goods have experienced a decline of about five cents per piece, with sales for the past fortnight amounting to about 1,800 pieces. In Canton there is not any change to notice in quotations, neither are there any sales to report. Camlets: A slight decline is also noticeable in the value of these goods, with sales in the Hong Kong market of 220 pieces. In Canton, where 100 pieces have changed hands, prices remain unaltered. Lastings haue found buyers to the extent of 340 pieces in Hong Kong. Blankets have been in fair request during the fortnight, and the sales amount to 720 pairs.

METALS.—Iron, Flat, &c.—A moderate enquiry has existed in Hong Kong during the fortnight, at about the quotations previously current, resulting in sales of 5,880 piculs of nail rod, 1,100 piculs of bar, and 225 of Wire. In Canton, where the prices of nail rod and wire show some decline in value, the business of the fortnight is limited to 2,500 piculs of the former. Lead has again declined slightly both in this market and in Canton, and the business of the fortnight is estimated at 300 piculs, and 12,000 piculs for each port respective. Tin.—500 piculs sold in Hong Kong. Tin-Plates.—The business done in this colony has been upon an unusually large scale during the past fortnight, amounting to 2,200 boxes, but prices show a slight decline when compared with the rates previously current. In Canton quotations show some improvement, but there are not any sales to notice. Steel.—The sales effected during the fortnight amount to 400 tubs.

CHINA EXPORTS.

CANTON.—The last report advised a fall in the price of Congous, and some settlements at the decline, which, however, left no margin on London rates, but, on the contrary, a loss. The tenor of last Mail's advices has been still discouraging for investment in tea. Purchasers of Congous have retired from the market, and beyond the settlement of a chop of Oopack for immediate shipment, nothing has been done, the offers being made now far below the teamen's ideas. Considering the lateness of the season, the holders of the remaining stock of Congous show great firmness. One teaman, the holder of six chops, is about shipping them on his own account to England. In Canton descriptions the demand has been quite insignificant, the demand for the London market having entirely ceased. The settlements of the fortnight are reported as under. Congous, 6 chops shipped on native account, 1 chop Oopack, blksh. 1f. Pekeo fla. at 31½ taels. Country Greens, 1 chop 1,100 packages for New York at 51½ taels. The stock remaining on the market is stated at 32 chops Congous and 2,400 packages Country Green.

FOO-CHOW-FOO.—The transactions of the fortnight have been moderate, at the range of rates last quoted. Latterly, however, owing to the lateness of the season and to the unfavourable advices from London, holders have shown more desire to realise, and the market tends down. The settlements of the fortnight are reported as under:—Congous, 4,800 chests, and 3,000 chests at 5 to 19 taels. Souchong, 260 chests at 22 taels. Oolong, 110 half chests at 19½ taels. Scented teas, 1,000 boxes at 17 taels. The total supplies to date are as follows:—Congou and Souchong, 605,500 chests, against 601,400 corresponding period last season. Oolong, 176,200 half chests, against 212,200. Stocks are so much reduced that the season may be said to be over. They are reported as under:—Congous, 4,500 chests. Souchong, 1,700 chests. Pekoe, 200 chests. Oolong, 1,100 half chests. Scented teas, 500 boxes.

SHANGHAI.—Black Teas: The settlements of the fortnight amount to 8 chops Oonam and Ningchow, at 25 to 28 taels per picul; and 3 chops Hohow and Shanghai packed, at 17½ to 21½ taels; leaving in stock only about 1,000 chests Congou, with very little more expected during the present season. Since the mail arrived rates have declined a tael per picul. Green Teas: Only 4,300 hf.-ch. are reported settled, the re-shipments on owner's account (which have been principally for New York), amounting to 5,400 hf.-ch. The quotations are as follows: Moyunes and Fychows, 34 to 46 taels; Ningsuey kinds, 34½ to 30 taels; and Hohows, 31 to 35 taels. The stock on the market is estimated at 8,500 pkgs.

Digitized by Google

KEWKIANG.—Green teas continued in demand, the settlements for the fortnight being reported at 9,400 half chests Fychow and Moyune, whereof 4,000 were purchased for New York. For second class teas the rates are a little easier, but the finer qualities are firmly held. The arrivals during the fortnight amount only to 2,500 half ch., the stock on the market being computed at 25,500 do. The total supply for the present season will undoubtedly be 50,000 half chests short of that of last. The quotations are—Moyune, medium to finest 35 to 41 taels. Fychows 33 to 39 taels. Kewkiang packed 27 to 32 taels. For Black teas the season may be said to be closed. Three chops of Common Hohow remain in stock. The exports are stated as under: Green teas present season to date 231,022 half chests against 223,058 half chests same period last season. Black teas present season to date 110,610 chests against 57,445 chests same period last season.

HANKOW.—Only one chop has been settled during the fortnight at 15 taels. The stock on the market comprises 12 chops of very undesirable quality. The total export of the season to date amounts to 362,100 chests against 279,400 do. same period last season.

YOKOHAMA.—We can at last perceive a slight improvement in the quantity offering of this staple, but prices are pretty fairly maintained. However, if foreign houses abstain from buying for a short time, we believe that the native merchants will become more rational in their ideas, and the sooner the better, as for the last three months rates prevailing here have left but a poor margin for satisfactory account sales from the other side. From native accounts we are led to hope for the arrivals of the new crop from the adjacent districts in about two months from the present date, and no doubt the slight improvement in supply arises in some measure from the Yedo merchants being desirous to get out of old stock, knowing from past experience that old season's teas are very unsaleable after arrival of the new crop. Our prices to-day are—fine, $26 to $32; medium, $21 to $25. Common, $11 to $20. Ordinary $1 to $10. These rates, however, with an absence of demand, are likely to become weaker, but we do not expect to be able to report much further business in the staple prior to the arrival of the new crop.

RAW SILK.—SHANGHAI.—During the fortnight about 800 bales have found buyers, without producing any alteration in prices. The demand has been chiefly for Tsatlee and Hainings; Taysaams being almost out of stock, and proportionately much dearer than other descriptions. The 26th January mail arrived on the 21st inst. with very unfavourable market advices, which, together with the possibility of war, have caused buyers to ask for lower prices, and as the dealers have thus far continued firm, transactions have only been moderate since the letters were received. The silkmen appear more desirous to realise, and it is probable we may shortly see lower quotations. From the interior it is reported that the rebels are committing great havoc in the Tsatlee districts, which is likely to interfere considerably with the coming crop. The transactions of the fortnight are reported at 800 bales, against 2,400 corresponding fortnight of last season, and 3,500 the season before. The present unsold stock is 4,000 bales, against 2,000 corresponding period last season, and 4,500 bales the season previous. The following are the latest quotations:—Tsatlees: No. 3 chops, 430 to 440 tls. per picul; No. 3, 415 to 425 tls. per picul. Market: No. 3, 405 to 415 tls. per picul; No. 2, 390 to 400 tls. per picul; No. 5, and common, 375 to 385 tls. per picul. Taysaams: No. 1 and 2, 390 to 420 tls. per picul; No. 3, and inferior, 340 to 380 tls. per picul. Yuenfa: No. 1 and 2, 405 to 425 tls. per picul; No. 3, and inferior, 375 to 395 tls. per picul. Hainings: 375 to 420 tls. per picul.

YOKOHAMA.—At the commencement of the week there was no perceptible change upon our last week's report of the business in this staple, towards the end of the week we had some arrivals of the stock, which we now estimate at fully 100 bales. Quotations nominal as follows:—Ida, medium, $540 to $555; inferior, 490 to 510. Sodi, fair to good, 480 to 505. Mybash, best parcels, 550 to 560; medium, 530 to 545; inferior 510 to 525. Oshio, best parcels, 535 to 545; medium, 495 to 515; inferior, 445 to 465. Coshu, best parcels, 495 to 510; medium, 475 to 490; inferior, 460 to 470. Hatchogee, 410 to 420.

DRUGS, &c.—CANTON.—Cassia Lignea: No settlements; quotations $16.50 to 16.75; stock 1,500 piculs. Cassia Oil: Still no supply. Cassia Buds: A small lot has been placed at $55; stock 75 piculs. Star Aniseed: Still no stock; nominal quotation, $22 to 22.50 for good. Aniseed Oil: 15 piculs are reported as placed at $152½, leaving no stock. Rhubarb: 60 piculs came to market, which were at once taken at $70. Gamboge: Still no supply; quotation $40 to 45. China Root: No settlements reported; stock 500 piculs; price $3.50 to 3.75. Galangal: No sales; stock 250 piculs; price $3.50 to 4. Galls: Stock 150 piculs; no settlements; price $14 to 14.50. Vermilion: About $45 per box. Musk: 30 catties appeared on the market, which were taken at $98.

CAMPHOR.—HONG KONG.—A lot of 40 piculs sold at $17.50 per picul is the only transaction reported since the issue of our last report, and but a small supply of about 300 to 400 piculs has arrived from Formosa. From Japan a small lot of very fine (Satsuma's best) camphor has been imported, and is held at $24 per picul. Formosa camphor nominal value $18 to 19 per picul. If supplies do not arrive shortly a small advance in prices will probably be reported next mail.

RAW COTTON.

CANTON.—The sales of the fortnight amount to 1,550 bags Shanghai, 800 do. Ningpo, and 480 do. Shantung, at previous quotations. The stock in the packhouses is stated at 1,100 bags Shanghai, 800 do. Ningpo, and 400 do. Shantung.

HONG KONG.—The activity mentioned in last report would have caused a rise in price of this staple, if the 26th January mail from London (arrived here on the 14th instant) had brought favourable advices, as expected. But, on the contrary, a gloomy state of affairs on the continent, and the value of money in London having become dearer, cotton was quoted lower, with few sales of China. This news caused purchasers, both Chinese and foreigners, to withdraw until the mail of the 10th ult. arrived here on the 25th inst., bringing rather better and improving intelligence for cotton, when a few sales of good Shanghai were made at $32 to 32.75. Present quotations are generally $2 lower than last reported, sales of the fortnight amounting to about 2,500 bales, and the present quotations are nominally:—Shanghai, $31 to 32.75; Ningpo, $32 to 33; Japan, $35. Stocks are increasing, and may now be estimated at 40,000 bales of all sorts.

SHANGHAI.—The market drooped ever since the date of last report, and the unfavourable advices from Liverpool, received per 26th January mail, decided the course of the market, causing an immediate fall of 2 taels per picul. Should exchange become easier a reaction is probable, in anticipation of more favourable advices. The late heavy rains have retarded supplies from the country, whence there are stocks to some extent expected. During the past few days settlements have taken place of 5,000 to 7,000 piculs fair and dry Shanghai and Kongpoot staple, at 20⅛ to 22 taels per picul, on English account, which will lay the article down in Liverpool at about 15d. to 15½d.

YOKOHAMA.—During last week supplies have arrived freely, giving rise to large transactions at about last quotations. The market closed firm.

From BATAVIA.—For London: March 23, West. For Holland: 22, Dordrecht, Macassar, Willemien, and Carel.

From PENANG.—For London: March 17, Devonvale.

LOADING.

At JAPAN.—For London: Milbrook, Ann Adamson, Anglo-Indian, Merse, Abbotsford, Alexander, Meppel, Mercator, and W. W. Smith.

At SHANGHAI.—For London: Benvoirlich, Osborne House. For Liverpool: Advance, Dunkeld, Express, Neville, Lauderdale, Mayflower, Simoda and Fort William. For New York: Cornelia and Luzon.

At FOO-CHOW.—For New York: Eva and Benefactor.

At HONG KONG and CANTON.—For London: Aunt Lizzie, Ethel. For New York: Sophie.

At MANILA.—For Cowes (for orders): John Banfield. For New York Ocean Eagle.

At SINGAPORE.—For London: Eleanor, Couranto, Tartar, and Hindustan. For Liverpool: Caroline, Chisholm and Ferris. For Bordeaux: Java and Spahis. For Nantes: Suez. For New York: Reynard.

At PENANG.—For London: Akbar.

FREIGHTS AND CHARTERS.

JAPAN.—To England: Silk, £7; £5. 10s. to £6 for cotton and tea. To Hong Kong: $8 to 9 per ton measurement.

SHANGHAI.—Freights remain unaltered, and little activity is shown. The rates, which are nominal, are:—To London and Liverpool, £3. 15s. to £4, and to New York, £4.

FOO-CHOW.—To London, £5 per ton of 50 cubic feet; to America, £4. 10s. per ton of 40 cubic feet.

HONG KONG.—Shipping has been in good demand, and still remains so. Considerable business has been done at £4. 10s. to £5 to England and Continent. The following are some of the charters:—Aunt Lizzie, £4. 10s. and £5 to London; Ethel, ditto, £4. 10s.; Diadem, Manila to Liverpool, £6 per ton hemp; Der West, Manila to England, £4. 15s. To Ningpo and Shanghai the rate is 40 cents per picul; to Saigon and back 60 cents per picul.

SINGAPORE.—To England, £3. 15s. for dead weight, and £4. 10s. for light freight. For New York, £2. 15s. sugar; hemp, £3. 10s. Tonnage less inquired after.

PENANG.—To England, £3. 10s. for dead weight, and £4 light goods.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—March 5, Gwalior, from London to Singapore; J. M. Bockelmann, Hamburg to Hong Kong; 11, Elizabeth, Cardiff to Singapore; 12, Jubitor, Bordeaux to Singapore; 19, City of Aberdeen, London to Hong Kong; 20, Preciosa, Hamburg to Hong Kong; Whinfell, London to Hong Kong; 24, Toke Lin (str.), Shields to Shanghai; 27, Alida, Swansea to Singapore; Bothwell Castle, Glasgow to Singapore; Constance, Cardiff to Hong Kong; Drusus, Cardiff to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—March 5, Tyburnia, Manila to London; Isabella Hercus, Hong Kong to Liverpool; 12, M. M. Peter, Shanghai to Liverpool; 14, Antelope, Singapore to Liverpool; 17, Coniston, Hong Kong to London; Concepcion, Manila to Liverpool; 18, Blackburn, Shanghai to Liverpool; 20, Thomas and Rebecca, Shanghai to London; 21, Patrician, Hong Kong to Liverpool; Macedon, Japan to London; 25, West, Batavia to London.

From CHINA, &c., to UNITED STATES.—March 15, Resolute, from Canton, and, 17, Haversham, Shanghai to New York.

CASUALTIES.

The Dutch vessel Krimpenerwaard struck a rock off Amoy the beginning of March—had to discharge and dock. The Danish brig Thorwaldsen, from Tamsui to Ningpo, had to enter Amoy for shelter, having lost sails, &c., the early part of March. The Danish barque Herlaff Trolle has been condemned and sold at auction for $2,600.

COMMERCIAL POSTSCRIPT.

TEA.—Sixth Day, 10th May.—The present series of sales were brought to a conclusion to-day. Prices generally have not altered much, with the exception of fair red leaf Congou, which must be quoted ½d. to 1d. per lb. lower. To-day a chop of black leaf, "with all faults," brought the fair value of 1s. 1d. per lb.; and some broken leaf sold from 7¼d. to 7½d., former prices. There were also realised about 1,100 packages recovered from the wreck of the Friar Tuck. To-day 4,538 packages have passed, and 3,667 have been sold, including 2,576 "without reserve." The total quantity offered at these sales amounted to 60,701 packages, exclusive of 6,400 which had been advertised, were withdrawn. About 38,000 packages were sold, but 36,400 were "without reserve."

ARRIVALS NOT INCLUDED IN THE TABLES.—May 8, at Deal, from Batavia, Wilhelmine Johanna; at Falmouth, from Macao, Orion; April 25, at New York, from Shanghai, Elizabeth; May 9, at Clyde, from Maulmain, Princess of Wales; 5, at Grangemouth, from Maulmain, Astrea; 4, at Texel, from Padang, Koerier; 5, from Batavia, Marinus Willem; at Brouwershaven, from Banjoewangie, Susanna Johanna, Duisburg; 8, off Portland, from Foo-chow-Foo, Weymouth; 7, off Dartmouth, from Shanghai, Wagoola, Lansdowne; 10, at Deal, from Foo-chow-Foo, Pak-wan; 9, at Falmouth, from Singapore, Emma; 11, off Liverpool, from Shanghai, Queensberry; 10, off Plymouth, from Shanghai, Marquis of Argyle; 10, at Deal, from Batavia, Nord; from Maulmain, Batavia; 10, off Plymouth, from Foo-chow-Foo, Stuart Wortley; 9, off the Start, from Shanghai, Oithona, Egmont; April 27, at New York, from Shanghai, Kate Carnie; from Canton, Ceres; from Shanghai, Annie Wood; from Kanagawa, &c., Sarah; from Shanghai, Johanna; 28, from Foo-chow-Foo, Peep o'-Day; 29, from Foo-chow-Foo, Kahlamba; off New York, April —, a barque (not American), from Canton; May 10, off Falmouth, from Hong Kong, Windward; 11, from Sourabaya, Sir Robert Peel; 13, at Liverpool, from Shanghai, Ranee; off Plymouth, from Shanghai, Island Queen; off Mount's Bay, from Shanghai, Sir Harry Parkes; off the Eddystone, from Canton, Tamerlane.

DEPARTURES.—May 9, from London for Shanghai, Sir W. F. Williams; 6, from Newport for Hong Kong, Atlantic; 7, from Liverpool for Shanghai, Jane Leech; 10, for Hong Kong, Amazone; 19, from Liverpool, for Penang, Fairy Belle; 10, from London, for Hong Kong and Canton, Dilkhoosh, for Newport and Shanghai, John C. Munro; 6, from off Dover, for Macassar, Helena; 7, from Cardiff, for Shanghai, Cesarea, from Liverpool, for Batavia, Cherokee (str.); 5, from Sunderland, for Singapore, Impulse; April 28, from Texel, for Batavia, Elise Henriette; May 10, from Glasgow, for Singapore and Penang, Osprey, from Port Glasgow, for Shanghai, Teen-chang, Vulcan; 11, from Liverpool, for Hong Kong, Eliza Stewart, from London, for Singapore, Hanthippe, from Deal, for China, Niagara; 7, from off Beachy Head, for Batavia, Kortenaar; 9, from Cardiff, for Shanghai, Spirit of Trade, from Liverpool, for Shanghai, Hannover; 10, from Shields, for Singapore, St. Oswin; 8, from off Lowestoft, for Singapore, Helena; 10, from Cardiff, for Shanghai, Palmerston; 9, from Swansea, for Hong Kong, Philip 1st; 13, from Liverpool, for Hong Kong Gemine.

SPOKEN.—Valdivia (ship), London to Singapore, Jan. 26, 24 S., 23 W.; Hamilla Mitchell, Canton to New York, April 8, 4 N., 30 W.

Laid on at London, for Shanghai, Clarendon.

The Elise Ruger, Treviranus, for Hong Kong, put back to New York 24th April, in consequence of the master having received considerable injury during a heavy gale on the 14th April.

Liverpool, 10th May.—The Falcon, O'Sullivan, from Hong Kong, which arrived here 10th April was ashore in Crosby Channel while coming in.

Lisbon, 5th May.—The William Mitchell, Bryce, from Shields for Shanghai, with coals, which put in here 17th April leaky, will sell part of her cargo here and return to England with the remainder.

The Maiden Queen loading in the West India Docks for Hong Kong, has been on fire—ship is not supposed to be much injured—cargo very much damaged.

Laid on at Liverpool for Singapore: Veteran; for Shanghai, Twilight; for Sourabaya, Gazelle.

THE TELEGRAPH BETWEEN RANGOON, JAVA, CHINA, &c.

We understand that the telegraphic scheme of Mr. Francis Gisborne, for connecting Australia, Java, Saigon, Singapore and China with Rangoon will be shortly announced to the public for its capital, which is fixed at £1,350,000. We shall notice this matter more fully in our next.

THE NEEDLE GUN.—Capt. Brooke, dating from the Army and Navy Club, in a letter to *The Times*, gives the following testimony to this gun:—"In 1860 I took a few needle rifles on Needham's principle to Sarawak, in Borneo, as an experiment. These rifles were turned out in a hurry, and were in many respects defective. It so happened that shortly after my arrival in Sarawak hostilities with some neighbouring tribes broke out, and the needle rifles were at once brought to the test. Now, I suppose of all climates in the world, the Bornean is the most trying to firearms. However, under all the difficulties of Bornean campaigning against head-takers by day and pirates by night, I found my needle rifle prove a trusty weapon, and carried it in preference to any other, on account of its accurate and rapid shooting, and its simplicity was such that an ordinary rough Chinese armourer could always repair or replace any portion of the needle apparatus with facility."

THE LEVEE.—On Saturday, the 7th inst., his Royal Highness the Prince of Wales, by command of the Queen, held a levee at St. James's Palace. Presentations at this Court were, by the Queen's pleasure, to be considered as equivalent to presentations made to Her Majesty. The Duke of Cambridge and Prince Edward of Saxe-Weimar were present. Her Majesty's bodyguard of the honourable corps of Gentlemen at Arms was on duty in the State saloons, under the command of the lieutenant. The Royal bodyguard of the Yeomen of the Guard were on duty, under the command of Colonel Bourke, the groom in waiting. The Prince of Wales having entered the Throne Room, attended by his gentlemen in waiting, the Foreign Ambassadors and Ministers were introduced. Amongst the presentations to his Royal Highness, on the part of the Queen, we notice the names of the following gentlemen connected with China:—Croft, Dr. J. M'Grigor, late of Hong Kong, by Sir R. M'Grigor; Medhurst, Mr. Walter Henry, Her Majesty's Consul at Hankow, by Earl Russell; Ross, surgeon A.C., M.D., on return from China, on appointment to the 92nd Highlanders, by Dr. J. B. Gibson, C.B., Director-General of the Army Medical Department; Rivett Carnac, Lieutenant R. Stirling, 19th Hussars, on his return from India, and late service in China, by his father, Vice-Admiral Rivett Carnac.

BANKRUPTCY OF JAMES CROSSLEY, OF THE CHINA TRADE.—The bankrupt was a merchant of 43, Mincing-lane, City, and of No. 23, Victoria-road, Old Charlton. He now came up for examination. Mr. Lawrence appeared on behalf of the assignees; Mr. Harrison for creditors; and Mr. C. E. Lewis supported the bankrupt. From the report of Mr. Graham, the official assignee, it appeared that the bankrupt's indebtedness, contracted from 1861 to 1863, represented a total of £90,689, of which a sum of £18,888 was due to unsecured creditors. The assets were stated at £339, and a further amount might possibly be realised from the property held as security. On the 1st of April, 1859, the bankrupt had a surplus of £3,328, and, as accounting for the present deficiency, he returned the following items:—Interest and discount, £4,618; trade expenses, £1,667; commission, £724; rent, £113; domestic and personal expenditure, £2,787; losses, £11,180; and expenses of journey to China, £593. Mr. Lawrence said he was not instructed to oppose. The bankrupt had dealt largely in teas, and there was no reason to question the *bona fides* of his trading. The books had been remarkably well kept. Mr. Harrison, for Messrs. Hyde and Jones, having stated that he did not oppose, the order of discharge was granted.

BRITISH WEST INDIES.—IMMIGRANTS AND LIBERATED AFRICANS.—A return, giving the numbers and other particulars of immigrants and liberated Africans admitted into the British West Indian colonies from 1843 to 1863, has been published. In that period there were altogether 164,505 immigrants and liberated Africans, of whom 981 were negroes taken from slave ships, 86,537 came from the East Indies, 27,575 from Madeira, 14,002 from St. Helena, 12,382 from Sierra Leone, 11,566 from China, &c. A similar return respecting the Mauritius gives a total of 305,963, of whom 302,627 were from the East Indies, 1,497 from captured slave-ships, 843 from China, 692 from Aden, 325 from Ibo, and 39 from Madagascar. A further return relates to the immigrants and liberated Africans who have returned to their own countries, and the amount of earnings remitted through Government agency in their behalf. The number who returned from Jamaica in the twenty years was 1,844, and the amount of earnings (so far as ascertainable), £3,000; from British Guiana 5,412, earnings £61,234. 9s. 10d; from Trinidad 2,680, earnings £39,861. 3s.; and from Mauritius 75,465, no returns of the earnings being supplied.

DEATH OF MAJOR BRABAZON.—A large number of gentlemen connected with the military and sporting world will regret to hear of the death of Major Brabazon, who expired last week, at his seat, Brabazon Park, in the county of Mayo, in his sixty-fourth year. The deceased gentleman had served in the army for many years, and was well and honourably known on the Turf. His eldest son was Captain Brabazon, of the Royal Artillery, whose capture and massacre in the last Chinese war will not be forgotten. Major Brabazon never got over the shock caused by his son's death, and an accident which occurred to him on his way home from China, whither he had gone in the vain hope of hearing some tidings of his son, gave rise to a long illness, which has now resulted in his death. His only remaining son, a lieutenant in the Grenadier Guards, is now serving with his battalion in Canada.

A WAR STEAMER FOR JAPAN.—Messrs. Westervelt and Son, of New York, have completed a war steamer of seven guns for the Japanese. She will leave for Japan in about two months.

BY the death of Lieutenant-General Geddes, Major-General H. A. Hankey becomes a lieutenant-general, and Colonel W. G. Brown, serving as a major-general on the Staff in China, a major-general on the fixed establishment.

THE troop ship *Adventure* is on the point of despatch from Plymouth, with the supernumeraries for the China fleet.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MAY 6.

The First Chamber of the States General has passed the East India Finance Bill by twenty-six to five votes, so that the Opposition, which many people supposed would muster very strongly, were left in a miserable minority.

In a very short time the Java railroads will come under discussion in the Second Chamber. A number of reports and other documents on the subject have again been presented by the Colonial Minister, in addition to those already mentioned in this correspondence. Among them are a letter from Mr. Stieltjes to the Governor General of Netherlands India, dated 6th September, 1863; a note from Lieut. Col. Haitink, of the Engineers; another from the civil officers of the Colonial Department; and another from the Governor General, to demonstrate the feasibility of constructing the branch line from Tempoeran to Ambarawa. Much light will all also be thrown on the subject by a report of the committee of the Indian Association, consisting of Mr. Bachiene, member of the Council of State, Mr. van Kerkwyk, member of the Second Chamber, and Mr. Millard, formerly an officer of the East India Civil Service, now sugar contractor, who were commissioned by the association to draw up a report on the question of the concession for the Java railroad to Messrs. Banck and consorts.

In accordance with the hundreth paragraph of the Electoral Law, one half of the members of the Second Chamber vacate their seats on the 14th June, their period of service having expired, when fresh elections will take place. Among the members who thus retire by rotation are Mr. C. Van Heukelom, Mr. J. Heemskerk, and Mr. S. Kool, representatives of Amsterdam; Mr. F. W. Blom, member for Rotterdam; and Mr. Gevers Deynoot, member for the Hague. Besides these there will be elections of members for the newly-constituted boroughs of Winschoten, Deventer, and Haarlem.

From the Government of Japan the following communication has been received concerning the reduction of import duties on various articles of foreign produce and manufacture, in conformity with the promises made by the Japanese Embassy that visited Europe in 1862:—

"To his Excellency Mr. De Graeff van Polsbroek, Consul-General and political agent of H.M. the King of the Netherlands, &c., &c.

"By the present we make you a communication. The reductions of duty on the import articles contained in the annexed list will come into operation at the following periods:—At Kanagawa on the first day of our first month (8th of February, 1864), and at Nagasaki and Hakodadi on the first day of our second month (8th of March, 1864).

"As the needful orders will be given to the different governors in the above named ports, we request you to communicate this to your several consuls there.

"Representation made with respectful courtesy on the 27th day of the 12th month in the 3rd year of Bunn Cuw.

(Signed) ITAKOERA SOEWOONO KAMI.
INOWOEYE KAWATSINO KAMI.

"ANNEXE.—Ornaments for dresses, looking glasses, perfumed waters and soap, knives and scissors, arms, books, paper and drawings,—all these articles to be imported henceforth at the reduced duty of 6 per cent. *ad valorem*.

"All sorts of wine, glass ware, engines and machinery, drugs and medicines. N.B.—The prohibition on the importation of opium remains in full force by virtue of existing treaties: bar iron, pig iron, iron plates, iron wire, tin and tinned manufactured articles, white sugar in loaves and crushed, clocks and watches; all these articles to be imported in future at the reduced duty of 5 per cent. on the value.

"The following articles used for the preparation and packing of tea to be imported free of all duty: sheet lead, solder, matting, canes, oils for paint, indigo, gypsum, pans, and baskets."

In addition to the list of vessels chartered by the company as given in my last letter the following supplementary list has been published:—*Gelderland*, Capt. Gaaff, *Commissaris des Konings van der Heim*, Capt. W. Kramers, and *Elize Henrietta*, Capt. Deterding,—all for Amsterdam; *Copernicus*, Capt. Algra, *Johanna Maria*, Capt. P. Dam, and *Triton*, Capt. Rusman,—all for Rotterdam; and *Ary Scheffer*, Capt. Kunst, *Aegidia and Pauline*, Capt. Hoogland,—both for Dordrecht.

On the 30th ult., a detachment of supplementary troops, Consisting of 12 non-commissioned officers and 150 rank and file, the whole under the command of Capt. J. Tomei, of the E. I. army (returning to duty from leave of absence to this country), and accompanied by Lieut. H. J. Prins, of the E. I. Infantry, and Lieut. P. K. Andreae, of the E. I. Cavalry, embarked at Rotterdam on board the fast-sailing clipper *Noach*, Capt. J. Ulrich, for Batavia, which vessel immediately afterwards got under weigh and proceeded to her destination.

H.N.M. steam transport *De Heldin*, commander Toutenhoofd, is nearly ready for sea, and is under orders to sail for Batavia on the 15th inst. She takes out a detachment of eighty-eight marines for distribution among the squadron in the Eastern Archipelago, under command of Lieut. Kaat, of the marines, who have already proceeded from this city to Nieuwe Deep, to be in readiness to embark.

A letter from Helvoetsluys announces that the new iron-clad steam gunboat is to be commissioned in the course of this month. The First-class Lieutenant Younker A. C. Van Haeften is appointed to the command. Destination unknown.

A report was in circulation last week that all the aides-de-camp of the Governor-General of Netherlands India had tendered their resignation. The *Courant* of the Hague now asserts that there is not the slightest truth in the rumour, which is nothing but a *canard* of Dutch manufacture, founded on the fact that one of those gentlemen, who has been for some time in ill-health, had obtained permission to return to Europe on sick leave.

PASSENGERS ARRIVED.

Per *Maria Adolphine*, Capt. Blom, at the Texel, from Batavia: Capt. N. H. Cornelissen, of the E. I. Army, and family; Mr. C. H. Fransen, Mr. Pastoer, and twelve passported soldiers.

Per *California*, Capt. De Wyn, at Amsterdam from Batavia: Mr. and Mrs. Leonhardt, Mrs. Trail and three daughters.

Per *Schelde*, Capt. Koffman, at Middelberg from Batavia: Mr. and Mrs. L. Kruyk and four children, Mr. and Mrs. Sperhake and child.

PASSENGERS OUTWARDS.

Per *Triton*, Capt. Rusman, from Rotterdam to Batavia: Mr. and Mrs. and Miss Breton Vincent, Miss C. Kroon, two Masters Kroon, Miss Boerenbreker, Mr. Sloten, officer of the first class E. I. Civil Service, Mrs. van der Heuvell and Javanese servant, Mr. de Buck, and Mr. H. A. Verduyn.

Per *Loevenstein*, Capt. Hulshoff, from Rotterdam to Batavia: Messrs. Z. H. Bachiene and P. Rutgers.

Per *Philips van Marnix*, Capt. Ruyven, from Rotterdam to Java: Capt. and Mrs. Bode, E. I. infantry, three children, and Javanese servant, Mr. and Mrs. W. Buurmann, Mrs. and Mrs. Bruins and two children, Messrs. Boot, Carstens, Bosch, de Kruyff, Faber, Hoofd, Meyer, Raadsma, and van der Burgh.

COMMERCIAL.

COFFEE.—There is but little alteration in the state of the market since last mail. Prices are, on the whole, well supported. Among the sales of the fortnight were 1,200 bags private trade Java, and 1,836 bags of Sumatra, both at secret prices; 727 bags of good bright Preanger at 45 cents, and 71 mats of bright do. at 46, both ex *Insulanern*. The company have announced their third sale in this year for the 18th inst., when 86,200 bags will be brought forward. The stock of coffee on company's warrants at the end of March was 87,761 bags, to which must be added the last sale of 82,527 bags, making together 170,288 bags of E. I. coffee. The deliveries in April were 78,297 bags, so that the present stock is 91,991 bags. The total deliveries of the four first months of this year amounted to 222,175 bags, against 373,101 bags at the corresponding period of last year; 320,917 in 1862, 352,146 in 1861, and 346,189 in 1860, so that there is a great falling off as compared with previous years.

SUGAR.—The excitement of the past few weeks has given way to a reaction, and a dead calm has set in. The only sales reported since last mail are 1,900 kranjangs of Java, No. 14¾, ex *China*, at secret prices, and 450 kr. of do., No. 13, ex *Germanica*, at 39 fl. The Company have announced their next sale to take place on the 24th inst. It will contain 80,400 kranjangs of Java, against 71,439 kr. in their May sale last year. Refined goods are dull, and prices have a drooping appearance.

RICE.—Market quiet. Holders of rough grain ask too high a figure to lead to business. In cleaned descriptions the dealings were confined to a few small purchases for the trade, but prices were well supported.

SPICES.—Nutmegs have been in lively request during the whole of the fortnight at an advance of 5 to 6 cents, 78 cents having been paid for No. 1, and 71 cents for No. 2. Mace has also experienced a considerable demand at improved values, as several parcels were taken for exportation at 62 cents. Some lots of Java cinnamon, No. 3, have been sold at 91 cents.

EAST INDIA HIDES.—A fair amount of business has been done at full rates. Among the sales were 175 Passaroean ox, per *Merchantman*; 780 Sourabaya buffalo, per do.; 55 Batavia do., per *Isaac da Costa*; 974 do., per *Johanna*; 1846 do., per *Rudolf*; all by private contract; and 1850 Java ox, per *A. R. Falck*, by tender. 7,000 Java ox, chiefly of fine quality, and light weight, are advertised for public sale on the 12th inst.

METALS.—Nothing to say about copper. Of Banca tin a few sales are reported at 67¼ fl., at which figure there are sellers. The deliveries of the first four months of this year were 26,817 blocks, against 30,288 last year. The stocks on Company's warrants are now 48,721 blocks, against 39,452 last year. In the Company's warehouses are 119,475 blocks unsold, against 101,325 last year.

INDIGO firm, but with limited dealings, in expectation of some sales advertised by private importers. The Company's sale went off well. Result at foot.

RATTANS can with difficulty keep up their value. Among the sales were 4,097 bundles (180 piculs), ex *A. R. Falck*, and 1,800 bundles ex *Margareta*.

JAVA TOBACCO is lower, judging from the result of some public sales held here, though it is but fair to state that a great deal was of very inferior quality, and the rest more or less sea-damaged. Since last mail the following have arrived:—189 bales W. Malang, per *County of Lanark*, 130 bales K L, per same ship, and 501 bales K L per *Aldeboran*; stock, 2,804 bales.

GUTTA PERCHA.—There has been a public sale of this article at Rotterdam, the result of which was as follows:—

26,000 kilogr., per *Cornelis Anthonie*:—
- 7,000 kil., No. 1, sold at 90 to 94 cents per ½ kil.
- 16,000 „ No. 2, „ 75 to 79 „
- 3,000 „ No. 3, „ 55 „

2,100 kil. per *Herman*:—
- 1,200 kil., No. 1, sold at 76 to 78 cents per ½ kil.
- 900 „ No. 2, „ 69 „

2,700 kil. per *Brouwershaven*:—
- 280 kil., No. 1, bought in at 175 cents per ½ kil.
- 2,230 „ No. 2, sold at 120 „
- 190 „ No. 3, „ 85 „

1,500 kil., also per *Brouwershaven*:—
- 200 kil., No. 1, bought in at 135 cents per ½ kil.
- 1,300 „ No. 2, sold at 120 „

MANILA CIGARS.—At public sale, of 182,500 cigars, 16 lots were sold at from 13 to 62 fl., and 9 lots bought in at 50 to 61¼ fl.

Result of the Company's sale of 670 chests and half-chests of Java indigo on the 2nd of May. There was a brisk demand, and the whole sold, in comparison with the sale of last October, as follows:—

Very low qualities	Par to 10 cents.	higher.
Ordinary	10 „ 20	„
Ordinary middling ..	20 „ 40	„
Middling and good middling	30 „ 50	„
Fine middling	40 „ 60	„
Fine and very fine ..	40 „ 60	„

Thirty-two bales of Java cochenille. All sold with lively competition, as follows, compared with last sale:—

First quality	5 to 10 cents.	higher.
Second	10 „ 15	„
Zaccatille	Par.	

PORTUGAL.

A correspondent writes from Lisbon on the 24th ult.:—This letter will be forwarded by the steamer *Maria Pia*, belonging to the Portuguese Steam Company Lusitania, which no doubt finds it attractive to establish a line between Lisbon and London in the differential addition duty of one-fifth imposed upon goods not the produce of England or British possessions imported into Portugal in British ships. Tea from London will form the principal element of freight for the Lusitania Company. The Portuguese direct navigation with China became so limited some years back that it was found necessary to allow indirect importations, the exorbitant freights under the protection of the national flag from Macao causing consumers in this country to pay more for it than the rest of Europe. Since the admission of indirect importations of tea Portuguese sailing vessels from London have, with great irregularity, supplied the principal wants of the country, exacting higher freights even than the English steamers under the one-fifth protective duty, the consumers continuing to pay an artificial price, to the prejudice of the revenue and without benefit to Portuguese ships, which have had to remain long upon the berth in London before they could complete a cargo, thus sacrificing the profit derivable from the high freight upon tea while filling up with other cargo at low rates as compared with the English steamers engaged in the trade. The Portuguese Government does not, however, always allow the prejudicial effect of existing laws to continue when once observed. It has just submitted to the Cortes a Bill to reduce from two per cent. to one per mil the duty upon the transshipment of goods from one vessel to another in its ports, because the war between Denmark and Germany brought to its notice the fact that vessels laden with Brazilian produce for belligerent ports might be transshipped here with a nominal duty, while they would seek other ports to call at and transfer cargoes if the two per cent. duty were maintained. The tobacco monopoly was to have been suppressed on the 1st of May, but the debates in the House of Deputies had delayed the Bill so long that the Government agreed with the Peers in Committee to alter the clause for suppression to the 1st of January, 1865.

Literature.

The Rudiments of the Chinese Language, with Dialogues, Exercises, and a Vocabulary; by the Rev. JAMES SUMMERS, Professor of Chinese in King's College, London. Quaritch, Piccadilly.—This little book will be eagerly sought for by those who are about to visit China for the first time, who will be rejoiced to find that some 160 pages can be made to contain such an introduction to the language as will enable them on their arrival in the country to speak and understand common words and phrases. The Roman alphabet is employed in the book, but sufficient examples are given of the Chinese characters to habituate the student to their use and signification. Generally speaking, the Chinese language is thought to have so many characters as to require a life-time to obtain a thorough knowledge of them. It is pleasant, therefore, to be able to correct this misconception by the authority of the Professor of Chinese at King's College, who tells us—

The number of different characters in Chinese is upwards of 40,000, but many thousands of them are ancient forms, and, therefore, obsolete. Thousands more are simply curious variations of characters which are in use, but which are not wanted. Not more than 10,000, it is believed, enter into ordinary use, and 5,000 are quite sufficient for the general purposes of literary composition.

Mr. Summers has, no doubt, thoroughly fulfilled the object he proposed to himself when setting about the rudimentary manual before us, viz., to make it "a stepping-stone to further efforts, and a practical grammar of the first principles of Chinese etymology and syntax." The purchaser will have to congratulate himself that the task has been undertaken by one thoroughly competent to discharge it.

The new number of the *Chinese and Japanese Repository* has a continuation of the "Story of Han-wan and the White Serpent," with which we expressed our delight on a former

Digitized by Google

occasion. The history proceeds in a very interesting fashion, and the reader will agree with us in hoping that we shall not part very hastily with the enchantments perpetrated by the Mistress of the Thunder-peak Pagoda. The first article is devoted to the "Mythology of the Dayaks of Banjer-masing." There is a fund of meaning in the following item of their creed :—

The god who ranks next to Hattala is Radja Ontong. "The King of Fortune," also called Radja Blawang Bulau, *i. e.*, the "King of the Gate of Gold," and his wife, Puter Sawawang Langit. Radja Ontong is constantly overburdened with work; his hands are never suffered to rest. *Bulau, salaka, blanga, garantong*—*i. e.*, "gold, silver, vessels, copper-drums"—are always being applied for, each person being anxious to get the largest share of these articles. But though the store of treasures of Radja Ontong is immense, even inexhaustible, he is not permitted to distribute them arbitrarily; for before he gives away any of these precious things to the suppliants, he must apply to Hattala for his consent, which is only then given when all the preliminaries have been conducted in the proper manner, which is not often the case. Radja Ontong being so much harassed by the fortune-seeking Dayaks, leave has been given him to present his applications in writing, it being impossible for him to go on every occasion in person to Hattala, and ask his consent.

The other articles are a continuation of Sir John Bowring's translation from the "Arte China" of Pére Goncalves, and a translation by the Editor from Von der Gabelentz's "Sketch of the Mongolian Language and Literature."

At length a blank in English literary history has been filled up that, in these days of Memoir and Diary publishing, has always surprised one should have existed so long. Mr. PERCY FITZGERALD'S *Life of Lawrence Sterne* renders "poor Yorick" simple, but ample justice. The author shows that many of the evil stories current about the writer of "Tristram Shandy" were little better than slanders. The truth is, Sterne's enemies had in himself their most potent ally. His asserted neglect of his mother, wife, and child, is proved to be an invention. Mr. Fitzgerald has collected a vast deal of information about the "life and times" of his subject, and, dealing with his materials in an impartial spirit, has placed the great humorist in a far more favourable light to that in which he has usually been regarded.—The Viscountess STRANGFORD'S *Eastern Shores of the Adriatic in* 1863, *with a Visit to Montenegro*, is a book that will be eagerly perused, dealing as it does with a portion of Europe hardly so well known to us as are the Sources of the Nile —thanks to Captain Speke. Lady Strangford's course of travel lies from Corfu into Albania, and by way of Ragusa into Montenegro and Dalmatia, and so homewards into Austria Proper. Along this route the Viscountess notes pleasant pictures, fluttering incidents, and agreeable civilities; while, by the side of these easier passages of feminine narrative and gossip, we have in three separate chapters a good deal of clear observation on the politics and prospects of the East of Europe, from the pen of Lord STRANGFORD, to whom wit and diplomatic acuteness descend hereditarily.—M. GUIZOT'S *Memoirs of a Minister of State, from the Year* 1840, resume the story of the author's official life with his return to Paris as Minister of Foreign Affairs, and carries it on to 1844. The Eastern Question, and the complications that led to the bombardment of St. Jean d'Acre, begin the volume, which then treats of the Paris Fortifications, the negotiations concerning the Right of Search, the visit of Queen Victoria to Louis Philippe at the Chateau d'Eu, that of the Emperor Nicholas to England, and Louis Philippe's return-trip to Windsor. It is needless to say that all the great statesmen of the period are introduced to the reader in turns, and that no one who has a spark of political feeling or even of love of mere gossip in his breast will be one unnecessary moment deprived of the pleasure of reading the volume whose contents are thus summarised.—Of works of fiction that have appeared since our last reference to books, we can recommend Mr. ALSTON COLLINS'S *Bar Sinister*, though the performance is perhaps happier in its scenery than in the characters.—Mr. DYCE'S *Bella Donna; or the Cross before the Name*, is a clever book, with the drawback of having a most hateful set of persons for the actors in it.—*Vladimir and Catherine, or Kiev in the Year* 1861, consists of a number of detached pictures of Russian life and manners, written by one who evidently has a personal knowledge of the scenes he describes.—Professor KINGSLEY'S *Roman and the Teuton, a Series of Lectures delivered before the University of Cambridge*, may be described as a book made up of light and rapid utterances of the thoughts that have occurred to the lecturer in his perusal of the works he has had occasion to "read up." The Teuton is the hero of the disquisition, while the Roman is unduly depreciated. However sad may have been the fate of the race, it should never be forgotten that Roman institutions are to this day at the root of all the liberties of modern civilisation.

The East India Ready Reckoner; by C. D., just published by Smith, Elder, and Co., is a set of tables showing the cost of any number of articles in Indian currency, from one pie to one rupee, advancing one pie at a time, including numbers answering to fixed Indian weights and measures. The tables go up to 14 annas 11 pies, and the accuracy of the book has been secured by repeated and rigid tests.—Mr. Bohn has brought his republication of *The Bibliographer's Manual of English Literature*, by LOWNDES, to a close in Part X. An appendix is to follow, however, which will contain, *inter alia*, a complete list of all the books printed by the literary and scientific societies of Great Britain, with particulars respecting them. The undertaking now so nearly completed has cost Mr. Bohn seven years of anxiety and application, and right well has he earned the thanks both of the scholar and the general reader. The latest addition to the Select Library of Messrs. Smith and Son is a two-volume republication of LEVER'S *Martins of Cro'Martin*. This tale has, perhaps, not achieved the popularity of others of the author's productions, simply because the public are generally unwilling to accept instruction from any man to whom they have been in the habit of looking for amusement only. Yet Mr. Lever tells us in the Dedication that he bestowed "much thought and labour" on the work; and the dialogues between Captain Martin and his fashionable associates have an epigrammatic smartness about them, combined with intense reality, that will bear comparison with anything to be found in the long series of modern fictions. This cheap reissue is worth the attention of all who prefer a mixture of food for solid thought with the lighter entertainment for an idle hour.—The two last numbers of *Macmillan's Magazine* are of superior attraction. Mr. Henry Kingsley's "Hillyars and the Burtons" interests the reader the farther the story advances. The scene in Old Chelsea Church invests a building we all know with a reality such as it never possessed before, by mixing it up with the deeds and emotions of living men and women. Mr. Broughton's "Letter from a Competition Wallah" is devoted to the subject of Christianity in India. In his opinion we are not to look for any wide or rapid conquests there to the profession of a purer faith. But if the prospects of missionary enterprise in India are discouraging, it does not follow there is no hope for the future. As one of the missionaries has described it—"Hinduism is dying; yea, is well-nigh dead, as respects the hold it has on the mind of the public." The following is true of other quarters than Bengal and of other Eastern modes of faith than Brahminism :—

However little we may have succeeded in doing towards introducing Christianity, we have done a great deal towards driving out Brahminism. The fresh air of European civilisation circulates freely through every pore of this vast community. That gross and grotesque system of religion which has prevailed through so many ages of semi-barbarism cannot hold its ground in the face of our art and science, our energy and good sense, our liberal views and purer morality. The gigantic edifice of class exclusiveness is shaken to the very foundation. The Government school had already done much, and the railroads seem likely to complete the work. A Brahmin who travels from Burdwan cheek-by-jowl with a butcher, in order to see his son go up to receive a prize at the Presidency College, in company with the offspring of a sweeper, is likely to go home with some new ideas on the question of caste.

The series of the Letters is completed in the May number in which also is the announcement that they are to be republished immediately in a separate form, and the pseudonym is discarded for the author's real appellation, G. O. Trevelyan.—Dalziels' *Illustrated Arabian Nights' Entertainments* grow in the spirit of the engravings with each issue. *The Vicar of Wakefield*, from the same *atelier*, also improves, but we still retain our opinion that something in the vignette style would have better suited the simplicity of that charming tale in the way of embellishment.—*Minchmoor*, by JOHN BROWN, M.D., is a reprint of a sketch by that popular writer, which first appeared in an Edinburgh periodical. The hill so called, "lying between Tweed and Yarrow," however little frequented by excursionists hitherto, is now destined to be climbed by thousands, who will be urged thither by this delightful essay on the traditions and poetry connected with it. *Jeems the Doorkeeper* is another of the same series—of an interest too local for general readers, who, with Jeems himself, will prefer "the fancical line —there is more leecence."—Mr. Murray, of Albemarle-street, has just brought out, in two volumes, with numerous illustrations, *Travels in the Central Parts of Indo-China* (*Siam*), *Cambodia, and Laos, During the Years* 1858, 1859, *and* 1860; by the late M. HENRI MOUHOT, French naturalist. A notice of this important and interesting work will appear in our next number.

LONDON, FRIDAY, MAY 13, 1864.

THE TYCOON BROUGHT TO BAY.

HOWEVER craftily the TYCOON may have manœuvred to turn into his own reservoir the wealth that flows on the current of foreign trade, each mail brings intelligence to show that the Daimios are as resolutely bent on changes that will enable them to obtain their fair share of the fertilising stream. In another part of this journal will be found a remarkable document which has been presented to the TYCOON and the MIKADO by the Prince of ECHIZEN, a veteran statesman who is looked up to with great respect, and will be held by the Japanese themselves to speak the sentiments of an independent and disinterested looker-on, inasmuch as he some time since resigned his principality to his son. Our old friend SATSUMA, too, steadfastly keeping to the object he has so long had in view, has at last succeeded in obtaining from the two Sovereigns the important concession that the whole question of foreign trade shall be referred for investigation to three eminent Daimios, one to be chosen by each of the parties principally concerned in the discussion. In consequence of this arrangement, we learn that the MIKADO has appointed as his representative a nobleman who is the head of the MITO family, and said to be opposed to foreigners. The TYCOON has selected OWARI, who, though much mixed up in late affairs, has contrived to keep his predilections a secret. SATSUMA himself has chosen no less able and fearless an advocate than MATS' DAIRA ECHIZEN-NO-KAMI, the man whose opinions are so decidedly set forth in the memorial we have above adverted to. It is clear that the persistency of the party of Daimios friendly to an extended intercourse with foreigners has won the day. The MIKADO and the TYCOON have been obliged to yield. However much opposed the Spiritual Emperor may have been to the naturalisation within his dominions of "barbarians"—more hateful still that they are Christians—the long-talked-of interview with his Temporal fellow-potentate has mitigated his views. The TYCOON, as we have over and over again stated, derives so much profit from the new-born commerce that he will submit to almost anything rather than go back to the old system of secluded isolation. The Daimios have now brought him to bay, and he will be obliged to face the decisive question of whether trade is to be free or altogether suppressed. One remarkable fact has just become known, which demonstrates convincingly the main bearing of the points of difference between SATSUMA and the Yedo Sovereign. The former is said to have obtained permission of the Gorojio, or Council of State, to dispose of a thousand bales of raw silk in the Kanagawa market. It is supposed that he will be allowed to escape the heavy exactions levied by the TYCOON'S Government on ordinary traders, and that the large margin of profit that will thus be left him, besides benefiting himself, will be an overwhelming argument in favour of his views on foreign trade with the other Daimios, when the result in hard cash is displayed before their eyes. Everything, in fact, betokens a year of peace and prosperity for the foreigner in Japan. Sir RUTHERFORD ALCOCK, too, appears to have acquired the conviction that any display of material force is not needed, and is better away, for the party of British soldiery sent forward from Shanghai have been sent back thither in the *Vulcan*, the very one of Her MAJESTY'S steamers that took them up.

TAIPING ADVOCATES AND THE RECENT DEBATE ON BRITISH POLICY IN CHINA.

AN anonymous pamphlet has been handed to us, intitled "Extracts from 'The Taipings as They Are, by One of Them.'" Not having seen a book with that title, we presume that it is not yet published; and as the author has rushed into print in this garbled form, with its rabid contents, there are reasons for supposing that his M.S. has been rejected by the publishers. Be that as it may, the *brochure* before us is the strangest mixture of vulgarity, piety, and politics on the Taiping question we have seen since the issue from Nanking, by the American missionary, ISSACHAR ROBERTS, of his famous report for 1860. It is the old story over again, of the purity of Taiping Christianity, advanced with the vehemence of a blind partisan; of the leniency and perfection of their Government; of the cruelties of the Imperialists, and of the perfidious policy England has pursued against the insurgents. These we might tolerate, as matters of opinion, however strongly expressed, but we must object to the republication of that disgusting, falsely-unnatural account of Imperial atrocities at Shanghai, which first appeared in the *Times of India*; and which he endorses "I can avouch its entire accuracy," though it has been long since proved to be a pure invention. With this exception, the pamphlet is worthy of a perusal, as containing some fresh information from the ranks of the Taipings, even though that be immensely exaggerated.

The writer starts with the assertion that this is a patriotic movement in which the people sympathize, and he considers the Chief, HUNG-SIU-TSIUEN, the future deliverer of China from bondage. No doubt this element exists amongst the voluntary followers of that personage, but it cannot be said that the people sympathized in the movement; for if such had been the case they would have risen *en masse*, and rallied round the standard of the TIEN-WANG. On the contrary, wherever the Taipings went, the peaceable inhabitants looked on their approach with fear and trembling. Those who could not fly from them were made captive; the men and boys pressed into their ranks as slaves, whom they branded with a red-hot iron on the face with Taiping characters, and made them labour as beasts of burthen, under pain of death. Instead of being a patriotic movement, for the purpose of driving the Manchoo Tartars from China, as alleged, it became a war against their own people, whom they plundered—the non-workers robbing the industrious; in fact, the incursions of banditti on a great scale, who carried desolation and ruin before them, where formerly peace and plenty reigned. As far as punishing the real Manchoos is concerned, it has been a signal failure, for they have never yet confronted Tartar troops; while it is worthy of note that the most cruel mandarins and Imperial forces they have encountered have been pure Chinese. That monster of executioners, YEH, was not of Tartar origin, he came from the central province of Hoopeh, and the Futai LE, so notorious from the Soo-chow treachery affair, is a native of Honan—a province which the pamphleteer correctly describes as "producing some of the best soldiers," and finest men in China. Having seen many of these men, as well as that Mandarin, we can vouch for the description the author gives of the Honan braves in the Taiping ranks as superior to all others in physical proportion, stature, and intellectual features. But he clings to the common error that the Government and its officials, and the laws they administer, are purely of Tartar origin, and have been so since the accession of the present dynasty, two centuries ago. This is about as correct as if a Chinaman concluded that the members of the British Government and its executive throughout the realm of the military, naval, and civil services, were all Germans, because Her MAJESTY is descended from the House of Hanover. As in this country the Guelphic dynasty accepted the national laws, so in China, the Manchoo dynasty adopted the code revised by CONFUCIUS, the basis of which had existed from time immemorial. That the modes of punishment are cruel and barbarous is undeniable, but they are purely of Chinese invention, and have been introduced into Mongolia, and the tributary states of this vast empire, as heir-looms of that long-haired race, which this Taiping movement ostensibly seeks to replace on the throne.

If we are to credit the unknown writer of this pamphlet, he is in some measure an envoy from Taipingdom to the Governments of Europe, interested in the commerce of China. After stating that they threaten to destroy the mulberry trees and tea plantations in the districts they occupy, if foreign support to the Imperialists be not withdrawn, he adds:—"I will now

Digitized by Google

"state what I am authorised to by the CHUNG-WANG. Upon "leaving him to proceed to England—considerably influenced "by this errand—I was commissioned to inform all European "authorities that, even now, the Taiping Government would "magnanimously forgive all their unprovoked murderous "aggressions, *if they were discontinued.*" From the earnestness in which he espouses the cause of the rebellion and its promoters there is evidence that the author believes, not only in their earthly success, but the divine mission of the TIEN-WANG, for which he quotes Scripture as follows:—"The "visions of HUNG-SIU-TSIUEN, if compared with Scripture, will "be found not so extravagant as has been represented. The "visions seem to have been the especial act of GOD to prepare "the man for the reception of His Holy Word, of which, at "the time of the vision, they were totally ignorant, and are in "accordance with the prophecy of JOEL quoted by PETER in "Acts: 'And your young men shall see visions.'" After perusing sixty-four pages of matter similar to these extracts, it naturally occurs to us, that if the author believes so firmly in the mission of the Taipings, and "as one of them," being delegated to address "all European authorities," why does he suppress his name—why "hide his candle under a bushel?" If the Taipings are such excellent Christians as he represents them to be, why should he be ashamed of announcing himself? Perhaps he blushes to acknowledge his virulent diatribes against the British Government and the people of England in the following *morceaux*, with which his lively pamphlet winds up:—

"If the present policy of the British Government with regard to China is to be persisted in, then I can only say that for England has been reserved the everlasting ignominy of striving to extinguish the last vestige of the glorious light of Christianity and patriotism in this mercenary-ridden land; and the name of England, so jealous of liberty for herself, will be handed down to all succeeding ages as a mocking bye-word for all that is base and perfidious. Is British principle to be made, or considered, subservient to any influence in the world? Yet lately it has assumed a most variable sort of existence in Chinese affairs. However, *nil desperandum.* The Taiping Chiefs say:—'The Mings took a hundred years to found their dynasty, and possibly so may we; but most assuredly, sooner or later we shall expel the Tartars and succeed.' What mockery is England's sympathy with Poland? Is liberty, patriotism, or life, so *very different* on opposite sides of the same world? What mockery and inconsistency is her sympathy with and reception of Garibaldi, the Italian patriot, when Hung-sui-tsiuen, the Chinese patriot, is by British hounds to be hunted to the death!"

We gladly turn from a review of this pamphlet—which is anything but creditable to an Englishman—to a consideration of the debate in the House of Commons on the same subject. The discussion, which was almost solely sustained by the mover, Mr. LIDDELL, and the Under-Secretary for Foreign Affairs, Mr. LAYARD, was of a most interesting character, and did credit to both debaters. The former hon. member opened the question in an able and temperate speech, while the latter, in reply, produced quite a budget of fresh documents to support his arguments in defence of the Government policy. Among these some new matter appeared that is worthy of comment. It appears that Major GORDON, in his communication to General BROWN, assigned as his reason for not throwing up the command of his force after the treacherous affair at Soochow, that it was "his firm belief the troops, to a man, "would have gone over to the Taipings; the Imperialists would "then be defeated; Shanghai would have been sacked, and an "enormous amount of British property destroyed." The possibility of the force deserting to the rebels, or, what would be not improbable, starting as bands of marauders on their own account, has always been a matter for grave consideration; and hence the anxiety of their foreign officers to see that they were always properly cared for in food, clothing, and quarters, with regularity of pay. This being the case, the next piece of information announced by Mr. LAYARD is important, viz.:—"That Major GORDON was no longer in the service of the "Chinese Government, because when Her MAJESTY'S Govern-"ment learnt the disgraceful act of treachery that had been "committed, they immediately repealed the Order in Council "which gave permission to British officers to take service "under the Chinese Government." We fear that the rescinding of that order may bring about that state of disorganisation which is to be dreaded, as the great difficulty all along has been to officer the regiments with competent and respectable foreigners. The withdrawal of the English officers, who are the mainstay of the force, may cause serious disaffection amongst the men.

Not the least interesting feature in the debate was the perusal of a letter from Mr. MICHIE, partner in the old China firm of LINDSAY and Co. Without throwing into the shade the abilities of other talented merchants of all nations in Hong Kong and Shanghai, no gentleman is better qualified to give a weighty opinion on the affairs of China. His experience in all parts of the empire, his comprehensive views and impartial judgment, eminently mark him as the representative of the British merchants, in communicating with the Government. Neither must we overlook the impartial and friendly course pursued by the Hon. ANSON BURLINGAME, American Minister at Peking, in so ably assisting Sir FREDERICK BRUCE out of the LAY-OSBORN difficulty; while his despatch to Mr. SEWARD, read to the House by the Under-Secretary, displays his acuteness and ability as a diplomatist.

THE JAPANESE AMBASSADORS.

(FROM OUR PARIS CORRESPONDENT).

The three Ambassadors, accompanied by their chancellor and secretaries, were received at the Tuileries on the 3rd inst., with all the ceremonies usual on such occasions. The Emperor and Empress were seated on the throne, having the young Prince near them, and were attended by the great officers of State, the Commander of the Imperial Guard, and the officers and ladies of the Imperial household. The Minister for Foreign Affairs was also present. The First Ambassador, his Excellency Ikeda Tsikongo no Kami, read an address to the Emperor in the Japanese language, which was first translated into Dutch by the Japanese interpreter, and afterwards into French by M. Blekman, interpreting secretary to the French legation in Japan. The purport of the address was as follows:—

"Sire,—In accordance with the instructions which we have received from His Majesty the Tycoon of Japan, to offer to your Majesty proofs of his sincerity and good will, we have the honour in our quality of Ambassadors respectfully to present to your Majesty these autographic letters, expressing at the same time our wishes for the welfare of your Majesty, and for the prosperity of your subjects.

"Since a treaty was concluded between the two Empires friendship has increased from day to day; but, in consequence of great changes in our ancient customs, there have been disorders in the national feelings; all possible efforts have been made to bring about order, but, at present, it has not been accomplished.

"Japanese have in fact fired at one of your Majesty's vessels of war, and have even assassinated one of your military officers. On this subject His Majesty the Tycoon has ordered us to express all possible regrets for these accidents, and, in order to show his goodwill and amicable feelings, to confer with one of your Majesty's chief subjects, so as to give such explanations as may be necessary, in order that mutual good relations may continue eternally.

"His Majesty the Tycoon prays your Majesy to have confidence in us, for we have all three been chosen by himself."

The First Ambassador then presented to the Emperor the letters in the handwriting of the Tycoon.

The Emperor then addressed the Ambassadors as follows:—

"I am indebted to the Tycoon of Japan for having comprehended the necessity for giving me explanations of the difficulties in the way of the execution of the treaty concluded between us and respecting the violence committed against a French officer. I sincerely desire to see our relations extend day by day; but in order that they may do so your Government must, in the first place, create respect for the rights of nations, and be itself thoroughly convinced of the accord that exists amongst the European Powers to defend their honour and their interests in far distant countries.

"Your mission here is a proof that your Sovereign regrets' what has happened, and I see you amongst us with pleasure.'

The Emperor's reply has created considerable surprise, not only as regards its spirit, but also its form, which is singularly familiar and undiplomatic; in fact the first line—"Je sais bon gré au Taicoon," is colloquial to the last degree, and the expression, which is almost equivalent to "I thank you kindly," would not be used by the most careless writer. Surely there is no room for much astonishment that the Emperor should speak pretty plainly respecting the events referred to, and he probably selected the unconventional form in order that his meaning might be understood by all the world. He did not require the use of picked language to conceal his thoughts.

The Ambassadors were carried to the palace and afterwards back to their hotel in the Imperial carriages by the introducer of ambassadors and other officers, and entered the court of the Tuileries by the triumphal arch and gate of honour between

Digitized by Google

two lines formed by a battalion of the infantry of the Imperial Guard. After the reception the Japanese visited M. Drouyn de Lhuys, the Minister of Foreign Affairs, who immediately returned their visit. A long and interesting conversation is said to have taken place between the Minister and the First Ambassador, who is said to exhibit most remarkable intelligence.

The Envoys afterwards called and left their cards on all the Ministers of State, and the Presidents of the Two Chambers and of the Council of State, and in the evening they gave a grand dinner to the Master of the Ceremonies, who had introduced them to the Emperor, and some other gentlemen. The Embassy attracts attention by the munificence of its arrangements, and it is asserted that they are to expend £200,000 in France, and at the rate of thirty-three millions of francs, or £1,320,000, a year during their stay in Europe. A good discount may be knocked off this account, and a liberal budget be still left. It is quite evident that the Japanese Government has selected able men and has given them important work to perform, and it is to be hoped that they will return to their own country with a sound appreciation of the civilisation and resources of Europe, and that their reports will be the means of preventing the recurrence of such scenes as those which have recently occurred between the Europeans and the Japanese, and of establishing a thorough and lasting understanding between them. The Ambassadors have, it is said, taken a step which certainly distinguishes them from all former Eastern emissaries; they have called in a Parisian tailor, and are about to don the coat, waistcoat, and trousers of Europe; much, doubtless, to their own discomfort, especially in the dog-days, which, however, will be mere happy days to them, and our July sun a mere farthing candle. Talking of costume, it may be mentioned that the Ambassadors passed the evening of Wednesday last at the house of M. Drouyn de Lhuys, and that the dress of the First Ambassador created quite a sensation. It consisted of an outer garment of white crape, with gold embroidery and black satin facings, an inner one also of white crape and a waiscoat of blue satin. The Japanese interpreter, Suo-Da, was quite a lion amongst the ladies, dealing out his autographs on all sides, and now and then venturing on an elaborate French compliment. The Ambassadors have been to the Opera and the Theatre Lyrique; at the former they saw a ballet, and went behind the scenes; they seemed deeply interested, and let us trust that they did not carry away a very unfavourable impression of European morality.

The body of the officer of the Embassy who died at Marseilles, was embalmed and afterwards buried in the cemetery of Saint-Pierre, several of the members of the Embassy having gone from Paris to be present at the ceremony. After the coffin was placed in the grave and covered with earth, a small brazier, half filled with burning charcoal, was placed on the ground, and each of the mourners, after kneeling and saying a short prayer, threw a small quantity of incense on the fire; this was all the ceremony. The other day the Ambassadors sent 300 francs to the Prince Imperial Asylum. A story is going the round of the papers that some days since, when making purchases at a jeweller's in the Rue de la Paix, the shopkeeper was so struck by a parasol carried by one of the Japanese, that he proposed to accept it in payment for a certain quantity of coral ornaments selected for purchase by his visitors; the proposal was readily accepted, and it is said that half the parasols of the Embassy have since passed into the hands of the speculative jeweller.

The following item appears in a Paris paper:—

The world of Paris is gone mad after the Japanese. This embassy, regardless of the "happy despatch" which may await them on their return, are enjoying themselves in the most reckless manner. Only last night I found several secretaries of legation—where, do you think? why actually behind the scenes of the Grand Opera, surrounded with ballet girls! European secretaries of legation know better than that, at any rate, though they do not know much as a rule. As for "Mabille," and the "Chateau des Fleurs," they are there every night. On Wednesday they "entertained at dinner." I saw the *menu*, but it contained nothing worth recording; judging, however, from the list of wines selected, I should say that the very best of everything is nearly good enough for the dusky diplomacy of Japan.

THE P. AND O. COMPANY'S SERVICE.

THE P. and O. Company's Southampton steamers will, in future, in order to avoid delay in transferring the mails from Alexandria to Marseilles, as sometimes now occurs, make one trip between Alexandria and Marseilles before returning to Southampton; so that the two lines will, in fact, be worked by the same boats, and not, as hitherto, special boats for each service.

COLONEL COOKE IN CHINA.—During the recent debate on China, Mr. Liddell mentioned the name of Colonel Cooke as that of a British officer in the Chinese service. This was an error among the many introduced on the occasion by members not thoroughly "up" in Chinese affairs. Although Colonel Cooke is an Englishman, yet he was not brought up to the profession of arms, and holds his rank in the Anglo-Chinese force from the native authorities, which he attained by his natural ability for generalship, and has, for some time, commanded the contingent at Ningpo. In the event of Gordon relinquishing the Chinese service entirely, it is probable that the post will be offered to Cooke.

IMPORTANT ADMIRALTY DECISION.—This was a cause of necessaries. The plaintiffs, Messrs. Thomson, Watson, and Co., of the Cape of Good Hope, claimed £1,210. 0s. 5d. for coals and ship's stores there supplied in February, 1859. The defendant, Jose Ramon Yglesias, the owner of the *Princess Charlotte*, pleaded that on the 30th of October, 1861, he purchased that steamer from Jonathan Dorning, of Liverpool, and J. H. Stebbing, of Southampton, shipowners; that at the time when he so purchased her she was a British vessel, duly registered under the name of the *England*; that he, the defendant, at that time had no notice, actual or constructive, of the plaintiffs' claim; and that at the time of the arrest of the vessel in this suit he, the said J. R. Yglesias, was domiciled in England. On these facts the defendant relied as a good defence to the action, the 5th section of the Admiralty Court Act, 1861, providing as follows:—"The High Court of Admiralty shall have jurisdiction over any claim for necessaries supplied to any ship elsewhere than in the port to which the ship belongs, unless it is shown to the satisfaction of the Court that at the time of the institution of the cause any owner or part owner of the ship is domiciled in England or Wales." The plaintiffs objected to this answer, as showing no defence in law. On a question previously raised in this suit, the *Princess Charlotte* had been held by the Court to have been a Belgian ship at the time when the necessaries were supplied. The plaintiffs consequently contended that their right of action in no wise depended upon the Admiralty Court Act, 1861, but upon the 6th section of the 3rd and 4th of Victoria, cap. 65:—"The High Court of Admiralty shall have jurisdiction to decide all claims and demands whatsoever in the nature of salvage, for services rendered to or damage received by any ship or seagoing vessel, or in the nature of towage, or for necessaries supplied to any foreign ship or seagoing vessel; and to enforce the payment thereof, whether such ship or vessel may have been within the body of a country or upon the high seas at the time when the services were rendered, or damage received, or necessaries furnished, in respect of which such claim is made." On the 19th of April last, counsel were heard on the question of the validity of the answer, Mr. Brett, Q.C., and Mr. Vernon Lushington appearing for the plaintiffs, and Dr. Deane, Q.C., for the defendant. Dr. Lushington now gave judgment. His Lordship held that the *Princess Charlotte*, having been a foreign ship at the time when the necessaries were supplied, the Court had jurisdiction to entertain the suit under the 6th section of the 3rd and 4th of Victoria, cap. 65; and that the sale of a foreign ship, effected subsequently to the supply of necessaries, could not oust the Court of its jurisdiction, although the purchaser were domiciled in England at the time of the institution of the suit.—Judgment for the plaintiffs.

POST-OFFICE PACKET SERVICE.—The total estimate for the Post-office Packet Service for the year 1864-5 is £860,276, the vote for the previous financial year having been £956,878. With respect to the former sum, it is stated in the official return that no part of it "is to be applicable or applied in or towards making any payment in respect of any period subsequent to June 20, 1863, to Mr. Joseph George Churchward, or to any person claiming through or under him by virtue of a certain contract, bearing date the 26th day of April, 1859, made between the Lords Commissioners of Her Majesty's Admiralty (for and on behalf of Her Majesty) of the first part, and the said Joseph George Churchward of the second part, or in or towards the satisfaction of any claim whatsoever of the said Joseph George Churchward, by virtue of that contract, so far as relates to any period subsequent to June 20, 1863." Of the total estimate for the current financial year, £85,900 is allotted for the conveyance of mails between Holyhead and Kingstown; £174,840 for Liverpool, and Halifax, and Boston mails, and to and from Liverpool and New York and Nassau; £50,000 for Galway and ports in America; £135,360 for mails to and from the West Indies; Brazil and Buenos Ayres, £33,500; West Coast of America, £25,000; West Coast of Africa and England, £30,000; India, China, and Australia, £81,941; Point de Galle and Sydney, £67,336; &c., &c. The following are the items which make up the actual Post-office expenditure in the "packet establishments" at various ports, it being understood that one-half of the salaries and allowances are provided for by the Admiralty:—Dover, £311; Holyhead, £256; Liverpool, £415; Southampton, £775; and Devonport, £5. A sum of £150 is allowed for pensions to retired commanders; £100 to widows of commanders and masters of packets; and £297 to the clerks and artificers of packet establishments.

A MARRIAGE is arranged between the Hon. T. J. Howell Thurlow, brother of Lord Thurlow, and Lady Elma Bruce, eldest daughter of the late Earl of Elgin.

Monetary and Commercial.

The Union Bank of London have resolved to increase their nominal capital from £3,000,000 to £4,000,000, by an issue of 20,000 new shares of £50 each, rateably to the present proprietors at £15 premium. The amount paid upon the existing £50 shares of the bank is £13, and it is contemplated at an

Digitized by Google

early day to increase this sum to £15 by an appropriation of profits.

The formal announcement of the Asiatic Banking Corporation has been issued and will be found in our advertisements. The project has been in hand more than a year, and a charter has been obtained. The subscribed capital is £500,000, of which £300,000 is paid, and the remainder is in course of being called up. By the terms of the charter, which, as usual, extends the liabilities of shareholders to double the amount of their shares, the company are empowered to increase their capital to £2,000,000. Mr. Fearon, late of the firm of Augustine, Heard and Co., China, is one of the directors. It is stated that the shares are at 50 premium in Bombay.

The Chartered Mercantile Bank of India, London, and China have issued their report, which shows the audited balance-sheet and profit and loss account of the bank for the year ended 31st December last. After providing for all bad and doubtful debts, and defraying expenses of management at all points, the net profit amounts to £196,562. 2s., to which has to be added a sum of £4,269. 9s. 2d. undivided profit, brought forward from the preceding year, making a total of £200,831. 11s. 2d. Out of the above total £50,000 has been paid in two half-yearly dividends, and £25,000 as a bonus, making together 15 per cent. on the paid up capital of the bank. A further sum of £50,000 has been added to the reserve fund. The unappropriated balance of £75,831. 11s. 2d. is carried forward to the profit and loss account of the current year. As will be seen by the accounts, the premium on new shares paid up to the 31st December, amounting to £81,140, has been added to the reserve fund; the balance due in respect of same, £18,860, since received, has also been passed to this account, which, with the addition of £50,000 from the year's profits, above referred to, makes a total at this date at credit of that fund of £250,000. The directors have purchased freehold premises for the bank's agencies at Bombay, Colombo, Singapore, Shanghai, and Yokohama. Agencies of the bank have been opened at Point de Galle and Newera Ellia, in Ceylon; Tuticorin, in Southern India; Hankow, in China; and Yokohama, in Japan. The 10,000 new shares have all been taken up by the shareholders to whom they were allotted, and the sum paid up to this date on account of the new capital amounts to £134,815.

The Oriental Bank Corporation have announced the terms on which their new shares for an increase of capital are to be issued. The amount is to be £1,500,000, in shares of £25 each, to be allotted at the price of £45 a share, being a premium of £20 to the proprietors whose names shall be on the shareholders' register on the 20th of May inst., in the proportion of one in six—*i.e.*, one-sixth of a share for every share held by them on that date. The whole are to be paid up by the 31st of December.

At a meeting of the Scinde, Punjaub, and Delhi Bank, W. P. Andrew, Esq., in the chair, a dividend at the rate of 5 per cent., calculated from the date of the payment of each call, was agreed to. The chairman stated that the bank had not, from the day it started, incurred a single loss or met with anything to retard its progress. A balance of £278 was carried forward, and £3,896 derived from premiums was placed to reserve. This bank intends opening branches in China, and has advertised for managers.

The Imperial Bank of China have taken the premises formerly occupied by the Oriental Bank in Walbrook.

At the meeting of the Agra and United Service Bank on the 7th, the arrangement with Messrs. Masterman and Co. was confirmed, resolutions being adopted to alter the title to that of the Agra and Masterman's Bank (Limited), and to increase the capital to £3,000,000.

It has been announced in the Spanish papers that the duty on coal imported into the Philipine Islands for consumption by Government vessels has been abolished at the solicitation of the Commandancy of marine of the Archipelago; and the Queen of Spain, wishing to lend her protection to the growing industry of that country, has extended the same privilege to the coal consumed by private individuals, this article being completely expunged from the tariff. On the talked of Spanish loan *The Times* says:—

It appears that the parties to the arrangement stated by the *Epoca* to have been made for supplying the Bank of Spain with £2,000,000 in gold and silver are Messrs. Baring, Gibbs, and Mildred. It is not believed, however, that the negotiation can be of the nature described by that journal. At a juncture like the present it is unlikely that three firms, each of which has a partner in the direction of the Bank of England, would enter into a commitment to send such a sum of money out of the country, not for commercial purposes, but to relieve the inconvenience which the Government of Spain encounters through the treatment experienced by its foreign creditors; and on the condition that they shall participate in future credit or industrial schemes that may be promoted in that country. Not only would this be in opposition to all the warnings which cautious persons have lately been endeavouring to impress, but it would also be a betrayal of the claims of the certificate holders unless a settlement of these claims shall have been at the same time stipulated. Hence, whatever may have been the circumstances in which the statement originated, no one doubts that its real explanation will be found to differ widely from the account in the *Epoca*, and that it will not prove in any way inconsistent with the high character of the parties whose names have been used by that journal.

It is rumoured that steamers similar but much larger than the *Far East* are to be put on the line between China and London. Two boats are building on the Clyde which may go in this service.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £133,700; to Bombay, £120,000; and to Madras, £46,300. The *minimum* price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to £850,000. Tenders on Calcutta and Madras at 1s. 11½d. will receive about 21 per cent., on Bombay at 2s. 0⅛d., about 66 per cent., and all above these prices in full.

It appears that from this date the drawings of the India Council on India, instead of being £700,000 per month, as has recently been the case, will be limited to £600,000 per month.

The Trade and Navigation Accounts for the month, and the three months, ending the 31st March, exhibit a continuance of the favourable state of things manifested in the two previous months of the present year. The expansion of the export trade of the United Kingdom not only continues, but progresses in a wondrous ratio, as will be seen from the following "total declared value of British and Irish produce exported:"—

	1862.	1863.	1864.
	For the month ending 31st March.		
All articles	£9,664,649	£10,217,473	£13,555,674
	For the three months ended 31st March.		
All articles	£26,423,763	£27,561,204	£36,667,381

The Exports to the countries and ports of the Far East, in regard to the articles named, are returned as follows:—

CHINA AND HONG KONG.

	1862.	1863.	1864.
	For the month ending 31st March.		
Cotton Manufactures ..	15,744,663	5,007,244	8,437,906 yds.
Cotton Yarn	530,649	60,800	63,042 lbs.
Woln. & Worst. Manuf.	328,672	245,959	110,969 yds.
Worsted Stuffs	669,003	1,120,902	1,231,482 „
Lead	561	2,413	549 tons
	Value for the three months ending 31st March.		
Cotton Manufactures ..	£398,527	£163,600	£386,067
Cotton Yarn	29,470	6,147	11,595
Wool and Worsted Manufactures	56,716	73,423	67,165
Worsted Stuffs	68,393	127,053	192,659
Lead	1,279	4,229	1,546

The Export of Cotton Manufactures for the month ending 31st March to the quarters named is thus given:—

	1862.	1863.	1864.
Singapore	2,937,643	844,288	3,080,464 yds.
Java	792,486	507,720	1,857,213 „
Philippine Islands ..	—	—	2,402,362 „
	Value for the three months ending 31st March.		
Singapore..	£199,740	£60,987	£276,231
Java	113,827	92,444	173,059
Philippine Islands	64,190	37,400	162,159

Singapore also took 166,900 lbs. of Cotton Yarn during the month of March last, against 35,200 lbs., and 142,360 lbs. in the same month of the years 1863-4; the value for the three months of 1864 being returned at £41,134, against £10,980 and £26,936 in the two preceding years.

Java and the Philippine Islands have sent us, during the present year, of Unrefined Sugar, third quality (not equal to brown clayed), for the month of March, 15,415 cwts., and for the three months, 23,650 cwt., while the quantity for the same three months of the preceding years was, for 1863, 268,630 cwt., and for 1862, 99,710 cwt. Of Hemp, we received from the Philippine Islands in the month of March last 3.008 cwt., which appears to have been the first import of the year, as the import for the three months ending 31st March is given as follows:—

	1862.	1863.	1864.
Quantity..	41,387	59,516	3,008 cwt.

The Declared Value of British and Irish produce and manufactures exported from the United Kingdom to the quarters named, for the two months ending the 29th February, was as follows:—

	1862.	1863.	1864.
Singapore and the Eastern Straits	£236,472	£84,739	£280,110
Hong Kong	124,815	123,287	186,654
China (exclusive of Hong Kong)	238,704	191,292	359,993
Dutch Possessions in India (Java, &c.)	156,603	90,283	173,521
Philippine Islands	101,921	61,029	131,542
Japan	—	13,467	39,873

ARTICLES OF IMPORT.

TEA.—The very large quantity declared for public sale without reserve, coupled with the advance of the Bank rate to 9 per cent., having more than neutralised the effect of the favourable advices received from China, the export from which quarter now shows a decrease upon last season, whilst our deliveries continue on a very large scale; prices, however, for congous under 1s. 6d. per lb. have given way about ½d. to 1d. per lb. Low and dusty kinds of congou have been offered freely at public sale, and prices have declined ¼d. per lb. Fair to good common, in the absence of shipping orders, has also suffered a similar reduction, the quotation being now 1s. per lb. Fair flavoury kinds have been much depressed, and prices are ½d. to 1d. per lb. lower. Common to fair blackish-leaf kinds have been sold at public sale without reserve at a reduction of about ½d. per lb. The better qualities show no material alteration. Good to fine Kaisows, also Monings and Wopaks, have been firmly supported; finest grades of Moning have been taken to a limited extent for export. Tayshans remain as before, also the new make Canton kinds. Oolongs, up to 1s. 3d., have been taken for export; fine kinds have been inquired for to a moderate extent. Souchongs of fair to good quality have been purchased for export to America at about former prices. Flowery Pekoes have sold at low rates at public sale without reserve. Common to fair scented capers have sold at a decline of ½d. to 1d. per lb., good to fine have been fairly maintained. Common to fair scented orange Pekoes have been difficult of sale; good qualities have sold about 1d. per lb. lower. Foo-chow kinds remain without material alteration. Uncoloured Japans have been sold to a large extent at the full prices last quoted. There have been no further public sales of Indian teas. Green teas show no material alteration in the fortnight, the fresh arrivals having been very limited; prices have been firmly maintained for all Country kinds. Canton-make Gunpowder of common to fair qualities have been sold at public sale without reserve at a decline of ½d. to 1d. per lb. The public sales, which commenced on the 3rd instant, comprised 66,160 packages, of which 38,143 packages were printed without reserve; of these, up to date, 46,454 packages have passed auction, and 26,872 packages have been sold, nearly all without reserve, whilst 6,462 packages have been withdrawn, 1,742 packages of which were printed without reserve.

SILK.—Soon after the departure of last mail, the silk market became active, and a large business was done, more especially in Japan silk. This, however, was put a stop to by the advance of the Bank rate to 8 per cent., and subsequently to 9 per cent., since which we have had a quiet market though importers show little or no disposition to sell at lower prices. Deliveries from 1st to 7th inclusive: China, 706 bales; Japan, 359 bales: total, 1,065 bales. A letter from Lyons of the 5th inst. states that the silk trade continues to improve in that city. The price of the raw material is likewise firm, but not so high as to prevent manufacturers purchasing all they require. The scarcity of Chinese and Japanese raw silk is the only unfavourable circumstance to be remarked. In New York the following is the report:—Stock is not large. Market steady and firm, on Canton, R. R., of which a considerable quantity has been sold during the past month at $8.87½, 9.00, and 9.25, mostly at $9.00. Canton, re-reeled Cumchook, No. 1, $9.00 to 9.50; Japan, $8.50 to 11.00; Tsatlees, Nos. 1 and 2, $9.1-4 to 9.75; Taysaams, usual reel, Nos. 1 and 2, $8.25 to 9.25.

SUGAR.—The revival of animation noticed at the close of our last report was followed by a subdued tone pending the final settlement of the duty question, and the small purchases made were at rather easier rates. As soon as the new scale passed into law, speculators again came forward, but, owing to the disinclination of the home trade to operate, a feeling of languor shortly returned, and with the prospect of large imports of their class of goods from the continent, refiners more especially, have almost kept out of the market, so that increased depression has of late been experienced; and, combined with the rapid advance in the Bank rate of discount within the last week, sales have been difficult to effect at drooping prices, by which not only has the reduction of duty gradually gone in favour of the buyer, but some additional decline has lately taken place, leaving our bond quotations, with few exceptions, lower than those of the 9th ultimo. With little inquiry from speculators, clayed Manila has been neglected, and purchases have generally been on lower terms: in unclayed business was at first transacted, chiefly for export, at advanced rates, but lately some reaction has taken place. Actual sales are as follows:—2,000 tons clayed Manila, shortly after our last, at 43s. 1½d., but since at the new duties from 40s., down to 37s. to 38s. 6d.; also 150 tons to arrive at 31s.; 600 tons unclayed, the recent sales being at 35s. 3d. to 34s. 6d.; and 500 tons for arrival at 40s., the duty of 12s. 8d. to be allowed.

COFFEE.—The sales of the month comprise,—4,800 casks, 3,600 barrels and bags Plantation Ceylon, latterly, fine ordinary to low middling 76s. to 81s., middling to good middling 82s. to 87s., fine colory up to 94s.; 500 casks, 8,000 bags native, great part good to real good ordinary 70s. 6d. to 72s., fine ordinary to superior 73s. to 74s., but within the last few days good ordinary to superior 68s. 6d. to 70s. 6d.: 900 packages Mocha, green to fair clean garbled, 90s. to 95s., a few good long berry 95s. to 96s.; also 500 bags Malabar, good ordinary 72s. 3d., fine ordinary 74s. to 75s., 40 cases superior Neilgherry at 86s. 6d. to 88s.; 300 bags mixed Courtallum, and 800 bags Singapore, part fair Campar 62s.

RICE.—A larger amount of business has been done in this article on the spot, but prices have ruled irregularly, as while soft grain kinds have been realised on moderate terms, the white and cargo sorts of Bengal have fetched some advance; the sales are 145,000 bags. Bengal: Ordinary cargo to fair Ballam and Moonghy, 8s. to 9s. 3d.; good and fine pearly Ballam, 9s. 6d. to 10s.; low (siftings) and middling hard white, 9s. 3d. to 10s. 6d.; good middling to good bold, 10s. 9d. to 13s.; good new Askoolie, at 11s. 6d.; low to fair pinky Madras, 8s. to 9s. 6d.; low Nakrenzie, 7s. 9d.; fair, 9s. 6d. to 9s. 7½d.; Rangoon, 7s. 9d. to 9s. 3d.; good, 10s. 3d.; common and middling Bassein, 8s. to 9s. 6d. Also 5,710 bags low middling to good white Java (offered by auction), at 12s. 6d. to 14s. 9d.; and to arrive 300 tons low cargo Bengal, at 7s. 7½d. ex ship, or 8s. 1½d. landed.

COTTON.—China (says the circular of Messrs. Walker, Whitehead, and Co., of Liverpool) has been in most extensive demand, both on the spot and to arrive, and prices have advanced from 1½d. to 1½d. per lb. For arrival, 19d. to 19½d. is now freely paid. Among the sales noted in a London market report between the 29th ult. and the 5th inst., we note—4,130 bales China, at 18d. to 19d. for fair; 3,020 bales Japan, at 19d. to 19½d. for fair, 19¾d. to 20d. for good fair, and 21d. to 21½d. for good—total, 15,880 bales. There was a large business transacted during the past week, and in the early part the demand was very active, and prices advanced about ½d. per lb. On the 2nd the rise in the Bank rate to 8 per cent. checked business, and the advance was lost. On the 6th there was a better tone until the further rise in the rate of discount to 9 per cent., when the market again became dull, and closes quiet, but firm, at last week's quotation. Sales for arrival:—7,400 bales China, at 18½d. to 19½d. January and March shipments, for guaranteed fair, 18¾d.; June, 18½d. August deliveries, for guaranteed fair; 2,500 bales Japan, at 19½d. to 21d. January shipment, for guaranteed fair.

CAMPHOR.—Market very flat; 421 cases China at auction mostly sold at £5 to £5. 2s. 6d. per cwt. Nothing doing privately.

CASSIA LIGNEA.—Nothing of any importance doing. Buds: Held firmly; and 70 cases firm, and of recent import, at auction retired at £16 per cwt.

DRUGS.—Cubebs: Continue flat; and of 29 bags damaged, at auction, half sold upon former terms. Dragon's Blood: Flat: 64 boxes at auction, all retired. Galangal Roots: Steady; 95 bags at auction sold at 22s. per cwt. for good. Rhubarb: Is still held with great firmness, but is very quiet; and of 63 chests at auction, a few only sold at extreme value.

GUMS.—Benjamin: Steady, 9 cases Siam at auction sold at £14 to £16. 10s. per cwt. for very dark block; and £10 to £12. 15s. dust and seed in block; and of 409 cases Sumatra, five-sixths sold at 27s. 6d. to 32s. for low 4th quality. Damer: Quiet, 78 cases at auction, all retired. Gamboge: Firm, and of 12 cases at auction, half sold at £8. 15s. per cwt. for middling mixed pipe.

GUTTA PERCHA.—Remains very quiet, and the lower qualities are cheaper; of 13 tons at auction half sold at 1s. 5d. to 1s. 11d. per lb. for middling to good natural; limited business privately. India Rubber: Very inactive, only 20 cases Assam at auction, sold at 5½d. to 8½d. per lb. for low to middling ball.

Digitized by Google

HEMP, MANILA.—Has been of heavy sale, and not above 4,000 bales have been reported, sold on the spot, at rates now showing a reduction of 30s. per ton on those of a month since, viz., roping and Sorsagon, £34 to £35; also, 500 bales fair roping for arrival at the latter price.

HORNS.—Auctions confined to 15 tons Siam, and 7½ tons Bombay Buffalo horns sold at 42s. 6d. to 43s. per cwt. for 3¼ lb. average, and 30s. 2 lb.; 4½ tons Calcutta Tips sold at 31s. 6d. to 32s.

JAPAN WAX.—2s. to 3s. lower. 100 bales good saucer sold at 64s. 6d. to 65s.

OILS.—Anniseed: A decline of 2d. per lb. having been submitted to, sales to a limited extent have been effected at the lower quotation of 6s. 6d. Cajaputa: Small sales at the higher figure of 2½d. Cassia: Flat, and without buyers at the quotations of 9s. 3d. to 9s. 6d.; 8 cases at auction retired. Cinnamon: One case at auction sold at 2s. 2d. per oz. for good. Mace and Nutmegs: Nothing doing; some inquiry. Small sales of the paste at 1d. per oz.

SAGO.—Small pearl in some instances the turn lower; of 2,201 boxes at auction, two-thirds sold at 23s. to 24s. per cwt. for fair to good small, and 21s. 6d. to 23s. large. Flour: Remains quiet, with limited business a little under the previous currency, 14s. 10½d. cash. Tapioca: Less in request, and only the following quantities of East India have been sold: 800 bags, 100 tins Penang, ordinary, 2d.; middling white, 2½d. to 2¾d.; good, 3d. to 3½d.; and sixty boxes stained Singapore at 1½d. per lb.; of pearl, 300 packages have been sold at 22s. 6d. to 23s. per cwt.

SPICES.—Cinnamon: The quarterly sales only contained 1,276 bales, which met with an active demand, and sold at an advance upon the previous series of 2d. to 5d. per lb. on the 1st, 2nd, and 3rd qualities, and 1d. 4th and jungle. 253 bales first sort realised 1s. 5d. to 2s. 6d., with superior up to 2s. 10d. to 3s. 2d.; 195 bales 2nd sort 1s. 2d. to 1s. 11d.; 280 bales 3rd sort 1s. 1d. to 1s. 6d.; 148 bales 4th and jungle 11d. to 1s. 2d. Cloves: Zanzibar very firm, with moderate business at full prices. Mace: Steady; and 42 cases Penang, and 12 cases Singapore at auction, mostly sold at 1s. 10d. to 2s. 2d. per lb. for fair palish, and 11d. to 1s. 6d. *inferior* dull red to fair reddish. Nutmegs: Have improved in *value 1d. to 2d.* per lb., but the most recent sales have shown less buoyancy *than the* earlier ones; of 140 cases Penang and 24 cases Sincapore brought *to the* hammer, three-fourths sold at 3s. 3d. to 4s. 2d. per lb. for middling to fine bold, and 1s. 1d. to 2s. 2d. middling small to fine medium. Pepper, Black: The inaction reported in our last continues, and business has been very limited, but without alteration in terms; of 673 bags Sincapore, and 1,056 bags Penang at auction, a small proportion (damaged) alone placed. White: Continues quiet, without change in value: 307 bags Sincapore at auction, all retired.

TERRA JAPONICA.—Cutch, Pegue: Market very quiet. 762 bags at auction all retired, with the exception of a single lot sold at 26s. 9d. per cwt. Limited business done privately at 26s. 6d. Gambier: Remains firm at previous value, with very moderate business. 1,712 bales at auction all retired.

TOBACCO.—Manila Leaf: A parcel is close at hand, bound for a port. There will be no auctions held in Manila till June, but from that period to the end of the present year 40,000 quintals will be submitted for sale. Cigars and Cheroots: Quiet. No further auctions will be held by the Government; purchasers can be supplied direct from the Government stores. Japan: Has engrossed a fair share of attention; parcels fairly packed and butted command ready sale. Java: Fine leafy descriptions soon pass into manufacturers' hands; medium parcels can now be obtained at reasonable prices; low classes difficult of sale.

MISCELLANEOUS.—Blacklead: Lump is 3s. to 4s. per cwt. lower, but dust is without change; several barrels at auction mostly sold at 15s. to 19s. per cwt. for fair to very good lump, and 9s. 3d. to 10s. good dust. Galls: All kinds—Bussorah, China, and Japan—very scarce, and in continually increasing demand. We quote Japan and China 80s. to 100s. per cwt.; 3 cases China sold at auction at 100s., and 25 cases Japan retired at 95s. Musk: Very quiet, and of 20 caddies at auction, one only sold at 25s. per oz. for middling Tonquin; remainder held for the previous nominal value of 27s. per oz. Rattans; Steady, and 3,660 bundles Penang, and 3,770 Calcutta, sold at auction at 3s. 6d. to 7s. 10d. per 100. Sapan Wood: Firm; and of 70 tons Siam at auction one-fourth sold at £11. 5s. per ton for fair wood, but damaged; £14 offered for fine. 38 tons Manila sold at £9 to £9. 17s. 6d. Mother o'Pearl Shells: Manila in demand at 5s. to 7s. 6d. per cwt. advance; and of 262 cases at auction, half sold at 92s. 6d. to 102s. 6d. per lb. for fair to good. Soy: Firm, with moderate trade at our higher quotation of 3s. for good. Star Anniseeds: Not any stock in the market; 4 cases at auction retired. Sticklac, Siam: Very flat. 206 cases at auction all retired: small sales privately upon previous terms. Tortoiseshell: Little doing. Of 8 cases Sincapore at auction 4 cases sold at 11s. 6d. to 17s. per lb. for inferior to good in sorts; 2 cases Manila retired; 3 cases turtleshell sold at 4s. to 4s. 3d. Turmeric: No China here: Java rather lower; and of 172 bags at auction half sold at 17s. 6d. to 19s. per cwt. for fair. Vermilion: Scarce and wanted. Nothing doing.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod, £9. 10s. to £10. 5s.; hoops, £11 to £11. 5s.; sheets, single £12 to £12. 5s.; Staffordshire bars, £10 to £10. 5s.; rails, £7. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 9½d. per lb.

TIN.—108s. for block; 109s. for bar. Tin plates, best charcoal, I.C., 31s. per box.

LEAD, &c.—English pig, £21. 15s. to £22; W.B., £23; shot, patent, £24; sheet, £22; spelter, £21. 10s.; zinc, English sheet, £25; quicksilver, £9.

The following is from the Circular of Messrs. French and Smith:—The month past has been marked by general dulness in the metal trade, very unusual even at the worst of times, nearly all speculative inquiry has ceased, and consumers buy only for immediate wants. Iron:—Scotch pig has fluctuated but little during the month. The shipments have been rather over the average, prices are rather weak. For railway iron there is a fair inquiry. Staffordshire of all descriptions is dull. Copper has continued dull the whole of the last month, and notwithstanding the reduction in price on the 11th ult., the demand has been very limited. This continued absence of demand caused a fall in the standard of ores at yesterday's sale, in Swansea, of about 3 per cent. Tin has steadily declined in price, both English and foreign, and in the face of increasing stocks here and in Holland, and a dear money market, we see no hope of early improvement; we must, however, take into consideration that it is probable many mines, especially English, which pay to work when tin is at a higher standard, must work at a loss at present prices. Yesterday the price of English tin was officially reduced £4 per ton. Tin Plates: The demand has been good for charcoal, but for coke there is not so much inquiry. The quantity shipped to all parts last month was 120,000 boxes, against 113,000 boxes, April, 1863. Lead: The prices have been well maintained, with good demand, but the last week or two the inquiry has slackened. Spelter is quoted, £21. 10s. but quiet; stock in London is 11,655 tons, against 4,729 tons same time last year. Quicksilver is ather easier, present quotation £9 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.
Shanghai	—	£126 815
Foo-chow-Foo	—	6,430
Hong Kong	£5,000	258,134
Amoy	—	—
Singapore	£3,750	82,375
Penang	—	78,495

FROM MARSEILLES.

(BY THE P. AND O. COMPANY'S STEAMERS.)

	Gold.	Silver.
Shanghai	—	£34,248
Hong Kong	£31,568	81,590
Singapore	—	18,920
Penang	—	4,233
Foo-chow-Foo	—	1,000

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9	
Spanish Doubloons	3 16 0	to 3 17
United States Gold Coin	3 16 3½	
Silver in Bars	0 5 1	
Mexican Dollars	0 5 2	

MANCHESTER MARKETS.

Mr. Mendel's Circular states that the market to-day is firmer with more enquiry, advanced prices are asked, but not assented to; the result is only limited sales, but at full rates, especially for yarns of all sorts. The tendency of the market is upwards, and particularly so for good makes. Grey Grey Shirtings, 7 lbs., 17s. 6d. to 18s.; 9 lbs., 23s. 6d. Cotton Yarns, 16-24, 2s. 6d. to 2s. 7d.; 28-32, 2s. 9d. to 2s. 1d. Maddapollams, 7s. 6d. Long Cloths, 20s. T-Cloths, 14s. 3d. White Spot Shirtings, 21s. 6d.; White Brocade do., 21s. 9d. White Damasks, 37s. 6d.

Mills, which had long been idle, are recommencing work, and the production is likely to augment considerably. So far as spinners are concerned, many of them have heavy contracts, but manufacturers are not generally so well situated.

At MONTREAL: H. E. Sassaune, Asia, Tycoon, Madura, and Romeo.

From MANILA.—At FALMOUTH: Maggie Lauder, Helverton. At LIVERPOOL: Elias, Teide, Burdoes y Habana No. 1, J. A. U., Concepcion, and Cervantes (via Cadiz). At COWES: Manila. At DENMARK: Emma. At ROTTERDAM: Zanibar. At NEW YORK: Castilian, and Surprise.

From SINGAPORE.—At LONDON: Oscar, Confiance, Najade, Early Dawn, and Chili. At ENGLAND: H.M.S. Centaur and Pearl. At LIVERPOOL: Crusader and Spanker. At FALMOUTH (for orders): Helene. At BORDEAUX: Salares, Hooghly and Saint Michel. At NEW YORK: Caroline and Rudolf.

From BATAVIA.—At FALMOUTH: Fredrika. At CHANNEL: Ceres.

From PENANG.—At LONDON: Rockliff, and Edinburgh Castle. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

The advices from the East received by last mail are favourable to shipowners. In China the amount of tonnage is large, but there is abundant employment in the country trade. At Manila and Batavia there is quite a dearth of British shipping. Homeward charters are being obtained at the following rates. From Maulmain to United Kingdom, £5 per load for teak. From Singapore to London, 75s.; from Manila, 80s.; and from the Rice Ports to United Kingdom, or Coast, to load next season, 82s. 6d. From China there is but little offering. In outward freights there is no improvement to report, as the tonnage on the different berths is still large, and there is but little doing in export business. The demand for coal ships for China is slacker, several charters having been recently entered into.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight. 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £39 to £40, and 35s. to 37s. 6d. For Shanghai: £48 to £50, and £2 7s. 6d. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £28, and £1. 7s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight in the Sydney Eggers and Sovereign of India for the following Government stores from Woolwich to Hong Kong, viz.:—66 tons shot and shells in boxes, and 249 tons loose shells, 5 tons combustibles, 99 tons gunpowder, and 39 tons light measurement stores.

CASUALTIES.

The Herman, Bart, from Amsterdam, for Padang, put into Portsmouth April 27, with master dead.

The Promise, English steamer, from New York for China, put into Rio Janeiro March 21, with loss of foremast.

LIVERPOOL, April 26.—The Hoang-Ho, of this port, Carrington, from the Clyde to Singapore, with a general cargo, which put in here April 11, after getting on shore on the Saltees in the night of the 7th, had been making twelve inches of water per hour, after coming off the reef on the morning of the 8th, and a portion of her main keel forward was found broken; the cargo has been discharged apparently in good order.

Digitized by Google

ST. HELENA, March 29.—The Orion (schr.) arrived here from Macao reports having been boarded and overhauled by an armed screw steamer, March 13, in lat. 34 S., long. 15 E.

CAPETOWN, March 21.—The Sappho of Greenock, Hildreth, master, from Shanghai for London, with a cargo of tea, got on shore on the beach while entering Table Bay, March 15, and became a total wreck; all hands saved by the lifeboat. The wreck has been sold, with her cargo, for £545. The Confederate steamer Alabama, three months from Singapore, arrived in Table Bay March 20.

OFF ASCENSION.—March 28, Maria Louise Antoinette, from Java.

OFF ST. HELENA.—March 26, Pak Wan, from Foo chow-Foo.

AT ST. HELENA.—March 11, Montmorency, Maxwell, from Shanghai, and sailed for Liverpool; 14, Taffarette, Dereix, from Canton, and sailed for Havre; Atlantic, Sherman, from Singapore, and sailed for New Bedford; 16, Etoile, Lachaud, from Penang, and sailed, 21, for Belle Isle; Juno, Nicolai, from Banjoewangie, and sailed for Amsterdam; 19, Rockliff, Drew, from Penang, and sailed, 20, for London; Isaac da Costa, Klein, from Tjilatjap, and sailed, 20, for Rotterdam; 20, St. Michel, Fradin, from Singapore; 21, Emma, Arentzen, from Singapore, and sailed for Copenhagen; 22, Doelwyk, Hoffman, from Batavia, and sailed 23, for Rotterdam; 23, Orion, schooner, from Macao, and sailed for Hamburg; 24, Ridderkerk, Teerlink, from Batavia, and sailed, 26, for Rotterdam; Helvetien, Boyson, from Manila, and sailed, 26, for Falmouth; 25, Spanker, Candlish, from Singapore and sailed, 26, for Liverpool; 27, Castilian, Pike, from Manila, and sailed, 28, for New York; 28, Thetis, Rhodin, from Shanghai, and sailed, 29, for New York; 29, Dolphin, Gollards, from Hong Kong, and sailed for Liverpool.

At TABLE BAY.—Feb. 24, Tun-sin (str.), Rowe, from London, and left, 29, for Mauritius and China; March 3, Margarita, Mas, from Manila, and sailed, 9, for Cadiz; 18, Gov. van Swieten, v. Fagg, from Kanagawa.

At NATAL.—Feb. 24, Robin, Gammon, sailed for China; March 4 Conrad, Claasen, for Singapore.

According to last advices H.M.S. Conqueror, for Japan, was still in Simon's Bay.

At MAURITIUS.—Mar. — Tun-sin (str.), Rowe, from London, and left, 19, for Singapore and China; 15, Vulcan (str.), Bunker, sailed for Singapore and Shanghai.

THE CAPE INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

CAPE COLONIES, INDIA, CHINA, AND JAPAN.

Office, 12, George-yard, Lombard-street, London, E.C.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK CO. execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The Dry Dock (opened in March, 1859) admits two Vessels at same time, being 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock, of larger dimensions, on the same premises, will next year be completed and available for the heaviest Screw-steamers.

There is extensive wharf, warehouse, and other accommodation adjoining, together with the usual conveniences for the discharge, re-fitting, and coaling of Vessels; also, Lathes and every appliance for the repair of Iron Steamers.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 25, Poultry, London, E.C.

WILLIAM CLOUGHTON, Managing Director.

New Harbour, Singapore, March, 1864.

J. C. and J. FIELD,

"EXCELSIOR" FAMILY SEWING AND EMBROIDERING MACHINE.

THESE MACHINES are far Superior to any others manufactured. They are lighter and easier to operate, simpler to learn, quieter in action, and less liable to derangement. The range of work performed is greater than any. They run, tuck, hem, fell, gather, cord, quilt, braid, and embroider; sews from two ordinary spools, requires no re-winding, finishes its work where it stops, and the seam, if cut at every inch, will not rip. Price, Complete, from £6. 6s.

The New STAR PATENT IMPROVED DOUBLE-ACTION ARM MACHINE, for Bootmakers and Manufacturers generally. Complete, £12. 12s.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL

Universally recognised to be Incomparably Superior to every other kind.

Prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, GENERAL DEBILITY, RHEUMATISM, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, and ALL SCROFULOUS AFFECTIONS.

In cases of **EXHAUSTION** and **PROSTRATION** produced by the debilitating diseases of unhealthy climates or resulting from Tropical Disorders, DR. DE JONGH'S COD LIVER OIL is much more safe and useful than the ordinary stimulating tonics, and it has been resorted to with the most beneficial effects after the whole range of these had been tried in vain. By its administration the natural appetite is revived, and the functions of digestion and humilation are improved, reanimated, and regulated; the muscular power and activity are sensibly and rapidly increased; and when its use is steadily persevered in, its peculiar nutritive and reparative properties entirely restore health and strength to the most feeble and deteriorated constitutions.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

SIR JOSEPH OLLIFFE, M.D.,
Physician to the British Embassy at Paris.

"I have frequently prescribed Dr. DE JONGH'S Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

DR. LAWRANCE,
Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.

"I invariably prescribe Dr. DE JONGH'S Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, *and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed.*"

DR. LETHEBY,
Medical Officer of Health and Chief Anayst to the City of London.

"It is, I believe, universally acknowledged that Dr. DE JONGH'S Light-Brown Cod Liver Oil has great therapeutic power; and, from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider the Cod Liver Oil sold under Dr. DE JONGH'S guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, *and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil.*"

*** DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL *is sold* **ONLY** *in bottles, each bottle being sealed with a stamped metallic capsule, and bearing beneath the pink outside wrapper a label with* DR. DE JONGH'S *stamp and signature; to these capsules and marks purchasers are earnestly requested to pay particular attention.*

WITHOUT THESE NONE CAN POSSIBLY BE GENUINE.

FULL DIRECTIONS FOR USE ACCOMPANY EACH BOTTLE.

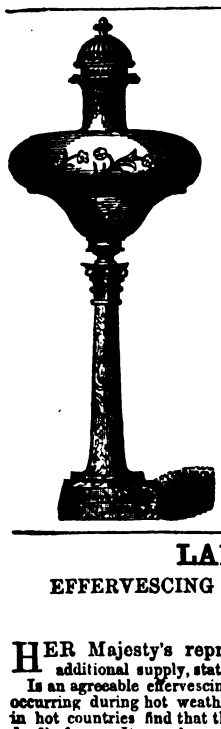
ROTARY KNIFE-CLEANING MACHINES of SUPERIOR QUALITY from £2 and upwards.

79, WARDOUR STREET, LONDON.



BARCLAY AND SON'S

IMPROVED

Enamelled Punkah Lamps for China,

AS SUPPLIED TO THE INDIA OFFICE.

(TRADE BB MARK.)

SHOW ROOMS,

170, REGENT-STREET, LONDON.

THESE Lamps are wrought into many beautiful designs, having on the surface a coating of the Patent Enamel. By this process the most beautiful marbles and stones—as Malachite, Lapis Lazuli, Brocatella, Pale Sienna, Jasper, and Pink Granite—are imitated to a nicety.

Advantages of these Lamps over ordinary India Lamps:—

1st.—They are unaffected by damp, heat, alkali, or oil.

2nd.—The more they are rubbed the better the polish: in this respect they are the reverse of bronzed or lacquered lamps.

3rd.—They offer no temptation to the natives to remove the outer surface; and were they to endeavour to do so they would signally fail.

4th.—They are free from liability to fracture.

5th.—The enamel never wears off, nor changes in colour or appearance.

PRICES, from £4 10s. to £5.

Ornamental Glasses, 7s. 6d. extra.

Ordinary Lamps, in bronze, bronze and relieved, and lacquered, from 38s.

May be obtained of the makers, BARCLAY & SON, or through the Cape, India, and China Agency, of whom Illustrated Prospectuses may be obtained. Orders sent direct must be accompanied by a remittance.

LAMPLOUGH'S PYRETIC SALINE.

EFFERVESCING AND TASTELESS, ITS CONSTANT USE IS ESPECIALLY CALCULATED TO MAINTAIN HEALTH.

HER Majesty's representative, the Governor of Sierra Leone, in a letter of request for an additional supply, states, "it is of great value; it should be in the hands of all Europeans visiting the tropics" Is an agreeable effervescing remedy, of great efficacy in all kinds of Fever and Blood diseases, especially those occurring during hot weather. Dr. Gibbon, Staff-Surgeon in the Crimean war, states that European residents in hot countries find that the use of this refreshing beverage prevents exhausting perspiration and its alternative deadly fever. It acts by purifying and lowering the temperature of the blood, hence its great importance to all persons seeking to reside with safety and comfort in tropical countries subject to unusual heat.

The elegance, purity, and usefulness of the preparation has been certified by some of the most eminent physicians in the Army, Naval, and Hospital service of Great Britain.

Lieutenant-Colonel Murray, 1st West India Regiment, Sierra Leone. "I have enjoyed uninterrupted health since I have taken your Pyretic Saline."

Dr. Sparks, the Government Medical Inspector, port of London, bears cordial testimony to its efficacy in chronic forms of Gastric complaints and Febrile dyspepsia.

William Stevens, Esq., M.D., D.C.L., states in his work on West India fevers, that wherever the saline treatmen is adopted the fatal yellow fevers are deprived of their terrors.

Testimonials and directions for its use in disease accompany each bottle. To be obtained from H. LAMPLOUGH, 113, Holborn, London, ananyd of the Agents of this Paper, in bottles at 4s. 6d., 11s. and 21s.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 19, RUE RICHER, PARIS.
Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, A. Bugeja, Magri, and A. Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Franjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia: L. Platon and Co. Macao: J. D. Freita.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World, Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.
Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.
At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.
Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch street London

VICHY.

SUMMER RESORT OF HIS MAJESTY THE EMPEROR OF THE FRENCH.
THE HOT WELLS ARE OPEN TO THE PUBLIC ALL THE YEAR ROUND.

Salts for making baths, each stone bottle containing the proper quantity for one bath.
These Salts are extracted from the mineral waters under the superintendence and **Control of the Government** and the use of the baths, drinking at the same time the water of the GRAND-GRILLE OR CELESTINS spring, may take the place of a course of treatment at Vichy itself.

Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.—INSTANT RELIEF.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress and induced to take a healthy action by applying this healing Ointment and taking these purifying Pills. It soothes all distempers of, and extracts all morbid humours from the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs, can sensibly be eased and shortly cured by Holloway's never failing Ointment, which represses excessive, and stimulates sluggish vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this cooling Ointment will give comfort, and a persistence in its use will effect a cure.

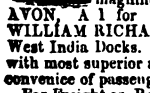
FOR COLOMBO, CEYLON, direct, to sail about 10th May, having a considerable portion of her cargo engaged, the magnificent, fast sailing, well-known ship AVON, A 1 for thirteen years, register 645 tons, WILLIAM RICHARDSON, Commander; loading in the West India Docks. This splendid vessel has a full poop, with most superior accommodations for the comfort and convenice of passengers.

For Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill, E.C.



FOR COLOMBO Direct.—The very fast-sailing barque WILLIAM AND JANE, A 1, 410 tons register, ROBERT BRUCE, Commander, now loading in the West India Export Dock. This vessel will now stand in Lloyd's Register continued A 1 five years. She has just had new decks and large repairs, and been re-coppered in the river.

For Freight or Passage apply to the owners, SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

To follow the "William and Jane," with quick despatch.

FOR COLOMBO and COCHIN, the nearly new clipper barque ELIZA LAING, A 1 eleven years, 441 tons register, T. LAING, Commander, now loading in the West India Export Dock. This fast-sailing Vessel, built under special survey in 1863, is strongly recommended to Shippers of fine goods. Has good accommodation for Passengers.

For Freight or Passage apply to SUART and SIMPSON, 6, Clement's-lane, Lombard-street, London, E.C.

MANILLA Direct (guaranteed first ship, and sailing under the Spanish flag), the splendid, new, Spanish clipper ELISA, A 1 at Lloyd's for ten years, 431 tons register, FRANCISCO RIVERO, Commander; loading in St. Katharine's Dock. This vessel has been built expressly for the Manilla line, and offers an excellent opportunity to shippers requiring despatch.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helen's, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the celebrated British clipper MARY MILDRED, 3 T. French Lloyd's, 460 tons register; C. J. FINE, Commander; lying in the London Docks. This beautiful vessel has superior accommodation for passengers, and sails very fast.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

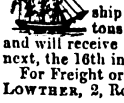
HONG KONG and WHAMPOA (under engagement with the Lords of the Admiralty), to sail on the 1st of June, the magnificent China clipper ship SOVEREIGN OF INDIA, A 1 ten years, 774 tons register; loading in the East India Docks.

Apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

With Quick Despatch.

FOR YOKOHAMA and NAGASAKI, the celebrated Aberdeen clipper VELOCIDADE, A 1 thirteen years, 280 tons register, JOHN WYRILL, Commander, lying in the West India Docks.

For Freight apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.



NOTICE to SHIPPERS to SHANGHAI.—The well known clipper ship ANGLO-SAXON, A 1 thirteen years, 693 tons register, has still room for measurement, and will receive goods in the London Docks all Monday next, the 16th inst.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

The French mail, with dates from Hong Kong to 26th April, arrived at Suez on 25th, and the mail will be here on the 4th June.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Syria, arrived May 26.—From Shanghai: Messrs. Reg. Russell, W. Watson, Stubbendorf, R. Daly. From Hong Kong: Messrs. Rodger, Escherich, M. Roldan, Pedro Largo, M. Diasdado, and S. Sedano, Miss A. Lyndon, and five second-class passengers. From Singapore: Mr. J. R. Smith.

To Southampton, per Ripon, expected to arrive June 1.—From Shanghai: Mr. and Mrs. Carpenter, two children, and servant, Col. Reeves, Lieut. Bennett, Messrs. C. Cooke and Lambert, seven second-class passengers. From Singapore: Mr. S. Davis and C. Lorenzen. To Gibraltar.—From Hong Kong: Mr. C. Valliscencio and two second-class passengers.

To Alexandria, per Golconda, arrived at Suez May 19.—From Shanghai: Mr. R. Gutschow, Mr. W. T. Tyers. From Hong Kong: Messrs. Youngman and Stephenson, Mr. E. H. Burgy.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, 20th May, from Southampton.—To Singapore: Mr. T. R. Waters, Mr. and Mrs. Ricketts and child. To Hong Kong: Rev. W. A. Rutherford. Mr. Kilby, Messrs. F. Sale, R.N., S. Thomas, R.N., and J. Morgan, R.N. To Shanghai: Mr. F. Whitmore, and four second class passengers. To Calcutta: Messrs. W. Jordan, A. Gordon, W. S. Blackhall, H. H. Locke, and J. P. Keatley. Assistant-Surgeons Troup, Lawless, Cunninghame, A. Thompson, A. Turner, A. Preston, and J. P. Dalmege, Dr. J. Anderson, and four second class passengers. To Madras: Mrs. Dauckert, Ensign G. H. Dale, and one second class passenger. To Ceylon: Mr. R. H. Hamilton. To Alexandria: Messrs. Summers, Davies, Cartwright, Cheatham, Nimmo, Johnston, James and Hosking, Mr. and Mrs. Barras and child.

From Marseilles, May 28.—To Singapore: Mr. and Mrs. von der Heyde, and European female servant. To Shanghai: Mr. Broadbent. To Hong Kong: Mr. F. Muselius. To Calcutta: Messrs. Wilson, H. Heath, and S. B. Carpenter, Capt. Angus, and one second class passenger. To Madras: Rev. J. Richards, Mr. Symonds, Mr. J. C. Campbell and servant, Mr. R. Bell. To Ceylon: Mr. C. Tatham.

Per P. and O. steamer Delta, 4th June, from Southampton.—To Singapore: Mr. J. Tyndall Woods. To Shanghai: Mr. S. Marcus. To Hong Kong: Mr. J. M. Hollingsworth, Assistant-Surgeon M. M. Magrath, R.N., Mr. R. Mearns, R.N. From Marseilles, 12th June.—To Hong Kong: Mr. Bannatyne. To Shanghai: Mr. H. Bruynd, Mr. P. J. Batteke. From Gibraltar.—To Shanghai: Mr. J. de Arguiz.

Per P. and O. steamer Delta, June 4, from Southampton.—To Hong Kong: Lieut. C. C. King, R.M.A. To Singapore: Capt. G. Mairis, R.M.A. From Marseilles, June 12.—To Hong Kong: Don Antonio, Moraleda.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The intelligence by the present mail confirms to the fullest extent the statements made in the *London and China Telegraph* of the 13th inst. in the article headed "The Tycoon brought to Bay." It will be seen by the following, which we take from the *Commercial News* of the 30th March, that the Tycoon has made submissions to the Mikado, and that the Conference, of which we spoke in the article named, has made its report long before this date, which there is every reason to believe will have been in favour of an extended opening to foreign commerce. Our contemporary says:—

"The most important epoch in the history of our relations with the Japanese is before us. The Tycoon, having been compelled to pay obeisance to the Emperor—having been called upon to refute and answer the charges of his accumulating enemies—has, through wise counsels, succeeded in not only ingratiating himself with the Mikado, and being the recipient of another token of his regard in the shape of higher rank and title, but has won the admiration of several of the most powerful Daimios, and a good understanding has resulted from his fearlessness and promptitude in daring the emergency. The question as to foreigners and Japanese foreign policy is not only agitating the higher powers at Miako, but is the all-absorbing topic with all classes of Japanese, and pervades all communities. And rightly do they judge of its importance. All other matters fade before the single one, for as they decide now, so will they have to abide. It has been contended by the several Daimios now at Miako that the Mikado and Tycoon should, for the safety and welfare of the country, delegate power to half-a-dozen of the great Daimios, representing all phases of political opinions, to confer and decide as to the will of the nation in regard to foreigners; and that the views agreed to by those six Daimios should receive the sanction of both the Mikado and the Tycoon, and become the law of the land. In a spirit of conciliation, and with a desire to produce harmony in the empire, the following Daimios have been appointed, and have entered into a conference:—Etchizen, Tosa, Aids', Stutz'bashi, Shimatz'saboro, Oowajima. We recognise in the above list stanch friends of foreigners and of a liberal policy, to the end that Japan be opened to unrestricted trade and unlimited prosperity; and although two, if not three, are as unremittingly opposed to all concessions, and evince a desire to see the country freed from our presence, we do not despair of the result. The effects of opening the country to foreigners by a decision of the conference will prove that step the wisest they can adopt. Our advices from Miako report that a decision by the conference will be had before third Japanese month, or about the middle of April."

It will be remembered that we stated Satsuma had received permission to bring a considerable quantity of silk to market for sale to the foreigner. It seems that the Mikado has put in his claim also for a share of the profits derivable from the trade of Kanagawa.

At Kioto, Osaca, &c., proclamations are said to have been issued by command of the Mikado and the Tycoon, notifying to the people that there is no immediate cause for fear or distrust; and that they may continue their trading operations with foreigners. It is reported that an arrangement has been come to between the Mikado and the Tycoon, by which the former is to be benefited by foreign trade to the extent of fifteen thousand rios ($25,000) per annum; which sum is to be levied upon raw silk. When the Spiritual Sovereign and the great feudatories have had some taste of the benefits that

Digitized by Google

flow from commerce with the foreigner, we need have no fear that the amicable relations once entered into will be lightly broken off.

The rumour that one of Satsuma's ships had been fired upon and sunk in the Straits of Shimonoseki turns out to be true. The following is Satsuma's own report of the affair to the Gorojio, or Council of State :—

The Prince of Satsuma had borrowed one of the Tycoon's steamers at Nagasaki, and she had gone to Satsuma's domain. Being in want of repairs, she was sent through the Inland Sea, on her way to the Nagasaki foundry to be repaired, on the (24th Jan.) 22 of the 12th moon of last year. Two days after this she came to an anchor in the Straits of Shimonoseki at eight o'clock in the evening. Shortly after this, the batteries on the northern shore opened fire upon her. Supposing that the steamer had been mistaken for a foreign vessel, the commanding officer ordered signal lanterns to be hoisted at the mast heads, according to an agreement entered into among the Daimios, to provide against such a misunderstanding. The signals were made and hauled down. But the firing commenced again, and as there was no attention paid to the signals when repeated, there being no help for it, the anchor was weighed, and the steamer directed towards the harbour of Shiro-no-e Mura, in the district called Awotoma, on the coast of Kokura. But a fire soon broke out in the ship and she was consumed before she reached the port Of the ship's company, nine officers, and nineteen others, including the engineers, lost their lives. Their bodies have not been found.

Tsiosiu, Prince of Nagato, who is the offending Daimio, pleads ignorance, and blames those on board the steamer, for neglect of the preconcerted signals, which should have been shown in time to prevent mistake. The steamers *Foh-kien* and *Scotland* are reported to have been purchased by Satsuma.

Professor Risley's amphitheatre was opened on the 28th March, and a large audience, consisting of upwards of 300 persons--Japanese, Chinese, Europeans, &c.—attended, and at eight o'clock the performances commenced. The arrangements as to lights, seats, &c., were very well made ; and judging by the enthusiastic applause which greeted the conclusion of each act, we conclude that the circus is the most popular amusement we have yet had at this port. The Japanese seemed delighted beyond measure with the feats of horsemanship, and with the high training of the dogs, all of which is something quite novel to them.

YOKOHAMA.

The following is a continuation of the Review of the Export Trade from this port, the first portion of which appeared in the *London and China Telegraph* of the 13th inst. :--

Raw Cotton has formed a very important branch of—indeed it may be said to have assumed the second position in—the export trade from this place during the last six months. It has given employment to a considerable number of vessels to Europe and China, and has proved, most conclusively, that this country possesses resources far beyond what is generally imagined by persons not acquainted with it, which resources only require inducement and opportunity to develop themselves.

Two years ago, as we have before observed, cotton was an article of import, and even when we closed our last report, only a few shipments had reached home from this. These few, however, had important results, for they convinced those connected with the trade that the Japan cotton is superior to China and to most of the Indian growth.

It is, therefore, not to be wondered at that, keeping pace with the great excitement prevailing in all the leading markets at home and in the East, a great demand should have manifested itself, resulting in considerable transactions at advancing rates during July, August, September, and October. At this period supplies began to decrease, the old crop's yield being exhausted. During July and August prices had advanced from $16 to $20 ; they declined in September to $19 ; but advanced in October again to $20. Towards the middle of November, as supplies of the new staple came to market, they were eagerly purchased at about $23 to $24 ; they however continued rather small during November, but then the effect of the high prices ruling began to tell upon producers, and, consequently, in December the cotton was freely supplied, and under the influence of favourable advices both from home and from China, the demand became very active, and prices advanced to $34 and $34.50 for best qualities,

The exports of cotton during the last six months of 1863 amount to 24,539 bales, and we calculate that would comprise about 4,000 of the new crop.

The exports for the two half-years show an amount for 1863 of 33,187 bales ; or, taking the weight at 1¼ piculs per bale, which we think may fairly be assumed to be the amount of the bale on average, 58,078 piculs.

We are happy to say that, apparently no restriction has been put upon the supplies of cotton, although on several occasions there were reports that the Japanese authorities would take some measures to curtail them, and there is every reason to believe that the native dealers experienced some difficulties in bringing down the staple to Yokohama, difficulties, however, which the large profits made by them determined them to brave and overcome.

We cannot end this slight review of this trade without again remarking upon the enormous increase which has taken place in the culture of cotton in Japan. We cannot ourselves go into the cotton-growing districts, and we are therefore limited for information to those accounts which the native dealers may vouchsafe, without any check as to what the amount of their reliability may be. So far as may be judged from this source, there is reason to believe that they regard this crop as having been very successful We learn, too, from them that they estimate that the yield is about double that of former years, and that much more cotton has been planted than formerly ; nor can it be doubted that, since the effect of the high prices lately ruling will have began to be felt by the original producers, their efforts would naturally be redoubled to increase the crop of a staple in so great demand in the ports open to European commerce.

We must permit ourselves one further remark before closing ; and that is of felicitation that at the present time, when the supply from America has ceased, when every bale from an outside quarter may be regarded as a boon to our starving operatives, a supply from an hitherto unexpected source has risen up, amounting to such a sum in a few months as that we have above quoted.

In our next number we shall publish a portion of the Tabular Returns of the Navigation and Trade of Yokohama for 1863.

HAKODADI.

Dates from this port are to the 16th March. The American steamer *Meteor* arrived from Nagasaki on the 10th, and on the 13th was passed over to the Imperial Government for the sum of $47,500. The new duty tariff came into operation here on the 1st day of the second Japan month. The principal alteration is the reduction from 35 to 5 per cent. on liquors ; and the understanding that, in future, foreign Government officers are to pay duty on stores landed for their own use, in the same way as others. According to the Custom-house returns, the export trade of this port (by foreigners) for the past year was $267,538, against $167,025 for 1862 ; a very decided increase.

It is now generally believed here that we must add another to the casualties in shipping in the neighbourhood during this winter. The *Dove*, a Prussian three masted schooner, Captain Wieland, left for Shanghai on December 12, in company with the *Osborne*. On the 14th the latter vessel put back to Hakodadi, with some damage to her sails, and several of the crew frostbitten. The captain reported very heavy weather at the western entrance of the Strait of Tsugar, which, together with the strong current setting into the Strait, and the intense cold, made it impossible for him to beat off the land into the Sea of Japan. He last saw the *Dove* on the 13th, endeavouring, also, to beat off the land. Shanghai and Nagasaki reports make no mention of the *Dove*, and, as there has been no native report of any vessel driven ashore, it is presumed that she foundered in the storm which caused the *Osborne* to put back. This case is more particularly distressing as Captain Wieland had his wife and family on board.

OURSELVES AND THE "JAPAN HERALD."

We observe that a "Subscriber to the *London and China Express*" has called the attention of the *Japan Herald* to an unintended piece of injustice committed against the last-named journal by the former in its issue of the 26th November last. The *London and China Express* of that day stated that the report on foreign trade, so highly spoken of by Colonel Neale, made its appearance in the *Japan Commercial News*. Our "Subscriber" corrects us by pointing out that the article in question first saw the light in the *Japan Herald* of the 16th of January, 1863. We can assure our friends in Japan that the error was simply an oversight, and not the result of any "dirty trick played" upon us. An occasional slip of the pen, being but mortal, we confess ourselves liable to ; but those who may attempt to "play tricks" upon us will assuredly find them detected and punished. We are glad, however, to have had the error of the 26th November last pointed out to us, and to be thus enabled to restore to our valued contemporary the *Japan*

Digitized by Google

Herald the entire credit of the article, which had the almost unprecedented honour conferred on it of being copied into the *London Gazette*, the official organ of the British Government.

CHINA.

PEKING.

From the capital there is no news of importance. The American Minister had requested Prince Kung to interdict any supplies to the *Alabama*. The following is the notification issued on the subject:—

The Board of Foreign Affairs is fully aware that a treaty of peace and amity exists between China and the United States; it cannot be permitted, therefore, that American citizens coming here to trade shall suffer injury from any one while living in the country, nor their ships or goods be destroyed. Now, the steamer *Alabama* has been burning American vessels with their cargoes on the high seas; and she must not be allowed to enter our ports, still further to destroy their ships, and every other vessel with similar evil designs must be likewise forbidden to enter them.

We therefore hereby notify all the governors general and governors of the maritime provinces to enjoin all the local authorities to keep a careful and close oversight; and if the steamer *Alabama*, or any other vessel of war scheming to injure American property, approach the coasts of China under their jurisdiction, they are to prevent all such entering our ports. Let them also directly issue a proclamation, embodying all these circumstances and reasons, for general guidance.

A copy of this despatch has been communicated to the Ministers of Great Britain, France, and Russia, as well as to the American Minister, Mr. Burlingame; and it is accordingly forwarded to the Manchu commandants, the governors-general, and the governors along the coasts for their action thereon.

Horse-racing, under the most adverse circumstances, always prospers with Englishmen. A second meeting has been held at the capital, which came off with the greatest *éclat*, and was graced by the presence of the principal members of the foreign legations and several high Chinese officials. A capital luncheon was served, of which the principal gentlemen present, both native and foreign, partook. The drilled Manchu force was exercised on the ground, between the races, to give variety to the entertainment.

TIEN-TSIN.

The following account of the occupation of the foreign community will be found interesting:—

We are in the middle of the Chinese New Year's holidays. The main streets of the city and suburbs of Tien-tsin are turned into a market place. A vast quantity of the red candles, coloured lanterns of all shapes and sizes, carved red paper, kites, toys, artificial flowers, and all sorts of sweetmeats and dainties, in short, everything necessary for the celebration of the New Year, is exposed in the streets for sale. Pictures, some of huge size, are exhibited on the walls and everywhere a suitable place can be found; the whole street looks like a picture gallery. It would be difficult, however, to say to what school the paintings belong. We were surprised to find even some French pictures (those cheap sheets of paper covered with soldiers and other figures) amongst the array. Occasionally you may see little boys, who, with very grave faces and gestures, are hard at work to exercise the Chinese reverence and shaking of hands, indispensable during the New Year's festivities, and practised all over China on the first day of the new year.

Whilst the Chinese population is thus busily engaged, the foreign community of Tien-tsin is by no means idle. Tien-tsin in winter is a splendid place for recreation, and we would advise all those whose health has suffered, and whose nerves are relaxed through the influence of Hong Kong or Shanghai summers, to go to Tien-tsin or Chefoo, and spend a winter there. The months of December, January, and February are delightful; the air serene and bracing. Of all the different amusements and games practised here during the time that we are icebound, skating and coursing are most adapted to give the body vigour and health.

Riding has, no doubt, a most sanative influence, but we don't mean riding alone; it is riding in company which is calculated to give body and mind strength and new life. Fancy the pleasure of riding on a cold but calm day thirty miles across country, with a lot of jovial fellows, eagerly looking out for hares or foxes. This may every day be seen, and all classes of the community, whether official, professional, or mercantile, give themselves up to the excitement of the time. It will be easily seen that the Tien-tsin residents may be taken as a model in one or two cases. They know how to drive away *ennui*, and they do it.

SHANGHAI.

The following are the items of general news:—The London mail of February 10 arrived on the 31st March. The weather had been unseasonably mild for several days, but the general health of the community was not affected. An amateur theatrical performance was given by the sailors of H.P.M.S. *Gazelle*, lying in the river.

Burgevine, the ex-general, has turned up again from Japan, and been arrested by the American Consul.—The culprits who seized the *Tsatlee* have made their escape from gaol.—On the 31st March a daring robbery was perpetrated in broad daylight in the centre of the English settlement. A bank coolie, engaged in carrying a box of sycee, was surrounded by five armed Cantonese, while passing along Church-street, between the premises of the Commercial Bank and those of Messrs. Birley, Worthing on, and Co. A policeman and a soldier of the 67th Regiment, who happened to be passing, saw the men break open the box and endeavour to escape with eight shoes. They immediately gave chase, and at length captured two, the other three having succeeded in making good their retreat. Another case of a somewhat similar description occurred on the 27th. A coolie carrying a chest of silver along Temple-road was attacked opposite the London Mission, and the chest robbed of four hundred Mexican dollars. The thieves escaped, and have as yet evaded detection.

The Municipal Council for 1863-64 have submitted to the land renters their report for the past year. The Rev. Mr. Yates has been compelled through failing health to resign, temporarily, the office of interpreter.

Circumstances having delayed the arrival of the new Superintendent of Police, the Council considered it inexpedient to proceed with the contemplated alterations in the organisation of the force. The strength of the force is at present 126 men, but a large increase is proposed. The streets are again to be partially broken up; but as it is for the purpose of laying down gaspipes, the matter is rather one for congratulation than for regret.

The following particulars with regard to Major Gordon's reverse at Kintang are from the *Shanghai Recorder* of March the 28th:—

We have received advices from Major Gordon's force up to the 25th inst., and now continue our narrative of its movements from the period of the occupation of Leeyang. We are sorry to have to record a serious reverse which the Imperialists have met with at Kintang:—Major Gordon, Colonels Kirkham, Tumbelty, Williams, Major Brown, A.D.C.; Captains MacMahon, Mansell, Brinning, Willson, Williams, Creamer, Raddimore, and another wounded; Major Toute and fifteen rank and file killed, and ninety wounded.

The city of Leeyang being got into a state of quiescence, Major Gordon with the 1st, 2nd, and 5th Regiments, and proportionate force of artillery, marched on the 16th *en route* to the city of Kintang, in possession of there ebels, and the same night reached a village some 12 miles to the north of Leeyang, where, mid the vast ruins, a few houses still remained with roofs, which afforded shelter for the troops in preference to tents pitched on the ground saturated with the continuous rain. These practical sons of Han soon each took up the breadth of his back where he tossed off his blanket and accoutrements; wood was as quickly collected, and fires lighted—a flat cooking pan supported on a few bricks, rice, some salt fish and water, and chow-chow was soon ready, which disappeared with tremendous despatch, and with apparently as much relish as the most daintily prepared repast.

The line of march was the main road from Leeyang to Kintang On the right lay lakes and hills; on the left a broad outwork of creeks through which the flotilla of boats crept at a steady pace. The land lies low and flat, and has all the appearance of having been a most fertile grain-producing plain, though it is now fast returning to that state of swamp from which the industry of ages had reclaimed it. Mulberry trees line the banks of the creeks, uncared for; reeds and other aquatic productions occupy the place of the cereals; old walls and ruins mark the dwellings of a once numerous, peaceful, and industrious population, of whom there now remain but a few half-starved cadaverous-looking creatures, prowling about with hollow cheeks, sunken eyes, and tottering gait, picking up such herbs as are visible; while skeleton after skeleton, white and bleached, lie all along the way, felled either by the hand of the soldiers of great peace as an amusement, or plundered and burned out of their dwellings, as they sunk from starvation.

The same devastation and ruin was present all along the remainder of the march to Kintang. There is no sign of the soil having been cultivated for some years, and this is a district which has been in the undisputed possession of the rebels for over four years.

Digitized by Google

Kintang is a district city standing in this vast plain, now little better than a desert, 30 miles north of Leeyang, the same distance to the west of Chan-chow-foo; unlike most of the cities in the hands of the rebels it has no outworks of defence, nor do the walls seem to be changed from their original state. On the morning of the 21st instant, the boats and guns were passed into a basin to the east of the city, distant from the wall only five hundred yards, without any opposition on the part of the garrison, beyond a few musket shots expressive of their disapproval of the proceeding. The heavy guns and mortars were placed opposite the angle of the wall to breach it, while the smaller guns and mortars were arranged so as to enfilade the *terre plein*.

The usual display on the part of the garrison was entirely absent; there the grim black walls stood without a single colour or spear visible.

The guns opened fire at 12 o'clock, bringing down ponderous masses of stone, clay, and brick, at every discharge, until at the end of two hours a breach was formed practicable to ascend; yet not a move on the part of the defenders. The advance was sounded, the 1st regiment by the bridge across the city ditch, and portions of the 2nd and 5th regiments by boat. The colours vied with each other in the ascent of the breach, but scarcely had their brave bodies set their foot on the top of the walls, than overpowered by overwhelming numbers, pouring on them musketry, bricks, stones, fire balls, and every other kind of missile procurable, they rolled with the advancing masses to the bottom, like a broken wave. Three times covered by the artillery, which did great execution, the party rallied and rushed up the breach, but with the same result.

Unfortunately at this stage of the proceedings Major Gordon was wounded and had to be carried to the rear, but getting into his boat he pushed forward and ordered up Col. Kirkham with the fresh companies of the 5th Regiment. The breach was again mounted but in vain—the defenders still held their ground; Kirkham was now also wounded and placed *hors de combat*. Again the breach was cleared by the artillery, and fresh companies of the 2nd Regiment coming up, the officers rallying their men, accompanied by Major Brown carrying Gordon's flag, made a most desperate attempt to establish themselves in the breach; the struggle for mastery lasted for several minutes, victory wavering in the balance, when the elements decided the day by a hurricane of wind and rain. The assailants slowly retired disappointed but not beaten. The force encamped in its position for the night, but news having reached of the Imperialists falling back from Chan-chow-foo, and the communications being threatened, the operations against this city (inasmuch as they were meant to press on Chan-chow-foo) were now without object, consequently the force withdrew and returned to Leeyang. Taking from them a portion of the garrison, Major Gordon continued his march to oppose the Rebels in the neighbourhood of Weosieh, at which place he arrived on the 25th.

In the operations the wounded and killed were as follows:—Major Gordon, Major Brown, Colonel Kirkham, Colonel Tumbelty, Cononel Williams, Captain MacMahon, Captain Mansell, Captain Brinning, Captain Willson, Lieutenant Williams, Lieutenant Creamer, Lieutenant Raddimore, and Lieutenant ——— wounded; Major Toute killed. Ninety rank and file were wounded and fifteen killed.

The following account is from the *China Mail*:—

The reverse which the Imperialists under Major Gordon sustained at Kintang admits of explanation, and we are glad to know that it has not damped the spirits of the disciplined force. So far as we have been able to ascertain, the circumstances are these:—The force left Li-yang on the 16th of March, and proceeded twelve miles that day and five more the next. On the 18th, they halted, marching again, on the 19th, when they arrived within four miles of Kintang. On the 20th, they advanced to within 700 yards of the city. The force numbered only 1,000 infantry and 350 artillery. The city is small, with no stockades, and the rebels did not venture out of it, nor were any flags visible on the walls.

At 10 A.M. on the 20th, just as the siege guns were landed, Gordon received letters that the Imperialists had fallen back from Chang-chow-foo to Woosih. This was a derangement of the general plan, for it had been determined that the Imperialists should press Chang-chow-foo as hard as possible while Gordon attacked Kintang. It was of importance that the two places should be threatened at the same time, so that neither might assist the other. The intelligence that Chang-chow-foo had been for three days without an enemy in front of it caused Major Gordon to doubt the policy of attacking Kintang; but as his arrangements for the attack were made, he considered that it would look awkward to withdraw. The attack was therefore proceeded with. In two hours a good breach was formed, and the Major led the assault in person. Hitherto the rebels had only replied feebly to the fire of the Imperialists, but as soon as the attacking columns reached the crest of t breach the most obstinate resistance was encountered. The colours of the first regiment were seized in the hands of the man who carried them, and lost after a desperate struggle. Meantime Gordon received a bullet through the fleshy part of his thigh, in consequence of which he had himself carried to the rear, and the assaulting party also retired, beaten. Gordon then directed Major Kirkman to renew the attack, which he did, both he and his men fighting bravely, but again they were repulsed, and Kirkham dangerously wounded by a bullet in the shoulder. A third time the assault was made under Major Brown, Gordon's aide-de camp, and with a similar result, Brown also being slightly wounded. The rebels fought very desperately, and the affair is said to have been worse than Taitsan. Brickbats, stones, and stinkpots were poured down upon the advancing column in great profusion. After the third attack had failed it began to rain tremendously, and the assault was abandoned for the day. Ten or twelve officers were wounded, and Major Chute of the 2nd Regiment was killed. Of the rank and file from 80 to 90 were killed and wounded, about 20 being killed. During the night the rebels attempted to surround Gordon's small force, but were forced to retire, having been rather warmly received.

The appointment of the Rev. W. J. Smith as British Consular Chaplain at this port, has been officially notified to the Church trustees by H. B. M. Consul. [We presume this is only a temporary arrangement, as the following announcement has been made here during this week:—The Rev. Charles H. Butcher, M.A., Fellow of University College, Durham, and curate of Hammersmith, has been appointed chaplain to the Church Establishment at Shanghai, China.]

KIUKIANG.

Some excellent races took place at this port on the 23rd and 25th March. Up to within two days of the time fixed, the weather had been so unpropituous that it had been proposed to train buffaloes, as the only animals capable of wading through the sea of mud which was where the course ought to have been. On the 20th, however, it cleared up, and the races came off most successfully; the omnipresent Aunt Sally being in attendance.

HONG KONG.

The dates are down to the 15th of April. The French mail of 17th of Feb. arrived out on the 2nd of April, and the P. and O. mail of the 26th on the 11th. The following items of news are from the *China Mail*:—

A fire occurred in one of the China houses in a street leading from Lascar-road to Taipingshan. As the locality is rather dense, and the dwellings very combustible, fears were at first entertained for the entire neighbourhood. Captain Quin was first on the spot, and had no less than five of the fire-plugs opened and a hose attached to each. The water played beautifully from each of the hose, and drenched out the fire in two hours. There was no disorder, but one Chinaman was apprehended while leaving a house with a bag of dollars belonging to an old woman who lived in one of the houses. Another old woman frantically implored some one to save a box she had left behind, and, on this being done for her she acknowledged the favour with many chin-chins. Two houses were burnt down before the fire was extinguished. The water-plugs were of immense value; some fire engines which were brought to the spot were not called into requisition.

The amateur performances for the season of 1863-4 came to a close last night, when the "Tailor of Tamworth" and the "Aladdin" burlesque were performed. Of the former we have already spoken, and have only to add that it was better played on this occasion than on the previous one. This we attribute to the increased familiarity with their parts which the performers had gained by experience, and it shows the value of rehearsal.

The Sailors' Home is still not nearly finished, and the money raised ($38,000) more than spent, the committee being in debt to the contractor. This is a pity, to say the least of it, and we call attention to the fact as one which cannot be too widely known. The principles upon which the institution

Digitized by Google

would have been conducted were liberal and sound; the necessity for such a building admitted on all hands; the moral and physical interests of the sailors frequenting this port loudly spoken of; and more than half of the sum hitherto collected was paid by a gentleman now deceased. We have reason to think that the late Mr. Joseph Jardine would have paid all the money required to build a Sailors' Home, had he not believed that the community would gladly be represented in the matter by sharing with him in the expense. They have not done so in the proportion or to the extent which might have been expected, and the result is the present unfinished building. These things are facts. When looked at fairly, the conclusion cannot be avoided that we should be doing a foolish thing to leave an unfinished building, with a debt even upon the part of it that is built, and commence the erection of a Public Hall, let the necessity for such an institution be ever so urgent, and the opportunity for building it the most favourable that could be had. It is very hard; but there are the facts, and what else can be made of them? The Clock Tower is a smaller matter, but still a case in point. We are truly a strange community, to do as a body what as individuals we should view as absurd and foolish.

A more desirable scheme than the City Hall was never propounded in Hong Kong, and the opportunity offered in the affair of a site leaves nothing to be desired but the funds to go on with. But the dead lock now arrived at was inevitable, and the plea for the Sailors' Home unanswerable.

At a meeting of the Legislative Council the minutes of last meeting having been read and confirmed, the President moved the second reading of a Bill to authorise the appropriation of a supplementary sum not exceeding $151,770·65. The Council next resolved themselves into a committee to examine the items in detail, which were all agreed to, and the Bill was passed.

It was next moved that an Ordinance be passed to give effect to Her Majesty's proclamation of neutrality between the United States and the States calling themselves the United States of America. The Hon. Mr. Perceval pointed out that the Act could be evaded by laying down munitions on the opposite shore, which was admitted to be true. The Bill having been read, was then passed.

His Excellency said, with regard to the Mint, he had to thank the non-official members of the Council and the Surveyor-General. He thought that they had selected the best site, viz.,—Causeway Bay. The distance was a drawback, but that might be got over by a ferry steamer. The Surveyor-General said he would have to reclaim twenty acres of land.

With regard to the Bankruptcy Ordinance, it was agreed that it should be examined by the committee appointed for that purpose; and to have their report ready before the next meeting of Council. The council adjourned until Saturday, the 16th day of April.

A correspondent has directed the attention of owners and commanders of the steamers trading up and down the China Sea, to there being an abundance of good coal to be had at Coal Point, Labuan Island. The weather was noticed as being disagreeably heavy and rainy towards the end of last week, and an opinion advanced of hottish weather following, which view has not, however, as yet proved correct.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 5d. to 6s. 6d.	6s. 6d. to 6s. 7d.

BORNEO.

SARAWAK.

(From the *Straits Times*.)

The progress of Sarawak cannot fail to interest even those who are in no way connected with the country. It has been said by Mr. Crawfurd, and other eminent writers, that a European settlement in any well-peopled part of the Archipelago, just enough to abstain from oppression and to deal fairly, and strong enough to enforce obedience from and secure protection to its people, cannot fail of success. Sarawak is working out that problem to its extreme, and its development would seem to bear out the conclusion indicated. The difficulties that beset the foundation of the country were greater than can be readily conceived, and for many years there was a constant sink of money. Now, however, a tide of substantial return appears to have set in. The trade returns have year by year been improving. The following are the returns of last year, which have just reached us:—

The above abstract of the coast and foreign trade of Sarawak shows the steady increase of imports and exports for the year 1863 over the four preceding years. In the years 1860 and 1861, the trade in Sago was destoyed for a time on account of the Mukah war, at the settlement of which the sago ports were opened, and the product which had been so long locked up was brought to Sarawak for sale, increasing the returns considerably, since which time there has been no intermission in the trade. The increase in the quantity of Gutta Percha forms an important item in the returns for 1863, and one which is likely to continue, both Malays and Dyaks being actually employed in working the forests. The foreign import trade is chiefly with Singapore, Java, and the Malay Peninsula, carried on by large native prahus of tonnage ranging from 40 to 190 tons, also the steamer to Singapore, and brigs or schooners as required. The foreign export trade is in sago, gutta, antimony, rattans, and timber, exported direct to England. The rivers from which most of the imports are derived are the Rejang for rice, gutta percha, wax, and rattans; the Batang Lupar for rice, paddy, gutta percha, wax, and gold; the Mukah Oyah and Matu rivers for sago in the raw state; Bintulu, gutta percha, camphor, wax, birds' nests, and rattans; Serebas, rice and gutta percha; Kalucka, rice and gutta percha;

Digitized by Google

Sadong, rice and birds' nests; Lundu, rattans, cocoanuts, and oil from the islands adjacent. This is expected to be much increased by the opening up of trade with the Kayans of the Rejang, from whom there is nothing but good news.

JAVA AND NETHERLANDS INDIA.

Dates from Batavia are to the 14th April. The value of cotton and woollen goods imported into that port during the month of February last, was as follows:—Dutch, 476,409f.; foreign, 337,342f. At a sale by the Billiton Tin Maatschappy, 3,370 piculs of tin were sold, averaging 68 19f. per picul. The *Wyoming* left Batavia Roads on the 8th April, steering north-west.

MALACCA STRAITS.

SINGAPORE.

Dates from this port are to the 23rd April. The London Mail of the 10th March reached there by the P. and O. Company's steamer *Jeddo* on the 15th, and the French mail with dates from London to the 17th, and Marseilles to the 19th March, arrived on the evening of the 21st.

The decision of the Home authorities regarding the transfer was anxiously looked for. April would close the official year 1863-64, and the Government Administration report would appear a couple of months afterwards. It is expected to show a considerable reduction in public works, and a steady yield for the Stamp Tax, of the proceedings of which only four months were included in last year's accounts. Some attention has again been directed to the progress making by the Dutch in the north-west coast of Sumatra. The Batavia papers complain that the Indian journals should term that progress "encroachment." The rights of the Dutch to this magnificent island are founded upon the treaty with Holland in 1824; and it would certainly seem that England then not only withdrew from the island, but acquiesced in the assumption by the Dutch of supremacy thereafter. All that was reserved was a stipulation from the Dutch that they should make no treaties with the native princes tending to exclude British trade or commerce, or to expose it to a disadvantage. Strong suspicions have been excited by the reports brought in by native traders, that exclusive treaties have latterly been concluded, and these suspicions are thought to gain weight by the circumstance that imports, both to Penang and Singapore, of Sumatra produce, have lately declined very much. No actual proofs of such treaties have, however, been brought forward. Indeed, no copies of any of the treaties lately made between the native princes and the Dutch have revealed this, and it is consequently impossible to say what they may contain. It is very desirable, observes the *Straits Times*, that the public mind should be set at rest on this subject, and for this purpose the Foreign Office at home should appiy to the Hague for copies of all treaties recently concluded in Sumatra, and when obtained, they should be sent out to the authorities here; for any complaints against the Dutch at present are made entirely in the dark.

The long drought had not yet been fairly broken. Within the three days before the 23rd some heavy showers had fallen, but of anything like continuous rains there had been none. Besides great damage to the fruits and vegetation which this condition entailed, a great scarcity of water in town had resulted.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DOS REMEDIOS—On the 10th April, at Macao, the wife of F. A dos Remedios, of a son.
KRASBERRY—On the 12th April, at Mount Zion, Singapore, Mrs Krasberry, of a son.
PARKES—On the 22nd May, at 32, Priory-road, Kilburn, the wife of Sir H. S. Parkes K.C.B., H.B.M.'s Consul, Shanghai, of a daughter.
SINCLAIR—On the 5th May, at Brussels, the wife of Charles A. Sinclair, Esq., H.B.M.'s, Consul for Chin-Kiang-Foo, of a son.

MARRIAGES.

CAIRNS—CUNNINGHAM.—On the 17th May, at St. Andrews, St. Castle. Douglas, by the Rev. S. Cowan, of Kelton, Capt. Robert Hannah Cairns, late of Kirkcudbright, to Jessie, eldest daughter of the late Robert Cunningham, Esq., of Lurkins. No cards.
FABRIS—JENKINS.—On the 5th April, at Trinity Church, by the Rev. R. Hamilton Edward Antonio Fabris, Esq., of London, to Julia Catherine, only daughter of the Rev. Dr. Jenkins, of Charleston, South Carolina. No cards.
WOLFE—MACLEHOSE.—On the 12th April, at St. John's Cathedral, Hong Kong, by the Rev. Thomas Stringer, M.A., the Rev. John Richard Wolfe, of Fuuchau, to Miss Mary Ann Margaret Maclehose.

DEATHS.

ANDERSON—On the 24th May, at the Grove, Norwood, Surrey, Mary Ann, wife of Arthur Anderson, Esq., Chairman of the Peninsula and Oriental Steam Navigation Company, aged 62.
CHAPMAN—On the 7th April, at the Government Civil Hospital, Hong Kong, Edward Lloyd Chapman.
D'ENCARNACAO—On the 31st March, at Shanghai, Carlos Maria, the infant son of Albino D'Encarnacao.
KING—On the 8th April, at the General Hospital, Hong Kong, Edward King, private H.M. 99th Regiment.
LEISK—On the 11th April, at Mount Erskine, Singapore, Anna, the wife of Captain W. C. Leisk, aged 65 years.
MAINE—On the 4th April, on his way home, on board the P. and O. Co.'s steamer China, Samuel Maine, Esq., of Yokohama, Japan.
MOLESWORTH—On the 5th April, at his residence, Portsdown Lodge, Notting-Hill, much beloved and most deeply regretted by all who knew him, Lieut. Robert Sackville Molesworth, R.M., aged 38, fourth son of the late Capt. Arthur Molesworth, R.M., for the last seven years Editor of *Thacker's Oeerland News.*
MATHESON—On the 11th April, at Hong Kong, on board the Hercules, George Matheson, sergeant, R.E.
ROBINSON—On the 21st March, at the Seamen's Hospital, Hong Kong, William Robinson, seaman ex-British barque Bristow.
STEPHENSON—On the 11th February, at Melbourne, Henry Stephenson, assistant with Messrs. Parker and Co., of Hong Kong.
SWANSON—On the 27th March, at Shanghai, Mr. William Swanson, aged 33 years.
TAPLIN—On the 21st March, at Yokohama, of small-pox, Frederic Taplin, engineer H.M.S. Argus, aged 36.
WILLIS—On the 9th April, at Hong Kong, on board H.M.S. Melville, Charles Willis, seaman H.M.S. Pelorus.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—MACAO.—New Tyshans, arrivals to date amount to about 1,400 bags of the Kysow fashion leaf, under private contracts, now in course of preparation for shipment, which would, however, only be equal to some 1,700 to 1,800 half chests when packed, after the process of firing, picking, and sifting; there seems to exist a great competition in the country which enhances the cost, and prices are reported higher by 2 to 3 taels.

CANTON.—The clearing of the Shanghai market of Congous, simultaneously with the shipments hence on China account, advised in last report, has to some extent tended to make holders of that description firmer in some instances. That is to say—some holders have refused offers quite as good as the rates at which late settlements were made, whilst others, either pressed for means or apprehensive at the near approach of the new season, have accepted prices which range as far as 1½ tael less. The fall established may be called one tael, the current quotations laying teas down in London at only one penny above the rates ruling there at date of last advice. A few musters of Tyshaans, country make, have been exhibited, and one small lot has been placed at a high figure. Scented Teas remain neglected. The market has been cleared of Country Greens for shipment to New York. In Canton Greens there is no alteration. The following are the settlements of the fortnight. Congoes 10 chops—say blackish leaf Pekoe flavour at 21½ to 24½ taels and blackish leaf Pekoe flavour at 26½ to 30½ taels; also 230 half-chests Tyshaans at 30½ taels. Scented Teas none. Canton Greens, 5,000 boxes Gunpowder at 18 to 20 taels. Country Greens, 2,900 packages at 42½ to 45 taels, making the total settlements of the season 11,250 packages. The stock is reduced to 21 chops of Congou, and a few Canton Greens and Scented Teas.

FOOCHOW.—There is no change to report in prices. The settlements of the fortnight are reported as under. Congous, 2,576 chests and 456 half-chests at 7 to 14½ taels for low and dusty to common, and 15 to 18 taels for good common to fl'ory. Souchongs, 866 chests and 226 half-chests at 16½ to 23 taels for common to fair. Oolongs, 1,364 half-chests at 13 to 15 taels common cargo. Scented Teas, 2,900 boxes at 17 to 18½ taels for common. The following is a list of arrivals, sales (including contracts) and stocks on hand, comparing this season with the last.

ARRIVALS.

	1863-64.		1862-63.
Congou	547,800 chests.		572,700 chests.
Souchong	60,570 do.		33,900 do.
Pekoe	7,700 do.		11,900 do.
Oolong	178,900 half do.		217,300 half do.
Scented Tea	73,400 boxes.		132,850 boxes.

SALES AND CONTRACTS.

	1863-64.		1862-63.
Congou	544,950 chests.		570,700 chests.
Souchong	60,000 do.		33,900 do.
Pekoe	7,100 do.		11,200 do.
Oolong	176,400 half do.		216,200 half do.
Scented Teas	72,570 boxes.		133,050 boxes.

STOCKS.

	At present.		Same time last year.
Congou	2,850 chests.		2,000 chests.
Souchong	570 do.		Nil.
Pekoe	600 do.		700 do.
Oolong	2,500 half do.		1,100 half do.
Scented Tea	830 boxes.		800 boxes.

SHANGHAI.—Black: Settlements for the fortnight on the market, 1 chop or 616 chests; reshipped on owners' account, 2 chops or 505 chests; together, 3 chops or 1,121 chests, making total to date 393,089 chests. Stock waiting shipment and for resale, 8 chops. The quotations are:—Second and third crop Oopacks and Ningchows, tls. 25 to 28; second and third crop Oonhams, tls. 20 to 25; second and third crop Hohows, tls. 17 to 21. Green: Previous to the arrival of the English mail on the 31st ult., the market was very dull, and although teamen appeared more willing to realise, yet no decline in price was established. Since then there has been more demand, and rates within the last day or two are decidedly firmer. The stock is now very small. Reshipments and settlements for the fortnight:—7,431 half-chests Fychows, &c., 946 chests Pingsuey, 796 half chests Japan and Shanghai packed—9,173 half-chests, making total to date, 282,450 half-chests. Stock of green tea is estimated at 5,309 half-chests Fychow, &c., and 1,100 chests Pingsuey; together, 7,009 half-chests.

KEWKIANG.—Greens: The finer kinds are a shade easier, whilst the commoner sorts have commanded full rates. The transactions of the fortnight comprise:—

900 half-chests	Fychows	at 22	taels
5,300 do.	Moyunes	do. 31 to 40½	do.
500 do.	Kewkiang packed	do. 29	do.

6,660 half-chests.

The stock is computed at 15,000 half-chests country, and 2,300 do. Kewkiang packed. Of the former full half are fine teas, the remainder being principally low and undesirable. In Black Teas there have been no transactions. The total settlements of the season to date amount to 110,600 chests Black, and 208,750 half-chests Green, against 53,000 chests of the

Digitized by Google

former, and 257,300 half-chests of the latter, corresponding period of last season.

HANKOW.—The transaction of the fortnight is 1 chop Congou at 14*l.* 2*s.* 5*c.*, making the total for the season 657 chops. The stock on the market is 10 chops, held at 13 to 15 taels.

YOMOHAMA.—Little demand is experienced, with the exception of some for the United States, and there is very little alteration in prices. The unfavorable reports from the home markets are probably the cause of shyness of buyers, and we expect that little will be done prior to the arrival of the new crop, which may be looked for thirty days from date. Quotations:—Fine, $26 to 33; Common, $13 to 22; Medium, $23 to 25; Ordinary, $11 to 12.

RAW SILKS.—SHANGHAI.—Early in the fortnight the market was very quiet, influenced by late unsatisfactory advices from Europe, and the Chinamen becoming more anxious to realise submitted to a decline of about 10 taels per picul on Tsatlees, Yuenfas, and Hainings. This led to the sale of about 35 bales, and as the dealers still appear willing sellers, the present rates are not likely to be maintained in the face of a rising exchange. The Imperialists have at length taken Hangchow and Kashing, and should the peasants be allowed to remain in these districts without being disturbed, the future supply may be increased. From Japan 188 bales have arrived, which go forward by this steamer. The latest advices quote high prices still ruling with a stock of about 250 bales on the market. The settlements of the fortnight are reported at 350 bales, against 800 bales corresponding fortnight of last year, and 2,000 bales the corresponding fortnight of the previous year. The present stock is 3,500 bales, against 8,000 bales same period last year. The present stock is 3,500 bales, against 8,000 bales same period last year, and 3,000 the year before. The following are the latest quotations:—Tsatlees: No. 2 chops, 425 to 430 tls.; No. 3, 405 to 415 tls. per picul. Market: No. 3 chops, 395 to 405 tls.; No. 4, 380 to 390 tls.: No 5, and common, 365 to 375 tls. per picul. Taysaams: No. 1 and 2, 390 to 410 tls.; No. 3, and inferior, 340 to 380 tls. per picul. Yuenfa: No. 1 and 2, 395 to 415 tls.; No. 3. and inferior, 370 to 395 tls. per picul. Hainings, 370 to 410 tls. pes picul.

YOKOHAMA.—Foreigners are not inclined to do business, but the market has continued firm throughout the last month. Settlements do not exceed 135 piculs. There is not much alteration in quotations except for best kinds, which have been offered and taken at a little higher rates. Receipts are trifling, but have increased in a degree. The unsold stock, chiefly hanks sorts, is estimated at about 150 piculs. Quotations—Ida, medium, $530 to 550. Mybash, best, $550 to 560; medium, 530 to 540; inferior, 515 to 525.

DRUGS, &c.—MACAO.—Cassia Lignea: Sales 1,600 piculs at prices ranging from $14.90 down to 14.60, leaving in stock 400 piculs. Cassia Buds: The small parcel last reported as offering at 61, has been withdrawn from the market in the absence of a buyer at the price. Cassia Oil: None nominal rate 210. Aniseed Oil: Sales 60 piculs at 143 to 145; stock 25 piculs held at the latter figure. Star Aniseed: Sales 150 piculs at 17.50 for inferior quality, stock 150 piculs of similar kind held at 13. Galangal Root: Sales 300 piculs at 2.80 on Chinese account, for the Straits, leaving in stock 900 piculs, which may be had at easier rates. Gall nuts: None. China Galls: Small sales on Chinese account at 12.50. Ginger Preserves: Sales for the Straits and India at 2.90 for best. Vermilion: Sales for India at 38.50.

CAMPHOR.—HONG KONG.—No sales reported and no further supplies arrived. The parcel of Japan is still held at $23 to 24, which buyers are not inclined to pay. Of Formosa Camphor a supply is expected shortly, which will find a ready sale at $16.50 to 17 per picul.

COTTON.

SHANGHAI.—Before the arrival of the London mail of the 10th February, there were few buyers, even at taels 20 per picul; this was attributed to the unsatisfactory state of the Schleswig-Holstein question; since the arrival of the mail, prices have gradually improved, and are today—Shanghai, No. 1, taels 21.5 to 22; No. 2, taels 20; No. 3, taels 17 to 18; Hankow, taels 21.5 to 22; Kong Poh—the bulk of this description on the market is unsold on account of being very inferior, good description selling at the same rate as Shanghai No. 1. There are some parcels of very inferior Shanghai offering on the market, at from taels 13 to 16. Settlements, since the departure of last mail, are between 10 and 12,000 piculs. Stocks on hand and the parcels coming in from the country are very small. The Shanghai No. 1 Cotton now coming into the market is of the very best description, the country people retaining the best cotton until the last for the purpose of extracting the seeds for planting.

CANTON.—The sales of the fortnight amount to 2,200 bags Shanghai, 1,300 do. Ningpo, and 1,000 do. Shantung, at an advance of 5 mace. The stock remaining unsold consists of 2,000 bags Shanghai, 830 do. Ningpo, and 1,000 do. Shantung.

HONG KONG.—The advices from Europe are not encouraging, and, consequently, exporters having retired from the market, the native demand governs prices. This demand has been tolerably good, and has taken off during the fortnight about 6,500 bags at the following rates:—Shanghai, $31 to $33.75; Ningpo, 33.50 to 34.75; Japan, 35.50. The stock on the market is computed at 25,000 bales. A few foreign holders are shipping in preference to selling.

AMOY.—The article is quoted $33 to 34½. No stock.

NINGPO.—At date of last advices about 1,250 bags were on the market. $35 per 118 catties being asked without finding buyers.

YOKOHAMA.—The market fluctuates, and there is an irregular demand; during the past month prices have receded to $25 per picul, and with anything but a firm market; present rates are quoted at $26 to 28.25.

CHINA IMPORTS.

COTTON YARN.—The value of this article remains without material change to notice, and the business of the fortnight is confined to the sale of 200 bales. Grey Shirtings: Have continued quite neglected so far as the Chinese dealers are concerned, the sales to whom only aggregate 500 pieces, but purchases on foreign account have swelled the settlements which have been reported since the date of last circular to 27,500 pieces. Buyers have confined their attention almost entirely to 8¼ lbs. goods, the price of which is quoted slightly higher. White Shirtings: The settlements of these fabrics, estimated at 2,200 pieces, consist almost entirely of re sales by Chinese and of goods imported from Singapore - quotations remain without change. T-Cloths: These goods are still in very limited request, and the bulk of the sales reported consists of cloths imported from Shanghai. Settlements are estimated at 7,000 pieces for the fortnight. White Spotted Shirtings, Dyed do., Brocades White and Coloured: These goods have been entirely neglected during the fortnight, and there is not a single sale of them to report. Damasks: Without sales to notice. Chintzes; Have likewise remained without inquiry. Handkerchiefs: A moderate demand has existed for these goods, and the sales of the fortnight are put at 2,600 dozens.

WOOLLENS.—SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—There are not any sales of the above fabrics to report from this market by the present mail, and prices remain as previously quoted. From Foochow the sales effected amount to 156 pieces, taken at 85 to 90 cents per yard. Long Ells have likewise been without inquiry since the date of last circular, but a fair amount of business has been transacted in Foochow during the fortnight, and the sales reported aggregate 1,000 pieces of Scarlet purchased at $8.60 per piece. Camlets: Without material alteration to notice in value, the business transacted in this description of goods amounts to 580 pieces, of which 200 pieces are of Dutch manufacture. Lastings: 100 pieces have been sold. Blankets have not met with any demand, and there are not any sales to report.

METALS.—Iron, Flat, &c.: The sales effected during the past fortnight of the various descriptions of Iron enumerated have been upon a smaller scale than for some time back, and are estimated to amount to 1,420 piculs of Nail Rod, 1,200 piculs of Bar, and 420 piculs of Hoop. The value of Nail Rod is quoted slightly higher, but other qualities remain unchanged. In Canton, where Nail Rod also shows some improvement, sales amount to 800 piculs. Lead: Without any improvement to notice in quotations the sales of the fortnight amount to 1,500 piculs. In Canton quotations have again given way, and sales amount to 1,400 piculs. Tin: 30 piculs have been sold. Tin Plates have again met with a fair amount of inquiry, principally on foreign account, and the sales of the past fortnight are estimated at 500 boxes sold to Chinese, and 1,200 boxes purchased by foreign firms. Steel: There are not any transactions to notice.

The Tabular Returns of Tea, Silk, &c., will be published in our next issue on arrival of French Mail.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: March 4, Challenger. From Newcastle: Susanna and Juno. From Hamburg. 6, Ida Maria.

At FOO-CHOW.—None.

At HONG KONG and CANTON.—From London: April 6, Robin Hood and 12, Edward Percy. From Liverpool: 4, Young Lochiwar. From England: 7, H.M.S. Pelorus. From Cardiff: 8, Jupiter. From Queenstown: 13, Archilles.

At MANILA.—From London: March 30, Trafalgar.

At SINGAPORE.—From London: April 11, Chanarla; 13, Bonnie, Lassie; and 14, H. Puddemsey. From Liverpool: 10, Athelstan; and 11, Gwalior. From Cardiff: 10, Monitor, Elizabeth; 16, Carita; and 18, Druses. From Newcastle: 11, Aguste and Meline. From Glasgow: 11, Bothwell Castle; 18, Bacchante. From Swansea: 16. Alida. From Bordeaux: 11, Jupiter. From Antwerp: 6, Ortelius. From Hamburg: 11, Carlotta; 15, Persia. From Amsterdam: 20, Bernard Agnes.

At BATAVIA.—From Liverpool: Carl Frederick.

DEPARTURES.

From JAPAN.—For London: March 10, Milbrook; 20, Meppel; 23, Alexander; 26, Ann Adamson.

From SHANGHAI.—For Liverpool; March 26, Glengairn and Fort, William; April 1, Advance; 2, Simoda; 6, Lauderdale.

From FOOCHOW.—For New York: March 27, Benefactor; April 2 Eva.

From HONG KONG and CANTON.—For London: April 12, Ethel. For Liverpool: 2, Berwickshire. For Bordeaux: 9, Johanna. For New York: 2, Sophia.

FROM MANILA.—For Cowes (for orders): April 1, John Barfield; and for Liverpool, Aureliana. For New York: May 23, Ocean Eagle.

From SINGAPORE. For Liverpool: April 9, Victory; 18, C. Chisholm. For Bordeaux: 12, Java; and from New York, Reynard.

LOADING.

At JAPAN.—For London: Canton, Abbotsford, Anglo-Indian. For Falmouth: Auld Reckie.

At SHANGHAI.—For London: Benvoirlich, Rajah (str.), and Osborn House. For Liverpool: Mayflower, Express, Neville, Elizabeth Nicholson, Helvellyn, and Unrivalled. For New York: Luzon.

At FOO-CHOW.—For London: Nitherby, on the way for new teas; Flying Spur, Dora (both in port), Serica, Fiery Cross, Belted Will, Ziba, Falcon, Ellen Rodger, Childers, Yang-tse, Sea King, (str.) Far East (str.).

At HONG KONG and CANTON.—For London: Bahia and Aunt Lizzie.

At MANILA.—For Liverpool: Diadem and Trafalgar. For Cork (for orders): Victoria Cross. For New York: Isabella and Sea Serpent. For Boston: Fearless.

At SINGAPORE.—For London: Eleanor, Tartar, Couranto, Athelstan, and Prince of Wales. For Liverpool: Ferris and Harry Puddemsey. For Falmouth (*via* Penang): Hindustan. For Bordeaux (*via* Penang): Suez and Nantes.

At BATAVIA.—For Amsterdam: Johanna, Waal van Puttershock, and Anna Sophia. For Rotterdam: Koophandel and Otto. For New York: Stockholm and Levant.

Digitized by Google

FREIGHTS AND CHARTERS.

JAPAN.—To England: Silk, £7; and £5. 10s. to £6 for cotton and tea, with good demand for tonnage.

SHANGHAI.—Freights are somewhat dull, and but few charters have taken place. The rates are:—To England, for tea, £4, and £4 to £4. 5s. for cotton.

FOO-CHOW.—To London, £5.

HONG KONG.—The following (from G. Holmes's circular) are some of the charters, which will best indicate the business done:—Glencoe, to Liverpool, £4. 5s. per ton. The Glenlee, Chandanagore, and Bahia on the berth at £4. 10s.; Chance (Falmouth for orders), £4. 10s., if for Continent 5s. extra. To Saigon and back the rates are 50 cents per picul, and 15 to 25 cents extra if ordered to northern ports. To Bangkok and back 50 to 55 cents per picul; 15 to 20 cents extra if sent north. Manila to Shanghai, 42½ cents per picul.

MANILA.—To Liverpool, unclayed sugar, £4. 10s.; hemp, £6. To New York, £4. 10s. dead weight, and £6 5s for hemp.

SINGAPORE.—For the rice ports, freights remain good for suitable-sized vessels, but for England tonnage is in excess of the requirements, causing the rates to decline, which are as follows:—Dead weight, £3. 10s.; light freight and measurement, £4. 10s. per ton.

BATAVIA.—Tonnage is extremely scarce, and a further advance has taken place in the rate for sugar, which is:—£5. 15s. per ton to the Continent; to New York, £5. 15s. per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—March 29, Niewland, from Sunderland to Hong Kong; 40, Karoline, Cardiff to Shanghai; April 3, Glen Aros, London to Hong Kong; 4, Berhard and Agnes, Amsterdam to Singapore; 5, Shanghai, Newcastle, for orders; 11, White Adder, London to Shanghai.

From CHINA, &c, to ENGLAND and CONTINENT.—March 25, West Batavia to London; 29, Macassar, Shanghai to Liverpool; 31, Samuel, Shanghai to London; April 1, Volunteer, Shanghai to London; 5, Black Watch, Hong Kong for London, and Lyolla, Manila to Liverpool; 7, Chieftain, Sarawak to London; Daybreak, Foo-chow, to London; Berdinkha and Sea Witch, Shanghai to London; 9, Helena, Hong Kong to Liverpool; and 16, Anna Forster, Batavia to Falmouth.

From CHINA, &c., to UNITED STATES.—March 29, Willy, from Manila; April 1, Milbrook, from Nagasaki; 4, Canton; 6, Solo; and 11, Ocean Eagle, from Manila to New York.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—May 23, at Brouwershaven, from Batavia, Tollens; from Padang, Van der Palm; at Texel, from Banjoewangie, Sophia Kon der Nederlanden; 24, at Liverpool, from Hong Kong, Cornelia Hendrika; 26, at Liverpool, from Shanghai, Veloz; at London, from Hong Kong, Rio; May 23, off the Start from Sourabaya: Regina Maris; 11, at New York, from Foo-chow-Foo: Santon; 12, from Manila: Caduceus; 25, at Texel, from Banjoewanjie: Jan v. Schaffelaar.

DEPARTURES.—May 25, from London, for Sunderland and Shanghai, Weymouth; 23, from Shields, for Shanghai, Queen of the Tyne; 24, from Newport, for Shanghai, Analyst; 26, from Liverpool, for Singapore, Prince Waldemar; 25, from Shields, for Shanghai, Bertha, from Cardiff, for Shanghai, Timavo, Trieste; 24, from Sunderland, for Singapore, Dunedin; 27, from Deal, for Shanghai, Constance; 28, from Liverpool, for Cardiff and Singapore, Florentin.

LAID ON.—At London, for Singapore, Early Dawn. At Liverpool, for Singapore, Florentin. At Liverpool, for Hong Kong, Lodore. For Hong Kong *via* Cardiff, Virginia.

SPOKEN.—Souberg, Rotterdam to Batavia, May 11, 48 N., 7 W.; Batavia, Amsterdam to Batavia, May 10, 48 N., 8 W.; Kortenaar, Rotterdam to Batavia, May 10, 48 N., 7 W.; Philip van Marnix, Rotterdam to Batavia, May 8, 47 N., 10 W.; Helene and Anna, Dutch ship, Rotterdam to Batavia, April 12, on the line, 22 W.; Barque, 3rd d.p., No. 5,481, London to China, 10 days out, May 11, 47 N., 9 W.; Johannes, Rotterdam to Batavia, April 12, 2 N., 23 W.; Huydecoper, Rotterdam to Batavia, May 13, 50 N., 2 W.

The Loochoo barque, Warden, from Ardrossan for Shanghai, has been totally wrecked on the north bank of the Yang-tsze-kiang; three men reported missing.

The Tricolour, Price, from Liverpool for Hong Kong, put back to Holyhead, May 26, leaky.

THE P. AND O. STEAMER "CANDIA" IN A CYCLONE.

The passage to India and China by the overland route is generally reckoned on as a simple question of so many days, and persons speak of taking a run out and being back almost before they are missed in this country. An exception to this general rule has just occurred to the P. and O. Company's steamer *Candia* on her way from Aden to Galle with the outward mails of the 4th-11th April. Her mails were transferred to the *Messageries Imperiales* steamer leaving Aden with the outward mails of the 17th April. In a late issue we recorded the transfer of the mails from one of the French boats to a P. and O. steamer; thus the public have the benefit of the harmonious working of these two companies. Thanks to the good sense which guides their affairs. The following is the Captain's report:—

"Aden, May 5.

"THE DIRECTORS OF THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

"I regret to have to advise you of my return to this port on the 3rd inst., having been compelled to put back, owing to damage received on the 29th of April in a heavy cyclone off Ras Ulloolah, in latitude 12. 48 longitude 51. 12.

"We left this port for Galle on the 27th, and experienced very fine weather, with smooth water, until the morning of the 29th, when it suddenly changed.

"At 2 A.M. I was called as usual. It was then beautifully clear and fine, with a light breeze from the northward, and we made all plain sail. At daylight we met with a heavy easterly swell; the weather then had the appearance of rain; the barometer remained steady.

"At 9 A.M. the barometer suddenly fell two-tenths. I then gave orders to take in the topgallantsails, and double reef the topsails; before that was completed the barometer had fallen three-tenths more, and the breeze was rapidly increasing. The foretopsail was just reefed when it blew away; hauled the foresail and furled it, and secured it with the studding sail gear, &c.; the main and mizen topsails were left on the cap double-reefed; the carpenter and his mates employed securing tarpaulins, &c.

"By noon the barometer was down to 29·10, and it was blowing furiously; the main and mizen topsails were blown out of the bolt ropes.

"At 3.30, finding that I was running into the centre of a cyclone, I hove the ship to, with her head to the N.N.E., keeping the engines working slowly. By 1 P.M. we had a most terrific gale; the ship was completely buried to leeward, and taking in tons of water, which washed the tarpaulins off the skid gratings, and an immense quantity of water found its way on to the main deck, and down the fore stoke-hole, &c.; the lee boats were washed away; the weather quarter boat blew out of the tackles and was lost. The weather lifeboat was blown inboard altogether, bringing the davits with it. About 3 P.M. the mizenmasthead carried away, the maintopmast and foretopgallantmast soon followed, the leward cathead was washed away, and the anchor washed off the forecastle, but the shank painter held it. We were not able to send any hands forward to secure it, and the following morning we found it had knocked a hole in the bow, but well above the water-mark.

"At 4 P.M. the barometer commenced to rise: the ship was then in a fearful plight, the water increasing fast in the stokehole and engine-room, ship labouring heavily all the sails blown out of the gaskets, the deck-gear either washed away or smashed, awning booms carried away by the force of wind alone, lee bulwarks gone in many places, lower booms, hencoops, and ladders washed overboard. Mr. Miller, the chief engineer, reported to me that he could not keep steam up any longer, owing to the quantity of water in the stokehole. Stopped the engines. About this time Mr. Turner, second officer, who was engaged in securing the tarpaulins, was washed to leeward, and had his leg broken in two places by a hencoop. Set all hands (passengers and stewards included) to pump and bale.

"At 6 P.M. the gale was moderating, and the barometer rapidly rising; the ship then appeared a complete wreck, the whole of the starboard cabins were full of water, the berths and washstands washed down, and the whole of the baggage destroyed. From this time it gradually moderated, and the wind veered round to the S.E., and became fine; the pumping and baling was continued until 11 P.M. the following day, although at times we had great difficulty with the pumps, owing to their getting choked with the coal in the bilges.

"At 11 P.M. on the 30th got up steam and proceeded towards Galle; the following day, at 5 A.M., the engineer reported that he could not keep up steam, owing to the quantity of water in the stokehole. I then considered it prudent, as both passengers and crew were nearly exhausted, to return to Aden; turned the ship round accordingly, and set all hands pumping and baling again.

"On the morning of the 2nd I passed a large number of bales floating about, and one dead body. Pumping was continued until the 3rd, when we arrived at this port about noon.

"I cannot speak in too high terms of the whole of the officers; the manner in which they exerted themselves is beyond all praise; also of the passengers and stewards; they all worked with a will.

"On the morning of the 1st the passengers formed themselves into sanitary parties, and cleared the main deck of wet bedding and baggage, which was commencing to get offensive. I am sorry to say many of them are heavy losers, as, independent of the baggage in the cabins, a large quantity is damaged in the baggage-room.

"The officers and crew have also lost the greater part of their effects.

"The cargo, as far as we can see, has escaped damage.

"J. S. CASTLE, commander steamship *Candia*."

THE AMERICAN TELEGRAPH TO RUSSIA, &c.

(*New York Herald*).

WASHINGTON, April 21, 1864.

The efforts of Mr. Collins to enlist members of Congress and other prominent parties in his great enterprise of a telegraphic connection between Europe and America are, we understand, meeting with encouraging success. This subject has previously received the attention of Congress, in which body, it will be recollected, two very favourable reports were made three years ago—one by Senator Latham, of California; the other by Mr. John Cochrane, of New York.

Since the date of those reports Mr. Collins has spent a large portion of the intervening time in pushing his enterprise, mainly in Europe, where he has succeeded not only in interesting a considerable portion of the mercantile community in his projects, but in enlisting the patronage of Governments also. The fact of the valuable concessions made to him by England and Russia of the right of way through their dominions in the north-western portion of this continent, has already been made public. These concessions are valuable, as indicating the favour with which the enterprise is looked upon in other countries. They are valuable also in another point of view, for they offer such inducements to capitalists as will, it is believed, insure the speedy completion of the overland line to St. Petersburg and London with a very moderate degree of encouragement from the United States Government.

The enterprise of Mr. Collins is thoroughly American in conception,

Digitized by Google

and is to be owned and controlled by American capital. For these reasons alone, therefore, it would seem to have peculiar claims upon the attention of the American public, as well as upon the favour of the Government.

A large portion of the Russian line with which the wires of Mr. Collins are to connect is already finished, and the work is now being rapidly pushed on at both ends—namely, from Irkoutsk, in Eastern Siberia; to which point the wires are already working from St. Petersburg, a distance of four thousand miles, and from the Amoor westwardly to meet the Siberian wires. The parties who have undertaken the construction of Mr. Collins' portion of the line—that is, the connecting link between Europe and America, *via* Behring's Straits—are gentlemen of experience in telegraph matters. It was their enterprise which, taking hold of the Pacific line at a time when all other men shrank from it, and enlisting the sympathies of the Government in its behalf, carried it through to a successful ending, in spite of the warning of friends as well as capitalists to let it alone. The fact that these eminently practical as well as energetic individuals have put their shoulders to the enterprise of Mr. Collins, is an assurance that the project will eventually be accomplished. But as the work is eminently national in its scope, and as, moreover, much time must necessarily be consumed in its construction before any returns can be made for the vast outlays its proprietors must submit to, it would seem that Government ought to find in the enterprise a case eminently worthy of its fostering patronage. The small subsidy allowed the line to the Pacific has, we are told, been paid back over and over again every year, through the facilities of the line enjoyed by Government in its correspondence with its Pacific posts. Similar facilities, only quadrupled in value, will be the result of the completion of the Russo-American line.

To all undertakings of this nature, so vast in its proportions and so full of promise to the welfare and progress of the country, Government will but show a prudent regard to the future, as well as a generous spirit in extending a helping hand. Russia and Great Britain in granting the right of way through their territories, besides according other valuable privileges for the purpose of encouraging the enterprise, have therein set an example which our Government, it is to be hoped, will not hesitate to follow.

Parliamentary Intelligence.

HOUSE OF COMMONS.

OUR POLICY IN CHINA AGAIN.

(May 20th).—Mr. BAXTER, in rising, pursuant to notice, to call attention to the state of affairs in China, said that while he approved the policy of non-interference which had been pursued by the Government in America and in Europe, he could not express satisfaction with the course which they had taken in Asia, where their policy had been one of interference and war. If, he added, we persist in that policy much longer we should have to encounter difficulties, the importance of which it was impossible to exaggerate. He objected to our aiding the Imperialists in China on two grounds,—in the first place, because he believed that in doing so we were acting on a bad principle; and, in the second place, because he did not think our efforts in that direction were likely to be attended with success. He did not, however, deem it necessary, after the exhaustive speeches which have been made on the subject by the hon. member for Northumberland, and the noble lord the member for Cockermouth, to enter very largely into details on the present occasion. As a merchant owning goods in the treaty ports of China, he did not hesitate to confess that he naturally wished these goods to be protected; but it was, he admitted, a doubtful question whether he was justified in calling upon the general body of the taxpayers of this country to contribute their money with that object, under the exceptional circumstances in which China was placed. Be that, however, as it might, he felt perfectly convinced that he was not, as a representative of the people, justified in voting away their money to assist a dynasty in that country which he looked upon as tottering to its fall. He would, no doubt, be met at the outset by the argument that the Government had done nothing more than defend the treaty ports, and the Under-Secretary of State, indeed, had over and over again maintained that we had been guilty in China of no breach of neutrality; but if the hon. gentleman would read the speeches which he had made on the subject, he would find that while seeking to justify everything that had been done there, and everbody by whom it had been done, he had admitted more than once that our policy in China had been neither impartial nor uniform. The papers which had been laid upon the table of the House did not, at all events, bear out the statement that we had been guilty in that country of no breach of neutrality. In the first despatch of Mr. Hammond to Sir E. Lugard, in April, 1863, he found it stated that Earl Russell did not deny that there was inconvenience in the state of things pointed out by the Commander-in-Chief, but that Her Majesty's Government could not allow British officers who were only temporarily detached from their regiments to be making war on the Taipings all over China. Again, in March of the same year, Sir F. Bruce wrote to General Staveley to the effect that he was very anxious it should be borne in mind that we were not making war on the Taipings, while, in the month of June, the Secretary for the Admiralty, in writing to Mr. Hammond, said he was commanded by the Lords Commissioners of the Admiralty to send for the information of Earl Russell a copy of a letter dated 14th of the previous April from Admiral Kuper, respecting the proceedings of Captain Dew, of the *Encounter*, at Show-Shing, and to state that the Admiral had been instructed to inform Captain Dew that he had exceeded his instructions in taking part in hostilities beyond the prescribed limit of 30 miles. Now, these instructions were all very well, but there were unfortunately other letters of the noble lords which have a different aspect, as well as two letters from the Foreign-office, in the latter of which Mr. Hammond stated that he was directed by Earl Russell, to say that during the then existing state of affairs in the neighbourhood of Shanghai British officers on full pay should be allowed to join the force under General Gordon's command, and to serve beyond the 30 miles radius. There was, besides, among the papers for 1862 a curious despatch setting forth the opinions of the noble lord with respect to the discipline to be observed in the British contingent in China, so that the instructions given on the one side of the question might, he thought, very well be set down against those given on the other. He would, however, appeal from the instructions to facts, which justified him in saying that we first broke our neutrality by our early operations within the thirty miles' radius round Shanghai, and subsequently by our operations at Ningpo, which was taken by a force commanded by Captain Dew. Our neutrality was again broken when the Commander-in-Chief of the British forces at Shanghai appointed Captain Gordon to the command of the Chinese auxiliaries. What was the character of these allies of ours, and what had been the proceedings of the men with whom it had been thought right to associate the soldiers of a Christian nation? The barbarities which were committed at Soochow were a sufficient answer to this question; but the blue-books were full of instances of the cruelty and perfidy of the Imperialists, and Sir F. Bruce had over and over again remonstrated with the Chinese Government upon the subject of the barbarous cruelties committed by their soldiers, which cruelties were defended by Prince Kung, the very man who was held up in that House by the Under-Secretary for Foreign Affairs as a man of humanity and enlightenment. (Hear, hear.) He now came to his second objection to the policy of upholding the Tartar dynasty—that it was not likely to succeed. In point of fact, we had been endeavouring to uphold a foreign dynasty which had never established itself in the affections of the people, and which those who had travelled in China told us would have fallen long ago if it had not been for foreign interference. Abbe Huc wrote that morality, arts, and industry had decayed, that poverty and destitution were making rapid progress, and that since the accession of the Mantchoo dynasty Chinese society had undergone a great alteration for the worse. Captain Blakiston, in his work entitled *Five Years on the Yang-tze*, declared that since the accession of the Tartar dynasty everything in the empire had fallen into a languishing and expiring condition, and that the rebellion against the Government was by no means confined to the Taipings, but extended very generally over the population. He had rather accept this testimony, agreeing as it did with the evidence of all missionaries and travellers, than the statements of the Under-Secretary of State for Foreign Affairs, who represented everything as *couleur de rose*. Sir F. Bruce and the consul at Shanghai told a very similar tale. It had been asked how it was that if the dynasty was so weak it had held power so long. The answer was, that no revolution had ever been accomplished in China until after years of convulsion, insurrection, and civil war, and he, in his turn, might ask how it happened, if the Taipings were so universally detested as had been represented in that House, that fears were so generally entertained lest the Imperialist troops and the auxiliary forces themselves should go over to the rebels? (Hear, hear.) He observed with regret the support given by the Government to the expedition sent out under Captain Sherard Osborn, and more particularly the parting benediction of the Chancellor of the Exchequer, and he rejoiced at its failure because it opened to us an escape from a situation of great embarrassment and difficulty. He hoped that we should date from that event a total change in British policy in China. Our whole policy there for many years past had been, not a comedy, but a tragedy of errors. (Hear, hear.) He freely admitted that the whole blame did not rest with the Government, but must be shared by both Houses of Parliament and by the country, and his object was not to cast reproaches upon any one for what had been done in the past, but to provide security for the future. In the last sentence of a despatch written in June, 1860, Sir F. Bruce said, "No course could be so well calculated to lower our national character as to yield our material support to a Government the corruption of whose authorities is only checked by its weakness." That was what we had been doing, and our ambassador still adhered to his opinion of the impolicy of our conduct. Only the other day his hon. and gallant friend the member for Aberdeen brought out the fact that in June, 1863, Sir F. Bruce, in concert with the other ambassadors at Peking, signed a memorandum in which he expressed these same views, and complained of the employment of British officers in the Imperial service. That memorandum had been presented to the American Congress: but it had been suppressed by our Foreign-office, because if it had been produced the Government would have been forced to change their policy. In June or July last year the noble lord at the head of the Government, in replying to the noble lord the member for Cockermouth, entreated the House to wait for one year and see the result of the policy which was then being pursued. They had waited a year, they had seen the result of that policy, and every word of warning which was spoken by the noble lord the member for Cockermouth had been proved to be true. (Hear, hear.) Therefore, the question which he had to ask the noble viscount at the head of the Government, whom he was sure that they were all delighted to see again in his place (general cheers), was whether the Government meant in future to adhere strictly and honourably to the defence of British property in the treaty ports, refusing every kind of aid, direct or indirect, to the Imperialists, and abandoning altogether the attempt to bolster up and support the Government of Peking. He should also like to know what instructions, if any, had been sent to Her Majesty's servants in China with reference to this important question, and whether they had been enjoined for the future not only not to accept employment under the Imperial dynasty, but to take no step, however indirect, to support the Government of the Emperor. (Hear, hear.)

Lord PALMERSTON: I am quite ready to answer the question of my hon. friend, but I must be allowed to say I regret that, notwithstanding the acuteness of his mind and the ability which he shows on all occasions, he has come to conclusions which are not supported by the materials which he says he has searched and digested. (Hear.) My hon. friend started with a general theory, and nothing is so liable to mislead as a general theory. (Hear, hear.) My hon. friend said that the principle upon which the British Government ought to act is that of non-intervention in the affairs of other States—a very plausible principle, and one which, in many cases, ought to be strictly adhered to; but my hon. friend forgets that there are cases in which we have treaty rights—that there are cases in which we have national interests, and if his doctrine were to be applied rigidly and in every case, our treaty rights would be violated and our national interests would be sacrificed. (Hear, hear.) This has been the principle invariably acted on by the British Government. We have

Digitized by Google

interfered with great success in the affairs of other countries, and with great benefit to the countries concerned. We so interfered, for instance, in the affairs of Greece, and we established the independence of that State. (Hear, hear.) We interfered in the affairs of Belgium, and we established the independence of Belgium as a separate State. We interfered in the affairs of Portugal, and enabled Portugal to obtain a free and Parliamentary constitution. (Hear, hear.) We interfered in the affairs of Spain with like success and with a similar result. We interfered in the affairs of Turkey, of Syria, and of Egypt, and we maintained the integrity of the Turkish empire. These were all events preceding the Crimean war, and I do not think any man in this House will say that in that struggle we were unsuccessful. We have interfered in the affairs of China. Why? Because our treaty rights were endangered and our national interests were at stake. (Hear.) See how inconsistent my hon. friend was at the beginning of his speech and in its conclusion. He said he would never, as a member of this House, consent to throw upon the tax payers of this country burdens for the sake of protecting his interests in China.

Mr. BAXTER said the noble noble lord had not properly caught his meaning.

Lord PALMERSTON: My hon friend said it was quite true he had merchandise and interests in China, and that he would not call on the Government to protect them. (Hear, hear.)

MR BAXTER: I said that might be an open question.

Lord PALMERSTON: My hon. friend now says that would be an open question. But in the question which he put to me at the conclusion of his speech, there was no uncertainty whatever, because he asked whether the Government would confine themselves to maintaining the security of our establishments in the treaty ports, in one of which I suppose his property must lie. ("Hear," and laughter.) I am bound to say that I quite concur in the propriety of maintaining and defending the security of British interests in the treaty ports. (Hear, hear.) But what has been the history of our interference in China? See the inconsistency of these mercantile gentlemen. They are constantly urging the Government to make treaties of commerce with foreign countries, and to extend the range of our commercial interests. Only the other day I received a deputation from the manufacturing districts urging that a reorganization of the Foreign-office and the Board of Trade should take place, for the purpose of enabling the Government more adequately to extend the commercial relations of this country. And the feeling no doubt was honestly entertained, because everybody must know that on the extension of our commerce depends the prosperity of our country, the accumulation of our capital, the abundance of our revenue, and the strength and prosperity of the nation. Any measure, therefore, calculated to increase the commercial relations of the country, so far from meriting the censure which my hon. friend, as a commercial man, thought fit to pass upon it, it is deserving of praise because it accords with the wishes and interests of the country. It was long felt that China would open a vast field of commercial enterprise to us; and there can be no doubt that among other things the great expansion of commerce with that empire has enabled us to meet without disaster the unfortunate obstructions to our commerce and manufactures occasioned by events still going on in America. (Hear.) My hon. friend says that the Chinese, especially the Imperialists, are a cruel people. Well, I have myself said in this House, and I repeat it, that the nature of the Chinese population is cruelty and perfidy. But those qualities are not confined to Imperialists, they are shared in a far higher degree by the Taipings, who are peculiar objects of interest to some hon. members of this House. (A laugh.) My hon. friend talks about a massacre at Soochow. There was no massacre. ("Oh, oh!") There was a very treacherous act committed towards the Whangs, who were decoyed into the power of the Tartar commander, the Tootai, who revenged upon them what he stated to have been an act of great barbarity committed by them on a former occasion I will not justify in any degree what they did. I am merely stating the extenuation put forward by themselves. But what happened the other day?—and this is a specimen of the acts of which Taipings are capable. There was a little steamer called the *Firebrand*, which they seized and carried off, and it was stated, and not contradicted, that four or five unhappy persons were roasted to death.

Colonel SYKES: By whom?

Lord PALMERSTON: By the Taipings.

Colonel SYKES: No, no! (Laughter)

Lord PALMERSTON: I believe their bodies were found in a charred state, but there was no other proof of the fact. Of course persons in the interest of these people who like to carry on a contraband trade with the Taipings, and to make a profit by supplying them with arms and ammunition—send home to their acquaintances high-flown panegyrics on the Taipings; but every impartial person writing from China bears witness to the desolation marking the track of the Taipings. (Hear) The districts which they occupy are laid waste, the people reduced to starvation, and only the other day we heard of a place in which the people were obliged to eat human flesh as a last resource. Is that a state of things conducive to British commerce? (Hear, hear.) Is that a state of things the extension of which to the immediate neighbourhood of our treaty ports we ought to permit? (Hear, hear.) My hon. friend does not deny that as far as the radius of 30 miles from these ports extends, we are justified in what we have done, and that it is our duty to keep these marauding Taipings from making piratical incursions within those limits. But my hon. friend, in studying the Blue-books, has not studied with equal care the history of China. He talked of the present dynasty as a foreign dynasty; and though he did not say, he certainly implied that it had been recently established in a conquered country, and, therefore, had no root in the affections of the population. If I am not misinformed, I rather think the dynasty has been the best part of 500 years in existence.

Colonel SYKES: No; 250 or 260 years.

Lord PALMERSTON: Well, when a dynasty has been established in a country for 250 years, I think hon. gentlemen at least ought to admit that it is well rooted ("hear," and laughter), has a good hold on the population of the country, and is no longer entitled to be called a foreign dynasty. (Cheers.)

Colonel SYKES: India! ("Order, order.")

Lord PALMERSTON: I say that it is greatly to the interest of this country to maintain those commercial rights which the treaty concluded with China gave us. When first the war with China began Sir James Graham, a sagacious man, warned this House of the danger that must arise from entering into war with a third portion of the human race. I return that argument to my hon. friend, and I say, what must be the commercial advantages to this country if it can have an unimpeded uninterrupted commerce with one-third of the human race? (Hear. hear.) It is, therefore, for our interests that tranquillity should be restored in China. My hon. friend says that the dynasty is tottering to its fall. I can only judge from what reports reach us, but I should rather be inclined to say that the rebellion is more likely to end than the dynasty to be overthrown. (Hear, hear.) No doubt there are parts of China which are always threatened with rebellion more or less violent; but that, I am sorry to say, is the normal state of many of those Oriental Governments which lack the organization and energy necessary to maintain order throughout their entire dominions. Such has been the condition of Turkey; such has been peculiarly the condition of China, whose central government has always had the greatest difficulty in maintaining order in its remoter provinces. But I can assure my hon. friend, as far as we can trust the accounts which reach us, that the Taeping rebellion has been narrowed to a much more restricted circle than it occupied one or two years ago; and that if we are to speculate on the future it will be safer to reckon that the rebellion is tending towards extinction, than that the dynasty is tottering to its fall. Besides, what must happen if the Imperial Government be overthrown? You would have nothing but extensive anarchy. (Hear, hear.) The Taepings are perfectly incapable of ruling the empire, and if they attempted to do so there would soon be fresh rebellions against them. In reply to my hon. friend, I stated that our interference as a direct interference has been limited to the treaty ports; but we certainly did give to the Chinese Government the assistance of British advice and arrangement in collecting their customs and improving their revenue, and great benefits have resulted to the Chinese Government from that assistance. (Hear.) Last year we issued an order authorising Captain Osborne and others acting under Mr. Lay to raise a squadron for the purpose of restoring order in the waters of China, and getting rid of the piracies which endanger navigation. My hon. friend says that when the expedition started he foretold its failure. Perhaps in that respect he was a better judge of Chinese character than we were. It certainly did fail, owing to the jealousies which existed between the central and provincial Governments, and to their desire to subject Captain Osborn to restraints and restrictions which he felt it would not be for his honour or for the advantage of this country to submit to. (Hear.) I regret very much that the expedition of Captain Sherrard Osborn did not succeed, because I believe that if it had gone on, and if Captain S. Osborn had been allowed to direct it according to his views, it would have put an end to that piracy which is now desolating all the coasts of China. That order in Council has been revoked, and there is no intention on the part of Her Majesty's Government to issue such an order again. Then there was another order in Council, authorizing any British subject to enter into the service of China. Major Gordon was one of those who took advantage of that order in Council. It has, however, been revoked, and there is no intention of renewing it. Major Gordon, I am sorry to see by the last accounts, has sustained a check, and has been wounded, I hope not severely. He is a most able and distinguished officer, and one who has performed great services for the Imperial Government, and my conviction is that if the Imperial Government could by his or any other means put down the rebellion, not only would they gain a great advantage for themselves, but they would confer an immense advantage upon the commercial interests of this country. All I can say is that it is not our intention to authorise any direct interference in the military or naval service of China as between the Imperial Government and the Taipings, beyond the protection to be afforded within a radius around our treaty ports. That is a duty which the Government owe to the commercial interests of this country, and I am quite convinced that if the commercial interests were assembled and were asked their opinion, they would say, "For Heaven's sake protect our commerce in China in the treaty ports." That commerce is daily assuming more and more importance, and is one of the means by which this country has wealth red the difficulty arising out of the diminished supply of cotton from America. I trust my hon. friend will be satisfied with what I have stated, although I cannot agree with him in the conclusions he draws or the objects he desires. My opinion is, that the country at large will be of opinion that the Government are doing their duty in protecting the commercial interests of this country in China, as defined by the treaty with China; and so far is it from being desirable that the Tartar dynasty—that is, the Imperial Government—should be overthrown and that these ragamuffin Taipings—(a laugh)—should get the advantage, that those who know anything about China will feel it to be an object of immense importance that order and tranquillity should be restored in a country in which our commercial relations are so extensive—(cheers).

M. LIDDELL said that the noble lord had expressed a hope that his explanation would be satisfactory. He felt compelled, however, to reply to some of the most glaring inconsistencies he had ever heard from a Minister of the Crown. The noble lord had spoken of the desolation which had been caused by what he termed the inroads of rebels. But the great silk-producing districts, the increase in the trade of which the noble lord had so much prided himself upon, had been in the hands of the rebels for the last four or five years. [Colonel Sykes.—"Since 1860."] The noble lord stated that the rebellion was waning, yet he next said that the troops, headed by a skilful English officer, had received a severe check. He could himself add that the French contingent had also received a serious check, and that in the opinion of persons on the spot there was a likelihood that Major Gordon and his force would be cut off. The successes of the rebels had been very considerable, and had followed each other in rapid succession ever since the last debate in that house. The noble lord had defended the policy of the Government in China, and had stated that it was intended to continue it. Had the noble lord, however, studied the advice of the Government Envoy in China, because the Government policy in every one of its most material points had been not only disputed, but absolutely contradicted by Sir F.

Digitized by Google

Bruce during the last two years? It appeared to him that the Government ought either to follow the advice of their envoy in China or to recal him. It was rather significant that the noble lord began by telling the House that general theories were liable to mislead. He did not know whether that remark was applicable to a speech made lately from the Treasury bench in the noble lord's absence; but, if so, he must express his belief that if the noble lord at the head of the Government had been present those very misleading general theories would possibly not have been heard in that House. [The CHANCELLOR of the EXCHEQUER: "Question, question."] Perhaps his remark did not exactly bear upon the question; but at the same time he concurred with the noble lord that general theories were likely to mislead. After the experience which had now been had of the working of the Government policy in China, the House had, he thought, a right to expect a complete renunciation of that policy. The commercial interests connected with China disapproved the policy of the Government, and unless they confined themselves to the simple duty of forcing the Chinese to observe their treaty rights, our trade would be materially prejudiced. The noble Lord said that the Government had interfered because our treaty rights were in danger, but he should like to be told in what single instance our treaty rights or trade had been endangered. He had before asked, and he now asked again, for one single instance in which either the property or the life of a British subject had been placed in danger, except in a recent fatal occasion of reprisals. This was the sort of acts to which civil war naturally led; but the civil war in China had been pushed beyond its natural limits by the interference of Her Majesty's Government.

Lord NAAS said he felt that he could not enter upon the important question now before the House without interfering with the discussion which must be raised upon the motion of the hon. member for Rochdale. At present there was no question before the House except that the Speaker leave the chair, and it was impossible to ask the House to give an opinion on the subject. He must, however, enter his protest against some of the assertions of the noble lord, and, at the same time, express his disappointment that the events of the last year had made no change in the policy of the Government. He had hoped that the noble lord would have admitted that the new policy he had inaugurated in China was a failure, and would have promised that the Government would return to the policy which they pursued two years and a half ago. The noble lord had defended the policy of the Government, and said we were continuing in the same path in which we had been working for the last year and a half, and that we were bound to defend our treaty ports. No one denied that we were bound to defend our treaty ports, and, what was more, that we were bound to protect the property of British subjects in China. (Hear, hear.) But the policy of the Government went far beyond that (hear, hear); it went to the length of interfering in the internal and domestic affairs of that country. (Hear, hear.) We had sent a fleet to China, and had lent nearly 100 officers to command the forces, not of the Emperor, but of the local and provincial authorities. (Hear, hear.) He should be able to show on a future occasion that we had endangered the interests of our trade even in the opinion of our merchants themselves, and that our policy was in direct opposition to the views not only of our naval commanders, but of our most eminent representatives. In fact, there was hardly a man who was acquainted with the affairs of China, who did not see the enormous danger of the course we were pursuing, and was not anxious that we should go back to the principles laid down by Earl Russell after the Treaty of Tien-tsin, namely, that we should not interfere in the internal affairs of that empire. (Hear.)

Colonel SYKES said as there was a prospect of a full discussion upon this subject, he would limit himself to a few remarks. The noble viscount in saying that he had interfered in other countries had overlooked the motives for interference. In Europe we had interfered to protect the rights of the people against oppressive Governments, and that interference was to our honour in the cases of Belgium, Portugal, and, to some extent, Spain; but in China we interfered in behalf of a Government which had been described by Sir F. Bruce and other of our representatives there as the most corrupt, treacherous, and cruel Government on the face of the earth. (Hear, hear.) He held in his hand extracts from a paper which contained the real views of the representatives of the four great Governments in China—namely, Russia France, America, and England, and which had been presented as an official communication by the American Secretary of State to Congress. That communication contained a despatch written by Sir F. Bruce on the 20th of June, 1863, and also details of the many conversations which had taken place between Sir F. Bruce and Mr. Burlingham. Those despatches had been sent to the Foreign-office, but when he asked for them recently, he was refused, on the plea that they related to the understanding upon which the foreign Governments in China were to carry out their policy, and could not be produced without injury to the public service. But though they would not be laid before the House of Commons, they had been presented to Congress. He would read the substance of Mr. Burlingham's despatch to Mr. Seward, which was in the possession of the Foreign-office, and was to be found in the library of the House. Mr. Burlingham says, "I expressed a warm desire that he (Sir F. Bruce) would present them (his views) to his Government, that they might become the basis of our future co-operation." He (Colonel Sykes) was indebted to the Under-Secretary for knowing that, because that hon. gentleman on a late occasion quoted as much as served his own purpose, and of course suppressed the rest. Mr. Burlingham went on to say:—

"He accordingly wrote the powerful despatch marked A, which he communicated to me for my private use, and which, with his permission, I send to you confidentially, with the most positive request that it is not to appear until it is first published in England. The three ministers hailed with delight this frank avowal. The policy upon which we are agreed is briefly this,—'That while we claim our treaty right to buy and sell and hire in the treaty ports, subject, in respect to our rights of property and person, to the jurisdiction of our own Government, we will not ask for, nor take concessions of, territory in the treaty ports, nor in any way interfere with the jurisdiction of the Chinese Government over its own people, nor ever menace the territorial integrity of the Chinese Empire. This we will not take part in the internal struggles in China, beyond what is necessary to maintain our treaty rights. That the latter we will unitedly sustain against all who may violate them.' To this end we are now clear in the policy of defending the treaty ports against the Taipings, or rebels, but in such a way as not to make war upon that considerable portion of the Chinese people by following them into the interior of their country. In this connection, while we feel desirous of what we know of it to have the rebellion put down, still we have come to question the policy of lending Government officers to lead the Chinese in the field, for fear of complication among ourselves growing out of the relations to the employed, &c. That while we wish to give our moral support to the Government at the present time, the power in the country which seems disposed to maintain order and our treaty rights, we should prefer that it would organize its own people as far as possible for its own defence, taking only foreigners for instruction in the arts of peace or war, and these as far as possible from the smaller treaty Powers."

(Hear, hear.) It was stated by the noble lord at the head of the Government that the Taipings had roasted four Europeans; but there was testimony from a person in China to the effect that those four persons said to have been roasted in December were alive in January. In contrast with the assertions made of the desolations which accompanied the march of the Taipings, he directed the attention of the House to the following description by Dr. Legg of the proceedings of the Imperialists:—

"It behoves the British Parliament—the British people—to look to the new complication of affairs in China, to look it in the face. If we are to pacify the Empire, we shall require 50,000 troops, and may then find again that we have undertaken more than we are equal to. But, I ask, in whose interest are we to put down the rebellion? Hitherto, Admiral Hope has been acting in the interest of the Imperial Government. Now, I protest against our putting down the rebellion on behalf of the Imperial Government on two grounds. The first is, the ground of its cruelty. I have read harrowing accounts of the devastations of the rebels—how the country is blasted by their march. The accounts are, no doubt, true. But I have seen also the ways of the Imperial braves, and kept company with them for hours together. Their march over the country was like the progress of locusts and caterpillars. Their thirst for blood was quenchless; their outrages on the young and old were indescribable. On the score of cruelty the case must be about equal, inclining to the Imperialist side, if we may judge on the principle that the more cowardly are the more cruel."

With regard to Se-Chow, the great emporium of the silk districts, it appeared from official returns that the exports had increased annually since the Taipings first held it, on the 8th of May, 1860, up to the period when it was taken from them by treachery, and by the aid of Major Gordon and British guns. The annual exports of silk, which had exceeded up to this year 60,000 bales, then fell to 40,000 bales.

Mr. GREGSON understood that since the Order in Council had been withdrawn the policy of the British Government was now confined to defending the treaty ports and defending British life and property. The expedition of Captain Osborn had, as stated by the hon. member for Montrose, failed; but he regretted that that was the case, for its purpose was a noble one. The Chinese Government were very sincere in their application for that force, and promptly remitted the whole of the money to pay for the ships; but afterwards some interference took place on the part of the officers of the Chinese Government, and Captain Osborn would not submit to be placed under any Chinese authority. He must say that he regretted that the Chinese Government had not acted more consistently with their first intentions; for he believed that the valuable assistance which Captain Osborn's expedition might have afforded would have been of the greatest benefit to China. With regard to the silk districts, to which the hon. and gallant member had just alluded, it was his opinion that they had been destroyed by the Taipings.

Mr. KINNAIRD believed that Admiral Kuper had the utmost desire to act with perfect good faith towards the Taipings, but experience showed that those people would not keep faith themselves. He concurred in thinking that Captain Osborn's expedition would have been of great benefit to China in clearing the rivers of pirates; but, under the circumstances, Captain Osborn acted with great discretion in withdrawing his ships, though that step was a great loss to the Imperial Government in China.

TRIAL IN THE COURTS IN CHINA.

(23rd.) Colonel SYKES asked the Under-Secretary of State for Foreign Affairs under what rule, ordinance, or law British subjects in China are subject to trial in the Consular Courts for breaches of neutrality in the present civil war in China.—Mr. LAYARD could not give his hon. friend any information as to any trials for a breach of neutrality; but the jurisdiction exercised by the Consular agents was under certain orders in Council.

SIR F. BRUCE AND MR. BURLINGAME.

(26th.) Mr. J. B. SMITH asked the Under-Secretary of State for Foreign Affairs whether the communications made by the American Minister, Mr. Burlinghame, at Peking, in a despatch to Mr. Seward, the Secretary of State at Washington, and dated the 20th of June, 1863, respecting the joint policy to be pursued in China by the Ministers of England, France, and America, was substantially in accord with a despatch addressed to Earl Russell, and a copy of which Sir Frederick Bruce gave to the American Minister, and whether a reply had been given to Sir Frederick Bruce's despatch, and in what sense.—Mr. LAYARD said Sir Frederick Bruce had not informed the Government that he had ever communicated to the American Minister such a despatch as that referred to by the hon. member; but there was a despatch among the papers in the Foreign-office which had the appearance of being the one spoken of by the hon. gentleman. The only objection to producing it in full was that it might not be consistent with our duty towards foreign Governments to publish the entire of the despatch; but if the hon. member allowed him to make extracts from the document he would produce those passages which he believed would satisfy the hon. gentleman's object. With regard to Sir Frederick Bruce, Her Majesty's Government had always felt the most complete confidence in him; and as there was no difference between the Government and Sir Frederick in respect to the principles laid down in the despatch to which reference was made in the latter portion of the question, it did not require an answer.

LONDON, SATURDAY, MAY 28, 1864.

ANOTHER DEBATE ON CHINA.

WITH persistent action, the philo-Taiping members of the House of Commons renewed the old topic of debate on British policy in China last Friday, which we had imagined received its *quietus* this session in the discussion before the recess. On this occasion the PREMIER undertook the defence of that policy himself; and with his usual inexhaustible fund of argument in reply to the mover of the question, convinced the House of its soundness. His home-thrust at that hon. member, as an interested but inconsistent advocate of our commercial relations in China, was keen and sharply aimed, showing that the vigour of political debate is still fresh within the "old man eloquent," party surmises to the contrary notwithstanding. We may thank Mr. BAXTER for again broaching the subject, as his questions elicited so many conclusive reasons in support of the Government action on this Taiping question. Lord PALMERSTON goes back to first principles, in elucidating the policy of intervention hitherto successfully pursued in the East, where our commerce required protection; and holds that such will rule our future relations with China, which has proved the opportune support of British foreign trade during the convulsions which have paralysed American traffic. As to rebellions in China, he alluded to the well-known fact that these have been the rule, and eras of peace the exception from time immemorial. And, he might have added, considering the vast territorial extent of that empire, with its multitudinous population, this is a matter not to be wondered at; inasmuch as, being greater than all Europe, a comparison of history will show that these regions of the West have been as rebellious as those of the Far East. Indeed, it would have been an apt illustration of the subject to show that with all our boasted institutions for the conservation of peace, Europe at the present time is suffering as much from a state of war as China is from rebellion; and the "greatest nation in all creation" is ten times worse. It is only by such comparisons that we can judge of a rebellion in one or two of the eighteen provinces of China, each of which is equal to a European State of the first or second order. It is with much satisfaction we remark that Lord PALMERSTON paid a well-deserved tribute to Major GORDON by designating him "a most able and distinguished officer," hoping that he is not wounded severely, as announced in the telegram from Suez. In this wish we cordially join, and trust that when the details reach us of his unexpected reverse at Kiu-tang, affairs will present a more favourable aspect than this brief message indicates.

THE ANGLO-AUSTRALIAN AND CHINA TELEGRAPH.

FOR the past six years Mr. FRANCIS GISBORNE has been engaged in the formation of a company to carry out a line of telegraphic communication between Singapore, China, Java, and Australia, to be connected with the Indian system at Rangoon, to which port the lines already extend, and on completion of the cable now being laid in the Persian Gulf, the last-named will be in communication with England. Mr. GISBORNE has obtained a subsidy from the Dutch and Australian Governments, but owing to the unfortunate failure of the Red Sea cable our Government declines to follow their example. No doubt such a subsidy would smooth the course very materially, but we fully believe sufficient support will be obtained from our merchants and underwriters to make the undertaking remunerative. The spirit of enterprise is at the present day so strong that we are confident the necessary capital will be forthcoming under the very able board of directors which Mr. GISBORNE has succeeded in forming. The list comprises merchants and others practically acquainted with the trade, and of first class standing. The correspondence Mr. GISBORNE has conducted on the subject with the British, Dutch, and Australian Governments has been published in the form of a blue-book by order of Parliament. According to a map that has been published, the lines proposed will be as follows:—

From Rangoon to Singapore a submarine cable of 1,200 miles will be laid in three sections, in a depth of forty fathoms. The first section will extend from Rangoon to King Island along the coast of Siam; the second from King Island to Penang in the Straits of Malacca; and the third on to Singapore. From Singapore to Hong Kong, say about 1,300, the first section of the cable will stretch from Singapore, across the head of the Gulf of Siam, to Saigon; from Saigon to the Island of Hainan, on the west coast of China, and from thence to Hong Kong. From Hong Kong it is proposed to lay another cable to Shanghai, in sections to Amoy, the north end of Formosa, and thence to Shanghai, the distance being about 1,000 miles. If these cables are successfully laid and worked, there will be no difficulty in continuing them on to Tien-tsin and also to Japan.

The Java and Australia part of the project will be as follows:—From Singapore the cable will be laid to the Island of Banca, thence to Batavia; from Batavia a land line is already laid right through Java to Cape Sedano; from the latter place the line will be laid to the north or south end of the Island of Timor—a place well known and much frequented by vessels to and from China during the adverse monsoons. From Timor the stretch will be to Port Essington; from there across the Gulf of Carpentaria to Port Denison in Queensland, which is already in telegraphic communication with Sydney, Melbourne, and Adelaide. The depth of water in which the cables are to be laid ranges from 20 to 80 fathoms. The entire distance of the proposed operations is about 6,000 nautical miles, and the estimated capital required about two and a quarter millions sterling.

THE JAPANESE AMBASSADORS IN FRANCE.

The Ambassadors are making the best use of their time, and are producing a decidedly good impression. It is evident that their Government has, upon the present occasion, either selected better men for the mission than it did previously, or has given them wiser instructions. The present Ambassadors are manifestly intent upon really studying the strange people in the midst of whom they are thrown, and also on leaving a pleasant impression of their own manners and habits of thought on the European mind. Not long since the Ambassadors visited Vincennes, that curious old building, like all its contempories, half-palace and half-prison, and where, by the way, died Harry of England, Falstaff's friend in youth and England's champion in after years. They inspected the old donjon tower, the arsenal, the *salle d'armes*, and the barracks; and their inquiries proved they were no mere loungers and sight-seers, but men intent on picking up information and storing it for future use.

Since this they have paid a visit to Cherbourg and other places. The Ambassadors were accompanied during their journey by a numerous suite, and also by M. Ballier, an attaché of the Ministry of Foreign Affairs in Paris; M. Blekman, Interpreting Secretary to the French Legation in Japan; M. Hervé de Lavaur, a medical man, also attached to the Ministry of Foreign Affairs; M. Pagès, Professor of the Japanese language, and several French artists. They were received at the railway station by the Sub-Prefect, commandant and commander of the artillery of the place, a battalion of the 18th regiment of the line, with band playing, being drawn up in the court of the station. The troops presented arms, and the Ambassadors drove off to the *Hotel de l'Europe*, where apartments had been engaged for them, through a dense crowd of people. On the following morning the Prefect of the Department, General de Maud'hui and Rear-Admiral Roze, acting at present for the Maritime Prefect, made a complimentary State visit to the Ambassadors, which, of course, the latter immediately returned in due form. Soon after this the boats of the Imperial Marine

Digitized by Google

carried the Japanese to the maritime port, amid a salvo by the artillery of seventeen guns. At the port the Ambassadors were received by a battalion of marines, with music, and the chief officers were presented to them by Admiral Roze. The party was then escorted through the various portions of the port and arsenal, the sawing machine room, the artillery workshops and the graving docks, and exhibited great interest, especially in all that related to arms, asking innumerable questions respecting them. They then were taken on board the steel-plated vessels *Solferino* and *Couronne*, which again interested them exceedingly, and gave rise to many memoranda in their note-books, of which they make good use upon almost all occasions. They afterwards were taken to the breakwater and forts, where they had an admirable view of the iron-sided fleet lying at anchor within, and the day being magnificent the effect was admirable.

In the evening there was a grand dinner at the lodging of the Ambassadors, to which all the principal officers of the place were invited. In the evening the latter went to the theatre on foot; and on the following morning they departed for Havre in the *Talisman*, where pretty much the same routine was gone through, with due allowance for the special character of the two ports. From Havre they proceeded to Rouen, where they were shown over some of the mills and other establishments, and thence they returned to Paris.

On the 18th the Ambassadors were entertained at a grand dinner by the Minister of Foreign Affairs, when the Minister of Marine and of the Colonies, Baron Gros; M. Albrand, the Superior of Foreign Missions; M. Etiennes, the Superior of the Layaristes; Comte Vitzthum and Triconpi; Ministers of Saxony and Greece in England; Admirals Charner, Jurien la Gravière, and Baron de la Roncière le Noury, many other officers of the army and navy, and all the heads of Departments in the Ministry of Foreign Affairs, were present. In the evening Mdme. Drouyn de Lhuys held a reception, at which the Japanese visitors remained till an unusually late hour. They have accepted an invitation from the Swiss Minister to visit that country, and also to enter commercial relations with the Government, and the proposal has been accepted.

The Japanese Ambassadors visited the Grand Opera on the evening of the 23rd inst., to witness the ballet of *Giselle*, when a kind of grand stand was erected for the party at the back of the pit, and in front of the balcony, placing them in the most conspicuous position imaginable. On the 25th the Ambassadors dined with the Emperor at the Tuileries.

EXTRAORDINARY IDENTITY OF THE JAPANESE INTERPRETER.

Several of the Paris journals relate the following story concerning the interpreter of the Japanese Embassy, now in Paris:—Frantz Bleckmann was a native of Holland, but being of a roving disposition, embarked on a vessel bound for Batavia to seek his fortune. Years passed by, and nothing being heard of him, his friends at last concluded that some accident must have befallen him, and that he was no longer living. His father remained in Holland, but being unsuccessful in business, he came to Paris. Here his resources soon failed him, and on writing to a friend to solicit a small loan he received the following letter in reply:—"I send you the money you ask for, and add to it the photographic portaits of the Japanese Embassy. You will remark the face of one of those strangers, for he is the very image of your son." The father could not but perceive the resemblance; the features were certainly the same, but the closely-shaven head and the Oriental costume greatly puzzled him. He, however, went to the courtyard of the hotel in which the Embassy was staying and was so fortunate as to arrive just as the Japanese were passing to go out. The original of the portrait he at once recognised, and called out: "Is that you, Frantz?" In a moment the son—for Frantz it really was—and the old man were locked in each other's arms. The Ambassadors who witnessed the scene were greatly moved, and old Bleckmann's troubles were now at an end, as the son is wealthy and prosperous.

A VOYAGE ROUND JAPAN.

A very interesting volume has lately made its appearance in Paris, published by the Messrs. Hachette, under the title of *Un Voyage Autour du Japon*. M. RODOLPHE LINDAU, the author, was some time ago introduced to the notice of our readers by one of our correspondents. Prepossessed in favour of the book by his recommendation, we have found, on looking into it, that the papers which appeared in the *Revue des Deux Mondes* certainly well deserved the distinction of a separate publication. The author's residence in Japan occupied portions of 1859, 1861, and 1862, and extended altogether to a space of two years. His sojourn, too, was not confined to one city, for he furnishes us with descriptions of Nagasaki, Hakodadi, Yedo, and Kanagawa, and of other places not so well known to us, based on his own actual residence and observation. He, besides, paid a visit to the Russian establishments on the Asiatic coast, his account of which is one of the most important chapters of the book. The general character of the work bears the impress of the mode in which its contents were originally published, partaking of that sketchy, easy-reading style that forms the charm of periodical literature. M. Lindau, moreover, is disposed, after the manner of his countrymen, always to look at matters on the bright side. He has a good word for everybody and every place. With the Japanese themselves he is ever on excellent terms; and the vices he recognises in them he is inclined to attribute to their new-born intimacy with Europeans; for he says, "You may admit it as a general rule, that the natives degenerate morally as soon as they enter into connection with us. To what causes are we to attribute this phenomenon, by no means flattering to our self-esteem? This is not the place for inquiring into it; but I assert that in Japan, as in China, the good and amiable native society has disappeared wherever the influence of Europeans prevails. The coolies of Decima are incorrigible thieves; the traders of Yokohama grow daily more insolent; and the Japanese women who are obliged to submit to the companionship of foreigners very soon lose the modesty that constituted their principal charm."

With the opportunities that our author enjoyed we are rather disposed to express surprise that he has added so little to our knowledge of the customs and laws of the Island Empire; but the difficulties of the language seem not to have been as yet overcome by any but the professional interpreters. To show the nature and amount of the impediments to a free interchange of thought and expression between the European and the Japanese, we will just throw together passages from various parts of the book that enable us to estimate the insurmountability of the barrier they interpose:—

Japanese, the profound study of which is for the learned man strewed with difficulties, presents to the traveller a mass of easy phrases which enables him in a short time to talk on common matters. The sound of Japanese reminds one of Italian. Vowels are abundant, and serve by their harmonious assistance to sustain an accent always placed with precision. The pronunciation is flowing, and a man of very ordinary memory may in a few weeks learn words enough to communicate with the natives without the aid of an interpreter. All foreigners who have resided in Japan for some time make use of the language of the country, and a few speak it readily. As regards the language of the men of letters and of political relations, to be able to write or handle it correctly demands a devotedness to dry philological studies which hitherto, even in the very country, missionaries alone have had the courage to undertake. . . . I endeavoured to explain the object of my visit, and I had some difficulty in making myself understood; but I had still much more to gather the meaning of the reply given. My hosts had never exchanged a word with a European, and the language that I passed off at Yokohama for Japanese seemed not to be naturalised throughout the Empire. In general, the Japanese spoken by most foreigners differs essentially from the pure and choice diction of the natives. So also I often remarked that to converse with traders from the interior the Yokohama dealers made use of their servants as interpreters. However, the difficulty we had in exchanging a few phrases threw no coolness on the kind welcome given me, and which Europeans always find in Japan when there is no particular motive for avoiding or fearing them.

Of the designs of the Russians on the islands and coasts of the Japanese seas, M. Lindau hints the gravest suspicions. The following extracts are of special value:—

POLICY OF RUSSIA IN JAPAN.

On the west of the bay, in front of Nagasaki, is situated the Russian establishment, near the native village of Inassa. The Russians are in the habit of isolating themselves from other foreigners in Japan. While the French, English, American, and Dutch functionaries and commercial men live without exception on the eastern shore of the bay at the gates of Nagasaki and in the centre of business, the Russians have withdrawn to Inassa, a little village peopled by monks, fishermen, and husbandmen. It is evident that the interests they are prosecuting in the Far East are altogether different from those of the English and French. Trade is not what occupies them: they have no representative at Yokohama, where most business is done, and not a single Russian merchant has, up to this time, established himself in Japan. At Hakodadi alone, a very busy city, but without foreign outlets, and for that reason neglected by the English and Americans—at Hakodadi, facing the ports of Mantchouria, is constantly stationed a small fleet of Russian steamers. People are much astonished to find the same nation represented there by a Consul-General, with a surgeon and a priest installed as fixtures. A hospital has been founded, a shipwright's yard constructed, and a number of measure taken from which may be deduced an inevitable intention to create there a durable establishment. The Russian Government has the propensity of certain rich proprietors: it neglects nothing to get its domains within a ring fence. The Island of Jesso, whose chief city is Hakodadi, would thoroughly complete its latest acquisitions in the Far East, and there is no doubt it will, at a period close at hand, seize on the first pretext for becoming its master.

RUSSIAN POSSESSIONS IN MANTCHOURIA.

Besides Vladivostock and Olga Bay, the Russians possess, on the coasts of Mantchouria and on the western coast of the large Island of Saghalien, Passiat Bay, Koussounai, Emperor Bay, Doui, Castries Bay, and Nicolaiefski. At Passiat Bay, in 42 deg. N., coal has been found. Koussounai and Doui, in the Island of Saghalien, offering no shelter for

Digitized by Google

vessels, military posts have been established there—at Koussounai (48 deg. N.) to watch the Japanese frontier; at Doui (51 deg.) on account of the coal mines discovered there. The colony of Emperor Bay possesses an excellent anchorage, but is destitute of communication with the interior, and a weak detachment of soldiers suffices for its guard. Castries Bay (52 deg.) is, next to Vladivostock, the most considerable port the Russians have in these quarters. It is connected by an easy route with Lake Kisi, from whence vessels of light draught can reach the River Amoor. The Russians established themselves at Castries in 1854; at Doui in 1856; at Koussounai in 1857; at Olga in 1858; and lastly at Passiat and Vladivostock in 1860. The necessity of all these establishments is not yet fully evident, for Nicolaiefski itself, on the Amoor, the only Russian large town in this part of the world, is far from having acquired much commercial importance. The foundation of these distant colonies will be without a motive until the projects of the Government of the Czars on China and Japan have assumed a degree of consistence. The natural riches of Mantchouria are but imperfectly known, and their development would be attended with immense difficulty. I have already mentioned the coal-pits of Passiat Bay and Doui; I may add that marble has been discovered at Olga Bay, and auriferous ore at Vladivostock. Wood for building abounds in the interior of Mantchouria, and, if set on foot, the fur-trade would yield satisfactory results. The grand obstacle to the civilization of these vast countries—an obstacle that will long remain insurmountable—is the want of population. To the north are met a few wandering tribes—the Guilaks, Tungooses, and Orotches—mixed, about Olga Bay, with some Chinese. South of Olga, and on the coast, Manzas alone are to be found. Maximovitch, the botanist, estimates that the whole native population of the coast of Mantchouria, from 42 deg. to 52 deg. north, does not exceed a thousand souls.

Three chapters are devoted to the later history of Japan, in which the course of events is traced with great clearness and point. The feeling of the Daimios towards the Tycoon and the relative position of parties are put in a very unmistakable light in a quotation from a pamphlet distributed some time back by the section opposed to the latter. The reader will see in it a complete corroboration of the views constantly urged in this journal, and also a remarkable justification of the Prince of Satsuma's desire to possess himself of a war-steamer, as indicated to Colonel Neale by his envoys:—

For centuries the Tycoons, forgetting the origin of their power, have undermined the dignity and power of the Mikado their master, and the conduct of the present Tycoon proves that either equity nor good faith is to be expected from him. Things are come to that pass that foreign Powers look on the Tycoon as master of Japan, and treat the legitimate Emperor as a being without power and without influence. It was to the Tycoon the barbarians addressed themselves when they wanted to conclude treaties with Japan. The Mikado was not even consulted, and his approval, which is indispensable to the introduction of reforms into the constitution, was not solicited. Yet these treaties are in force as if they had a legal value. The Tycoon, therefore, has committed an act of treason against the majesty of his master and the sacredness of the constitution, in virtue of which he is placed at the head of the executive power. It cannot be denied that the Court of the Tycoon is endeavouring to concentrate all the power of Japan at Yedo. There are the arms and the foreign ships; there spring up schools, in which are taught the arts and sciences of the West. The trade with the barbarians has no place but in the dominions of the Tycoon; the great Daimios have no right to open their ports to it; it enriches the subjects of the Tycoon alone, and the latter derives considerable emoluments from it himself. The purpose aimed at by the Government of Yedo is easy to be seen; it is arming and preparing to subjugate all who would like some day to get from under its sway. In the time of Hieas, the eighteen great Daimios united might have offered a formidable resistance; but the armies of those Princes were inferior to those of Hieas but in one respect, that of numbers. Now-a-day, the chances are no longer so equal. The Tycoon's steamers, the firearms he has purchased or had manufactured after foreign patterns, his acquaintance with an entirely new art of warfare, give him a dangerous superiority over the other Japanese Princes. To avoid being attacked in detail, the latter ought to assemble, as soon as possible, and by allying themselves, defeat the tortuous policy of the Tycoon. The Mikado is ready to give the support of his name to the good cause; but for him to do so, it is necessary that an official request should be presented to him. There is no doubt that he would receive it favourably, and would re-establish the union of the old nobility with the legitimate Emperor. From that union, which he has always ardently desired, will spring a return to the ancient and venerable state of things.

In face of the combination against him the Tycoon was obliged to make great concessions, and eventually to promise to pay a visit to the Mikado within a year. This interview, which, according to our latest advices, has but just taken place, would exercise, thinks M. Lindau, a great influence on Japanese affairs, though it would not remove every difficulty. He concludes his historical retrospect in the following terms, which afford an excellent specimen of the author's more serious style:—

The Tycoon is in fact too potent voluntarily to abdicate a power exercised by himself and his ancestors for more than two centuries. The Mikado, on his side, will not, without an obstinate struggle, let slip the opportunity offered to him for regaining the power of which his family has been dispossessed since the days of Taikosama. One fact, however, remains certain—which is, that the existing difficulties of Japan will turn to the advantage of Europe. Whosoever shall be the master the eventualities of the struggle may give to Japan, he must resolutely put himself at the head of the party that is willing to ensure the progress of the empire by a new policy. The foreign element that has penetrated Japan can never again be expelled from it. Whether it like or not, the Japanese Government must remain in relation with the Westerns, and from those relations a better situation must inevitably arise. What the love of conquest did in the primitive times of human society—what love for the Faith did in the Middle Ages, commerce is doing in the present day. The principal civilising agent of modern times, it proceeds in a different manner to what national pride and religious belief did in former epochs; but it tends to the same goal. If the devouring activity of our merchants does not excite the same sympathies as the heroism of warriors and the devotion of apostles, those men none the less serve the cause of Western civilisation with an intelligent and fruitful ardour. They go to spread afar off that light of which their country is the fountain. They carry the influence of European energy unto the most distant and most barbarous countries. And the best guarantee of vitality put forward at this moment by Japanese society is found in the presence amidst it of European men of business—in the growing part that society itself is capable of assuming in the ideas and tentatives given birth to as a consequence of the commercial relations between Japan and the West.

CHARTERED MERCANTILE BANK OF INDIA, LONDON AND CHINA.

On the 17th inst. the sixth ordinary general meeting of the shareholders was held at the offices in Threadneedle-street; Mr. G. G. Nicol in the chair. The report and statement of accounts, which will be found elsewhere, were taken as read.

The CHAIRMAN hoped the report submitted would be as satisfactory to the shareholders as it was to the directors. The profits of the year had amounted to within a fraction of 40 per cent. The current and fixed deposits and the issues, which were the tests of public confidence and of prosperity, amounted to £8,600,000, and that in the face of a considerable drain on banking deposits. Of the last year's profits they had already divided at the rate of 15 per cent, and added £50,000 to the reserve fund, leaving a balance carried forward of £75,831. The system adopted of paying dividend and bonus in anticipation made it necessary to retain always in hand a sum sufficient to pay the next half-year's dividend and bonus, for which purpose the sum now carried forward would be available on the 1st July, at a rate which he had no doubt would satisfy the proprietors. They had increased the capital by £250,000, and had added £100,000 to the reserve, making the total capital £750,000, and the reserve £250,000. This might appear large for a reserve, but when they considered the great extent of their liabilities and the great importance of confirming the confidence of the public in the bank, he thought they would agree that the policy of the board, in increasing the reserve to an amount which would enable them to meet any emergency was sound. (Hear, hear.)

He had every reason to believe that the present year would be quite as successful in its results as the last; at the same time he wished to guard the shareholders against over sanguine expectations. The commerce of India was still in a transition state, arising principally from the uncertainty in which for some time to come the cotton trade was likely to be involved. It was possible, therefore, that their profits might be temporarily reduced; but the resources of India were so inexhaustible, and were being so stimulated, that he had no doubt of the general prosperity of trade in that country, and of the banking business as a natural consequence. It was only just to say that they were very largely indebted for their present favourable position to the zeal, intelligence, and energy of the officers of the bank, and to mark their sense of the exertions of the various officers, the directors had awarded a bonus equal to 15 per cent. in the case of the manager, and 10 per cent. in the case of all the other officers, on their respective salaries. (Hear, hear.) This amounted to about £6,000. No doubt this was a large sum, but he felt sure that the shareholders would consider it a wise policy.

They had also purchased freehold premises at the several points mentioned in the report; and although as a rule the directors were averse to locking up their monies in dead stock of that kind, the position of matters in India made it imperative that their establishments there should be placed on a permanent footing, otherwise, as land was rapidly rising in value, they might experience great inconvenience and expense in finding themselves suddenly displaced. He was happy to say that the purchases they had made in this way were already worth a considerable profit on the outlay as it stood in the books. He had also to inform them that the directors, finding that the business of the bank was increasing beyond the capabilities of their present offices, had purchased property in Broad-street, where they would have premises equal to three times the business which could be accommodated at the Threadneedle-street establishment, and he was happy to add that the purchase had been so well made that if they were now disposed to resell, they could realise a very considerable profit on the transaction. As would be seen from the report, branches had been opened in various places since the last meeting, and the board was always reluctant to extend branches, but in a bank like this it was absolutely necessary to follow the trade where it was. These were all sub-agencies, that at Point de Galle and Newera Ellia being in connection with the Columbia branch, and the others with the Shanghai branch. In conclusion he moved the adoption of the report, which was seconded by Mr. D. Larnach.

Captain HALL held that the new shares had no right to participate in the profits earned by the old capital.

The CHAIRMAN stated that the new shareholders were part and parcel of the general body. No distinction could be drawn.

Captain HALL repeated his objection, observing that the new capital had not come into operation until December 31. He could not understand what was the object of keeping so large a reserve. Was it that their operations were attended with more than ordinary risk? He thought £200,000 would have been an ample reserve, in which case they would have had £50,000 more to divide among the shareholders. Other banks, whose profits were only half as much as theirs, paid 18 or 19 per cent. to the shareholders, while they only divided 15 per cent. out of 40 per cent. profits earned. He suggested that instead of carrying over £75,800 they should have a bonus of £3 a share, which would enable them still to carry over a balance of £15,800.

The CHAIRMAN said that, so far from there being any unusual risk in

Digitized by Google

the operations of the bank, it was quite the contrary. All their transactions were of the safest character, and carried on with the greatest prudence. The object of keeping up so large a reserve was to secure the confidence of the public, and that it had the effect was shown by the increased value of the shares since they had announced their intention of augmenting their reserve. He might mention that it was the intention of the board to pay a dividend on the 1st of July at the rate of 20 per cent. per annum, which would absorb the balance carried over.

Captain HALL complained that the money was kept in hand until July, and contended that the profits made ought to be divided in the current half year.

Mr. D. LARNOCH, a director, remarked that if they were to wait until the accounts of the current half year came in the dividend would not be paid until probably October next. As to the dividend, he thought 20 per cent. was a very good one, considering the time they had been in existence, and he thought too that the price at which the shares stood in the market, viz., £72 on £25 paid, was equally satisfactory.

The CHAIRMAN added that it was thought well to keep in hand a sum which would enable them to maintain something like an equal dividend, and this he hoped they would be able to keep at 20 per cent.

In reply to further questions,

The CHAIRMAN explained that it was thought advisable, looking at the aspect of the times, to keep a large proportion of the revenue invested in securities immediately convertible, and which did not therefore pay so high a rate of interest as it would yield if the money was used in the ordinary operations of the bank. The directors considered the reserve had now reached its maximum, and it was proposed in future to capitalise profits over twenty per cent. for the benefit of the shareholders.

Mr. D. LARNOCH added that the course would probably be to capitalise the extra profits and convert them into new shares to be given to the shareholders. The motion was then put and carried unanimously.

The directors retiring by rotation were re-elected.

Colonel JAMESON urged that directors of this bank ought not to hold office in other banks, and suggested that it was possible information might through their means be given to competing establishments to the injury of this.

The CHAIRMAN did not see that there was any objection to the directors being directors of other banks, provided they were not competing banks. He thought no charge could be made against them of neglecting the interests of the shareholders. (Hear, hear.)

The auditors were then re-elected, and £100 awarded to them for their services. A vote of thanks to the directors and managers concluded the proceedings.

ANOTHER CHINA DEBATE.

(THE TIMES.)

Lord Palmerston is one of the very few men in this country who understand the importance of China to England. Perhaps he is the only man in the House of Commons, and he certainly is the only man in the Cabinet, who is able, from a thorough knowledge of all that has gone before, to see his way clearly in his present conduct, and make his decisions with confidence as to his future policy. A China debate has become dreary and unattractive, but it is at the same time a very important matter, for it takes in, as Lord Palmerston said on Friday night, no less a question than that of our commercial relations with one-third of the human race.

We are committed to trading relations with the extreme East, which are to compensate, and which do in a great measure compensate, the falling-off of our commercial relations with the West. The opening up of China is undoubtedly one of the most obvious causes of that wonderful, and to many inexplicable, prosperity which, amid the dangers of Europe and the convulsions of America, seems to settle in lieu of other sunshine upon these islands. We must, however, accept the new advantage with its conditions. The Chinese never have been and never will be a peaceful and well-governed people. The insurrection of the Taipings is not an acute disease; is is the symptom of an ineradicable constitutional infirmity. China always has been a country of frequent revolutions, secret societies, and powerful robbers. In all ages and in all times China has been traversed by banditti and coasted by pirates. The history of China is full of nothing else but pirates and banditti, and it is because there has never been any security that China is the oldest society in the world with scarcely any really ancient remains. The oldest thing in China is supposed to be a vase, which hands down the tradition of the turbulent insecurity of still earlier times. Its inscription is an aspiration for "ten thousand years' rest from violence and troubles." China was never without her Taipings ashore and afloat. The Ming dynasty was founded by a lay brother of a Buddhist monastery, who got together a multitude of bandits. When the Tartars came down the last of the Mings had just hanged himself, because there was a robber chief in possession of Peking and eight rebel armies in different provinces of China, each plundering upon its individual account. The patriot defenders of their country against these same Tartars were pirates, now celebrated by Chinese historians, and robber chiefs who when they left a city massacred all the inhabitants, and the greatest of whom made it his chief merit that he had cut the throats of three hundred women. As it was then so it is now, and so it will continue to be while the same causes continue. China is a densely populated country, especially exposed to inundations and failures of crops. There are, therefore, always millions of hungry and destitute men, a feeble and corrupt Government, an inefficient police, and no poor-laws. It is a condition of such a society that men must either rob or starve, and therefore they rob, and they gather together to rob. But there is no fibre in their cohension. They gather like the avalanche, and they rush onwards with all its desolating force and rapidity; but when they have reached the valley they dissolve in the sunshine, and leave nothing but a mass of rubbish behind.

The difference between the Chinese rebels of to-day and the piratical bodies who drove the Dutch out of Formosa, or the bandit who got possession of Peking, or the Chinese Jack Cade who appointed an examination for literary honours, and when he had thus assembled several thousand candidates murdered them all on the spot under the pretext that by sophistry they would excite disturbances throughout the empire, or the monster who murdered all the women, is simply that the Taipings of the nineteenth century have come in contact with a trading nation, and are making themselves exceedingly inconvenient to the received course of respectable business. The brigands of former days swarmed and crunched and died like successive flights of locusts in the same lands, without acquiring much fame. No doubt they had their virtues in the eyes of some persons. The Portuguese obtained Macao as the price of protection against some of them, and Hangchow, Nanking, and Soochow became more wealthy as places of security. So, in the present day, Shanghai as a city of refuge is growing so important that a bit of land there is about as valuable as a site in Cheapside. Mr. Liddell, by a whimsical error, has sought to gain credit also to the Taipings for our recent supplies of silk, the fact being that these robbers, by their presence in the silk districts, have frightened away all the holders of the old hoards of "box silk," and have thus cast it all upon the market. The wind that blows nobody good has yet to blow, and the Taipings must necessarily produce some irregular advantage to some one. We can even recognise in the existence of some counterpoise to the absolute rule of the Peking Government a wholesome corrective to the "anti-barbarian" policy is even now only kept in check by fear of the spread of Taipingism to the Northern provinces, and by regard for the proceeds of the Shanghai customs. Their influence, however, upon our Western interests is in the general point of view evil, and their presence in the silk districts is an unmitigated misfortune to us. What we hope from the Sherard Osborn Expedition was not that the piracy and brigandage would for ever cease in China—for that is impossible—but that they would be driven away from those parts of the country where we trade and whence we draw our supplies. But for the unfortunate failure of that enterprise, this expectation would have been fulfilled. The Taiping Chiefs were prepared to abandon Nanking, and the whole "ragamuffin" crew would have moved off to more distant fields of operation. Now, not only is the rebellion raising its head again—a fact we need not care much about—but it is occupying the part of the country from which it is our interest that it should be driven. The encouragement of the Osborn expedition was in this point of view a wise and statesmanlike measure, and its failure was a great misfortune.

It is satisfactory, however, that, whatever may be the difference of opinion as to the past, every one agrees as to what the future conduct of England should be in China. The House of Commons was unanimous on Friday—perhaps Colonel Sykes may have protested, but if so we will take his protest as proof of the general unanimity—that the Treaty ports must be protected. The defence of a port of course involves the defence of its immediate circuit, and thus we are all resolved as to the propriety of defending the towns with which we trade. Henceforward we shall attempt no more, either by direct or by indirect interference. The silk districts and the tea districts must take care of themselves. After the practical refusal of the Peking Government to avail itself of the aid we offered it, this is, no doubt, our wisest course. But out of these circumstances important consequences must follow. The protected ports and the producing districts will soon find their interests in being indissolubly connected, and the result will probably be to effect some regularity and consistency in the Government of the Taipings, or to infuse some energy into the councils of the Imperialists, but in either case to obtain for the producing districts some practical protection from their mercantile ports.

Naval and Military.

VESSELS OF WAR ON THE CHINA STATION.

The *Army and Navy Gazette* gives the following in its usual monthly list as the names of vessels of the Royal Navy now on the China station :—

Algerine, 3, sc. gunboat, Lieut.-Com. A. R. Blane.
Argus, 6, st., Com. J. Morisby.
Barrosa, 21, sc., Capt. W. M. Dowell.
Bustard, 2, sc., gunboat, Mast. Com. J. C. Tucker.
Centaur, 6, pd. st., Com. J. T. Creasy (ord. home).
Clown, 1, sc gunboat, Lieut. Com. J. S. Tonkin.
Conqueror, 78, sc., Capt. W. G. Luard.
Coquette, 4. sc. gunboat, Com. A. G. Roe.
Cormorant, 4. sc., Com. G. M. Buckle.
Coromandel, 4, sc., Lieut. D. G. Davidson.
Encounter, 14, sc., Capt. R. Dew (ord. home).
Euryalus. 35. sc., Capt. J. H. Alexander, flagship of Vice-Admiral Kuper, K.C.B.
Flamer, 1, sc., Lieut. Com. T. S. Gooch.
Grasshopper, 2. sc. Lieut. Com. J. C. Tucker.
Hardy, 2, sc., Lieut. Com. T. G. Bogle.
Haughty. 2, sc, gunboat.
Hesper, 4, sc., Mast. Com. A. F. Boxer.
Hornet, 17, sc., Com. Hon. R. Hare (ord. home).
Insolent, 2. sc., Lieut.-Com. G. Parsons.
Janus, 1, sc., Lieut.-Com. Richard Adams.
Kestrel, 1, sc., Lieut.-Com. Hamilton Dunlop.
Leopard, 18, st., Capt. C. T. Lecky.
Leven, 1, sc , Lieut.-Com. H. P. Knevitt.
Manilla, sc., 70 h.p., Mast. Com. H. W. Burnett.
Osprey, 4, sc., Com. A. J. Innes,
Pantaloon, 11, sc., Com. F. R. Purvis.
Pearl, 21, sc., Capt. J. Borlase, C.B. (ord. home).
Pelorus, 21, sc., Capt. Henry Boys.
Perseus, 17, sc., Com. A. J. Kingston.
Racehorse, 4, sc., Com. C. R. F. Boxer.
Rattler, 17, sc., Com. J. W. Webb.
Rifleman, 5. sc., sloop, Com. John Ward.
Ringdove. 4, sc., Com. R. A. O. Brown (ord. home).
Saracen. 4, brig, tender to Rifleman.
Scylla, 21, sc., Capt. R. W. Courtenay.
Severn, 51, sc. frigate, Com. F. B. Montresor.
Slaney, 1. sc., Lieut. Com. W. R. Lee.
Staunch, 2, sc., Com. G. M. Temple.

Digitized by Google

Swallow, 9, sc. sloop, Mast. Com. E. Wilds.
Tartar, 20, sc., Capt. J. M. Hayes.
Vigilant, 4, sc., Com. N. R. Hobson.
Vulcan, 6, sc. tr.-ship, Capt. A. C. Strode (ord. home).
Wasp, 13, sc., Capt. W. Bowden.

DEATH OF ADMIRAL HERCULES ROBINSON.—We have to record the death of the above gallant and distinguished admiral, who expired at Southsea on the 15th inst. The deceased, who had attained the advanced age of 75 years, entered the Navy in June, 1800, on board the *Penelope*, 36, and in the *Euryalus*, 36, fought at the battle of Trafalgar, October 21, 1805. He was confirmed a lieutenant April 25, 1807, in the *Glory*, 98, off Cadiz, and August 30, 1809, was promoted to the command of the *Prometheus*, 18, and captured three privateers and drove on shore and burnt a fourth in the face of a body of troops. He was advanced to post rank, June 7, 1814, and from September, 1817, to December, 1820, commanded the *Favourite*, 26, at St. Helena, in the Rio de la Plata, and Newfoundland. He accepted the retirement October 1, 1846; became rear-admiral, October 9, 1849; vice-admiral, October 21, 1856; and admiral, January 15, 1862.

DEATH OF SIR A. MURRAY TULLOCH, K.C.B.—We have also to record the death of Sir Alexander Murray Tulloch, K.C.B., who died on the 16th inst., after a short illness. The news of his death at the War Department occasioned much regret among those persons with whom he was associated in official matters. The late Sir Alexander Tulloch was educated at Edinburgh, and afterwards went to the Military College at Sandhurst, where he obtained the highest honours in the senior department of that military seminary. He entered the army as ensign in the 45th regiment in 1826. The late general occupied several important administrative offices in the War Department. For some time he was in charge of the statistical branch of the War Office, and was latterly Assistant Military Superintendent of Pensioners. He obtained the honour of a Knight Commander of the Bath for his civil services as Commissioner, in conjunction with Sir John M'Neill, G.C.B., in the inquiry sent out to the Crimea by the Government in 1855, on the management of the British army during the campaign in the East. The care and diligence in drawing up the joint report is generally considered due to the discretion of Sir Alex. Tulloch; and, as was afterwards declared in Parliament, "he was a faithful exposer of the errors which then brought our military organisation into disrepute."

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, May 22.

On the proposition of the Minister for the Colonies, H.M. the King has just authorised Mr. A. W. Kinder de Camarecq, principal officer of the East India Civil Service, lately Resident of Bagelen, in Java, now in this country on leave of absence, to proceed to Vienna and Paris to attend the practical trials about to be made with respect to the discovery of Mr. Daniel Hooibrenk for an artificial fructification of fruit trees and corn. The special object of this gentleman's mission is to ascertain the best method of introducing this important discovery into Netherlands India, where, as we learn by late advices from that country, great expectations are formed of the benefits to be derived from this new system. According to despatches from the Governor-General of Netherlands India, the first attempt will be made in the rice-fields belonging to the domain of Tjipanas, in the Treanger Regencies, and if they succeed, to be extended to the coffee and spice trees.

The "Indian Club" of this city, as a proof of its sympathy towards the Colonial Military Asylum at Bronbeck, has just sent to the commandant the munificent sum of 700 fl. for purchase of an organ for that establishment, which has also of late received some very valuable presents of works on various subjects from different booksellers, amongst whom may be mentioned the houses of Jantzen, of Amsterdam; Quentin, of Arnhem; and Breijer and G. J. Thieme, both of the same place.

The following twenty-two first-class vessels have been chartered by the Netherlands Trading Company to load produce in Java to the undermentioned ports:—*Jacob Roggeveen*, Capt. Van Marken; *Jan Hendrik*, Capt. Lelyfeldt; *De Zwaan*, Capt. Doekzen; *A. R. Falck*, Capt. Van der Plas; *Senior*, Capt. Bakker; *Wildemann*, Capt. Driest; *Helena and Anna*, Capt. Van Aalborg; *Vier Gezusters*, Capt. Otto; *Nieuw Holland*, Capt. Witting; *Helena*, Capt. Dill; *Kinderdijk*, Capt. Zwanenburg; *Telenak*, Capt. Popken; all for Amsterdam. *Europa*, Capt. Lupcke, jun.; *Silentium*, Capt. Schagen van Leeuwen; *Johanna*, Capt. Verduyn; *Vier Gebroeders*, Capt. Bunk; *Kaap Hoorn*, Capt. Dik; *Rudolf*, Capt. Meinsma; *Minister Thorbecke*, Capt. Kannegieter; *Columbine*, Capt. Kock, for Rotterdam; *Stad Middelburg*, Capt. Ouwehand, for Middelburg; and *Jacoba Helena*, Capt. Swart, for Schiedam.

H.N.M. steam transport *Heldin*, 10 guns, under the command of Capt.-Lieutenant P. W. Stort, after having had her crew mustered by the Naval Commander-in-Chief at Nieuwe Diep, hauled out into the outer roads, where she took in her gunpowder, and having exchanged the usual salutes with the batteries, sailed from the Texel on the 15th inst. for the East India station.

The flourishing little manufacturing town of Almelo appears to drive a large trade with Netherlands India; for, according to the returns just published, they exported to that country during the last year 201,202 pieces of cotton manufactures, 341 piculs of muletwist, 42,500 jute coffee bags, and 22,040 kilogr. of pork and beef.

The *Stoompost* asserts that the directors of the new Canal Company for cutting through the strip of land between this city and the sea, have received an offer from the house of Messrs. York and Co. to execute the works and keep them in order for two years after completion, for the sum of 23,750,000 florins.

H.M. the King has been pleased to appoint the following gentlemen to be members of the Order of the Netherlands Lion:—Baron Stoet van de Beele, Governor-General of Netherlands India, and Mr. A. Prins, Vice-President of the Council of Netherlands India, to be Knights-Commander; Mr. E. Netscher, Resident of Riouw; Mr. J. E. Teysmann, Director of the Government Botanical Garden at Buitenzorg, Mr. W. Cores de Vries, a manufacturer of Sourabaya, and Mr. P. W. Hofland, landed proprietor of Krawang, to be Knights.

The Second Chamber of the States-General, after passing nineteen Bills (all of a local nature), have adjourned, there being still left thirteen that will be brought on in the ensuing Session. The First Chamber is convened for Thursday, the 2nd June.

At a public sale of shares, &c., held here, Java Bank shares realised 174¾ per cent., and shares in the Netherlands Sugar Refinery 188 per cent.

The Netherlands Trading Company, by order and for account of the Colonial Department, invites tenders for 15,480 kilogr. of fine wheat flour, and 19,800 litres of wine vinegar, to be delivered into the Colonial magazine in this city for shipment to Java. Tenders received till the end of this month.

COMMERCIAL.

COFFEE.—The Company's sale of 86,164 bags of Java, held this time at Rotterdam, went off very easily, all being sold, though generally a trifle lower than last sale. Good ordinary realised 43 to 43¼ cents, and on the average all went 1 to 1¼ cents lower. The sale was immediately succeeded by another containing about 5,000 bags of private trade Macassar, of which a few lots were bought in, and the rest sold at from 33¾ to 44½ cents, according to quality.

SUGAR.—Raw has had a fair amount of business, chiefly for shipment at ¼ to ½ fl. below Company's March sale prices. Refined market still in an unsatisfactory state, with little or no demand, and drooping prices.

SPICES.—Pepper has been more in request, but without leading to an improvement in value. Nutmegs continue in favour, and still realise the advance mentioned in last report. Cloves are again in favour, and have been an object of considerable speculation, 28¼ cents having been paid for parcels of the crop of 1863.

RICE.—The market has been very active since last mail, and prices well supported. Among the sales reported were 870 bags of Java, ex *Johanna Christina*, at 9¼ fl.; 2,132 bags Java ex *Vrede*; 2,200 bags do. ex *Nova Zembla* and *Johanna Christina*, at 9 to 10 fl.; and 1,750 bags of Java table rice ex *Henriette*, at 16 fl.; and at Rotterdam, 14,000 bags Java, ex *Rudolf*, at 16 fl.

HIDES.—Large parcels have been sold, including the following:—7,000 Java ox, by public sale, at 37 to 61 cents for the sound; and 34½ for the damaged; 780 buffallo, ex *Merchantman*; 2,427 ex *Johanna*; 560 ex *Cornwallis*; 878 ex *County of Lanark*; 165 ex *Mary and Hillegonde*; 859 and 515 ex do.; 494 and 60 ex *Macassar*; 500 buffalo ex *Elizabeth*; 944 ex *Jeddo*; 360 ex *Catharina*; 293 ex *Marinus*; and 465 ex *Henriette*. Full prices were in all cases realised.

METALS.—No sales are reported of copper. Banca tin continues to decline, and may now be bought at 66 fl. Billiton was more in demand, but could only realise 65¼ fl.

INDIGO still attracts purchasers at firm prices.

RATTANS were more in favour again, and the sales included 8,165 bundles (504 piculs), ex *Insulanarin*; 844 bundles (60 piculs), ex *Maria Adolfina*; and 561 bundles (100 piculs), ex *Scharnhorst*.

JAVA TOBACCO.—Market inactive, the only sales reported being 189 bales, mark W/Malang, ex *County of Lanark*, sold by tender; and by private contract 414 bales Kawi, 752 bales mark D. At the end of this month the Company have advertised some large sales of tobacco, among which are 22 bales from Japan, and 1,427 bales of Java, of the following marks:—K.M., B.K., K.L., P.O.M., D.M., W.G.J., and H.B.V.H. 131 bales of Java, mark *Josa Klakka*, have come to hand per *Bilderdyk*. Stock in this country 4,720 bales of Java and 22 of Japan.

Literature.

Stanford's Map of the Empires of China and Japan, with the Adjacent Parts of British India, Asiatic Russia, Burmah, &c. E. Stanford, 6, Charing-cross, London.—Maps of China have been hitherto almost invariably confined to the Eastern portion of that great empire, omitting even parts of the provinces which constitute China Proper. This mattered little when European intercourse with the Chinese was limited to the seaboard and to Kiachta on the Russian frontier. But our interest in the magnificent provinces of Western China has immensely increased of late years, and while Russia is extending her territory and establishing communication with the interior of China along the whole of her frontier, extending between the Pacific Ocean and the new settlements on the Kirghis Steppe, Englishmen may also hope to enjoy the fruits of commercial intercourse with the rich and populous provinces of Yunnan, Shensi, and Szchuen. The new map now before us, issued by

Digitized by Google

Mr. Stanford, brings all these provinces before the eye, the undeveloped wealth of which offers a new field to commercial enterprise. It includes also, as the title intimates, the Empire of Japan, and thus the whole of the Far East is brought before us in a portable form. Mr. Stanford is so well known as a cartographer, that it is scarcely necessary to add that the execution of the work is admirable.

THE EARL OF ELGIN'S COLLECTION OF WORKS OF ART.—A portion of the choice objects of art collected in China and Japan by the late Earl of Elgin and Kincardine, Governor-General of India, and recently exhibited at the Kensington Museum, was submitted to public competition at the rooms of Messrs. Christie, Manson, and Woods, in King-street, St. James's, by order of the executors. Also a few bronzes and porcelain, the property of the late Mr. George Roake, and some fine enamels and carvings in jade, recently received from China. The sale excited very great interest, and was numerously attended. The following were the more important articles:—Enamels 67 and 68. An incense-burner, of extraordinary size, on three feet, surmounted by masks of metal gilt, with mask and ring handles, enamelled with flowers in colours on turquoise ground, the cover of enamel, pierced, and surmounted by a kylin of metal-gilt, 3½ft. high; and the companion incense-burner, on three feet, enamelled with flowers and ornaments in brilliant colours on turquoise ground, the cover of enamel, pierced, and surmounted by a metal gilt kylin, 3ft. 2in. high—£139 (Hewett). Carvings in Jade.—80 and 81. A beautiful circular incense-burner of white jade, on three feet, with handles formed of kylins, the cover surmounted by a handle, with two rings attached, and a pair of beautiful small white jade bowls and covers, with dragons, bats, and ornaments in slight relief—£66. 10s. (Archer). Bronzes.—99 and 103. A bacchanal with a horn, and a bacchante—a pair—on bronze pedestals; and a similar pair, a bacchanal with a pipe, and a bacchante with an ewer, on marble plinths—£43. 10s. (Boore). A different property.—A pair of ivory vases, elaborately carved and perforated, the most exquisite specimens of Chinese workmanship ever produced; manufactured expressly for the Great Exhibition of 1862, by that celebrated worker in ivory, Hoaching. These vases are hexagonal, the larger panels measuring 8in. or 9in. by 6in. or 7in. on the wider sides; these, and the other panels and bars, exhibiting raised figures and foliage, illustrating episodes from classic story. Each vase measures, including ebony stand, about 3½ft. high. The ivory was selected at Siam, and is very pure—150 guineas (Harbord). 107. A massive Chinese silver vase and cover, manufactured expressly for the Great Exhibition of 1862, weighing 3?0oz.—£114 (Archer). 108. A pair of very large and rare old porcelain pagodas, on lacquered bases, about 18ft. high; from the Chinese collection, 1843—82 guineas (Hewett). 109. A Chinese skull, lined with gold, and with cover of pure gold; on triangular stand and plinth of the same, chased with dragons and clouds, weighing about 77oz. 9dwts. "The Gold-mounted skull from China, which is stated to be that of Confucius, has been described as a drinking cup, but we are not prepared to admit that it ever was applied to that purpose, as it may have been, and probably is, a sacred relic, though we may doubt it is the skull of Confucius himself which is thus richly mounted and preserved. All who visited the Exhibition will doubtless recollect this curious specimen of goldsmith's work as one of the great attractions of the Chinese Court. It was taken from the Summer Palace of the Emperor by one of Fane's cavalry. The skull is placed on a triangular stand of pure gold, and rests on three very roughly shaped gold heads; the cover, also of pure gold, is richly ornamented with minute patterns in low relief, and is studded with small precious stones. The ornament itself presents nothing peculiar, the principal portion of it being formed of the usual Chinese conventional mode of representing clouds or sky, typical, perhaps, of the region to which the soul of the deceased had flown."—Waring's *Masterpieces of Industrial Art*, vol. iii., plate 291. This extraordinary and beautiful work was, after a spirited competition, knocked down to Mr. B. Benjamin, of Glasshouse-street, at the price of £327. Enamels.—126-8. A fine square vase, with landscapes and ornaments in colours, 16½in. high; a pair of beautiful square lanterns, with openwork borders and stands of enamel, 20in.; and a pair of curious pagoda-shaped lanterns, of perforated enamel, with coloured glass panels and pendant ornaments, 24in. high—£93 (Stempson). 136. A magnificent incense-burner, of ancient enamel, with flowers and animals in colours, on torquoise ground, the cover and upper part of pierced and chased metal gilt, on square rose-wood stand carved with masks and foliage—£50 (Wareham). Ancient porcelain.—154 and 187. A pair of very fine square pillars, beautifully enamelled with flowers on sea-green ground, in diamond-shaped medallions, 18in, high; and a fine vase, of ancient enamel, with ornaments and flowers in colours on turquoise ground—52 guineas (Mr. Jones Loyd).

THE P. AND O. COMPANY'S LINE TO JAPAN.—The *Corea*, a screw steamship, built and engined by Messrs. Gourlay Brothers, of Dundee, and purchased by the Peninsula and Oriental Company to run between Japan and Shanghai, left Southampton for that station on the 21st inst. The length of this vessel between perpendiculars is 226ft., 8in.; breadth of beam, 27ft.; depth from top of floor to spar deck, 15ft. 4in.; gross tonnage, 609. On her trial trip, which took place a few days since, the *Corea* realised a mean speed of 13·129 knots per hour. With a total weight on board of coals, water, stores, &c., of 404 tons, her mean draught of water was 12ft. 3in., and the engines, which are of 200-horse power nominal, indicated 1,044.

THE BURIAL OF THE LATE COUNTESS OF FALMOUTH.—The remains of the late Countess of Falmouth were, on the 7th inst., according to her own last wishes, interred in the family vault of the Earls of Falmouth, at Tregothnan, Truro, Cornwall, between the remains of the Earls, her husband and son. The funeral was attended by a large assembly of relations, friends, and tenants. The lamented Countess, since the death of the Earls, her husband and son, had lived in complete seclusion; but her charities nevertheless continued to be widely extended; not only the aged and dependent on the former properties of her noble husband, but many of the distressed inhabitants of the poorest quarters of London were in constant receipt of relief from her Ladyship.

PARLIAMENTARY NOTICES.—Mr. J. B. Smith: To ask whether the communications made by the American Minister at Peking, in a despatch to Mr. Seward, the Secretary of State at Washington, and dated the 20th of June, 1863, respecting the joint policy to be pursued in China by England, Russia, France, and America, is substantially in accord with a despatch addressed to Earl Russell, &c. Colonel Sykes: Copy of all Orders in Council or Consular ordinances in China at present in force, for the punishment of breaches of neutrality by British subjects.

Monetary and Commercial.

During the present mania for joint stock banks, we are not astonished to find that persons most interested in them should exert their skill in causing a rise or fall of the price of shares as may be desired, but it is a matter of regret that the names of such men as Harry G. Gordon, Esq., Chairman of the Oriental Bank Corporation, should figure in these affairs. A shareholder of the "British and American Exchange Banking Corporation," of which Mr. Gordon is a director, and Mr. Sam Gray, late of the Oriental Bank in China, is Secretary, has asserted that one or more of the directors have been guilty of extensive dealings in the shares, by which dealings the shares have been forced up from 5 to 25 per cent. The following is the statement referred to:—

"The ten directors, holding together like one man, have stated to you that they 'have not in any way, directly or indirectly, assisted in producing the late extraordinary rise in the premium on the shares.'

"I take leave, however, now to say that they have directly and indirectly assisted in producing the late extraordinary rise.

"I assert they 'beared' the shares, trying to force the prices down, and forced them up, trying to buy them back. I assert this, and let them collectively, the ten like one man, deny it if they can.

"I know the ten directors held for some time back 318 shares amongst them, and no more. I know that in this state of things one of their number sold 500 shares, and if he could only have driven the shares down to par, he would have made £3,000 to £4,000 by buying the shares back at a lower price than that at which he sold them. The letter to Mr. Slaughter, however, failed to effect this object.

"I believe the result of the 'bearing' was that it drove the *bona fide* holders into an opposite line of action, and that the 'bears' drove the market up, trying to buy back.

It has also been a matter very generally talked about, that Mr. W. W. Cargill, also a director of the Oriental Bank, has joined the boards of a large number of the new banks, and, in fact, this gentleman, to whom the Oriental owe so much during its earlier days, has earned the sobriquet of a "guinea-pig director."

At an extraordinary meeting of the shareholders of the Agra and United Service Bank, Mr. G. G. Macpherson in the chair, the resolutions passed on the 7th May were unanimously carried.

The Imperial Bank of China has advertised for managers for Calcutta, Bombay, Hong Kong, and Shanghai.

The meeting of the shareholders of the Mercantile Bank of India, London, and China was duly held on the 17th inst. A report will be found in another column.

The new companies lately introduced to public notice have been as follows:—

The Scottish Fire Insurance Company, capital one million, in 50,000 shares of £20 each. The company is formed under the auspices of a provisional committee, composed of many of the most eminent mercantile names in Edinburgh, Leith, Glasgow, and the other chief towns of Scotland.

The Cadiz, Oporto, and Light Wine Association, capital £150,000, in 15,000 shares of £10 each. It appears that this company adopts the principle of purchasing wine direct from the vineyards, and making the "family grocer" the medium of introduction to the consumer.

The Worcester Engine-Works Company, capital £300,000, in 30,000 shares of £10 each. The object is to construct and maintain locomotive and other engines and machinery, and to sell, lease, or hire, the same. Arrangements have been made for the purchase of the works, machinery, plant, &c., of the firm of Messrs. McKenzie, Clunes, and Holland, of the Vulcan Works, Worcester.

The Ceylon Coffee Estates Company has been formed for the purpose of purchasing and working certain coffee plantations in Ceylon. The directors have contracted with Messrs. David Wilson and John Randon Worcester for the purchase of five valuable estates. The capital of the company is £120,000, in 12,000 shares of £10 each.

The Clyde Steamship Company. The object of the promoters is apparently to place Glasgow and the Clyde ports on an equality in point of steam communication with the other ports of Great Britain, such as Liverpool, Hull, &c., where a great extension of enterprise of this class has taken place during the last few years. The capital is £200,000, in 8,000 shares of £25 each.

The objects of the Floating Telegraph Station and Light-Ship Company are to provide and anchor ships near the ordinary track of vessels, such ships to serve as electric telegraph and signal stations, and also as safety beacons for navigation. The company's ships will be fitted up complete as telegraph stations. It is also intended to provide them with steam power and lanterns for displaying a powerful light. Day and night signals, steam whistles, guns, lifeboats, &c., will form part of their equipment. Steam tenders fitted up for the conveyance of passengers, mail

Digitized by Google

specie, and merchandise, and capable of acting as tugs, will, moreover, be provided by the company, so that assistance can be rendered to disabled or derelict vessels. The stations selected for the first services of the company are off the Scilly Islands, and off Cape Race, Newfoundland. The capital of the company is £250,000, in 25,000 shares of £10 each.

The Torbay Hotel and Winter Garden Company, capital £50,000, in 5,000 shares of £10 each, of which £1 per share is to be paid on allotment. The company is formed for the purpose of establishing an hotel at Torquay on a scale commensurate with the growing importance of the town as a watering place. There is also to be a winter garden of considerable extent. Arrangements have been made for taking on lease a piece of land excellently situated in close proximity to the railway station, with a southern aspect,

The Freehold and General Investment Company, capital £250,000, in 10,000 shares of £25 each, of which the first issue is to be 5 000 shares. The objects of this company are to purchase from time to time such freehold or leasehold property in London and its neighbourhood as may present special capabilities for improvement as first-class houses, offices, and chambers.

The Hydraulic Tube Drawing and Steel Ordnance Company, capital £150,000, in 15,000 shares of £10 each, is formed for the purpose of purchasing and developing certain new and valuable patents for improvements in the drawing and shaping of metals, and for the machinery employed thereon. The patent has been experimentally worked in Paris for nearly two years, and as the Ordnance Department of France has reported favourably on it, negotiations are at present on foot for the supply of the Imperial Government.

The English, Swedish, and Continental Financial Company, with a capital of £1,000,000, proposes to assist agricultural, railway and other works.

The General Contract Company, capital £1,000,000, to take over the business of Mr. Rowland Brotherhood and his establishment, at the Great Western Railway station, Chippenham.

The Maritime Credit Company, capital £1,000,000, in 20,000 shares of £50 each, is formed for the purpose of making advances by way of mortgage or otherwise on shipping, wharves, ship yards, docks, warehouses, and every description of maritime securities, and will conduct the usual business of a Credit Company.

The London and Venezuela Bank, to which will be transferred the business of the "Bank of Caracas." The great and increasing demand for money for the cultivation of various staples, especially cotton, large quantities of which are now being exported to England, will find abundant employment for all its resources. The board of directors, as at present constituted, is composed of six directors in England, with power to increase their number, and of four directors in Venezuela without that power. The principal control of the bank is to be vested in the English board, who are to select and appoint the manager in Venezuela. The capital proposed to be raised is £500,000 in 10,000 shares of £50 each.

The Tyne Iron Shipbuilding Company, capital £400,000 in £50 shares. It is stated that the works now in operation are capable of turning out 30,000 tons of shipping per annum. A local demand for iron colliers is relied on. The company, furthermore, comes into possession of current contracts. There is a capacious graving dock and ground for a patent slip, which might be made a good source of permanent revenue.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was:—In gold: To Alexandria, £3,000; to Madras, £645. In silver: To Calcutta, £15,000; to Penang, £3,080; to Hong Kong, £1,100; to Shanghai, £22,795; to Yokohama, £8,050. Total, in gold, £3,645; in silver, £65,025.

ARTICLES OF IMPORT.

TEA.—Business has continued only on a limited scale, although, owing to a belief that present prices are about the lowest likely to be established, there has, within the last week, been more disposition on the part of the trade to buy, whilst there have also been a few speculative purchases of blackish-leaf Congous; and, on the whole, we may quote our market rather firmer both in tone and prices; and as the quantity afloat is now very small, we hope to see a more general demand should money continue to fall in value Owing to the increase in the duties on teas imported into America, there has been a marked diminution in the demand for that quarter. Low and dusty kinds of Congou have been inquired for at the low prices established at the last public sales. Fair to good common have not been much in request. Fair flavoury kinds show no alteration, being still difficult of sale. There have been some purchases of fair blackish-leaf kinds at a shade better prices. The medium kinds remain much as before. Good to fine Kaisow, also Monings and Wopaks, are in moderate supply, and previous prices have been maintained There has been but little demand for export for the finest grades of either. Tayshans have sold at about previous prices. The new make Canton kinds show no alteration. Common Oolongs have been dull, owing to the absence of export orders. Other sorts have been steady at about previous rates. Flowery Pekoes and Souchongs remain as last advised. In Scented Teas there is no variation to notice. Sales to a moderate extent have been made both in Capers and Orange Pekoes at about previous prices. Uncoloured Japans have been less in demand, and prices are quoted rather easier. The public sales of Indian Tea went irregularly, but the chief reduction was in the commoner sorts. The new arrivals of Green Tea have been freely offered, and the sales made have been at full prices to 1d. per lb. advance for Gunpowders; Young Hysons realising about previous prices, whilst Hysons have been rather more difficult of sale in the absence of export orders. Canton made Teas show no alteration.

SILK.—Our market during the fortnight has been exceedingly quiet, but prices remain unchanged, holders of silk continuing very firm. The uncertainty as to the prospects of the European crop has caused buyers to hold off until something more definite is known of its probable result. An unfavourable feature is the still further falling off in the deliveries, which show a decrease even upon the miserable figures of the past six months. Deliveries from the 1st to 23rd inclusive:—China, 1,901 bales; Japan, 983 do.; total, 2,884 do. The prices current were:—Tsatlee: No. 1, 23s. to 23s. 6d.; 2, 22s. to 22s. 6d. Taysaam: Key-ing, No. 1, 20s. to 20s. 6d.; 2, 19s. to 19s. 6d. Mibash: No. 1, 23s. to 23s. 6d.; 2, 22s. to 22s. 6d.

SUGAR.—There was but a moderate business done on Tuesday, the 24th, in West India, but prices in some instances receded about 6d. per cwt. During the preceding week the business reported privately comprised 37,500 bags clayed Manila at 38s. 6d. to 39s. Of sales by auction reported on Friday, 10,032 bags clayed Manila were withdrawn above the value.

COFFEE.—The arrivals being again large, the upward movement in the colonial market has been checked, and the supply brought forward has not all been cleared off; prices, however, remain unchanged. Ceylon: 450 casks, 410 barrels and bags plantation, at public sale, were disposed of, fine ordinary to low middling, 79s. to 82s.; middling to good middling, 83s. to 85s.; fine, 90s. to 92s. Native meets less inquiry, and 340 casks, 1,950 bags, in auction, being held for previous prices, only a small proportion found buyers, good ordinary, 69s.; superior, 70s. 6d. to 71s. Mocha: 284 packages of undesirable quality were withdrawn. East India: At public sale, 41 barrels, 410 bags Malabar were partly sold at full rates, fine ordinary, 74s. to 75s. 6d. The monthly sale of the Dutch Trading Company, on the 18th inst., comprising 85,200 bags, went off ½ to 1 cent below the valuations; good ordinary Java, 43½ to 44 cents. No public sales took place on the 24th, and in the private market a few parcels of native Ceylon were disposed of at about former prices.

RICE.—8,546 bags new white Bengal, at public sale, on Friday, were chiefly bought in, Askooli 11s., good white 13s.; 2,783 bags cargo sort and Ballam were only partly realised, middling 8s. 6d. to 9s., fine 10s. to 10s. 6d.; 15,575 bags Rangoon were nearly all withdrawn at 9s. to 9s. 6d. Privately, 4,000 bags low red cargo Bengal have been sold at 8s. 3d. On the 24th, East India descriptions continued to command full rates.

COTTON.—Since the early part of last week there has been less animation in the market, but a firm tone has prevailed, and prices are unaltered. 5,400 bales have been sold on the spot, low middling to fully fair Tinnivelli Madras 17⅜d. to 22d., middling fair to fair Western 20d. to 21⅛d., ordinary to good fair Bengal 13d. to 17¼d., and fair to very good China 19⅛d. to 20⅛d. For arrival, 8,300 bales have been taken, China 19¼d. to 19⅛d., Japan 20d., and Bengal 17d. to 17¼d. per lb. On the 24th, the market was quiet, without change.

CAMPHOR.—Cheaper; 254 tubs and cases Japan at auction retired at £5 to to £5. 5s. per cwt. 100 subsequently sold at £5. Of 630 chests China, a small proportion sold at 90s. to 91s. for very dark.

CASSIA LIGNEA.—A recent importation, 1,000 boxes, sold readily at auction at 86s. to 93s. per cwt. for 3rd to 1st pile, being very full prices. Buds: Selling slowly at our higher quotation of £16.

DRUGS.—Cubebs: Very quiet; and 300 bags at auction all retired. Dragon's Blood: Continues flat; and of 19 boxes at auction, a single one alone sold at £9. 5s. per cwt. for good lump. Galangal Root: Steady; 29 bags at auction sold at 21s. per cwt. for fair quality. Rhubarb: Firm, but with very little demand at present extreme rates, the highest quotation being 8s. 9l chests at auction all retired.

GUMS.—Benjamin: Fine qualities inquired for, and scarce. Of 222 cases Sumatra at auction, rather more than half sold at 31s. to 38s. per cwt. for low fourth quality, being dearer. Damer: Flat, and 101 cases at auction all retired. Gamboge: Steady, but 11 cases at auction were all retired.

GUTTA PERCHA.—In increased demand; 31 tons at auction all retired, but the bulk subsequently sold at full prices; a large quantity in all changed hands up to 2s. 6d. per lb. India Rubber: Some revival in demand, and sales of good quality effected to a fair extent, mainly at 1s. 5d. per lb. 302 baskets Penang at auction, all retired.

Digitized by Google

HEMP.—Manila: £31 to £34. 10s. During the present week about 300 tons Ropiug are reported sold at firm rates.

HORNS.—Auctions confined to half a ton Penang buffalo horns, sold at 39s. 6d. per cwt., for 2¼lb. average.

JAPAN WAX.—Auctions have combined 116 cases. Saucers sold at 63s. to 63s. 6d. per cwt. for good, being 2s. to 3s. lower; and 398 cases block, all retired.

OILS.—Anniseed: Rather better; moderate business on the spot at the quotations of 6s. 8d. to 6s. 9d., and for arrival at 6s. 9d. to 6s. 10d. per lb. Cassia: Remains flat and without buyers, at 9s. 3d. to 9s. 6d.; 4 cases at auction retired. Cinnamon: Of 3 cases at auction one sold at 3s. per oz. for fine. Mace and Nutmegs: Nothing doing; small sales of paste at 1d. per oz.

SAGO.—Small grain is fully 6d. per cwt cheaper; of 1,185 boxes at auction, half sold at 22s. 6d. to 23s. per cwt. for fair to good small. Flour: again the turn lower, small sales having been effected privately at 14s. 9d. per cwt. cash. Tapioca: Of 1,220 bags Penang, the greater part found buyers, common to good middling 2d. to 2¼d. per lb.; good bought in at 3d.

SPICES.—Cloves: Penang steady; and 2 cases sold at auction at 1s. 3d. to 1s. 3¼d. per lb. for good. Amboyna and Zanzibar dearer; and 10 casks of the former at auction sold at 6d. per lb. for good; fair business in Zanzibar at 4d. to 4¼d. Mace: Steady; 3 cases Penang at auction sold at 1s. 10d. per lb. for fair palish. 3 cases Singapore, and 10 casks Batavia retired. Nutmegs: Steady; 16 cases Penang, and 4 cases Singapore at auction, mostly sold at 3s. 4d. to 3s. 8d. per lb. for middling to fair bold, and 1s. 3d. to 2s. fair small to good medium. Pepper: Black remains very flat, transactions being nearly nil. Only 121 bags Singapore at auction, and those retired. White continues quiet, without change in value, and scarcely any trade.

TERRA JAPONICA. Cutch, Pegue: Market still very quiet. 1,169 bags at auction, all retired, but business to a fair extent accomplished privately at our higher quotation of 26s. 6d. for fine. Gambier:—Dearer; 230 bales good sold at auction at 23s. 9d. per cwt.; fair trade also privately up to 24s. 3d. on the spot, and 24s. 9d. for arrival.

MISCELLANEOUS.—Blacklead: Has sold irregularly, but of 709 barrels at auction two-thirds sold at 11s. at 20s. 3d. per cwt. for middling to very good lump, and 8s. 9d. to 10s. 6d. fair to fine dust. Galls: All kinds—Bussorah, China, and Japan—very scarce, and in strong demand. We quote Japan and China 80s. to 100s. per cwt. 10 cases China sold at auction at 90s. per cwt. for middling quality; and 60 cases fine Japan at 92s. 6d. Musk: very quiet, with the smallest trade, supplies increasing materially, and large sales advertised. Rattans: In more adequate supply, and cheaper; and 32,653 bundles Singapore and 7,000 bundles Penang at auction, mostly sold at 3s. 6d. to 6s. 8d. per 100. Sapanwood: Continues firm; and 39 tons Siam at auction, sold at £10 to £12. 5s. per ton for middling to good: 98 tons Manila sold at £7. 15s. to £8. 10s. old and weathered, and two tons Ceylon £8 to £8. 10s. Star Anniseeds: Not any stock in the market: much wanted. Sticklac, Siam: Cheaper, and of 872 cases at auction one-third sold at 42s. to 44s. per cwt. for fair, rather small, and woody.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s.; nail rod, £9. 10s.; hoops, £11; sheets, single £12; Staffordshire bars, £10; nails, £7. 10s. to £7. 15s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 9d. per lb.

TIN.—108s. for block; 109s. for bar. Tin plates, best charcoal, I.C., 30s. per box.

LEAD, &c.—English pig, £21. 15s. to £22; W.B., £23; shot, patent, £24; sheet, £22; spelter, £22. 15s. to £23; zinc, English sheet, £25; quicksilver, £8. 15s.

The following is from the Circular of Messrs. French and Smith:—Since our last Circular, 13th inst., there has been but little change in the aspect of our market. Iron remains stationary. For Copper there is rather more enquiry. Tin: English is in moderate demand, the price for Straits is now 106s. cash, Banca 110. Tin Plates are very quiet. Lead steady. Spelter is again dearer, transactions being reported at £22. 15s. spot, £23 for July delivery. In Quicksilver no alteration.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

From BATAVIA.—At LONDON: West. At FALMOUTH: Fredrika.

From PENANG.—At LONDON: Edinburgh Castle, and Devonvale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

On the Freight Market we have but little to report. Export business continues dull, and outward rates remain unaltered. Homeward rates are good, and vessels are already in request for next season's rice crop at 75s. to 85s. per ton from the usual range of ports.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: 38 to £40, and £1. 18s. For Shanghai: £50 to £52, and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £27. 10s., and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of 34 tons light Government stores from the river Thames to Hong Kong, and have ordered the Mary Mildred to be surveyed for that purpose.

CASUALTIES.

The Thetis, Rohdin, which arrived at New York 6th May, from Shanghai, encountered on the 28th Feb., in 28 S., 36 E., a very heavy hurricane, commencing at E.N.E., round to W.N.W., throwing the vessel on her beam ends, carrying away part of bulwarks, and doing other damage.

A Portuguese brigantine, which arrived at St. Michael's 5th May from the Cape de Verds, had on board 15 of the crew of the Childe Harold, Gunnion, from Shanghai for Liverpool, before reported abandoned; she has proceeded on with them for Lisbon.

St. Helena, 14th April.—The Teide, of Cadiz, Becard, from Manila for Liverpool, put in here 1st April, making three inches water per half hour, and has been recommended to discharge a portion of her cargo to find out the leak.

The Zanzibar (barque), of Hamburg, from Batavia to Rotterdam, with only her mainsail set, having lost her foremast, main top-mast, jibboom, &c., and steering for Simon's Bay for repairs, was spoken 5th March, in lat. 27 S., long. 52 E.

AT ST. HELENA.—March 30, Rio (Swedish brig), Wallatz, from Hong Kong, and sailed, 31, for London; Fair Leader, Pearse, from Shanghai, and sailed for London; Alice Tainter, Barnaby, from Shanghai, and sailed for Liverpool; 31, Maria Catharina, de Bos, from Batavia, and sailed, April 1, for Amsterdam; Cornelia Hendrika, Straaten, from Hong Kong, and sailed, April 1, for Liverpool; Tycoon, Mutter, from Shanghai, and sailed for Montreal; Regina Maris, Ouwehand, from Sourabaya, and sailed, April 1, for Amsterdam; April 1, Manila, from Manila, and sailed for London; Teide, from Manila, and sailed for Liverpool; 12, Chili, from Singapore, and sailed, 15, for London; 15, H.M.S. Centaur, from China and the Cape, and sailed for England, March 31; Nederland, from Batavia, and sailed, 1, April, for Amsterdam; April 1, Rudolph, from Singapore, and sailed for New York; Henrietta Maria, from Batavia, and sailed for Amsterdam; 3, Ortelius, from Banjoewangie, and sailed, 4, for Amsterdam; 4, Admiral de Ruyter, from Sourabaya, and sailed, 5, for Amsterdam; Catherina Wilhelmina, from Banjoewangie, and sailed, 5, for Amsterdam; 5, Jedo, from Samarang, and sailed, 6, for Rotterdam; Capella, from Sourabaya, and sailed, 6, for Amsterdam; 11, Holland, from Java, and sailed, 13, for Amsterdam.

AT TABLE BAY.—March 23, Ramolino, Crowley, from Newcastle, and sailed, 30, for Hong Kong; 25, Kiu-Kiang, str., Taylor, from New York, and sailed, 31, for China; 30, Emilie, Lundstrom, from Cheribon, and sailed, April 2, for Stockholm; April 1, Yeun Tze-Fee, str., Stocks, from Glasgow, and left, 4, for China; 8, Countess of Yarborough, from Cardiff for China.

OFF ST. HELENA.—April 2, Devonshire, from Hong Kong for Liverpool.

SIMON'S BAY.—March 28, H.M.S. Pearl, from Hong Kong, and sailed April 5, for England; 31, H.M.S. Centaur, from Hong Kong, and sailed April 3, for England.

The Confederate steamer Alabama left Table Bay, March 25.

CHARTERED
MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

(INCORPORATED BY ROYAL CHARTER.)

SIXTH ANNUAL REPORT of the COURT of DIRECTORS to the SHAREHOLDERS.

The Directors have the pleasure of presenting to the Shareholders the Audited Balance Sheet, and Profit and Loss Account of the Bank, for the year ended 31st December last.

After providing for all bad and doubtful debts, and defraying expenses of management at all points, the net profit amounts to £196,562. 2s., to which has to be added a sum of £4,269. 9s. 2d. undivided profit, brought forward from the preceding year, making a total of £200,831. 11s. 2d.

Out of the above total, £50,000 has been paid in two Half-Yearly Dividends, and £25,000 as a Bonus, making together 15 per cent. on the paid-up Capital of the Bank. A further sum of £50,000 had been added to the Reserve Fund. The unappropriated balance of £75,831. 11s. 2d. is carried forward to the Profit and Loss Account of the current year.

As will be seen by the Accounts, the premium on New Shares paid up to 31st December, amounting to £81,140, has been added to the Reserve Fund; the balance due in respect of same, £18,860, since received, has also been passed to this account, which, with the addition of £50,000 from the year's profits above referred to, makes a total at this date at credit of that fund of £250,000.

The Directors have purchased Freehold Premises for the Bank's Agencies at Bombay, Colombo, Singapore, Shanghai, and Yokohama.

Agencies of the Bank have been opened at Point de Galle and Newera Ellia in Ceylon, Tuticorin in Southern India, Hankow in China, and Yokohama in Japan.

The ten thousand New Shares have been all taken up by the Shareholders to whom they were allotted, and the sum paid up to this date on account of the New Capital amounts to £134,815.

The Directors retiring are Mr. GEORGE GARDEN NICOL and Mr. GEORGE PALMER ROBINSON, who, being eligible, offer themselves for re-election, and the Court recommend them accordingly.

The Shareholders will have to appoint Auditors for the current year.

GEO. G. NICOL, Chairman.

52, Threadneedle-street, 27th April, 1864.

Captain Wm. Champion, Lloyds.

TEMPORARY OFFICES.

40, Old Broad-street, London, E.C.

PROSPECTUS.

This Association is formed for the purpose of making advances, by way of mortgage or otherwise, on Shipping, Wharves, Ship Yards, Docks, Warehouses, and every description of Maritime Securities, and will conduct the usual business of a Credit Company.

A glance at the statistics of the registered tonnage of the United Kingdom, at the Tables of Imports and Exports, at the vast amount of property accumulated in our leading ports and at the great expansion of our Maritime Commerce generally, shows at once the favourable opening for the establishment of an Institution of this nature. Up to the present time this extensive field for the profitable employment of capital remains almost wholly unprovided for.

In support of these statements the following statistics are submitted:—

Total value of Exports and Imports.

1854	£268 210,145
1862	393,782,118
1863, upwards of	444,000,0. 0

Number and Tonnage of Registered Sailing and Steam Vessels (exclusive of River Steamers) of the United Kingdom employed in the Home and Foreign Trade.

	Vessels.	Tons.
1854	17,407 ...	3,729,093
1862	20.092 ...	4,473,294

Tonnage of British and Foreign Vessels Entered and Cleared with Cargoes only at Ports in the United Kingdom.

	British Tons.	Foreign Tons.	Total Tons.
1854	9,473 640 ...	6 296 638 ...	15 770,278
1862	13,922,108 ...	8,458,549 ...	22,450,657

Tonnage of British and Foreign Vessels Entered and Cleared with Cargoes only (coastwise) at Ports of the United Kingdom.

	British Tons.	Foreign Tons.	Total Tons
1854	12,762.107 ...	46,483 ...	12,808,590
1862	17,397,687 ...	72,673 ...	17,470 360

This Company will make advances for *agreed periods*, on Dock Warrants, Freights, &c., a species of security on the safety of which it is unnecessary to comment. Under this head may be classed advances on the hypothecation of goods and merchandise, a description of business which affords a very extensive and desirable field for the employment of Capital.

Advances on shipping will be made by way of mortgage, and further secured by Policies of Insurance. This branch of business is very lucrative where the Ships are carefully selected, and it has hitherto been chiefly in the hands of private capitalists, from whom Shipowners have, from necessity, been content to borrow at rates of interest varying from 10 to 15 per cent., and often more. The Company will also serve as a medium between capitalists and borrowers, and will undertake the general business of a Financial Association.

It will be seen, from a consideration of the above statement, that the Directors of the Maritime Credit Company aim at the opening of a general credit in aid of Commerce in all its branches, being an Institution designed to meet, in a complete and comprehensive manner, not only the wants of the Marine carrying trade, but the requirements of our maritime commerce generally; and to secure thereby the safe, constant, and profitable employment of a large amount of capital.

The Articles of Association may be seen at the Offices of the Company.

Prospectuses and forms of application for Shares may be obtained from the Bankers, Brokers, and Solicitors, and at the Temporary Offices of the Company.

Application for Shares must be made in the form annexed to the prospectus, accompanied by the deposit of £1 per Share. If no allotment be made the deposit will be returned in full, and if a less number be allotted than is applied for, the surplus will be used towards the payment in allotment.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Maritime Credit Company (Limited).

Gentlemen,—Having paid to the Bankers of the above-named Company the sum of £ , I hereby request that you will allot me Shares in the said Company, and I agree to accept such Shares, or any smaller number that may be allotted to me, and to become a Member of the Company, and I authorise you to place my name on the Register of Members in respect of the Shares to be allotted to me, and I agree to be bound by all the conditions and regulations contained in the Memorandum and Articles of Association of the Company, in manner provided by "The Companies' Act, 1862." And I authorise you to forward by post to my address, the Certificates of any Shares which may be allotted to me.

Dated this..... day of .....1864.
Name in full .....
Firm (if any) .....
Business or Profession .....
Place of Business .....
Residence .....

THE MARITIME CREDIT COMPANY

(Limited).

NOTICE IS HEREBY GIVEN, that the LIST of APPLICATIONS for SHARES will be CLOSED on WEDNESDAY, the 1st June, for London; and on THURSDAY, the 2nd June, for the Country.

HOLLOWAY'S PILLS.—ENFEEBLED EXISTENCE.—This medicine embraces every attribute required in a general and domestic remedy: it overturns the foundations of disease lat by its effective food and impure air. In obstructions or constitutions of the liver, lungs, bowels, or any other organ, these Pills are especially serviceable and eminently successful. They should be kept in readiness in every family, as they are a medicine without a fault for young persons and those of feeble constitutions. They never cause pain or irritate the most sensitive nerves or most tender bowels. Holloway's Pills are the best known purifiers of the blood, and the best promoters of absorption and secretion, which remove all poisonous and obnoxious particles from both solids and fluids.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The French mail steamer brings no later dates from the above port, though we are enabled to supplement the intelligence given in our last number, by the receipt of journals completing our files.

It appears that the existence of small-pox among the crews of the shipping in the harbour had been the means of exciting considerable alarm amid the foreign residents at Yokohama. The *Japan Herald* says:—

"For some weeks past it was no secret that we had that fell disease raging to some extent in the settlement—or, to speak more guardedly—in the harbour; for although two or three of the residents were known to have been seized with it, it had not spread in the settlement to any alarming extent. When, however, these cases began to increase, attention was drawn by ourselves, and afterwards by 'An Old Resident,' in our columns, to the fact of its existence to much more serious amount on board some of the men-of-war in harbour, and that a house, in a situation ill adapted for the purpose, that is to say, on the new Swamp Concession near the British Consulate, had been taken, and was being used as a hospital for small-pox patients removed from the fleet. On Monday a number of men affected with this infectious disease were seen to be carried through some of the most crowded of our streets, which drew from a considerable number of the heads of houses a letter to H.B.M.'s Consul, representing the fact, and suggesting that a Floating Hospital, as had once before been provided here, should be established for this and such other infectious diseases as endanger the lives of the community by being sent amongst them. The views of this letter were warmly backed up by a resident medical practitioner, who, after stating his belief that no case at present existing amongst the residents was mainly attributable to the fact that no expense had been spared and every precaution taken by the residents themselves to prevent the spreading of infection, went on to point out that the danger to the settlement arises from the present Small Pox Hospital being in a populous part of the foreign location, and then to suggest that a temporary building, erected on the eastern side of the canal, either on the Navy lot or on the Bluff, would answer the purpose of a Small-pox Hospital as well as the present site, with far less risk of infection spreading among the community and Japanese. We are happy to be able to state that the naval authorities are now pushing forward, with all possible haste, the erection of a building for this purpose on the Navy lot on the eastern side of the canal, which is, for many reasons, a very suitable spot, though one could have wished it had been a trifle further removed from the settlement."

Sir Rutherford Alcock, K.C.B., H.M.'s Minister Plenipotentiary, had held a conference at the official residence of the Governor of Kanagawa, the "Tobe," with the following Japanese Ministers, viz., Inuye Kawatsi no Kami, Minister of State; Suwa Inaba no Kami, Vice Minister; Takemoto-kai no Kami, Governor of Foreign Affairs and the Governor of Kanagawa. The British Minister rode out to the "Tobe" accompanied by M. O. Flowers, Esq., Acting Japanese Secretary, and A. Von. Seibold, Esq., Interpreter, and escorted by his body-guard under command of Captain Applin. The conference was of a confidential nature, and the subject-matter discussed had not been made public.

From intelligence received by overland mail from Nagasaki, it was known that the steamers *Foh-kein* and *Scotland* were flying Japanese colours in that harbour, having been purchased by Prince Satsuma.

Our contemporary remarks on the last piece of intelligence:—"It will be recollected that we have lately had two steamers here under the name *Foh-kein*; one a vessel of 866 tons which left here for Hong Kong on Feb. 7th; the other of 204 tons, which left on Feb. 20th for Nagasaki. It was understood at the time of the latter leaving that she had been sold to Satsuma, and it is most probable that this is the vessel alluded to; indeed, there can be little doubt of it, as we have good information that only very recently the other of that name was in dock at Whampoa."

The *Japan Herald* continues its review of the Export trade of the port as follows:—

Of Tobacco, in the nine months ending 1st of March, we find that 2,822 packages have been exported. There seems no

Digitized by Google

room for observation upon this, either as to its quality or the amount of production.

Of Oil, we note the export of 3,190 piculs of Fish-kind, and of 2,530 piculs of Rapeseed, during the year. 1,638 tubs of this were for London.

Of Wax, only 1,580 packages have been exported from this port during the nine months. In this article the port of Nagasaki far outsteps Yokohama.

Of Timber, 167,278 pieces have been exported during the nine months, principally in the spring and summer months, at prices ranging from $16 to $19 per 100 planks.

A small quantity of Flax has also been exported.

Of Sea-weed, 13,086 bales, principally of the broad sort, have been exported.

Dried Fish, Charcoal, &c., &c., exports entirely for the Chinese markets, have fallen off very rapidly, and are now of but little value.

Freights: Our port has been well supplied with tonnage, but, with the considerable amount of bulky freight we have exported, ships of a good class have experienced little difficulty in obtaining satisfactory rates. Freights have averaged about as follows:—

To Europe.—Silk: £6. 10s. per ton of 50 cubic feet.

To Shanghai.—Silk: $3 per picul; general cargo: $4 per ton of 40 cubic feet.

To Hong Kong: $7 do. do.

Mr. Consul Winchester's return shows the number of vessels arrived from all ports and places during the year 1863 to be 170. This faces the year 1862 with 121, showing an increase of 49 vessels.

The British shipping shows an increase of 35 arrivals—*i.e.*, 100 in 1863 against 65 in 1862; and in departures 48—*i.e.*, 100 in 1863 against 52 in 1862.

A third official return, of the Direct Trade in British vessels to Great Britain during the year ending the 31st of December last, gives the names of the vessels and the value of the cargo in each as follows:—

Wynaud, £66,127; Adelicia, £51,722; Ocean Gem, £26,352; Carausius, £30,384; Prudhoe, £11,747; Maravi, £4,707; Kent, £28,476; Medina, £24,616; Cambridge, £61,707; Broadwater, £35,025; Dolphin, £5,386; Ravensbourne, £24,275; Esperenza, £2,397; John C. Munro, £63,500; Scawfell, £22,500; total, £458,921. In addition to the above, three Dutch vessels, of 707 tons with general cargoes, were dispatched to Great Britain during the same period.

An estimate of the Imports and Exports at the port of Kanagawa during the year 1863 presents the following figures:—

Under what flag.	Imports in sterling at 5s.	Exports in sterling at 5s.
British	£635,731	£2,149,291
Dutch	72,671	171,734
American	70,458	161,702
Prussian	19,712	95,177
French	10,176	46,789
Russian	2,398	13,810
Total	£811,146	£2,638,503
Total amount of Imports and Exports as per above estimate		£3,449,649
Importation of Peking gold bars		225,351
Sale of British steamers to the Japanese during the year ..		175,000
Total		£3,850,000

CHINA.

PEKING.

There is no later news from Peking or Tien-tsin.

NEWCHWANG.

The following report is from the *Friend of China*:—

We now beg to hand you the price current for commencement of a new season, but as few buyers have as yet arrived, we feel confident that higher prices will be attainable when they come down. For exports, they are daily becoming more reasonable in their demands. We quote prices as follows:—

Grey shirtings, 6¼ catty, taels 4.2.0; 7 catty, taels 4.4.0; 7½ catty, taels 4.7.0; white shirtings, taels 4.0.0 to 4.2.0; T-Cloths, 36 in. taels 3.2.0; 32 in., taels 2.7.0; domestics, 72 yds., taels 8.0.0; white spots, taels 3.4.5; coloured spots, taels 3.8.0; white brocades, taels 3.5.5; coloured do., taels 3.9.0; drills, taels 6.4.0 to 6.5.0; cotton (Shanghai) per picul of 92 catties, taels 16.0.0; paper, taels 2.2.0 per pk.; nailrod iron, taels 2.2.0; bar iron (round and flat), taels 3.2.0; block tin, taels 24.0.0; lead, taels 5.5.0 per picul; glass 18X24, taels 3.6.5; white sugar, taels 8.6.0; ordinary do., taels 7.0.0; brown sugar, taels 4.5.0; ordinary do., taels 4.0.0; sugar candy, taels 8.0.0; ordinary do., taels 6.5.0; opium, taels 550 nominally.

EXPORTS.—Indigo, tls. 5.4.9; Tallow, tls. 6.6.2.; pea oil, tls. 4.5.0 per picul; bean cake, tls. 3.9.2 per 10 pieces; peas, tls. 3.5.0; millet, tls. 3,8.2; melon seed, tls. 12.8.3 per shik of about 350 catties, all free on board, and duty paid. Cotton (Newchang), tls. 18.0.0. per picul of 92 catties.

YINGTSE, April 5th.—Bean-cake and peas a few cents higher than quoted above.

SHANGHAI.

The mail of 26th February arrived out on the 15th April. The dates are down the 20th. We take the following items from the *Friend of China*. The files of the *North China Herald* and *Recorder* have not come to hand:—

"Reynolds and Thompson, two of the *Tsatlee* 'passengers,' who escaped from the U. S. Consular gaol the other day, were again captured the night before last, when taking some refreshment at the Bellevue Restaurant, nearly opposite our old office, here in Hongque. What took the stupid fellows so close to their old quarters, we cannot divine. Their presence was soon told of to Mr. Deputy United States Consul Lewis, and their manacling effected by the expert hands of Marshal Howard and Gaolor Williams. 'Justice Gull' being deemed unsafe, Reynolds and Thompson were then taken to the British Consular gaol, where no doubt they will be duly cared for. We are told that, in the height of their anger at being again taken, they uttered aloud some rare stories of the complicity of people in higher positions. Stories of this kind, however, should be received with caution—mud spattering being one of the easiest things imaginable, especially when no risk attaches to the utterance.

"Mr. Manning, whose freaks in connection with steamers and Consular courts in Shanghai are matters of notoriety, did not wait for the result of his appeal to the Hong Kong Court against the award to Day and others for saving the *William the Fourth*. Both money and credit are reported to have run out, and after raffling his watch he evanesced incontinently. It was well he did not stay for the appeal decision, because it went against him.

"The Harbour Master, on behalf of the Taoutai, has at last succeeded in getting a contractor in the person of Mr. Heustiss, to blow up the *Lord Lyndhurst*, and remove the junk on the Point. Sum payable, taels 9,300."

"Aking, the murderer of Mr. Dore, is to be beheaded in the Maloo on Tuesday next.

"A young man by the name of Wm. Scott, late second engineer of the steamer *Meteor*, was found in the water-closet on the premises of the S. S. N. Co.'s work shops, Hongque, with his throat cut. He had evidently been lying in that position for some time when he was discovered. There was no apparent reason for his committing this deed, as he appeared to be in good health, having only arrived from Japan a few days since, and paid off with about $500. At the time of his death, there were about $160 in his room, which, with his other effects, were taken possession of by an officer of the U.S. Consulate.

"We have received particulars of an outrage committed on a village in the neighbourhood of Shanghai, which surpasses in gravity any previous crime we have had to record, and indicates the existence of a formidable organisation among the scoundrels who abound in the settlement. A band of some forty or fifty Cantonese, armed with swords and led by two foreigners, ascended the Honque creek on Saturday evening, and attacked and looted a large native house and a few surrounding cottages, carrying off about $500 worth of property. No resistance was offered at the time by the villagers, but they seem afterwards to have recovered from their panic, and, as the burglars were returning, fell on them with their hoes and rakes and stretched three dead on the spot. Three others were so severely wounded that they remained on the ground, and were delivered the next day to the Che-hien. The intelligent vigilance of a policeman secured the arrest of one of the culprits on Saturday morning, but none of the others have yet been discovered. The individual in question was seen by P. C. Mumford, taking two bundles out of a boat, which were being carried off by two coolies, who also arrived in the boat, when the constable, whose suspicions had been aroused, arrested the three. Two swords were discovered in the bundles, which contained a quantity of clothes that have since been identified by the villagers as belonging to them, We believe that measures are being taken which, it is hoped, may lead to the identification of the European ringleaders, one of whom is also wounded."

COLONEL GORDON'S FORCES.

Colonel Gordon has again taken the field, and we find the best account of his proceedings in the *China Mail*:—

"Our advices state that Colonel Gordon attacked the rebels at a place called Wai-soo, at 10.30 A.M., on the 11th April. They were found strongly entrenched, and very numerous. After some shelling, their left flank was turned, and they hereupon precipitately retreated. The rear Imperial troops, who were

Digitized by Google

acting in considerable force as auxiliaries to Colonel Gordon, pursued them and cut them up very severely. Wai-soo is reported to have been literally strewed with dead. The rebels numbered previously to the action some 15,000 strong, and the Imperialists some 8,000 to 10,000. The force under Colonel Gordon was only about 800 strong, the greater portion of his men being still in garrison at his last capture, Le-yang. Colonel Gordon had therefore halted at Wai-soo, leaving the pursuit to the Imperial commanders; and it was probable that he might move immediately upon Chang-chow-foo, the fall of which stronghold may be considered as imminent. This will leave Nanking and Hoo-chow-foo, to the south of the Tae-hoo Lake, as the only two places remaining in possession of the rebels.

"From the foregoing it will be seen that Gordon's return to active service has restored the prestige of the Imperial force. This is nothing new in the leadership of armies, one great European Captain of a former day being said to be worth 40,000 men when personally in the field. It is likely that the feeling operates more strongly among the Chinese, who are fatalists, and no doubt are strongly impressed with the idea that Gordon is lucky above all other leaders. It will be seen that he husbands his own resources carefully whenever the work to be done is within the capacity of the Imperial troops. In the present instance, finding the rebels strongly intrenched, he proceeded to disturb their situation by means of vigorous shelling, and having thus made the place too hot for them, he held the Imperial force of from 8,000 to 10,000 ready for pursuit. On the turning of the left flank, the retreat and pursuit were commenced with evidently good success to the Imperialists.

"From the accounts we received it will be seen that the rebels are becoming disorganised, and they cannot fail to be correspondingly disheartened. If they cannot stand up when strongly intrenched, they are not likely to do much good for themselves when broken up and dispersed in the open country. Cities and towns they have none, except Nanking, Chang-chow-foo, and Hoo-chow-foo. We have not heard of Kintang being taken, it is true, except in the form of a rumour that the inhabitants had shaved, and would have done so at Gordon's first appearance had not a strong force of the original rebels from Chang-chow-foo been thrown into the place as a garrison. It was their unexpected appearance and desperate bravery which caused Gordon's repulse, but the likelihood is that they have now left the place in order to meet the Imperialists again elsewhere. Since their departure the inhabitants may have determined to surrender according to the original plan.

"The three places we have named are cut off from communication with each other, and from the rebels now in the field; the Taiping territory is gradually being freed from the scorching grasp that has held it for so many years, and which might have now been holding Ningpo and Shanghai. Nanking, once a great commercial city, now a ruined place used as the head-quarters of the Taiping soldiery, is not likely to hold out long after the other two places are taken; and the policy of keeping it in check until the last cannot be doubted. It would be strange indeed, if, after Soochow and Hangchow, the Taipings should keep the Imperialists out of Nanking, and we do not anticipate much difficulty there. Should the present pleasing state of affairs continue, it will rather diminish the fancied importance of the Anglo-Chinese fleet, and must suggest to Captain Osborn that he was scarcely warranted in asking Colonel Gordon to serve under him. As matters have turned out, the fleet could have been of no use in assisting the Imperial cause, the inner wall of Nanking being beyond range, and there being no more coast towns in rebel possession. The crews, indeed, might have brought their artillery on shore, but a land force has been worked very effectively without them. What the Yang-tsze river wants is a steam police to overhaul suspicious craft and apprehend rowdies."

A meeting has been held for the purpose of forming a company to found an hotel at Pootoo, and run steamers to and from the island. Many influential members of the community were present. The object—a most laudable one—the establishment of a sanitarium for those overpowered by the heat and malaria of summer. At this meeting the original proposal—to form a company to be called the Shanghai Sanitary Company, for the purpose of providing steam communication with the island of Pootoo, or such other site as may be decided upon, with adequate accommodation there to meet sanitary requirements of this settlement—was negatived, and the two following resolutions passed:—

I. That a Sanitary Commission be nominated to organise weekly trips by steamer to Pootoo or some other more convenient island, during the summer, such trips being arranged to suit the departure of the European mail.

II. That Doctor Coghill, Messrs. Tyson, Johnson, Hanbury, and Cuthbertson, with power to add to their number, be appointed as a committee to carry out the foregoing resolution.

The Futai has surrendered the steamer *Tsatlee*, which he had manifested an inclination to confiscate. Messrs. Russell and Co. despatched the *Sycee* to Soochow, with a view to make a further endeavour to alter the Futai's decision; but the journey turned out to be unnecessary, as she met the *Tsatlee* on her way down. The Futai has further forbidden the receipt of any reward by the European officers who were concerned in her recapture. He deserves credit for this step, inasmuch as, had he been disposed, he might probably have raised objections to her surrender which would have taken some time to dispel. We are both surprised and gratified at being able to accord his Excellency praise for generosity, when we anticipated that extreme pressure would be required to induce him to pursue the course he has voluntarily adopted.

The murderer Bulkley was executed at the American Consulate gaol. He was accompanied to the scaffold by Father Le Jacques and Mr. Hamilton. A number of persons, among whom was the president of the Chinese defence committee, had assembled to witness the execution. Bulkley addressed the crowd in a few brief sentences, saying that he died at peace with all, and freely forgave those whose evidence had led to his conviction. He then walked firmly to the scaffold, the noose was adjusted, and the bolt was withdrawn at precisely ten minuter past ten. The drop was nearly seven feet, and death was almost instantaneous, as the neck was broken by the fall.

The *North China Herald* and the *Daily Shipping Report* give the following items on the rebellion:—

HANCHOW.—This city has at length fallen into the hands of the Imperialists. On the 29th March three assaults were made on it, all of which failed. Three hundred rounds had been fired by the artillery during the day without apparent effect; the only result of the day's efforts having been the capture of some forts and of two villages, which completed the investment of the city. On the 30th a well-planned attack by the Franco-Chinese and Imperialist troops showed the rebels the danger of their situation, and during the night the greater portion of the garrison evacuated the city; so that the assailants were able to enter it on the morning of the 31st without opposition. It is satisfactory that the Chekeang province has at length been nearly cleared of the rebels.

KIASHING.—We are glad to be at length able to record the fall of this important city. Several assaults had been made and failed; and the Imperialist General Ching had been obliged to return to Soochow severely wounded. On the 20th ultimo, however, a good breach having been made, his successor made another assault which was successful. A correspondent, writing from Kiashing on the 26th March, says that the rebels defended themselves with great bravery. They had constructed a citadel in the centre of the city, within which they retired after the Imperialists had gained the breach; and held out for three hours. After they had been driven out of this their last stronghold, great slaughter took place among them as no quarter was given.

NINGPO.—A Mr. Gardner, of Soochow notoriety, has published an attack on Colonel Cooke, the commandant of the Anglo-Chinese Contingent at Ningpo, which appears to us so unjustifiable that we deem it right to expose some of its absurdities. Mr. Gardner's statements will, we imagine, carry little weight with those to whom Colonel Cooke is personally known.

It appears that we are not alone in our disappointment at the non-receipt of papers. The Editor of the *Friend of China* states that he does not get two out of three of our outward issue of the *London and China Express*. Our publisher affirms that they have been regularly sent by post, and that he has had no complaints from other persons for the past six months. It would thus appear that they are appropriated in transit from the Post-office, Shanghai, to Mr. Tarrant.

LATEST NEWS.

The latest news from Gordon's front, before Chang-chow-foo, is to April 14th. The whole force was expected to be mustered before that city in five or six days. No serious attack was at that time meditated, though it was contemplated to try one or two of the stockades. There are no rebels now outside of

Digitized by Google

Chang-chow-foo, Tayan, and Kintang; all the expeditionary force of rebels has been cut up. It is believed by some that the rebellion will be at an end in four months. Le-yang is probably garrisoned by Imperialists, and Colonel Gordon's older troops will thus be able to assist in the siege of Chang-chow-foo. We also learn that the bodies of Gordon's seven officers, who fell into the hands of the enemy some time ago, have been found and identified. General Ching is dead; he was one of the bravest soldiers and best generals in the Imperial army.

HONG KONG.

The dates are down to the morning of the 26th April. The English mail of 10th March arrived on the 22nd April.

The steamer *Sea King* is announced by Messrs. Johnson and Co. to load at Hankow for London, with a guarantee of the time of passage.

We gather the following items from the *Evening Mail*:—

The works of the Hong Kong and China Gas Company are fast approaching completion. The manager, in drawing attention to this fact, urges the five following advantages which gas possesses over oil:—

1st. It is safer than oil or candles, as there are no wicks or sparks.
2nd. No injury to carpets or furniture by the dropping of oil.
3rd. No waste by carelessness or dishonest servants.
4th. It is lighted, increased, diminished, or extinguished in a moment's time.
5th. The light from a gas-burner consuming 5 feet of gas per hour is equal to 12 candles, and will illuminate a room to the same extent. Houses can be either partially or wholly lighted at once, and can have extra lights affixed at any future time; the yearly cost being in exact proportion to the number of burners required.

We have not been able to see the new dollar, but have obtained an impression of it in wax. The size is precisely the same as the Mexican, and we believe that the intrinsic value of the piece is three 1,000-ths more, which is of course a difference on the right side. We may be sure that, on its first appearance, this coin will undergo the most rigid scrutiny on the part of Chinese shroffs, and, being found of full value, will take rank at once as a most acceptable currency. It will not, assuredly, be subject to defacement any more than is now the half-dollar, the half-crown, or the English shilling, which have always circulated undefaced. But should the dollars be defaced in any instances, or carried out of the colony, so much the better for the Mint. The coinage of a half-dollar is, we hear, also under consideration, either in the capacity of a token or of a legalised current coin.

An inquest was held upon the body of a European found dead on the hill. From the nature of the injuries, it appeared presumable that he had fallen into a crevice about fourteen feet deep, a portion of detached rock which was found beside the body having probably given way with him. Deceased seemed to belong to the class of destitute seamen; no valuables or money were found on his person, but this fact was not necessarily considered to argue that he had met with foul play. The jury brought in an open verdict of "Found dead."

The subject of banking is at present receiving attention in certain quarters, and, on the grounds that the high profits arising from the banking business in the East are flowing into the pockets of shareholders in England totally unconnected with Eastern trade and in no way directly influencing it, the idea has, we hear, been privately mooted of having a bank in Hong Kong with Hong Kong shareholders and Hong Kong receivers of dividends. The plausibility of the notion recommends itself to our judgment at the first blush. Everybody would want shares, and, getting them, would become constituents of the bank from that moment. Every shareholder would deposit money and buy bills of exchange with a view to swelling the amount of his own dividend. The picture is not a new one, but has been drawn many a time before, and nowhere better than in the "Newcomes," where the prospectus of the Bundlecund Banking Company is noticed. That concern proved a failure, but the prospectus was an undoubted success.

The steamer *Chanticleer* reports having arrived at the Prata Shoals, whither she had gone to the rescue of the British barque *Cornelia*. At one P.M., on the 18th April, she took on board 5,500 chests of tea, all in good condition, leaving the *Cornelia* 1,500 for ballast. She then took her in tow, and brought her safely into Hong Kong, about 4.15 this afternoon. The *Cornelia* has sustained but very little damage, having only unshipped her rudder, and is making no water.

Arrangements are on foot, we hear, for a garrison regatta, to come off early next month. These garrison sports are getting into favour both with the public and the soldiers, and their repetition at short intervals shows that the officers are satisfied with their good results. Liveliness and activity in garrison keep a great many men out of the hospital, and such sports maintain a general good-will among all classes, civil or military.

Mr. Black gave his entertainment of the "Adventures of Bonnie Prince Charlie." Like the former series, it was well attended and heartily applauded. The narrative was both interesting and truthful, and while it was happily illustrated by the songs which he sang, the songs themselves borrowed a fresh interest from the recital of the events. The second part consisted of various songs, both humorous and pathetic.

A serious mutiny, resulting in a loss of life, occurred at Stonecutters' Island, on the morning of the 21st April. On hearing two guns fired to indicate that convicts had escaped, Captain Quin despatched a body of forty constables, and afterwards followed these up with forty more. It turned out that a body of one hundred convicts had been set to work at a sea-wall out of sight of the hulk. After the roll was called they were told to fall in. This seemed to be the preconcerted signal, for they immediately made a simultaneous attack upon the seven men in charge (three European turnkeys, two European constables, and two Indian constables), took away their arms, which consisted of swords, revolvers, and muskets, and got into an empty barge which lay awaiting a cargo of stones. On crossing to the mainland they soon came in sight of the hulk, and a boat with some armed men moved out to intercept them if possible; the barge was fired into, but except the rowers all the others were lying down in the bottom and no one seemed hurt. Both parties got out on the opposite shore, but the convicts had the start and went right up the hill. They were again fired at by their pursuers and two men killed. When Captain Quin's men reached, some hours after, they went off on the trail of the scoundrels, which was recognisable by drops of blood, fragments of prison clothing, and bits of broken chain. The convicts were never sighted, however. One peasant said he had seen them to the number of seventy or thereabouts moving over the hills, and that they came to a spot where they all set off in different directions. Some of the turnkeys are badly hurt; one, it is feared, mortally. An Indian convict who tried to defend the turnkeys received a stroke across the spine, and was found in the water drowned, having, perhaps, been stunned and unable to crawl out. It is difficult to say who is to blame; the chains of the convicts are very easily broken, and a chisel was found on the body of one of those shot.

The *Scawfell*, from London, reports that on the 23rd March she passed close to the northward of a small coral shoal, —marked "Akbar, position doubtful," in the Admiralty Chart —with apparently very little water on it, though no breakers, as the sea was quite smooth. It appeared to be a narrow ridge of coral, about two cables' length north and south, and not half a cable's length in breadth east and west. The shoal is situated in about lat. 2.37½ S., long. 117.16 E. Passing two miles to the southward of St. Pierre Island, off the coast of Borneo, no ledge of rocks or breakers could be seen, as mentioned in "Horsburgh." Little St. Pierre is a ledge of rocks only six feet above water, as in "Horsburgh;" and a mistake might in consequence have been made, as the large island on a south and north bearing appears, and is, actually, two islands, about 100 yards apart—the easternmost one appearing like a haycock, and the westernmost and largest like a saddle, being lowest in the middle.

The report of the Colonial Surgeon, along with the numerous tables of "sickness and mortality," has been published.

The Governor has approved of the addition to Rule 13 of the Volunteer Regulations, by which the appointment of officers is modified or restricted.—James Whittall, Esq., has been provisionally appointed a member of the Legislative Council, in room of the Hon. Mr. Perceval resigned.—Staff-Commander Loney, R.N., has been appointed one of the Marine Surveyors. Philip Albert Myburgh is appointed Captain of the Hong Kong Volunteers, vice Kane resigned; and Lieutenant and Acting Adjutant John Dodd is appointed Adjutant. The amount of notes in circulation and specie in reserve of the several corporations is as follows:—Oriental Bank, notes issued, $671,049; specie and reserve, $250,000. Chartered Mercantile Bank of India, London, and China, notes $624,114; bullion, $250,000. Chartered Bank of India, Australia, and China, notes $71,958; specie, $150,000. Agra and United Service Bank (Limited), notes $271,307; specie,

Digitized by Google

$100,000.—The Governor has recognised provisionally Le Vicomte O'Mahoney as Acting Consul for France, in the absence of M. Godeaux.

JAVA AND NETHERLANDS INDIA.

We have dates from Batavia to the 26th April. The present Resident there, Mr. D. F. Schaap, is about to resign his office and retire into private life. Mr. J. Graafland, Recorder at the Court of Justice, has been promoted to a councillorship at the Supreme Court of Netherlands India. According to an official statement in the *Javasche Courant* of the 22nd, the rice crops throughout the island were satisfactory. In some districts in Tagal, however, nearly 5,300 bouws of paddy had been destroyed by the Ama-Mirrha. An exhibition of the productions of the Dutch islands is to be held some time next year, and it is stated the affair is to be conducted on a grand scale. Mr. Cores de Vries has brought another steamer, the *Singapore*, on the line between Batavia and Sourabaya.

BORNEO (SOUTHERN AND EASTERN DISTRICTS).—The works at the mines of Pengaron were being continued, and the yield of coal during February was 410 tons, making with the balance on hand 497 tons, of which 444 tons were sent to Banjermassing, leaving 53 tons at Pengaron on the last of February. The balance on hand at Bangermassing on February ult. was 917 tons. The bad weather continued to have a bad effect on the health of the miners. Thirty-eight persons were still under treatment in the hospital.

BANCA.—During the month of March 110,25 piculs tin had been delivered in the Government stores, so that the delivery since 1st January exceeded 3,000 piculs.

BILLITON (March).—The works in the mines were being proceeded with. The yield of tin is expected to be large this year. Since last year thirteen new mines have been opened in the districts of Boeroeng-Mandi and Singgang, and four or six more will be opened shortly. The yield of tin during the last three years amounted to 22,972 piculs or 3,000 piculs more than from 1853 to 1860. Business was brisk. Twenty-six large native vessels had arrived during the month. The principal articles imported were rice and Chinese goods; those exported were tripang, indiarubber, agar-agar, gum damar, garoe, wax, 112,332 piculs tin and 50,000 fr. specie.

AMBONIA (February).—The inhabitants had delivered the cloves produced in 1863, amounting to nearly one million pounds. A strong shock of earthquake, accompanied by subterranean noises, was felt at Saparoea on the 3rd of February, and another on the 4th. Both shocks were vertical, and the noises appeared to have proceeded from the south.

TERNATE (January and February).—On the 20th and 26th January the volcano of Ternate emitted much smoke and ashes, and a heavy report was heard during the eruption. On the 17th February the volcano again emitted ashes and small stones, and several reports were heard. It continued to smoke during the month. Much damage was done to the fields on the mountain slopes and an advance has consequently taken place in the prices of some articles of food. The Makian had also emitted smoke during the last fortnight. On the 23rd February a slight shock of earthquake was felt about 11 o'clock P.M. On the 18th previous, a strong shock had been felt about midnight at Dodinga (Halmaheira).

MACASSAR.—The Court of Justice here has sentenced Mr. H. M. Van Ryssen, Assistant-Resident of the northern districts of Celebes and dependencies, to fourteen days' imprisonment for having abused the power in his hands, in the punishment of one of his domestic servants, whom he suspected of having appropriated to himself some spirituous liquor belonging to him, and on whom he inflicted more than twenty-five lashes, and afterwards sent to hard labour for three months, without making an entry of said punishment in the police register at Maros.

SAMARANG.—The traction engine arrived on the 28th March at Kali Alang, about seventeen miles from this place, without further trouble. It was to take in a load of coffee there and return with it to Samarang, which has since been satisfactorily effected. With the works of the railway station everything is progressing satisfactorily. There are plenty of labourers; in fact, so many offer themselves daily, that large gangs are sent away, there not being sufficient work for all.

SOURABAYA.—H.N.M. steamship *Etna*, which was offered to public competition on the 2nd April, was purchased by Mr. Cores de Vries for f. 500. The court of justice has sentenced Raden Toemengoeng Poerwo Kesoemo, late Regent of Kangean (Madura) to be hanged, for instigating Hadjie Oemar and Bangkok to commit murder. The two latter have been condemned to undergo the punishment next to death.

BANDA.—The spice gardens had suffered much from the high winds and heavy rains which fell in the beginning of February. The number of nuts gathered is consequently very small. On the 6th and 9th February, 9,599 lbs. mace, and 161,531 lbs. nutmegs were stored in the Government warehouses. On the 3rd February, 47 barrels mace, 275 barrels nutmegs, and 5 cases nutmeg soap were shipped to Java, whilst 41 barrels oil, 172 barrels nutmegs, and 7 cases nutmeg soap were ready for shipment on the 29th of that month.

STRAITS OF MALACCA.

SINGAPORE.

We regret that we have no later papers from Singapore. The editors in that locality do not appear to recognise the French mail line. The dates, we believe, are up to the 4th of May.

The following are reports made by H.M.'s surveying vessel, *Rifleman*:—

RICHARDSON ROCK, DURIAN STRAITS.—This is a dangerous coral rock of small extent, lying off False Durian Island, on which the ship *Hurry Puddemsey*, Captain Richardson, struck in May, 1863. It has two and three quarters fathoms on it at low water spring tides, and is about a cable's length in extent. From it the Peak False Durian bears N. 78 W. 2.25 miles; Rocky Islet, S. 9 E. 0.27 miles; North Brother, N. 80 E. 2.75 miles; Middle Brother, S. 57 E. 4.02 miles. Round it, and between it and the shore are seven to ten fathoms.

ATKIN ROCK.—Is a pinnacle which uncovers at two-thirds ebb, and on which the brigantine *Bob Tail Nag*, Captain Atkin, struck in May, 1863. The rock is about the size of a ship's launch at low water, and has deep water all round it; when covered, unless the tide is running strongly, there is no indication of it. From it the south extreme of the South Allang-tiega Island bears N. 65, W. 85 miles, and the left extreme of the North Island is just shut in by the right extreme of the Middle Island.

LAMMERMUIR ROCK, GASPAR STRAITS.—The British ship *Lammermuir*, Captain Joass, from Shanghai to England, was lost on 31st December, 1863, at 2.20 A.M., in the Macclesfield Channel, Gaspar Straits, and from bearings taken by Captain Joass when aground, it appeared that the rock was in the centre of the channel, between the shoals off Jelaka Island and the Discovery Reef. The *Rifleman* anchored in the supposed position of this rock, and sounded the channel between the Jelaka Reef and Discovery Shoal, carefully, without discovering any sign of danger. The whole time we were searching for this rock (seven days), the current was running to the southward at from 1½ to 2½ miles an hour, and the depth of water in the channel being from 20 to 30 fathoms. I consider that had there been a rock or shoal in the position assigned by Captain Joass, we should easily have discovered it without soundings by the tide ripple; but as neither tide nor soundings gave any indication of the existence of shoal water, I am confident that Captain Joass was mistaken in his bearings, and that the *Lammermuir* was lost either on the Jelaka Reefs or Discovery Shoal, most probably the former.

Births, Marriages, and Deaths.

PROGRESS OF THE FRENCH IN COCHIN-CHINA:

A significant question was put to the Under-Secretary of State for Foreign Affairs, in the House of Commons, by Viscount ENFIELD, regarding the ratification of the treaty which the French have recently concluded with the ruler of the western division of Cambodia, tributary to Siam; wherein it was alleged that one of the stipulations tended to exclude all foreigners but themselves. In reply, Mr. LAYARD said information to that effect had reached Her MAJESTY'S Government, and the matter was brought to the notice of the French Minister for Foreign Affairs, who acknowledged that a treaty had been negotiated between France and Cambodia to which his Government desired to give the most liberal interpretation, and if such a clause was inserted, it must have been done by inadvertence. No copy, however, of the treaty accompanied this assurance, although it was stated that no privileges should be given to French subjects which were not equally extended to the subjects of all other nations.

Notwithstanding the Minister's diplomatic reserve concerning the exclusive articles of this treaty, enough has transpired to indicate the progress of Napoleonic ambition, by endeavouring to establish in the second Empire—what failed in the first, and during preceding dynasties—a "French East Indies." Not more than five years have elapsed since the capture of Saigon and the first treaty with the King of COCHIN-CHINA, which ceded that city and a large tract of the surrounding territory to the French. Since then TU-DUK and his wily mandarins have alternately professed peace or war against the invaders, just as it suited their internal state of affairs; breaking treaties and renewing them, each time being forced to augment their concessions to the French, until they have yielded up the Island of Pulo Condor, the cities and provinces of Saigon, Myt-ho, and Bien-hoa; which includes all that fertile region from Cape St. James in the east to the Great Lake of Cambodia in the west, and secures the mouth of the Cambodia under the walls of Myt-ho—a river navigable for ships of moderate burden for three hundred miles into Annam and Siam. At the first attempt to occupy Cochin China the admiral-commanders of the forces clung with pertinacious tenacity to Tourann and the country north of Saigon, in spite of its comparative unsuitableness for colonization, excepting the magnificent harbours on the coast. Now, a change has come over the spirit of the Imperial dream, since the naval force at Saigon has surveyed the interior navigation. To the West! is the watchword that leads the tricolour flag into the regions of Cambodia, where the ramifications of streams and lakes form a network of water communication unrivalled in South-Eastern Asia.

Of course the French have a perfect right to negotiate legitimate treaties with friendly native Powers contiguous to their colony in Cochin-China, on which so much life and treasure has been expended; but it will be a backward movement in their career if they cling to that exclusiveness which was one of the chief causes of their invasion of the country, and which they have apparently successfully

Digitized by Google

broken down. Now that they are extending their influence into the hitherto little known regions of Cambodia, it would be a "dog in the manger" policy to secure all the benefits to be obtained exclusively to themselves. It is just possible, also, that this secret treaty may contain warlike clauses, offensive and defensive, as well as those of commerce, amity, and the "propagation of the faith," affecting the integrity of that rapidly progressive commercial country, Siam. Be that as it may, we know that last year, when this treaty was under negotiation, and the French steamers were exploring all the streams leading to Cambodia and the Great Lake, considerable alarm was felt at the Court of Bangkok, as well as that of Hue; for the authorities felt that their ancient enemies the Cambodians were the most likely native inhabitants to join the foreign invaders in extending or maintaining their conquests, provided they obtained assistance in throwing off the Siamese or Annamese yoke. It is satisfactory for those interested in these countries to observe that our Government has been on the alert in this matter of the treaty, and no doubt they will see that England is not exempt from any "favoured nation clause" secured by France.

While these symptoms of extending dominion are progressing in the neighbouring State, the local Government has issued a newspaper entitled the *Courier de Saigon*, which duly emblazons forth the perfect success and continued prosperity of the colony. We have no desire to impugn the testimony of our contemporary, but we learn through a little bird that sings among the monkeys in the trees on the banks of the Dong-nai that all is not gold that glitters in Saigon, neither is it the Agapemone of France in the East. Indeed, it is made no secret of, that the administration of affairs by a purely naval government is most unsatisfactory. And how can it be otherwise? An Admiral-Governor is bad enough, even in a British colony. Quarter-deck despots are generally narrow-minded tyrants on shore. As to legislative or executive adaptability of talent, your sailor is just like a fish out of water; he flounders about in all directions, incurring needless expenditure without the slightest heed for the revenue. Such is the case at present in French Cochin-China, and has been so, more or less, from the beginning. It was founded by a naval force; in five years four admirals have successively ruled it as governors; its executive administration is composed almost entirely of captains and lieutenants in the navy, and even midshipmen are sent into the interior as prefects or deputy-governors. It is the sailor's paradise, where he can revel in wanton authority at the outstations, committing all sorts of debauchery on the female inhabitants with impunity. Adding injury to insult, these officers are tax-collectors, who levy imposts upon the unfortunate Annamese within the ceded territory, and who, from dread of TU-DUK and his emissaries, pay a tax to him also. As to the trade of Saigon, it is almost entirely limited to the supply of provisions to the force, consisting of about twelve thousand men on shore and afloat. Among them are a large proportion of military, including several batteries of artillery. The officers of this contingent are disgusted with the administration of affairs, and grumble at being obliged to carry out land operations planned by a sailor. The missionaries murmur, not loud but deep, at the manner in which the native population have been treated; where their converts have fled from the domination of the French, as more intolerable than the yoke of TU-DUK. Instead of their flocking to Saigon and forming a native Christian colony, as was anticipated, the greater number have left for the middle and north provinces of Annam. That city and the surrounding country continues to be deserted by its former inhabitants. The extensive cultivated plains, formerly rice plantations, which supplied the north with a great part of this staple article of food, are now overgrown with rank vegetation. Villages, farmsteads, cottages, and cultivation have been abandoned. Moreover, it is alleged by those resident in the country that the treaty with France was not ratified by King TU-DUK in April last year. By an evasion his autograph was left out of the document, and the signatures of the plenipotentiaries inserted instead, who have since been disgraced by the KING. From these accounts, which we have obtained from authentic sources, it will be seen that, notwithstanding the flattering official reports that appear from time to time in the French journals, there is reason to conclude that the colony so far is a failure, and that it has already become a second Algeria, in being a burthen on the mother-country. What effect the return of the Annamese Ambassadors from France may have upon the policy of their KING, nothing had transpired, up to last advices, to indicate. Evidently the French themselves do not expect it to be pacific, as they still keep up their vigilance and armaments on the northern frontier. We may, therefore, safely conclude that for some time to come the French will find it as much as they can do to hold their own in Cochin-China. At the same time it is well that our Government continue to be on the *qui vive* in Siam and Cambodia, where the trade of British merchants in China and the Malacca Straits settlements is rapidly on the increase.

THE SETTLEMENT OF SHANGHAI.

(COMMUNICATED.)

Since the opening of the Yang-tze and other northern ports of China to foreign trade, no place in the world (excepting California, with which, to a certain extent it may be favourably compared) has so rapidly risen in commercial importance as the foreign settlement of Shanghai, which may now be considered the chief emporium for trade in China. A glance at the past few years' statistics of trade with Shanghai will at once prove this. Six or seven years ago a few small vessels and one steamer per month from Hong Kong calling at the open ports was all that was requisite to conduct the coasting business which at that time existed between Shanghai and the South. It is now vastly different; for, independent of sailing craft, the Yang-tze employs some forty steamers, of capacity varying from 300 to 2,000 tons each. The other northern ports and Japan, half as many more, and to and from the southern ports about ten others; and although, perhaps, no more may for the present be found requisite, there is every reason to expect a greater demand at no very distant period. No doubt as soon as the American war is ended and a subsidy granted by the Government, a line of steamers will be running between Shanghai and San Francisco, meeting the New York line, by which means (*via* the Isthmus of Panama) communications and light freight can be transmitted to and from New York as quickly to London as by the overland route. To American merchants this will be a great desideratum, especially for exchange operations, &c., doing business direct instead of through London, as at present. We may also look for a much larger extension of trade with the interior of China so soon as the rebellion be subdued (which appears decidedly on the decline), and other ports are opened; and should the Yellow River, Poyang Lake, and cities now in the possession of the rebels be free to foreign enterprise, the result would be as surprising as in the case of the Yang-tze river. In the event of such, Shanghai becomes the focus; particularly for exports to Europe.

In a place of such rising importance, with shipping numbering seldom less than 150 vessels in harbour at a time, and an aggregate tonnage for 1863 of nearly one and a half million tons, it is surprising that no better form of government exists. There are about 700 respectable residents in the settlement, to whose regret, large numbers of rowdies, discharged seamen, together with numerous others from the ships in harbour, infest the place. The present form of government is by far too weak, and it is high time the consular and municipal system were superseded by some more effective body. It is impossible H.B.M. Consul can at present thoroughly overtake the whole of the immense business which falls to his office. Fortunately we are well represented in this respect by Sir Harry S. Parkes.

It would be a great benefit to the community at large could the many disreputable characters which are to be found there be deported—all who could not show their calling to be legal and respectable, and those whose business call them into the interior, should be furnished with passports. Here again, however, the gaol accommodation is too limited for its present requirements, it being no uncommon thing for prisoners to be liberated after a few weeks' incarceration to make room for fresh delinquents. Unity of action by the various Consuls is absolutely necessary by representing to their separate Governments the true state of matters; unless they can, among themselves, organize some firmer and better management for the administration of justice and government that it may once more be known as the model settlement. In commercial importance Shanghai by far excels the colony of Hong Kong, which has its Governor and staff, Legislative Council, Chief Justice, Attorney-General, &c., while the former is without any such support. Those whose province it is to move in such matters would do well to take the matter into careful consideration, and use every endeavour to bring about some beneficial change.

Literature.

Travels in the Central Parts of Indo-China (Siam), Cambodia, and Laos, during the Years 1858, 1859, *and* 1860; by the late M. HENRI MOUHOT, French Naturalist. London: Murray, Albemarle-street.—These two handsome octavo volumes are rather outlines of the journies they refer to than that full record of all the traveller saw and observed, which we must now deplore we are for ever deprived of by the unfortunate death of M. Mouhot, far away in the interior of the country, with none but his faithful Chinese servant to close his eyes. How much the reading public and the whole civilised world have to regret that they must be content with mere jottings and memoranda, when they would have gladly devoured a journal expanded to the most minute detail, they may judge from one of the very earliest pages of the book, explaining the extent of country covered by the deceased in his peregrinations, a large portion of which was before untrodden by European foot. In the memoir prefixed we are told—

M. Mouhot dedicated the last four years of his life to exploring the interior of Siam. He first travelled through that country, then through Cambodia, and afterwards reascended the Mekong as far as the frontiers of Laos; visited one of the savage and independent tribes inhabiting the district between those two countries and Cochin China; then, after having crossed the great lake Touli-Sap, he explored the provinces of Ongcor and Battambong, where he discovered splendid ruins, especially the temple of Ongcor the Great, which is nearly perfect, and perhaps unparalleled in the world. Passing from the basin of the Mekong into that of the Menam, he saw mountains of which the principal peak was more than 6,000 feet high. He returned occasionally to Bankok, the capital of Siam, in order to make preparations for fresh expeditions. The loss, by the wreck of the *Sir James Brooke*, of a very valuable collection, did not discourage him; but he set about at once to replace it. At the time of his death, which happened on the 10th November 1861, he was *en route* for the provinces south-west of China, when, having already penetrated into the interior, he was attacked by the jungle fever, and died after twenty-two days' illness. He set out for Louang-Prabang on the 13th October, and on the 18th halted at H——(the name is unfinished in the manuscript). The next day he felt the first symptoms of the fever to which he fell a victim. From the 29th October he wrote nothing. The last words in the journal, "Have pity on me, O my God," show the religious principles which had guided his life.

As a traveller, M. Mouhot will rest his fame on the fact of his first introducing to European notice the wonderful ruins of the Temple of Ongcor, which city was the capital of the ancient kingdom of Cambodia or Khmer. Of this long extinct empire the tradition is that it had twenty kings who paid tribute to it, that it kept up an army of five or six million soldiers, and that the buildings of the royal treasury occupied a space of more than 300 miles. The remains of the city and its temple are amply sufficient to evidence that they must have belonged to a powerful and civilised people, however much we may be inclined to treat the tradition just named as an effort of Eastern exaggeration. The admirable drawings of M. Mouhot, which are as admirably engraved, enable us to form a very definite opinion of the extent and magnificence of this temple—as to whose founder or period of erection nothing whatever is certain. Strange, that here again we have the same obliviousness, as to the architect and the intention, that prevails with regard to so many other relics of remote oriental antiquity.

THE RUINS OF THE TEMPLE OF ONGCOR.

What strikes the observer with not less admiration than the grandeur, regularity, and beauty of these majestic buildings, is the immense size and prodigious number of the blocks of stone of which they are constructed. In this temple alone are as many as 1,532 columns. What means of transport, what a multitude of workmen, must this have required, seeing that the mountain out of which this stone was hewed is thirty miles distant. In each block are to be seen holes 2½ centimetres in diameter and 3 in depth, the number varying with the size of the blocks; but the columns and the sculptured portions of the building bear no traces of them. According to a Cambodian legend they are the prints of the fingers of a giant, who, after kneading an enormous quantity of clay, had cut it into blocks and carved it, turning it into a hard and, at the same time, light stone, by pouring over it some marvellous liquid. All the mouldings, sculptures, and bas reliefs appear to have been executed after the erection of the building. The stones are everywhere fitted together in so perfect a manner that you can scarcely see where are the joinings. There is neither sign of mortar nor mark of the chisel, the surface being as polished as marble. Was this incomparable edifice the work of a single genius, who conceived the idea and watched over the execution of it? One is tempted to think so, for no part of it is deficient, faulty, or inconsistent. To what epoch does it owe its origin? As before remarked, neither tradition nor written inscriptions furnish any certain information upon this point, or rather, I should say, these latter are as a sealed book for want of an interpreter, and they may perchance throw light on the subject when some European *savant* shall succeed in deciphering them.

Another curious problem left for solution by the history of the past is touched on by our author in scattered references to the Isiampois (or, as we English would call them, the Isiampans). Some among the missionaries have been of opinion that this race is of Jewish descent, principally from their use of the peculiar rite of the Hebrews and their abstinence from the flesh of the pig. But, as suggested by one of them, there is also a probability of their being of the Abrahamitic, but not of the Jewish race—of being, in fact, a colony of Ishmaelites or Idumeans. This is a point often forgotten, seeing that we continually find travellers laying too much stress on a mere cast of physiognomy. M. Mouhot mentions that even among the Stiêns, a thoroughly wild tribe, he was struck by the Hebrew character of many of the faces. We may mention here that one great charm of the book is the number of striking portraits it contains of individuals of all ranks and races encountered by the author in the course of his wanderings. They impress one with the conviction that they are vivid likenesses, and in transferring them to paper the engraver must have rendered the original drawings with a spirit and fidelity worthy of all praise. The whole body of the inhabitants of these little known regions look like a more manly race than their neighbours of the Mongol type. But the Chinese are here, as throughout Eastern Asia, the only really industrious class to be met with. Indolence, in fact, seems to be the vice inherent in the composition of the three nations—the Siamese, Cambodian, and Laotian; and the other faults they possess are but the natural consequences of the first.

Under a settled and tolerably well-administered Government, the commerce of Siam and Cambodia with the adjoining countries and with Europe would soon grow to vast importance. Bankok, the capital of Siam, is already one of the most considerable markets in Asia. But then, at the time of M. Mouhot's residence, the First King was man of rare attainments. "He was familiar not only with all the dialects of Siam and Indo-China, but also with ancient Sanscrit and English, in which latter language he had written several treatises. The English journals at Hong Kong have been honoured by articles from his pen, and no one who reads them can be surprised that the august contributor should have been elected a member of the Asiatic Society in London." The Second King, also, is described as "a perfect gentleman, of a cultivated mind, writing and speaking English, and leading in his palace—which is arranged and furnished in our Western fashion—the life of a rich, noble, and learned European." This singular institution of a double monarchy is common to the three kingdoms, Siam, Cambodia, and Laos. M. Mouhot had interviews with the two Sovereigns of the second-named State, but found that the First King had mastered only one English phrase: he could point to a bottle, and say "good brandy." What commodities these countries could offer in exchange for foreign products will be seen from the following extracts:—

CAMBODIA.

The chief productions of Cambodia are tobacco, pepper, ginger, sugar, gamboge, coffee, silk, and cotton. The latter important article of commerce thrives here admirably; and, as according to report America is menaced with civil war, it is a question whether we can henceforth calculate on that country for the supply it has hitherto furnished. If that supply were even partially to fail, and thousands of workmen to be in consequence thrown out of employment, what a vast field might be opened on the banks of the Mekong and of Touli-Sap for European activity, industry, and capital. England, that great nation for colonies, could soon make of Lower Cochin China and Cambodia a vast cotton-plantation; and there is no doubt that if she set about it in earnest, with her Australian, East and West Indian, and New Zealand possessions, she might soon secure to herself the monopoly which America now has of this precious article. We [M. Mouhot is writing as a Frenchman] should in that case be obliged to buy from her. Why should we not be our own purveyors? The island of Ko-Sutin alone, in which the lands belonging to the Crown are let to the cotton-planters in lots for one pound per lot, may be adduced in order to give an idea of the profits realised from the cultivation of this plant. Each lot affords an income of more than 1,200 francs.

The forests situated on the higher grounds abound with justly celebrated timber; as also trees yielding resins and gums much esteemed in commerce, likewise the eagle-wood, and several species of dye-woods. The mountains contain gold, argentiferous lead, zinc, copper, and iron, the last two in some abundance. One is astonished to find these fertile lands furnish so little for exportation; but the Sovereigns and Mandarins enrich themselves by spoliation and extortion, and every abuse which can ruin a country and retard its progress. If these dominions were ruled wisely and carefully, with probity, and with a regard to the interests of the working classes, the whole aspect of affairs would be changed. The taxes now weigh solely on the cultivator and producer. The more he raises the more he has to pay. Disposed therefore to indolence by the influence of the climate, he has little inducement to combat this vice.

Before dismissing these most interesting volumes we cannot refrain from giving utterance to our feelings of admiration for that band of zealous devotees to the works of Nature, who are ever, like M. Mouhot, ready to run the risks of the deadliest climates and the fury of bloodthirsty savages, if they can but add one name to the catalogue of species, or introduce a

new plant to the use or the ornament of our gardens. A magnificent shell and a gigantic beetle are the discoveries, it seems, that will transmit the name of our traveller to posterity in connection with the science he so fervently loved. On such matters, however does the naturalist rest his fame. M. Mouhot writes, after a fifteen months' absence from Bankok—

A new shell or insect filled me with a joy which ardent naturalists alone can understand; but they know well how little privations and fatigues of all kinds are cared for when set against the delight experienced in making one discovery after another, and in feeling that one is of some slight assistance to the votaries of science. It pleases me to think that my investigations into the archæology, entomology, and conchology of these lands may be of use to certain members of the great and generous English nation, who kindly encouraged the poor naturalist; whilst France, his own country, remained deaf to his voice.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA.

(May 31st.) Mr. COBDEN, who, on rising to move a resolution on the subject of China, was received with cheers, said: The subject to which I venture to call the attention of the House has been introduced to our notice first by the noble lord the member for Cockermouth, and in the next place by the hon. gentleman the member for Northumberland, with very great ability, and it has also been referred to in another place by Lord Grey in a speech which displayed, I think, very great wisdom and forethought. That being so, I should not now trouble the House on the subject had the circumstances in connection with our relations with China remained unchanged or did they appear to be in a more satisfactory state than they were at the time when these motions were brought forward. I cannot, however, read our more recent despatches from that country without feeling that we are not entitled to consider that there is any prospect of any amelioration taking place in those relations. I have read attentively the last Blue-books, and I confess their perusal impressed me with a sense of great anxiety and uncertainty for the future. It seems to me that no one in China representing this country is satisfied with the present state of things. Our merchants are very much dissatisfied, and Sir F. Bruce, our Minister, appears to be in a state of despair because the policy recommended by him, or carried out there with his acquiesence, seems to have failed and broken down, so that he has no longer any policy —so far as I can understand his despatches—in hand. Then with regard to our military commander, in his last despatch of December he has advocated the complete abandonment of that policy which we were led to suppose was the sole means of restoring peace and the authority of the Imperial Government. We must all recollect that the mail now on its way to India carries out with it an Order in Council, revoking a former Order in Council, which allowed English officers to take service in the Imperial army—a step which, in my opinion, ought never to have been permitted. But we have it from Sir F. Bruce, that it is the foreign element in China which has gained all the late successes, and I cannot but apprehend that when the news arrives in China that those officers who led the disciplined contingent of the Chinese army are to be withdrawn from the service, renewed hope will be given to the insurgents, and, probably, the result of the interference of our Government two years ago in China may be to make things there in a more distracted state than they were. Such being the uncertain position of affairs, I think we should be wanting in our duty to the country if we shrank from expressing our opinion on this important question. Taking a review of our position in China, I ask myself what is our object in going to that remote region at all? It is simply trade and the profits of trade. The next question I put to myself is, have we pursued a course in China consistent with our interests and our honour? and I am bound to say that I think we have not consulted either in the line of policy we have adopted. It might have happened that we, with a great sacrifice of national character, might have achieved great success in our commercial undertakings in China. That might be urged by some persons with the view to reconcile us to the course we have pursued; but I confess for my own part that I should not be disposed to consider a satisfactory balance in the national ledger as sufficient to condone a course of conduct which I thought inimical to the national character. I am, however, sorry to say that the most unsatisfactory feature in our relations with China is the commercial view of the question. We have been carrying on large military operations, and making great efforts to extend our trade in that country, and I am prepared to show they have ended in the most unsatisfactory manner. This appears to me a subject in respect to which the greatest misapprehension exists, and nowhere does it prevail more apparently than in the mind of the noble lord at the head of the Government, for the noble lord a little while ago made a reference to our trade with China, to which I shall presently allude. I want, in the first place, to lay the foundation of the consideration of this question by showing the House what the nature of our trade with China is, and what it has been during the time we have been attempting to extend it by these warlike operations. It is a somewhat remarkable fact that it is only those foreign countries in which we have been systematically attempting to force a trade by violence and war, which really form exceptions to the progress we have made in all other directions in the extension of our commerce.

I moved for a return of the exports from this country to China and Hong Kong from the year 1835 up to the present time, thus including the whole of the period during which our trade with China has been carried on by private enterprise—I mean since 1834, when the monopoly of the East India Company was abolished. There is a peculiar characteristic in this trade. We have had three wars in twenty years, and whatever has been the apparent cause, the ultimate and undisguised object of those wars has been, to use a technical phrase, to open up China and to extend our trade with that country. The effect has been this—and it is curious to watch the progress of our trade with China—that whenever there has been a war our merchants, stimulated by a splendid market, have sent out there speculative stocks, and that their enterprise has invariably been followed by disappointment, collapse, and reaction. I am speaking in the presence of an hon. friend of mine, through whose house I believe one-third of the export trade to China goes, who, on one occasion, said to me, "The trade with China has been always a disappointing trade." If the House will allow me I will give it an analysis, in a very few words, of the returns for which I moved, and to which I have already alluded, which will serve to show how great is the misapprehension which prevails on this subject of our trade with China. In 1835, the first year of the open trade after the abolition of the East India Company's monopoly of the China trade, our exports to that country were £1,074,000. In 1836 they were £1,326,000, which was the highest amount they reached while the trade was confined to Canton. The opium war occurred in 1840, and by the peace of 1842 Shanghai and the other treaty ports were opened. For the following three years there was an increase in our exports—in 1843 they were £1,456,000; in 1844 they were £2,305,000; in 1845 they were £2,394,000. From this point they declined, and for the next ten years they remained, with the exception of one or two spasmodic efforts at recovery, at little more than half the amount of 1845. In 1854 they fell to £1,000,716, being less than in 1835, twenty years previously, when the trade was confined to Canton. In 1856-7, and again in 1859, the war arising out of the lorcha affair was carried on, and by the peace that followed several new ports were opened, and the great river the Yang-tze was made accessible to foreigners. A treaty opening Japan was also entered into, and the first exports to that country were sent through China. Our exports rose in 1859 to £4,457,000, and in 1860 to £5,318,000; but, following the invariable law, they fell in 1862 to £3,137,000. Last year, 1863, they amounted to £3,889,000. Speaking the other evening, the noble lord at the head of the Government informed us that, owing to the great expansion of our trade with China, the difficulties of our commerce in Lancashire had been nearly met, and that we were indebted to that increase of trade for our ability to bear as well as we had done the pressure of the American civil war.

Now, it amazed everybody connected with the trade of Lancashire to find that the noble lord made such a statement. The trade with China is almost the only one that has weighed on the business of Lancashire in consequence of the immense amount of stock which lies at Shanghai and Hong Kong, and China is the very last market that responded to the rising prices consequent on the cotton famine. A gentleman in business informed me that during the years 1862 and 1863, the very time when, according the noble lord, this market was relieving Lancashire from depression, there was such a glut of goods in China that it would have been profitable to have brought cotton goods from Shanghai and sold them in Manchester. I am astonished at the reckless assertions that I hear made at that table. I can account for it in no way but this—that noble lords and right hon. gentlemen who become Cabinet Ministers consider that they speak from a brief. They do not speak with the ordinary responsibility of private individuals. It is supposed that somebody else puts the figures into their hands and that they may say anything. I venture to say that there are more groundless statements made at that table to this august body—(hear. hear), by both sides (cheers and laughter)—when they are in office (hear, hear)—and they are made with such solemnity and with such emphatic blows on that box (renewed laughter), that all but the oldest and most obdurate members of this House are imposed upon; and as for the public out of doors they believe everything that is said by a Cabinet Minister. The noble lord, from his long experience, must be considered the most accomplished master of this, which I will call official, language; and if I was asked to point out the most promising of his pupils I should say that it was my hon. friend the Under-Secretary for Foreign Affairs. (Loud laughter.) It was, I believe, my hon. friend who misled his chief. They ought to understand each other better. Speaking on the lapsed debate upon the motion of the hon. member for Northumberland, the hon. gentleman read a tissue of the most fallacious statements to show the vast extension of our trade with China. He compared the trade of 1857 with that of the present time; he gave us the exports and imports of the treaty ports; the exports that went from an interior port to a coast port, and then the exports from that port to another; but he altogether left out of sight the fact that by Lord Elgin's Treaty in 1859 the trade in opium was legalized—that is, brought into the regular trade and into the statistics, in which it did not appear before, because it was a smuggling trade; and that generally amounts to three times as much as our legitimate exports. (Hear, hear.)

I have stated in general terms the facts with regard to our exports to China, but here is a statement which has been sent to me with regard to cotton goods which will fix upon the mind the extraordinary nature of that market, and the great depression which has existed in it, more than the statement of any money amount. My friend, who was surprised at the noble lord's statement, sent me these figures showing me the quantity of cotton goods exported to China and Hong Kong for the four following years:—In 1860 there were 222,963,000 yards, and in 1861 243,654,000 yards; that was during the time of excitement and speculation, when the hope that now at last there was going to be a large consumption in China was operating upon our merchants' minds. Now comes the recoil; in 1862 the exports fell from 243,000,000 yards to 80,000,000, and in 1863 it fell from 80,000,000 to 46,000,000 yards. So that the exports to China of cotton goods, which are really the chief article that we export to that country, fell in two years from 243,000,000 yards two 46,000,000 yards, or less than one-fifth, and that was during the time when the noble lord tells us that Lancashire was sustained by the great extension of our trade with China. (Hear, hear.) That is the character of the business that you are transacting with China. You have now tried it in every possible way. You have tried it by war; you have tried it by the extension of the treaty ports; you have tried it by going into the interior; and that is the character of your market in China. I do not pretend to say what is the reason why we cannot find a large consumption of our goods in China. Whether it is that one-third of the human race—as the noble lord told us the other night when he said, "Think of having free and unrestricted trade with one-third of the human race!"—whether it is because the Chinese are the most industrious, the most frugal, the most energetic and persevering people in the world, because their labour is cheaper than any-

Digitized by Google

where else, and that you get for the cheapness of the Hindoo the quality of the Scotchman or the Swiss—whether it is in consequence of that that they can produce their own articles cheaper than even a steam-engine can do it on this side of the earth—whether it is that the opium traffic absorbs their means, and prevents their being in a condition to purchase other goods which we expect to sell, or whether it is that the revolution and civil war going on in China tend to destroy the cities and populations where the great consuming demand existed, I do not pretend to say; but this I do say, that from some cause or another you have arrived at this positive proof, that it is not by war or violence, or the increase of your treaty ports, that you are likely considerably to extend the consumption of your goods in China.

If you look back for the last thirty five years you will find that China is the only country that has disappointed you; that is, that the exports to China have not kept pace with the natural increase of your trade in other directions. Last year your exports to China were £3,800,000, your exports to the rest of the world £146,000,000; so that you only send 2½ per cent. of your exports to China. If you run your eye over the table of exports, you will find that China stands only twelfth in the list of your foreign customers, that it stands even below Egypt. This is the moral—that it is not by blood and violence that you are to extend your commerce. (Hear, hear.) That is the way to destroy trade, and not the way to create it. I hope that after all this experience we shall none of us again advocate any violent measure with the view of extending our trade either in China or elsewhere. (Hear, hear.) The noble lord told us truly that there is one-third of the human race—that is 350,000,000 or 400,000,000 of human beings—in China. They are but very small customers, but look at it in another way. If you are to follow that policy, which is peculiarly the noble lord's; if you are to break into the country, hold it, and be its police; if you are to make another Turkey of China, and if, in addition to meeting Russia and France, you are to meet the United States at Peking; if you are to trouble yourselves and future generations with governing and controlling and intriguing in China, recollect that you have a country of vast extent and prodigious population to govern, and that you ought well to consider whether it is worth your while to incur all these risks, and enter upon this policy with the proofs that you have that you are not likely to do more trade with that country than with Brazil or Egypt. We are too apt to forget what China is. China has ten times the population of France. It has eight times the surface of France. Having broken into Peking by the most flagitious means you have now a minister there who is undertaking to remodel that vast empire Read his despatches: what is he doing? Constantly advising the Government that they must change their mode of administration. They are to become a centralized Government. I can hardly speak of the tone of those despatches without expressing my feelings in unparliamentary language. Why! the idea of a man going to an empire that is now moving in the ruts created by 2,500 years of existence and of one civilization, a country which has probably transmitted to you very much of the habits and mode of living of the ancient Babylonians—to think of going to Peking and coolly recommending that the Government of Peking should absorb to itself the government of all the provinces—each province being as large as a European empire. What good can possibly come of that? It only shows the utter impossibility of our understanding the nature of the country with which we have to deal.

Sir F. Bruce forced his way to Peking expecting to find there a centralised Government and a great Power. When he got there he found a decaying capital and an Executive with very little power. It is very possible that it is owing to that circumstance that the empire has endured so long as it has (An emphatic "Hear, hear" from Mr. White, followed by a laugh) What is Sir F. Bruce doing? He is recommending the Emperor to withdraw the power and authority enjoyed by the local governors of the different provinces, and to assume their power himself at Peking. He is recommending a complete revolution in the mode of governing China. It seems, according to the experience that we have had, that there is very little centralised authority in that country, and that the power of the governors of departments is really almost independent of that of the central Government. Now, I think that what we have to do in China, if it be a great empire in ruins, is to avoid the fall of the ruins, just as you would keep out of the shadow of an old castle wall for fear it should fall upon you. The wise policy would be to have as little as possible political or social relationship with that country. That is the policy which I should recommend this House to consider. What are we doing now? We are actually doing our very best to break up the little authority that was left to that central Government, because we are carrying into that country habits of insubordination, and letting into that country wild and lawless men. And the very circumstance of our opening the door to what is called the extra territorial population is that we let in, not respectable merchants alone, but every kind of filibusters and brigands who can reach that country. There is nothing comes out so clearly in the late despatches as that you yourselves cause much of the disorder that is going on in China. (Hear, hear.) You opened up the great Yang-tse river—that is, you stipulated that foreigners should have the right to navigate that river. Well, that was an unusual thing, and we ought not to have done it unless with much better securities than we could possibly obtain. I believe it was done against the better judgment of Lord Elgin himself. What has been the effect? Read the despatch of Vice-Consul Adkins, who is placed in a consulate on that river, and who describes the population. He says, writing to Sir F. Bruce from Chinkiang, on the Yang-tse, on the 2nd of September, 1862 —

"I am well aware that the river is likely to be overrun by foreign blackguards, knowing no law, and under no control; the more so that the Chinese authorities themselves shirk the responsibility, and take no steps to protect their countrymen."

Writing again on the 23rd of September, and referring to outrages that had taken place, he says:—

"The Europeans who caused the disturbance were in Chinese employ. It is a common practice to hire a foreigner 'to take care of the boat.' By this is meant hoisting a foreign flag when passing a native Custom-house, and bullying any official who may get in the way."

Again, on the 27th of April, 1863, he says:—

"I very much fear that the foreigners trading on this river in sailing boats are almost without exception men without principle or character—outlaws, in fact, who have no regard for treaties or regulations, and who look upon the Chinese as made for them to prey upon. Their drunken and debauched habits have made an impression even on the Chinese."

And Sir F. Bruce, writing so late as July last to Earl Russell, speaks of the "constant scenes of blood and violence which have inaugurated the opening of the Yang-tse river." Can any one realize what this extra-territory means? You have stipulated that Englishmen who go into China shall not be subject to Chinese laws. You make a sort of effort to follow your fellow-subjects with your own law—that is, you set up consuls 200 or 300 miles apart on this great river. I believe there is a space of 500 miles on that vast river where we have no consuls at all. Your countrymen go there, and foreigners also. This system of hoisting flags is carried on in all sorts of surreptitious ways. Let us suppose that Chinamen came here, and could penetrate into Oxfordshire without being subject to our law—that they could commit every species of robbery and outrage upon the constituents of the right hon. gentleman the member for Oxfordshire, and that the local magistracy had no power to interfere with them beyond this, that they could not talk to them because they could not understand their language, but that they could seize them and carry them to the nearest consulate, there to be judged according to Chinese laws. They must be taken to London, the witnesses must be brought with them, they go before a foreign tribunal, and then, after all this expense, what chance would you have of obtaining law and justice? Why, such a condition of affairs amounts to a state of actual lawlessness for every European and American in the interior of that country. (Hear.) The law allows every foreigner, be he English, French, or American, to pass into the interior, and foreigners having treaty rights are exempt from the jurisdiction of the mandarins. You must bear in mind that the mandarins shirk the responsibility of meddling with these people; and why? Because they know very well that one war, or rather two wars—the wars of 1856-7—were caused by the lorcha *Arrow*. The same may be said of the war that followed the exchange of the ratifications; and there is not a Chinese authority that does not tremble in the presence of the English flag. The consequence is that for vessels under the English flag since that lorcha war there is a complete irresponsibility and lawlessness. Chinese capitalists buy European-rigged vessels; they get a foreigner to come on board, as they did in the case of the *Arrow*, to take care of the boat. When he is on board he claims to be the owner of the boat. He bullies the Chinese authorities, he passes the Custom-house, and defies them to fire upon him. Why, this amounts to an actual state of anarchy. (Hear.) These lorcha vessels are at the bottom of a great deal of this mischief. What says Sir F. Bruce in his despatch to Consul Sinclair at Ningpo, dated Jan. 24, 1863. He says:—

"I have to instruct you to execute strictly the treaty in the matter of clandestine and prohibited trade, particularly as against lorches and small sailing craft engaged in the coasting trade. The class of men who sail these vessels, and their lawless and violent proceedings, make peaceful progress difficult, and do much to keep up a feeling of alarm and aversion to foreigners among the authorities and population of China. You must be aware, from your experience at Ningpo, that is the employment to be found in these vessels which keeps up the class of lawless foreign adventurers which infest the ports, and is the hotbed of crime on the coasts of China."

Now you undertake the police of this vast region. You have got your gunboats on the Yang-tse river and the coast, but I am very much afraid that you are led into almost as much lawlessness and involuntary crime as the natives themselves, because a wholesale massacre and destruction of the native junks by our ships of war has been going on, attributable, no doubt, to our ignorance of their language. Such acts, however, reflect a very great discredit on the national character. We read of 200 junks at a time being destroyed by our vessels. They destroyed first the pirates, as they are called, and then the Government vessels. (A laugh.) There is a curious correspondence, from which I will trouble the House with only a short extract. It illustrates in a very short space the anomalous and discreditable relations to which I refer. Prince Kung sends a despatch to Sir F. Bruce, complaining that our force in the Yang-tse river had burnt three Government war junks for pirates, one of them having on board a mandarin, for the loss of whose personal effects a pecuniary compensation is demanded. In reply Sir F. Bruce says:—

"A short time since Captain Dew destroyed a fleet of 200 pirate vessels at Chusan at the request of the Chinese authorities, and in the case now complained of the officers of Her Majesty's ships, at the request of the people, destroyed these junks, which the popular voice, as well as the appearance of the vessels themselves, pointed out as Cantonese and piratical."

And he adds, in reply to a second remonstrance, that,

"As several respectable-looking villagers on shore averred that these junks had been plundering them for some time past (a statement corroborated by a small mandarin), the commander of the larger steamer caused them to be set on fire."

(A laugh.) That is not a thing to laugh at in a Christian assembly. (Hear, hear) You cannot realise such a state of things. There is an old saying that a man would sleep more soundly if he knew that the whole Chinese Empire would be totally destroyed in the night than if he knew he was to have a tooth drawn in the morning. We are becoming deeply compromised in the Chinese Empire. Here is the answer of Prince Kung, and I would rather have a broadside fired at me than have received such a communication:—

"Well-dressed and well-to-do people are not necessarily well-affected subjects, nor is a small mandarin necessarily a genuine mandarin. Who can say that in this case the parties complaining were not pirates in disguise, who, in their dread lest the Government vessels should arrest them, trumped up this story of the evil done by these junks with a view to inciting the commanders of British steamers to destroy them?"

And the Prince proceeds to say that for this act of violence in the summary destruction of these Government vessels he hopes that a penalty commensurate with the offence will be inflicted on the British officers.

Digitized by Google

This is a most demoralising state of things when your forces are made the instruments of this brutal violence—when they destroy 200 vessels because they are denounced by a large mandarin, and then three Government ships because they are denounced by a small mandarin. (A laugh.) I say that such a state of things, if allowed to go on, would re-act prejudicially on our home politics and the character of our social life—(hear)—and it is our duty to put it down. Why are our vessels there to do the behest of the Chinese Government in putting down what are called pirates? At Chusan it was said that the 200 war junks destroyed were ready to join the Taipings. In the present state of things in China you can't draw a line between pirates and rebels, and yet these junks that are found ready to co-operate in the defence of the rebels—and these people had as much right to rebel as ever we had—are to be treated by our forces as a common enemy. Under what authority are such things done? I see in the despatches, Standing Order No. 10, from Admiral Kuper, he says:—

"Chinese vessels are on no account to be destroyed by Her Majesty's ships unless the officers in command are requested by a competent Chinese authority to aid in doing so; nor unless, on the sea coast of China, a pirate is caught in the act of piracy."

It was an old standing order of the Admiralty that our vessels of war were not to destroy even pirates unless they were found, or were proved, to have attacked a square-rigged vessel. I think I heard that standing order quoted by the late Mr. Hume some twenty years ago. It is not to be tolerated that our brave sailors are to be made the executioners of such a community as that. (Hear, hear.) Now, the question arises—what is the remedy for this state of things? If we were beginning afresh to-morrow to establish our relations with China we should not hesitate a moment as to what we should do. We should avoid all political and social contact with that country. We should, in fact, follow the example given us by a man who was not only a statesman, but essentially a philanthropist—Sir Stamford Raffles. He founded Singapore in 1819. He purchased an island about the size of the Isle of Wight, a bare, bleak island, covered for the most part with dense jungle, and gave no earthly advantage to the desert spot except the establishment of a complete freedom of commerce and complete security for life and property. What has been the consequence? That place has grown up from some 200 inhabitants to 100,000, and its exports and imports—which are genuine, and not fictitious, like those of my hon. friend—I have lately seen stated at something like £12,000,000 sterling. Well, why not do in your China trade what has been done in Singapore? You have only to establish free ports on the coast of China, and to withdraw yourselves altogether from political contact with that people, and you will have a trade greater than ever you can hope for by assisting to destroy their civilisation in the vain attempt to push your commercial relations. You have an example of what might be done in the case of Hong Kong. Hong Kong is a mere rock at the entrance of the Canton waters. You have made a free port of it; it has no productive nor consumptive power whatever, but by making it a free port, one-third of all the commerce which now goes on with China is carried on through that port.

While Canton is a desert quite out of the list of your export and import accounts, everything goes to Hong Kong, and there is no doubt if you get two other small islands—the smaller the better—one towards the centre of the coast and the other towards Shanghai, and merely establish them as free ports—I don't ask you to do more—they will draw all the trade of China, and will settle themselves without any more ado on your part. Well, then, having this example of what should have been done, we go on preferring a policy which is carried out at great loss to the national character and at great cost to the people of this country, because such a policy imposes a great charge upon the people, and the time may come when this country will be very impatient of this sort of mismanagement. I would exhort this assembly and the constituencies, since we are now beginning to view ourselves as a kind of privileged class and want to exclude five-sixths of our people—(hear, hear)—because we are supposed to have more forethought, more political wisdom, more philosophy in us, that something is expected from us. I will show you by the conduct of a great, a brave, and essentially a just man—the Duke of Wellington—what the course you have pursued during the last 30 years is as compared with what he would have done. A very curious incident brings in the Duke of Wellington as an authority. I may call to the recollection of this House that in 1834, after the opening of the trade with Canton to private enterprise, Lord Napier was sent out to that place. He addressed the officials there in the usual way, but they refused to have anything to do with him except in the way of trade. Lord Napier, after some angry correspondence, wrote home some despatches inciting our Government to coerce the Chinese by sending out a few regiments, and showing how easily they might be brought to submission. At that time the noble lord at the head of the Government was Foreign Secretary; but before Lord Napier's letters arrived, that curious interregnum, which those at the wrong side of 50 cannot but remember, took place, when the Whig Government went out and the Duke of Wellington held all the seals until Sir R. Peel should return from Italy. Those letters of Lord Napier's fell into the hands of the Duke, who then held the seals of the Foreign Office as well as the seals of the other Secretaries of State, and he wrote in reply a very brief despatch, which is the only one of the papers of 1840, and here is one of the sentences, which contains the pith of the whole. It is dated February 2, 1835:—

"It is not by force and violence that His Majesty intends to establish a commercial intercourse between his subjects and China, but by the other conciliatory measures so strongly inculcated in all the instructions which you have received."

(Hear, hear.) Now, I am bound to say, in justice to the noble lord at the head of the Government, that the instructions which were sent out by by him, being the King's ordinance by an order in Council for the management of our trade in China, were all dictated in a spirit of justice, moderation, and peace—(hear, hear)—and I can say I have never seen any despatches of the noble lord which have been addressed to China which have not always breathed that spirit of forbearance and justice. (Hear, hear.) But what I find fault with in the noble lord is this—if one of his subordinates in any part of the world commits any violation of those rules of moderation and justice, the noble lord backs him. (Laughter and cheers.) Now, I defy the noble lord in all his correspondence to show me half a dozen lines written with the courage, with the justice and propriety of those few lines of the Duke of Wellington. What we want is a Government here which can check its officials at the antipodes as well as the Government of President Lincoln can restrain its officials from wars with China. (This remark of the hon. gentleman excited some murmurs and subdued commentaries on the Opposition benches.) I understand what is passing among hon. gentlemen. Well, I come now to the point to which I was going to refer, and that is the Duke of Wellington's view of what should be our expenditure in China. After sending the despatch from which I have quoted to Lord Napier he sits down, and in a memorandum prepared for the Cabinet, which you will find in the same volume of the Correspondence up to 1840, he goes into the question of Lord Napier's difficulties with the Chinese. He says, "They refused to receive him at Canton; they had a perfect right to do so. For us to attempt to force the Chinese officials to receive an English official would be disgraceful." (Hear, hear.) "Disgraceful," that is the word; and he goes on to say, "If they don't want to receive an English minister with high-sounding titles, let us be content;" and at a time when Lord Napier was supposed to be a refugee at Macao, in a memorandum dated March 24, 1835, he fixes our establishment in China. He recommends, until trade has taken its regular peaceable course, a frigate and a smaller vessel of war for the protection of our trade with China; and he fixes the cost of the civil establishment there at £13,600 a year. (Hear, hear.) So that, according to the Duke of Wellington's principle, our trade was to be protected by a single small vessel, and our civil establishment was to cost only £13,600. Now, last year I saw a list of Government vessels in the waters of China and Japan, and they were 50 in number, and we have a little army at Hong Kong and another at Shanghai—(hear, hear)—and the expense of our establishments has enormously increased.

While our trade with China has increased only threefold during all that time, our trade with the rest of the world has increased fourfold, and all that has been done under the purest delusion that ever any people were under. We went to work with the Chinese to force our political connection on them—a course which the Duke of Wellington thought ought not to be followed at all. We have done so on the assumption that the Chinese could be traded with fully only if we established our political connection with them. But the Chinese, with an instinctive knowledge of their own interests, immediately came to the conclusion that their vital interests were at stake in excluding foreigners from all political and social contact with them. They felt that they could not co-exist on an equality in the same country with the English, and, while they have consequently resisted all social and political contact with us, we have been always acting under the delusion that a political and social connection was essential for the interests of our trade. That was the greatest delusion in the world, for the Chinese people were free-traders, while we were in the very mire of protection in this country. (Hear, hear.) The Chinese and Asiatics never understood or felt the question of protection to native industry. I remember quite well, when I advocated free trade in this country twenty-five years ago, repeatedly making use of the argument of the case of the Chinese, and showing what free-traders they were. They not only allowed rice to come into their country, but they exempted from port charges a ship bringing a cargo of that first necessary of life in China. (Hear, hear.) Some persons may attempt to answer me by saying that I am only speaking of exports to China, and that I say nothing of our imports from that country; but no one doubts that if we stayed at home the imports from China would still reach us. We have never gone to China to force the Chinese people to give us their produce, but to increase our exports to that country. It may be said that it is not a practical question to talk of withdrawing our present connection with China. I am not responsible for anything that has been done with respect to China, but we are in the midst of difficulties with that country, increasing every year in danger; therefore we cannot leave the matter alone, and if we cannot suddenly take that course which we might do if we had to begin again, we can at any rate move in that direction, and can apply the principle I advocate to Japan, where we have endeavoured to force ourselves on a reluctant people. The representatives of Japan are now in Paris, and they will come over to this country, and will, almost prostrate on the ground, ask us not to force ourselves on them, for if we should, they could not be answerable for the safety of those forced upon them, and civil war and strife might be the consequences. Now, I want to know whether we are going to receive the Japanese Envoys in the same way as we received those men who pleaded in the same manner with Lord Elgin. The communication which passed between the Chinese Plenipotentiaries and Lord Elgin, when they were opposing in every possible way the English forcing themselves on their country, was of a most affecting character. Are we to pursue the same course with respect to Japan? I trust not. I trust that we shall, in respect to that country, pursue the same principle as in Singapore and Hong Kong. Establish ourselves if we will on the mainland, but let us isolate ourselves, and not come in contact with the interior. (Hear, hear.) Let us take this precaution. We have had the death of one man in Japan—Mr. Richardson—and to avenge that we have thrown away the lives of many brave men.

We must observe, in our trading relations with the Japanese, precisely the same policy as we pursued when we received in former times those merchants from the Hanse towns who came here and were allowed to trade, but were obliged to keep themselves distinct from our people. The consequence was that those merchants settled in a distinct part, a place being set apart for them, and were obliged to keep themselves free from the foreigner simply because they were exempt from our laws. In the end we must come to the same condition of things in dealing with these people, and in order to carry on business with them in quietness, we shall have to establish free ports—if on an island so much the better, and if on the mainland we must keep our people to themselves. If Englishmen go out to these parts of the world, must they involve their countrymen at home in these wars because they will not confine themselves to five square miles for horse exercise? Why, our naval officers are content to be imprisoned on the quarterdeck, with the chance of an occasional walk of half a mile. Let our merchants submit to the same ordeal, and as a matter of duty to

RAILWAYS FOR CHINA.

IT has been the subject of remark in professional and other journals in this country that the absence of railway communication, even on the smallest scale, in China is anomalous; especially where so much has been accomplished, through British, American, and French enterprise, in establishing lines of steamers at the chief ports from Canton to Tien-tsin along a seaboard not less than eighteen hundred miles in length. Those who are conversant with the foreign element among the people of that nation, know that this apparent backwardness in promoting the introduction of the locomotive and the iron road, with its attendant telegraph wire, has not existed. For the last twenty years the question has been discussed from time to time, and projected lines proposed, but these have been laid aside as being premature, chiefly on account of the unsatisfactory relations between England and the Imperial Government. It was not until the ratification of the Treaty of Tien-tsin that hopes of success were entertained for the introduction of steam afloat, commensurate with the extensive navigation opened up by its articles—a treaty which may be considered one of the most successful diplomatic achievements of modern times, and will redound to the memory of Lord ELGIN for his astuteness, humanity, and liberality towards all nationalities participating in its benefits. On this groundwork steam navigation has been not only introduced as a carrying power in the hands of foreigners, but the Chinese mind—always slow, but sure—has become alive to its paramount advantages over their own sluggish mode of traffic, so that they are investing their means in steam-boats, and taking shares in steam navigation companies. Nothing could be more advantageous than this to prepare the way for steam locomotion by railway, as it familiarised the people and Government to the wonderful power of this western discovery, of which their inventive genius had no previous conception. The time had arrived when the merchants in China deemed it favourable to mature their projects regarding the introduction of railways. Accordingly, a company was formed at Shanghai about the beginning of last year, to construct a line of railway from that port to Soochow, in anticipation of its recapture from the rebels. In the following summer they addressed a memorial to the Viceroy of the Province for permission to lay the line, which that functionary did not entertain in a very favourable manner. This, of course, was before the fall of Soochow, since when nothing has publicly transpired regarding the project, which was based upon the supposition that the wealthy and industrious refugees who fled from that city to the settlement and city of Shanghai would immediately return and restore that ancient mart to its former prosperity. This expectation has up to the present not been realised, even in a moderate degree, so that probably the promoters of the Shanghai and Soochow Railway Company are keeping their project in abeyance.

Meanwhile in the autumn of the year Sir MACDONALD STEPHENSON arrived at Hong Kong, the successful introducer of railways in India and Turkey. Immediately he placed himself in communication with the British Minister at Peking, under the auspices of Lord PALMERSTON and Earl RUSSELL, and addressed the leading foreign residents on the subject, from whom he received most interesting, and generally favourable replies to his proposed lines. He has now returned to England, and produced the result of his experiences in the shape of a voluminous "Report upon the Feasibility and most effectual Means of introducing Railway Communication into the Empire of China," accompanied with a map, more than four feet square, showing on a large scale the most comprehensive system of railways imaginable, stretching from Calcutta through Eastern India, Western and Central China to Peking. At the first glance this appears so gigantic, that one is inclined to view it as one of Utopian character, destined to go the way of all bubble schemes. Each point is, however, clearly discussed in his report, and where at one part some difficulty arises in the reader's mind, in a subsequent sentence this is satisfactorily discussed and met by sound argument. From the grand general project of uniting India and China by rail, as delineated in the Sketch Map, he confines his observations and correspondence to that comprised within the limits of China proper, and this is again reduced to the practical proposition of constructing at first a line of only fifteen miles. He starts with Hankow as a central terminus, from which radiates three trunk lines,—one South to Canton with branches to Fatshan and Hong Kong; a second Westward up the Yang-tsze River into Sze-chuen, and a third Eastward to Nanking and Shanghai, from thence to the North by Soochow along the line of the Imperial Canal to Tien-tsin and Peking—in all about 3,000 miles.

To deal with the project in detail is beyond the limits of our space, we shall therefore confine ourselves in this article to pointing out its principal features. These resolve themselves into the line from Canton to Hankow, and from Shanghai to Peking. Acting upon the recommendation of his correspondents,—who are nearly all residents in South China, and illness prevented him personally visiting the North—he advocates strongly the adoption of the first-mentioned line, and proposes that an experimental loop-line of fifteen miles be laid between Canton and Fatshan—the southern metropolis and Birmingham of China. This is undoubtedly the route for a trunk line when the system is once introduced, but we question the propriety of giving it the precedence of all others. From the admission of the correspondents who touch upon this point, and the remarks quoted from the Hong Kong press, it is apparent that the chief object in proposing it is with a view to restore that trade with the tea districts which formerly constituted Canton the great foreign emporium of China, and which has been transferred to Shanghai since the opening up of the Yang-tsze. We have no wish to retard that expected state of future prosperity, but it might nip the whole project in the beginning if the experimental line was laid where there are few or no foreigners to support it, with the prospective advantages of carrying it six or seven hundred miles into the tea districts. Moreover, it is here that the greatest engineering difficulty occurs in crossing the Meiling Pass that divides the north and south watersheds of the tributaries to the Yang-tsze and Canton rivers. On the other hand the line from Shanghai to Peking *via* Soochow and the route of the Grand Canal, on to Tien-tsin, is not only the most feasible, but presents the fewest engineering difficulties. In fact, here is the base of a track with dead-level gradients made to hand, if one of the banks of the canal be straight enough, between the three rivers, which will have to be crossed by ferry. Not many years ago, that section of the canal between the Yellow River and the Peiho was blocked up against navigation by a large portion of it filling up, so that the supplies of rice for the consumption of Peking and the northern provinces, which cannot produce this "staff of life," have been prevented from arriving by the old water communication. We may reasonably conclude, therefore, that the Government would hail with satisfaction the construction of a railway along this route that would bring these supplies regularly and expeditiously from the South. On this route it is proposed to have one or other of the short lines from Shanghai to Soochow, sixty miles, or Tien-tsin to Peking, seventy miles, constructed at the outset, to show its advantages to the Chinese authorities, and see whether or no it would pay. But we conceive there is a better and much shorter line pointed out by Dr. MURRAY, where he states:—"But the line that I would press on your attention, as "one to commence with, is that between Woosung and Shanghai, "a distance of only eight miles in a direct line, and free from "any engineering difficulties. Ships might then load and

Digitized by Google

"discharge at Woosung, and be saved the difficult navigation "of the Shanghai River "(Wongpoo). Woosung is the natural sea-port of Shanghai, standing on a more salubrious site, and where anchorage and dock accommodation to any extent may be formed. The land intervening is nearly all in the hands of foreigners; it is quite level the whole way, although intersected by numerous small creeks, that could be easily crossed until arriving at Soo-chow creek, where the costliest piece of work in the shape of a good iron bridge is required, not only for railway, but ordinary traffic, which would be accepted as a boon by the inhabitants. When his plans are ready for maturity, we would advise Sir MACDONALD to bear Mr. MURRAY'S hint in mind. In the meantime we cordially wish him every success in the formation of a company to carry out his views; and consider the project worthy of public support, as eventually to turn out a profitable undertaking.

YET ANOTHER CHINA DEBATE.

THE celebrated free trader Mr. COBDEN brought on another debate on our policy in China, which will be found to occupy ten pages in our present issue. The Statistics of Trade which we published on the 7th March were quoted by Mr. LAYARD, the Under-Secretary of State, as affording good proof of our trade under the Government policy. We shall notice the debate more fully in our next.

PARLIAMENT—CHINA DEBATE.

(*Continued from page* 319.)

ourselves we are bound to enforce such a course of conduct on them. I have brought forward this motion because I think it right not to let this question be huddled up by a "count out," and a "count out" never takes place in this House unless the Government are in it—("Hear," and laughter)—and because I wish to give the opportunity to hon. gentlemen on both sides of the House to express their opinions on the subject. I think—and the thought occurred to me since I gave notice of submitting a motion on this question—that it would be the wisest course if this House should understand that, at the next meeting of Parliament, a committee would be appointed to inquire into our commercial relations with China and Japan. It may seem presumptuous, considering the uncertainty of human and parliamentary life, to say what should be done six months hence, but some steps might be taken in the interval of the recess to procure the necessary documents from China, and in the meantime hon. gentlemen on both sides of the House might express their opinions on the subject. After the debate is over, I attach very little importance to the fate of the motion; but it is important people should know in China that this country is dissatisfied with the present state of things, and is not prepared to endorse the conduct of any Englishman which may involve a repetition of our Chinese disasters. I hope that during the recess nothing will be done to give us greater cause to blush than now, or to increase the humilation which we must feel at what has passed, and that every man in that distant country, whether official or merchant, will bear in mind that, in dealing with an ancient but helpless people, it is our duty and interest to act in accordance with the mild character of Christianity. (Cheers.) The hon. member concluded by moving the following resolution:—"That in the opinion of this House, the policy of non-intervention by force of arms in the internal political affairs of foreign countries, which we profess to observe in our relations with the States of Europe and America, should be observed in our intercourse with the empire of China."

Mr. LAYARD observed that this question had been frequently before brought under the notice of the House, and he fancied that the large audience now present was owing not so much to the attraction of the piece as of the actor. The hon. member for Rochdale had made a speech characterised by great ability and moderation, and he would do his best to answer the statements which the hon. member had made. When on a previous occasion there was a difficulty in keeping together a House to listen to a debate on China, that arose, not from the Government being desirous of a "count out," but because the House felt that the proposition to call on the Government to reverse the policy they had pursued in China involved too great a responsibility for the House to undertake; and he would be able to show that disastrous results would have ensued from the adoption of the course then recommended by several hon. members, not only to the commerce with China, but to the interests of a large number of English merchants. But after those speeches either no resolution was put to the House, or the House was counted out in consequence of there not being 40 members present. He never very clearly understood what those hon. gentlemen meant. The hon. member for Montrose the other evening, after blaming the Government for their policy, concluded by wishing that they should continue to defend the Treaty Ports and to protect British interests in China. Why, that had always been the policy of the Government, and therefore, as between them and those hon. gentlemen, the question became one of degree and not one of kind. But now the House had a totally different state of things before it. His hon. friend the member for Rochdale had brought forward a new policy. He said the time was come when we ought to abandon the policy on which we had acted in China, and adopt another and a different one. That was an original view, and such a one as might be expected from his hon. friend—one displaying great capacity and knowledge on the part of the hon. gentleman; but he thought he should be able to show the House that it would be impossible to adopt it, and that to reverse our policy in China would be to give up our commercial position in that country.

His hon. friend had stated that China was the only country with which our trade had not increased; but he did not think even the hon. gentleman's own statistics bore out that view of the case, because in the end of his speech he said our trade with China had increased threefold within the last few years. He also said that the statistics quoted in that House on behalf of the Government were not trustworthy,—that the most reckless disregard of facts, accompanied by emphatic blows on the box, was exhibited at the table of that House. The hon. member characterised the noble lord at the head of the Government as the master of that proceeding, and paid him the compliment of saying that he was the most promising of the noble lord's pupils. (A laugh.) He should be proud of the past and hopeful of the future if the latter statement were correct, but he knew his hon. friend only paid him an empty compliment. He would now call the attention of the House to a few statistics which he had gathered from official returns laid upon the table from year to year, and if his hon. friend doubted them because they were official reports he would refer to reports given in China by persons not connected with the Government, but connected with trade, and who had no interest in misrepresenting the facts. He found from the returns headed "Declared value of British and Irish produce exported from the United Kingdom to various countries and British Possessions" these results relating to the exports to China, exclusive of Hong Kong:—That in 1854 the amount was £532,639; in 1855, £888,679; in 1856, £1,415,478. There was a gradual increase till 1861, when the amount was £3,114,157; but in the following year there was a sudden drop to £2,024,118, which was easily accounted for. It was owing to the cotton famine, and the consequent decrease in the cotton trade. The value of the imports into China was in 1854 £9,125,000; in 1862 it was £11,699,964, and the exports increased from £1,000,000 in 1854 to £5,451,557 in 1860. There could be no doubt whatever that those returns were accurate; but if his hon. friend should be inclined to question them he would refer him to returns published in a supplement of the *London and China Telegraph* for the 7th of last March. In that broadsheet it was observed:—

"The advance of the import trade from China is very remarkable, the value having doubled within the past two years. The imports of tea here have been very large—a considerable quantity now coming here for reshipment to the States of America, Russia, and other parts of the continent. Chinese wool keeps steady, although showing no very large increase, and a new item appears in the imports of cotton. Hitherto China has been an importing country, receiving large supplies from India, instead of an exporting country. The value of British exports to China has been rather on the decline of late years, but this arises in a great degree from the decrease in the shipped cotton manufactures, which is scarcely one-fourth of the amount of former years. Beer, coals, iron, lead, hardware, and other principal articles keep pretty steady."

Our imports of tea from China and Japan had risen from 75,000,000 lb. in 1859 to 134,000,000 lb. in 1863. In a former debate it was alleged the proceedings of the Taipings had caused no diminution in the export of silk, and his assertion that it had decreased while the export of other articles had increased was questioned by some hon. members, but in the same paper he found this statement:—

"The total export of silk from Shanghai during the year (January to December) 1862 was 84,983 bales, against 70,459 during the preceding year; but out of this increase 8,330 bales were Japanese silk re-exported, so that the increase on Chinese produce was only 6,194. A portion of this, too, may fairly be assumed to have been diverted from Ningpo, where the falling off during the last six months of 1862 was 6,620 bales; so that unless an increase be assumed at the latter port during the six months of Taiping occupation, the export of silk from the two ports has actually decreased. According to the annual circular of Messrs. Durant and Co. there was a diminished import here in 1863 of 21,400 bales of Shanghai silk, 800 of Canton silk, and 900 of Chinese thrown silk, but an increased import of 14,000 bales of Japan silk."

His hon. friend the member for Rochdale had said that on a former occasion he had quoted statistics of the accumulated trade in China, instead of those of the trade of China with this country; but it would be in the recollection of the House that he had quoted those figures, as returns of the accumulated trade, in order to show the good results that had followed from the protection of the treaty ports by the British Government with our French and American allies. His hon. friend said that, instead of having commercial intercourse with China in the towns of that country, we ought to conduct our trade with the Chinese in free ports, and the hon. gentleman pointed to Singapore in proof of the success of a similar policy. His hon. friend thought we ought to choose an island in the Northern Sea, and another in the Southern, and there establish free ports. We made Hong Kong a free port when it was ceded to us; but our doing so caused very considerable annoyance to the Chinese. They would not give their consent to the adoption of his hon. friend's plan, and therefore it would be impossible to adopt it, for it was only after a long war we obtained the cession of Hong Kong. (Hear, hear.) If we could not obtain those islands by negotiation, then, of course, we must go to war to compel the cession. There was no alternative. But there were other Governments in China besides ourselves who would ask for similar concessions, and it was impossible not to see that such a policy would get us into endless difficulties, both with China and foreign Powers. What had been our policy in China? We had obtained from the Chinese the right of trading at certain ports which had heretofore been closed against us. As soon as British and foreign trade was admitted into those ports an immense increase of commerce took place. Shortly afterwards the Taiping rebellion broke out. The Government had often been charged with having interfered in this domestic quarrel between the Taipings and the Chinese Government—(hear, hear)—but that was not the case. Our only interference had been to prevent the Taipings entering the treaty ports. We had nothing whatever to do with them until they approached the treaty ports, and they might have gone on fighting for centuries if they had not threatened those ports. There was not a diplomatic agent, a missionary, or a merchant in China who had not urged Her Majesty's Government to defend the treaty ports against the Taipings. Everybody concurred in asserting that the Taipings were utterly incapable of forming a Government; that they would not respect our treaties with the Chinese, and that if they were allowed to take the treaty ports British and foreign trade would be utterly annihilated. In the face of these representations what a responsibility would have rested on the Government

Digitized by Google

if they had permitted the Taipings to enter the treaty ports! His hon. and gallant friend behind him was fond of quoting anonymous writers and newspaper extracts in favour of the policy he recommended—the other night he produced a string of newspaper columns as long as a tailor's measure; but he had never heard of any evidence given by any person of authority and knowledge in favour of establishing relations with the Taipings. When Admiral Hope went out he was exceedingly desirous to treat the Taipings as a Power equal to the Chinese, with whom we could treat in the same manner, and he paid a visit to Nanking for the purpose. But he failed altogether, and he was the last man in China to give up the idea that relations could be established with the Chinese. His hon. friend maintained that the Taipings were not destructive, and he was unwilling to accept the evidence of Ministers and Consuls to that effect. In fact, he, and some other hon. gentlemen as well, seemed to think that there was a perpetual plot going on in China to deceive Her Majesty's Government. (Hear, hear.) There was no doubt about it, however. Everybody who had seen anything of the proceedings of the Taipings concurred in so describing them. Nanking, Hankow, and other flourishing commercial towns were ruined the moment they fell into the hands of the Taipings. A great deal has been said about the thirty miles' radius, but no general principle had ever been laid down that there should be a thirty miles' radius from all the ports. At Shanghai that radius was the military line of defence pointed out by the military authorities. At other ports a ten or twenty miles' radius might be sufficient. It was altogether a military question. It was true that this thirty miles' radius had been passed on several occasions, and the officers were not always justified in passing it. In several instances the Government had condemned officers for passing it; in others they had acknowledged the force of the reasons on which they had acted. It was thought necessary on one or two occasions, in order to prevent the Taipings closing the roads which lead to Shanghai, to dislodge them from posts outside the thirty miles radius. The hon. gentleman had condemned Sir F. Bruce as one of the authors of this policy, but on other occasions it had been said that Sir F. Bruce had opposed the policy of the Government, and that the Government had gone against the recommendations of Sir F. Bruce. The hon. member for Montrose went so far as to say that the Government had suppressed a despatch, or, rather, a memorandum, signed by Sir F. Bruce and others, disavowing the policy of the Government, and another hon. gentleman said that an admission had been with difficulty extracted from him that such a memorandum had been received. That showed the reckless manner in which statements were made in that House—(an ironical cheer)—for there was not a single word of foundation for that statement. Sir F. Bruce communicated a despatch and enclosures to Mr. Burlinghame, the American Minister, who wrote to his Government to say that he had seen that despatch, and had a copy of it, but requested that it should not be published until the English Government had published it. He himself was the first to bring that despatch under the notice of the House. He quoted from it to show the entire concurrence of Mr. Burlinghame in the policy proposed to be pursued by Sir F. Bruce—(hear, hear)—and he also stated that that was the policy which had been followed by the Government. ("No, no.") There had never, he might add, been any difference between the Government and Sir F. Bruce as to the policy which he should pursue, and he had over and over again borne testimony to the great ability and tact with which that gentleman had conducted his communications with the Chinese authorities. He could not lay the despatch in question on the table because it contained observations on the policy of foreign States which it would not be conducive to the public interests to publish, but he would to-morrow or the next day produce extracts from it which would give all the parts to which allusion was made by Mr. Burlinghame. One extract which bore on the point at issue he might be allowed to read. It was as follows:—

"On the appointment of his Imperial Highness to the post of Prime Minister Sir F. Bruce had strongly urged Her Majesty's Government—firstly, by protecting the ports against the rebels; secondly, by aiding it in the organisation of a regular executive. The feeling of the British nation is always opposed to interference in the internal dissensions of other States. Sir F. Bruce had, notwithstanding, on his own responsibility authorised Her Majesty's army and navy stationed in China to defend the ports against the rebels; and it is entirely due to the allied forces that Shanghai and Ningpo are not now in rebel possession."

Then Sir F. Bruce himself suggested the employment of British troops in the defence of Shanghai, so that a distinct contradiction was given to the allegation that there was any disagreement between him and the Government on the subject. But be that as it might, was it, he would ask, or was it not, the fact that the position of China was improved? His hon. friend had quoted the correspondence relative to the destruction of certain junks by British officers, but it was perfectly clear that if a similar circumstance had occurred some years ago, instead of Prince Kung writing a diplomatic note to Sir F. Bruce, and negotiations taking place, war might have ensued between the two countries. Lord Elgin was, he also thought, perfectly right—and the result justified his conduct—in pressing on the Chinese the conditions to which he endeavoured to obtain their assent. Constant intercourse now took place between Sir F. Bruce and the Imperial authorities, and matters leading to irritating controversy were settled with comparatively little difficulty. With respect to our having entered into treaty engagements with Japan, his hon. friend seemed to forget that we were not the first to adopt that course; that a similar treaty had previously been concluded by the United States and Russia with that country, and that he himself would in all probability be the very first to condemn the Government if they had declined to follow in the same direction. His hon. friend, he would further observe, condemned the existence in China of a state of things which no longer prevailed in that country. There was no doubt still in China much which was to be deplored. The collection there of large numbers of idle persons, known as filibusters, was a great evil, and imposed on the British Government a great responsibility. Such a state of things could not, however, be avoided, unless we were prepared to withdraw from China altogether. What, under the circumstances, had we done? We had established that extra-territorial system, which he admitted was open to objection; but which, considering the cruel character of the Chinese, was necessary for the protection of our own people and to prevent them from being exposed to unduly severe punishments. The exertions of our consuls under the system had, he believed, already tended very much to check crime in China and to exclude from it idle and worthless persons. Nevertheless, acts were frequently committed by British subjects which deserved severe punishment, but in all these cases the offenders had been fairly tried, and entire satisfaction had been given to the Chinese authorities. It was all very well to say that we were supporting in China a usurping dynasty, but having spoken much on this subject with Mr. Lay, who was perhaps better acquainted with that country than any other living man, he had been assured by him that the present was a popular dynasty, that the people looked upon it as having conferred upon them great benefits, and were willing to remain under it, while they looked with horror on the rebellion. Those were facts which he had never heard contradicted on reliable authority, and he asked the House, with confidence, whether after the explanations which had been given it would be possible for the Government to change the policy which they pursued, an order in Council having been issued to the effect that British officers must no longer take service under the Chinese Government. Therefore, our exertions were now limited to the defence of Shanghai and the treaty ports. Those ports we must defend against the Taipings, for if we allowed the rebels to enter them, Europeans by thousands and Chinese by tens of thousands would be slaughtered. If Shanghai, that great emporium of trade, which, according to Sir F. Bruce, contained 1,500,000 inhabitants, was allowed to fall into the hands of the Taipings, and to become a desert like other great cities of China, a vast responsibility would fall upon the Government, from which they would never be able to escape. (Hear, hear.)

Lord NAAS, referring to the statement of the Under-Secretary for Foreign Affairs that he could not find out the meaning of those who condemned the policy of the Government in China, said that what they meant was that the Government ought to maintain a policy of absolute neutrality between the two contending parties in that country—(hear, hear)—and to require all their *employés*—whether diplomatic, military, or naval—to abstain from mixing themselves up with the internal affairs of the Chinese Empire. (Hear, hear.) That had not been the policy of Her Majesty's Government since about six months after the signature of the Treaty of Tien-tsin; and if they were now returning to the policy which Earl Russell laid down in his despatch about that time, it was because they had tried a different policy and it had failed. It was true that he and those who agreed with him in condemning the policy of the Government had always admitted the necessity of defending the treaty ports, and protecting the enormous amount of British property which was to be found in the towns and cities of China; but they had always maintained that our interference with the internal affairs of the empire endangered the safety of that property, and was calculated to defeat the objects which the Government professed to have at heart. Last year he showed that with regard to these particular matters the policy of the Government had been one essentially of interference, and he ventured to predict that on all these points it would be a failure. He was surprised to see how quickly his prediction had been fulfilled. The foreign Inspector of Customs had been ignominiously dismissed; the flotilla which went out under the command of Captain Sherard Osborn had been as ignominiously withdrawn and disbanded; the Anglo-Chinese force, which was under the command of a very gallant gentleman, Major Gordon, was at present in a most critical state, and its maintenance would be so fruitful a source of danger to our relations with the Chinese Government that he did not believe that the Ministry would long be able to hold it. (Hear.) The Under-Secretary of State having taken credit for the success of the Government policy in China, it was necessary that he should show the House what the Government really had done with reference to these matters. He would not go minutely into the history of Captain Osborn's expedition, but would refer to only one or two points to show with what carelessness and almost recklessness the Government went into that most wild and extraordinary scheme.

Before the expedition sailed last year he denounced it as impolitic and dangerous, and ventured to say that the Government had taken upon themselves, without authority from a foreign Government, to despatch to it a large armed squadron. The hon. gentleman the Under-Secretary for Foreign Affairs contradicted him flatly upon that point, and stated that the persons who had come to England to organise the expedition were armed with full and complete powers, and had satisfied the Government upon that subject. What were those powers? He found that Earl Russell very naturally suggested that Mr. Lay should produce some written authority from the Chinese Government before the consent of the Foreign-office was given to his request, or the orders in Council were repealed. Mr. Lay's answer was that he had received such an authority—from whom?—from Mr. Hart, his *locum tenens*. The Chinese Foreign Board had no doubt told Mr. Hart that if he could send them any vessels they should be glad to receive them, but there was no written authority from the Chinese Government stating on what conditions this force was to be raised, or what treatment it was to receive when it arrived in China. Sir F. Bruce himself said that, although the fleet left England in the winter, it was not until the arrival of Mr. Lay in China in the following spring that the Chinese Government had any intimation of the position of affairs, of the cost of the vessels, or of the nature of the undertaking entered into by Mr. Lay. Therefore if our Government was not in ignorance as to the intentions of that of China, the Chinese Government was in total ignorance as to the cost, the intentions, and the objects of this expedition; and yet the Under-Secretary of State assured the House that the Government knew all about it and were in perfect accord with the Chinese Government and with Mr. Lay, who had come to this country armed with full powers to negotiate. If that was not keeping the House in the dark he did not know what it was. There was a still more serious matter connected with these negotiations, to which he must call attention, because it showed how very suspicious was the nature of the whole affair. Mr. Lay and Captain Osborn made an agreement between themselves in this country which came to this, that Captain Osborn was to have the entire control of the vessels, and that he undertook to act upon all orders of the Emperor conveyed to him by Mr. Lay, but that Mr. Lay was not to give any orders unless he approved them himself. So that Captain Osborn was to be entirely under the control of Mr. Lay, and was to receive his

Digitized by Google

orders from no one else, although nominally in the service of the Emperor of China. There was a sort of agreement between the Chinese Government and Mr. Hart, and it had been stated that Mr. Lay must have been conversant with an agreement that Captain Osborn should be associated with a Chinese officer of high rank, who should control all matters relative to the fleet. It was clear that Her Majesty's Government were entirely imposed upon by the representations made to them. So little indeed did they think of the importance of this expedition that they sent out no instructions to the Ambassador at China when the expedition sailed, from which Sir F. Bruce inferred that Earl Russell could have no intention of being a party to the engagement. It was entirely owing to the neglect of the Government and the carelessness with which the expedition was sent forth that British officers and the British name had been subject to such an indignity as the contemptuous dismissal of Captain Osborn.

It was impossible to continue these Anglo-Chinese expeditions, to which he took exception last year. The great difficulty in China is that the central authority was weak and the local authority strong, and he agreed with the hon. gentleman (Mr. Cobden) that the evils that afflicted the Chinese Empire were not likely to be remedied by these proceedings, and that no act of ours ought to increase them. These contingents had done more to weaken the central authority and strengthen the corrupt local government of the mandarins than anything else could have done in China. The House would be surprised to hear that Captain Gordon and his officers were not in the service of the Emperor of China at all. They were under the orders of the Futai of Shanghai, an almost independent Prince, who habitually set at naught the orders he received at Peking. Let him implore the House to consider the disgrace that was brought upon British names and British arms by any man wearing Her Majesty's uniform and in command of such a force. (Hear, hear.) He would remind the House that an act of the grossest treachery had been committed, contrary to the wish, but under the very nose of the officer commanding the force. An agreement for the capitulation of a town was made between the chiefs and Captain Gordon, but as soon as the Imperial General got them in his power he cut off their heads. In another disgraceful case seven Chinamen were tortured in the very camp and station occupied by Her Majesty's forces. It was impossible to continue this species of assistance without being mixed up in these abominable acts. Take the case of Colonel Burgevine, who succeeded to the command of the English contingent after the death of Mr. Warde. He was dismissed by the Chinese Government, in opposition to the opinion of Sir F. Bruce, who thought it safer that the force should be under the command of a foreigner than an Englishman. He deserted to the Taipings, where he shot his second in command. He then left the Taipings and returned to Imperial territory. Capt. Gordon thought it of great importance to get his name back into the Imperial service. What proposal did he make to Captain Gordon?—that as they were both tired of serving the Taipings and the Imperialists, it would be better for them to set up for themselves, and create an army and an altogether independent Power in China. (A laugh.) He then made a piratical attempt on a steamer at Shanghai, and was at last sent out of the country by the American Consul. The truth was that these Eastern waters were so infested by men of Burgevine's stamp that it was impossible to officer the Chinese forces without having recourse to their assistance. It was perfectly impossible that any course of action at all creditable to this country, or in accordance with the general feeling, could be carried on with such tools as were to be found at our disposal in China. (Hear, hear.) No wonder, therefore, that the Chinese Futai should have said that actions such as those of Burgevine and his comrades were altogether without the pale of civilisation. He wished to say nothing disrespectful of the English gentlemen who were engaged in those affairs. He believed many of them were gallant men and wished to serve their country; but daily contact with the people they had to do with, and with the scenes which they had to witness, would in the end blunt the finest sensibility. (Hear, hear.) He greatly feared in the case of Colonel Gordon that as a Chinese commander he had witnessed and participated in acts which the young engineer officer in the Crimea 10 years ago would have recoiled from with horror. (Hear, hear.) No doubt the temptation was very great, and very large sums were offered for the services of such men. By the blue-book upon the table it would be seen that Mr. Lay himself made upwards of £10,000 in the last year. Those temptations ought not to be held out to British officers, and he implored the Government to prevent British subjects from yielding to them whenever they could. (Hear, hear.)

But to turn to another subject—he was somewhat surprised at the repeated statements made by the Under-Secretary (Mr. Layard) as to the opinion of the best authorities in China upon the policy of the Government. The hon. gentleman had endeavoured, on various occasions, to show "that the policy of Her Majesty's Government had been approved by the merchants in the East, by missionaries, by naval and military authorities, by Sir F. Bruce, and Mr. Burlinghame, and he hoped it would be approved by the House." Now, he (Lord Naas) thought he could show that every one of those authorities had individually expressed his disapproval of that policy. (Hear.) With regard to the missionaries, taking as an instance Dr. Legg, who had spent the greater portion of his life in China, who was a ripe Chinese scholar, and whose personal predilections would incline him to a favourable view, he had condemned the policy of the Government two or three different times. Sir F. Bruce had pronounced an emphatic condemnation of that policy; he showed how impossible it was that the flotilla could succeed, and was delighted at having got rid of it, and his opinion of the contingent was equally unfavourable. He could not but express his astonishment that the hon. gentleman should to-night have repeated the statement which he had made on a previous occasion as to the views of the merchants in China with regard to our policy. The memorandum of the Chamber of Commerce of Hong Kong had been already read to the House. But the hon. gentleman said that was not the opinion of Shanghai merchants. But anybody that knew anything about China was aware that the Hong Kong merchants were intimately connected with Shanghai, and he had himself received a personal assurance on the subject from a gentleman who had large trading transactions with Shanghai. [Mr. Layard: "What I said with regard to the unanimous testimony of merchants and missionaries was with reference to the Taipings."] That was not what the hon. gentleman had stated, because he had his words there. (Hear, hear.) And, besides, they must take the rebellion as it stood, and when the hon. gentleman spoke of the policy of Her Majesty's Government in China they could not pick out this or that particular part of it. However, he (Lord Naas) distinctly affirmed that even the policy of the Government, with regard to the Taipings, had been disapproved by all the authorities he had quoted. (Hear, hear.)

The hon. gentleman had read a portion of a despatch from Mr. Burlinghame, the American Minister, as if he and the other representatives of the foreign Powers approved of the policy of Her Majesty's Government. He (Lord Naas) had taken the trouble to discover that despatch, and he found that instead of being favourable it was perhaps the strongest thing that had ever been written against the policy of Her Majesty's Government in China. (Hear, hear.) Mr. Burlinghame stated that he gathered together the representatives of the Foreign Powers in Peking, in order to come to some joint understanding, the principal object being to alter the policy which had been carried on by Her Majesty's Government and to return to the policy of total and absolute neutrality. (Hear, hear.) And first he quoted the opinion of Sir F. Bruce to the effect that he did not wish that any English officer should lead troops against the Taipings, he would much prefer that the Chinese should take men from the smaller States of Europe, and relieve England from being considered the bully of the East. (Hear.) Mr. Burlinghame said that he was for a change of policy, declaring that the course of policy which had been pursued was wrong. This was in the very despatch of which the hon. gentleman quoted a portion the other day to prove that Mr. Burlinghame and Sir F. Bruce approved the policy of the Government; and Mr. Burlinghame went on to congratulate his Government that he had been able to persuade Sir F. Bruce to write a despatch strongly disapproving the policy of Her Majesty's Government, and recommending an instant change. He trusted that that despatch would be published. It appeared also that Mr. Burlinghame wrote to his Government to the effect that if he had known the constitution and nature of Captain Osborn's force, he would have objected to its employment, unless commanded by a mixture of officers, and not placed entirely at the disposal of an English captain. No one could read these despatches without being of opinion that they were opposed to the sense in which they were quoted by the hon. gentleman the other evening. It was notorious that Sir J. Hope did not approve Captain Osborn's expedition; and, no doubt, Captain Osborn would have as strongly condemned, had his opinion been asked, Captain Gordon's contingent. He thought that he had now disposed of the various authorities which the hon. gentleman had quoted for his policy, and shown that they, one and all, concurred in strong condemnation of it. Any hon. member reading the blue-books—and particularly the last blue-book—must be struck with the absence of any explanation on the part of the Government as to the various important questions which arose. Perhaps European diplomacy had within the last six months overtaxed the powers of the Secretary of State for Foreign Affairs. It was true that England was supposed to be a first-rate European Power, though the events of the last six months might perhaps have changed that opinion—(a laugh)—but in Asia England was all powerful, and its influence was paramount. England was in possession of an empire in India, by the side of which every other Asiatic Power was entirely dwarfed, and out of this state of things arose the relations of this country with China. They certainly seemed to be sufficiently important to justify the devotion to them of a large portion of interest and attention on the part of anyone presiding over the Foreign-office. When it was recollected that during the last twenty years much of English blood and treasure had been spent in China with little honour, it behoved those who conducted the foreign affairs of this country to be, at all events, careful that nothing was done in China without their special and direct authority; but he did not find in the blue-books any indication of any policy whatever on the part of Her Majesty's Government. (Hear, hear.)

The affairs of China were left to take their course, and the consequence was this country was drifted into difficulties and dangers in connection with that part of the world. This circumstance assumed importance when it was considered how necessary it was that, in dealing with a people so peculiar as the Chinese, the English should consistently endeavour to set them a good example. The Chinese were most jealous of foreign interference, and until lately they excluded all foreigners from China. Such being the case, the English ought to be particular to show the Chinese that they had no object of conquest or aggrandisement, and that national honour depended on the fulfilment of national obligations. He feared, however, that what had occurred since the treaty of Tien-tsin had impressed the Chinese with a totally different opinion, and had tended not to remove, but to increase old jealousies. There were three other Powers besides England who had distinct and very considerable interests in China. The interest taken by America in Chinese affairs was shown by the despatches of the American Minister. France had a missionary interest in China. French ecclesiastical establishments were springing up there, and Jesuits were engaged in preparing Chinese boys for those competitive examinations by which alone admission was gained to the civil service of China. (Hear.) Russia had still greater interests in China. By means of the telegraph St. Petersburg was now within fourteen days' connection with Peking, and it was highly probable that before the expiration of twelve months the connection would only take three days. There could be no doubt that Russia had ambitious views in the direction of China, and before long we might see a new Sebastopol springing up, which would be a standing menace to the trade of other nations with the Chinese. If we persevered in the course which we had taken, and availed ourselves of that influence which the employment of British military officers in that country would give us, we could not be surprised if before long we found French, Russian, and American contingents mixing themselves up in the internal disputes of China. (Hear, hear.) He was bound at the same time to express his opinion that the policy which the hon. member for Rochdale had indicated would hardly be possible at present. Ex-territorial jurisdiction was no doubt an evil, but in the case of China he believed it was a necessary one, for we could not hand over English subjects to the Chinese Courts. He was glad that the hon. member for Rochdale had rather intimated his intention not to take the sense of the House on his resolution. The time for resolutions about the policy of the Government in China had gone. The

Digitized by Google

evils resulting from that policy were curing themselves. What the position of British officers serving with the Chinese now that the order in Council had been withdrawn was not very clear. Last year he ventured to say that the policy of the Government in China was such that success or failure was equally to be apprehended. His words had since been verified; and he could not think that any Government would preserve in a policy which had been attended with such consequences. (Cheers.)

Mr. B. COCHRANE thought the House were indebted to the hon. member for Rochdale for having given them an opportunity for the full discussion of this question. After the able speech of the hon. member and the eloquent remarks of his noble friend the member for Cockermouth, he should not take up the time of the House, only it was due to the hon. member that those who agreed with him should state their sentiments on this occasion. The Under-Secretary for Foreign Affairs, in replying to the speech of the hon. member for Rochdale, quoted figures, the accuracy of which he for one disputed; but, assuming them to be correct, the hon. member treated this question too much as one of trade, and did not seem to regard it as one affecting the dignity, the honour, and the character of this country. (Hear, hear.) He felt that the honour, interests, and character of England had suffered by the policy which had been followed in the East. (Hear, hear.) Accounts had just been received that Colonel Gordon and his disciplined force had received a most severe defeat at a place some seventy miles from Shanghai, far away beyond the thirty miles radius; and what would be the effect, coming on that defeat, of the news of the revocation of the order in Council, and the consequent recall of Colonel Gordon? It would certainly be most disastrous to the *prestige* of England. He did not say that it was wrong to repeal that order in Council, but the effects which would certainly follow that revocation would be due to that meddling interfering policy which, mischievous everywhere, had never been so mischievously carried out as in China. (Hear.) It had been said that it was no use discussing this question because when instructions deliberately framed in this country had been sent out circumstances might have so altered in China that they would be no longer applicable. But that was in his opinion the very reason why the House of Commons should fully discuss everything connected with our Chinese policy, since when any course had been decided upon it was so difficult to reverse it. The Under-Secretary had referred to the great benefits conferred on this country by the extension of trade, but he should like to have added up all that the wars caused by this policy had cost the country, and then to make a debtor and creditor account, and see on which side the balance lay. (Hear, hear.) One effect to be feared from our policy was the demoralisation of a portion of the Christian inhabitants of those countries. Those best capable of understanding the state of things in China concurred in regretting the conduct of many of Her Majesty's subjects out in China, and, he was sorry to say, also of some of our merchants. Speaking to the merchants of Shanghai, Lord Elgin said:—

"Neither our own consciences nor the judgment of mankind will accept us. When we are asked to what use we have turned the opportunities, we can only say we have filled our pockets from among the ruins we have found or made. An eminent French writer has observed that it is one of the glories of Christian civilisation that it has caused a sentiment of repentance to find a place in the hearts of nations; let us hope that it will not be by pointing this moral that great Britain, when she comes to review her connection with the furthest East, will make good her claim to the title of a Christian nation."

A gentleman long resident in China wrote in 1860:—

"Our own advantage has been the regulating principle of our policy. We make exactions when it suits us, and do not exact them when inconvenient. Our diplomacy has resulted in confusion worse confounded. We shall probably now have to overthrow a Government we have been endeavouring to support. Had we been more considerate we should now have less to deplore."

The misconduct of our traders was not a matter of yesterday. Two hundred years ago Dryden wrote of them,—

"Industrious of the needle and the chart,
They rush full tilt to the Japonian mart;
Bereft of shame, and prodigal of fame,
Sell all of Christian to the very name."

And these lines were applicable to the conduct of too many of our merchants still. This was the language of Sir Rutherford Alcock on this subject:—

"We are threatened with the same dangers now, by persons wholly regardless of what may happen if they can only secure their own temporary advantage. But it is the business and the duty of all foreign representatives to prevent a few individuals thus endangering the relations and damaging the permanent interests of nations. It is better that there should be no trade than a trade carried on under such conditions as those which it has been attempted to impose. It is better that there should be no intercourse than relations of ill-will and conflict, threatening only war as a final result."

It certainly was very humiliating that periodically these lectures should be read to British merchants to teach them how to conduct themselves in their relations with foreign countries. The hon. gentleman said that Sir F. Bruce approved all that had been done in China, but such was not the fact. So far from Sir F. Bruce approving the policy of the Government, he had throughout conducted himself in a most able and proper manner, placed as he was in a most difficult position. Writing in one of his despatches with respect to the conduct of our consuls, he said:—

"I have also to observe that the Chinese Government in employing foreigners in its Custom-house is doing what foreign Powers have advised her to do, and following a system of improvement which in other countries has led to the best results. I expect Her Majesty's consuls to set an example to foreign communities of treating with respect the gentlemen who hold these important offices, and who are not inferior to them either in character or social position. It is your duty in this way to strengthen their influence with the Chinese provincial authorities, as it is to that influence that we must look for the peaceful execution of treaty privileges, and for the gradual introduction of progressive ideas into Chinese administration which will enable us to accommodate its maxims to the growing development of trade."

The hon. gentleman was, therefore, greatly mistaken in supposing that our policy had the approval of Sir F. Bruce, though it might have the approval of a great many subordinate officials in China, and of those who were prepared to take advantage of the confusion which they created in that quarter. Mr. Burlinghame, he might add, distinctly laid down, with Sir F. Bruce, the principles on which we were to interfere at all, which was simply to defend the treaty ports against the Taipings, but in such a way as not to make war on that considerable body of the Chinese people; and Mr. Seward, in reply to the despatch setting forth that policy, characterised it as wise and just towards the Chinese. And what, he would ask, was the cause of the rebellion in China? If the course which we pursued did not lead to it, it was, at all events, quite clear that by weakening and degrading the Government at Peking we strengthened the Taipings, and that we were thus indirectly contributors to the success of the insurrection. It was, however, said that our interference was based on the ground of humanity, but on reading the other day a very interesting work on the subject he found a very different account given of the Taipings from that which appeared to be generally accepted as correct. Mr. Forrest, in a work published in 1862, said of them:—

"It is impossible to live among the people a long time and not take an interest in them, and in a certain way to like them. I have met with not only civility, but actual courtesy from them, and shall never regret the time I have spent among them. Heaven forbid that England or France should ever make confusion worse confounded by interfering in the struggle now raging. After seeing a great deal of both parties, I must confess I have no better opinion of one than of the other."

Now, we might talk of a selfish policy and the necessity of pursuing a particular course in the interests of commerce, which seemed to consist in killing our customers; but let us not in support of such a policyt as that which we pursued in China invoke the name of civilisation and he interests of humanity. We seemed, in fact, to act on the principle of interfering everywhere, and our policy in the East was most ridiculous and inconsistent. One day we fought against a great Power in the East, and the very next allowed our fellow-countrymen to aid in strengthening it as much as possible. The plea of humanity was put forward in defence of the course which we took, but if that was the true ground of our interference in China how came it to pass that we did not interfere in the struggle which was going on at the other side of the Atlantic? On the same principle on which our officers were allowed to serve in China we might have permitted recruiting and interfered in the struggle in America. The reason of the difference which was made between the two countries was that America was a powerful and China was a weak one. If it was said that the Government had done what they had out of regard to the national honour and dignity, he replied that they might have interfered in a country nearer home, the sufferings of which had been caused by their foolish intervention and perpetual meddling. (Hear hear.) Allowing our men to go and fight in a quarrel in which they had no concern was nothing better than murder, and it was peculiarly disgraceful that we should adopt such a course at the very time when Switzerland, which in former times permitted its subjects to sell their blood to foreigners, had abandoned that practice. The hon. member merited the thanks both of the House and of the country for his clear exposition of the policy which we ought to pursue in China, and if it put an end to this objectionable and criminal intervention, not only our country, but the whole world and civilisation itself would be indebted to him. (Hear.)

Mr. LIDDELL said he must contest the accuracy of the statement made by the Under-Secretary for Foreign Affairs that if the policy of the Government had not been reversed disasters might have occurred. He maintained that disasters had already occurred. At the date of the latest advices Major Gordon was lying severely wounded in the interior of the country. He had lost a large proportion of his officers. His communications had been cut off, and there was too much reason to fear that the next advices would bring news of the loss of his whole force. The fact was that the Government had receded from their policy, but not before they had taught the Chinese to distrust their own native leaders, who were their natural leaders. The Taipings had also been taught the same lesson of the superiority of Chinese forces when led by European officers. At Shanghai plenty of adventurers were to be found, and there was nothing to prevent the Taipings from availing themselves of the services of foreign officers. He believed that if the civil war in China continued, bands of these adventurers would be opposed to each other. The Under-Secretary for Foreign Affairs complained that the rebels would not observe treaties. He had always felt, on the contrary, a strong conviction that we ourselves had not observed good faith in our dealings with the Chinese. (Hear.) We had pledged ourselves to observe a strict neutrality between the contending parties, but how had that pledge been carried out? It was neither fair nor correct to state that the Taipings—ragamuffins as they were, according to the noble viscount—had failed to keep their engagements towards us. They might be people of low morality, but it was our duty not to lower the standard of our morality to their level, but to raise them to our own. (Hear.) He was sorry to say that, cruel as these people might be, their conduct to ourselves contrasted favourably with our conduct to them. The Government had raised a false issue on this question. Those who opposed their policy in China had never denied that it was their right and duty to defend the treaty ports. If they contented themselves with that, the rebels would never attempt to interfere with them there. But the Government carried their warlike operations into the interior of the country—into the very middle of the silk districts. Since we had carried war into those districts the silk supplies had fallen off. At Shanghai the supplies for a fortnight this year were but 350 bales, against 800 bales for the corresponding fortnight last year, and 2,000 bales for the corresponding fortnight the year before. We had supported the Imperial Government to the utmost of our power; the Taipings knew it, and if they were made implacable enemies, and ravaged the silk districts, we had only ourselves to blame. The present stock on hand was only 3,500 bales, against 8,000 bales which were on hand at the same time last year. But our whole policy in China had died a natural death, and yet the Government were taking a great deal of trouble in defending it. (Hear.) He wanted to know for certain what the effect of the repeal of the order in Council would be. He hoped the House would have a

Digitized by Google

distinct statement that it was retrospective, and not merely prospective. Did it apply to Captain Gordon and Captain Cooke, and the other officers who had taken service under the Chinese Government? He wanted also to know, what he had never yet been able to ascertain, how Captain Gordon had been appointed, because every one of any authority in China condemned the appointment, and also whether he now, or at any time before, held a commission direct from the Sovereign of the country in which he was carrying on war; for, if not, he was simply a filibuster. (Hear, hear.) He hoped that once for all we had done with British interference in China. In conclusion, he begged to thank the hon. gentleman who had lent his high commercial authority, and his position as a statesman in that House, to a cause which was a cause of justice and humanity, and which the policy of the Government had been so well calculated to destroy. (Hear, hear.)

Mr. GREGSON said he had supported the hon. member for Rochdale in his agitation for free trade; but he could not concur in much that he had said with regard to our policy in China. The hon. gentleman had said truly that our object in China was simply commercial, and he (Mr. Gregson) would have been delighted that our relations with that country had never been otherwise. He concurred with the hon. gentleman that it would be desirable next Session to have a select committee to inquire into our commercial relations with China; but he could not agree with him in thinking that those relations were unsatisfactory. The hon. gentleman had said that we were the cause of the present state of things in China, and that we should drive that empire into anarchy. But it had been often stated in that House that China had been in a state of anarchy for a very long period, and it was not owing to us that anarchy had prevailed, was prevailing, and, he feared, would long prevail there. His hon. friend near him (Colonel Sykes) suggested to him that he ought to say a good word for the policy of the Government, as there was no one else to do so, and that was the reason why he stood up there to make a few remarks. He was afraid the suggestion made by the hon. member for Rochdale with regard to opening small free ports would be impracticable. In the first place, by so doing they would have to derange all the present establishments, and in the second place they would have to get the concurrence of the Chinese authorities. Now, Hong Kong had been established as a free port, but as compared with Shanghai it had not been at all successful. His hon. friend alluded to the recommendations made by the Duke of Wellington. Those recommendations might have been all very well for that time, but we had got far beyond that point now. The noble lord (Lord Naas), who had made a very able speech, had appealed to the opinions of the merchants in China. But he (Mr. Gregson) had taken great pains to ascertain from a large number of gentlemen connected with the Chinese trade what their views were, and he found them to be favourable to the policy of the Government. (Hear, hear.) The hon. gentleman then read extracts from letters of Chinese merchants to the effect that the Imperial Government ought to be supported, that the Taipings were only marauders, and that the limited supply of silk was owing to their devastations. The hon. member then referred to the increase which had taken place in the imports of tea and silk from China, and observed that last year the large quantity of 160,000 bales of raw cotton was sent from China, and relief was thus afforded to the manufacturing districts of England. The trade with China was, besides, of considerable importance to the revenue of this country, for the payment of the duty on tea yielded a revenue of about £4,500,000 a year, and during the last 30 years the enormous sum of £160,000,000 had been paid into the Exchequer from that source.

Sir J. ELPHINSTONE had refrained for the last two years from taking part in the China debates, because his predictions with respect to the policy of the Government had been completely verified, and because he did not see any way out of the difficulties into which that policy had led us; but little as he agreed in the course which the Government had adopted, still less could he agree with the hon. member for Rochdale in his plan for extricating us out of our embarrassing position. (Hear.) He had always held that our policy in China should be to support the Chinese chiefs in the provinces where we traded, to support their Government, and not to break in upon the much-cherished privacy of their capital and so destroy the *prestige* of the rulers of the country. Those bands of marauders who were now called Taipings, but who went under different names at different times, had long been the bane of China. When he first visited that empire, which was in 1820, he saw villages that those ruffians had set fire to, and the marks of their brutality on the bodies of those whom they had plundered. Brigandage was the normal condition of affairs in China. It was caused by the descent of hordes from the more sterile districts, in which the population became too numerous for the means of support; but somehow or another those hordes were kept down by the Government of China till we broke down its *prestige*. He did not believe the hon. member for Rochdale's plan of free ports on islands practicable in China. The treaty ports afforded the only means of carrying on our trade there, and we were bound to extend our protection to every one trading in those ports under the British flag. Besides this, in concert with our allies, we ought to adopt active measures to put down piracy in the Chinese waters, and there was no reason why we should not have a treaty in respect to that great navigable river in China which, under God, would, he believed, afford us the means of introducing European civilisation into the heart of the Chinese empire. (Hear, hear.) It was said in the theology of China that when making the world the Creator took a pair of bamboo compasses, and putting one leg into the spot where Peking now stood drew a circle, and so marked out the world, which was China. The hon. member for Rochdale drew a circle of which he made Manchester the centre; but his speech was a repetition of speeches that were delivered when the removal of the East India Company's charter was under discussion in that House. It had been found that the Chinese would not take our woollens. The reason was, Russia sent into China woollen material more suitable to the tastes and habits of the Chinese. He had never believed that the introduction of the opium trade was a disadvantage to China. The food of the lower classes of China—a great deal of pork, sour vegetables, and vinegar—was of a character to produce intestinal disorders, and the little whiff of opium which they took after their meals was of great benefit to them. It was perfectly impossible for a man to make a beast of himself on opium under £120 a year. He hardly saw his way clearly out of the position into which our policy in China had brought us. It certainly was impracticable to adopt the course recommended by the hon. member for Rochdale, but by taking up the matter with a strong hand and undertaking to curb the disorderly spirits who had been attracted to China by the love of gain and who plundered the poor Chinese, by establishing a police force of gunboats along the rivers, we might produce some effect. By no manner of means ought we ever to have anything to do with the Taipings, for a more bloodthirsty, horrible set of scoundrels never existed on God's earth. (Hear, hear.) Nothing had ever shown that they were likely to establish a form of Government. They had no idea of anything but rapine and licentiousness. Certainly he would be no party to recommending the Government to abandon the footing we had in China, but no doubt the committee suggested by the hon. gentleman opposite might be useful in devising a remedy for the evils of the present state of things. (Hear.)

Mr. WHITE thought the policy which had been recommended by the hon. and gallant gentleman must lead to a considerable augmentation in the expenditure we had already incurred in China. The hon. and gallant gentleman had certainly kept his constituents in mind. He had often told the House of the gunboats which were lying at Portsmouth doing nothing, and if his advice were adopted there soon would be plenty for all of them to do. [Sir J. Elphinstone.—They are all rotten.] (A laugh.) He could quite believe the hon. member for Lancaster that many gentlemen having a large stake in China praised highly the noble lord and his policy; but what the House had to consider was, not the interests of a single class of traders, but of the British taxpayers. At what cost had our trade with China been purchased? In his Budget speech of 1863 the Chancellor of the Exchequer told the House of Commons that they had to face a war expenditure of £8,800,000, of which in round numbers £7,000,000 was caused by the war in China, and our Chinese policy at the very lowest estimate cost us an extra half million yearly. If on one side were set the trade we had gained, and on the other the sum it had cost us, it would be seen that there never was a policy which gave such barren results for such an enormous expenditure. (Hear, hear.) The Under-Secretary would find on inquiry at his own office that his figures were ludicrously fallacious, and his facts were pretty much of the same value. At the same time, he could not altogether concur in the course recommended by the hon. member for Rochdale. At the time of the treaty of Nanking it was practicable, and he himself had urged it upon Sir Henry Pottinger at the time. The course which the Government ought to pursue was to dissociate British subjects as much as possible from all connection with the Chinese Government, to require that, within a certain area, Shanghai, Ningpo, Canton, and the other ports should be deemed free, and to leave the sellers of tea and silk to make their own arrangements as to duties with the Government. (Hear, hear.)

Mr. KINGLAKE said the noble lord opposite (Lord Naas) had used a phrase which might, perhaps, be understood in a sense very different from that intended. The noble lord spoke of the force under Captain Sherard Osborn having been ignominiously withdrawn. He felt assured that the noble lord in saying so meant only that the policy which had originated the expedition had totally failed, and did not express any condemnation of Captain Sherard Osborn personally. ("Hear, hear," from Lord Naas.) If there was any fault which a microscopic mind could discover in the conduct of Captain Osborn, it was that he might, perhaps, be deemed too scrupulous as to the point of honour, and too resolute in determining to escape from a position in which he might have been subjected to orders which he thought no British officer could execute without loss of reputation. (Hear.) Great credit was due to the gallant captain for his behaviour in that respect, and also for the success with which he had brought home his force—a feat which could not have been accomplished except by a man possessed of high personal qualities and ascendancy of character. (Hear, hear.) There lay before Captain Osborn and his men the prospect of much fame, and of wealth to a very large amount indeed; but these things could not tempt him, and such was his influence with his force that, of 500, less than thirty failed to return with him to England. (Hear, hear.) He was sure the noble lord would be glad of an opportunity to correct any misapprehension as to his meaning on this point. (Hear, hear.)

Lord NAAS said that nothing was further from his mind in speaking than to utter anything in the least disrespectful towards Captain Sherard Osborn. (Hear, hear.) His remark applied not to the commander, but to the expedition generally and the policy on which it was based. He thought the whole conduct of Captain Osborn, from the beginning to the end of the transaction, was beyond all praise. (Hear, hear.) He had shown an utter absense of selfishness, and a sense of what was due not only to himself as a British officer, but to the interest and honour of England. (Hear.)

Colonel SYKES complained that his hon. friend, the Under-Secretary for Foreign Affairs had tried to delude the House into the notion that the other Powers represented in China were pursuing the same policy as ourselves. On the contrary, while our policy was one of direct intervention on behalf of the Imperialists, the other Powers were resolved not to take any active measures, except in defence of the treaty ports when attacked, and not to allow any of their officers to serve under the Chinese. (Hear, hear.) His hon. friend had also described the Taipings as a sort of human locusts, who destroyed the fertility of the countries through which they passed. Since May, 1860, however, the Taipings had been in possession of the two great silk districts, embracing a vast area of country, and a population of upwards of 60,000,000 souls. (Hear.) He had, he might add, in his hand monthly returns of the exports of silk from Shanghai, and he found that while those exports amounted in 1860 to only 69,137 bales they went on increasing until in 1864 they amounted to 84,933. The hon. and gallant gentleman then proceeded to quote extracts from the evidence of European eye-witnesses to show that from Ningpo up to Way-ho-kow, which lay on the verge of the 30 miles radius of Shanghai, the country was flourishing and the inhabitants happy and contented, while within that radius its aspect was described as that of a desert. In relation to the case of Major Gordon, he went on to say that it was painful to find that anybody in Her Majesty's service should have exposed himself to the odium that was heaped on that gentleman in China. Other newspapers had also condemned the conduct of Major

Digitized by Google

Gordon in speaking of him as an "unprincipled soldier," and another as a "mere mercenary," and he regretted that Major Gordon, who had felt his position to be so irksome that he had at one time tendered his resignation, had not adhered to his resolution and come home. That gallant officer, in a letter addressed to a missionary, said that if half the pains had been expended upon the rebels which had been wasted upon the Imperialists the country would have been at peace long ago; and Admiral Hope, who had been cited as the direct opponent of the Taipings, admitted that they had well observed agreements which they had entered into with him not to approach within thirty miles of Shanghai for a period of twelve months, and not to molest *bona fide* British vessels on the Yang-tse river. It was said that, if the insurgents came to Shanghai, there would be an immense destruction of human life and property; but the fact was that they were for five months in possession of Ningpo, and during the whole of that time they allowed trade to go on without molestation and inflicted no injury upon Europeans. The Taipings had repeatedly offered to us the hand of friendship, but their despatches had been returned unopened, and we had never taken the trouble to ascertain whether we could make any arrangements with them or not. Our motive for maintaining the Imperial Government had been the selfish desire to secure payment of the portion of the indemnity, about £1,300,000, which still remained unpaid. Our acts in China had been dishonourable and disastrous, and were likely to be still more so in the future. (Hear, hear.)

Lord PALMERSTON: I am anxious to say a few words before the House determines the question which has been proposed by my hon. friend the member for Rochdale. It is remarkable that while my hon. friend took a very wide view of the subject according to his notions, those who have followed him have taken a narrow and confined view of it, and have limited their observations chiefly to the recent transactions of the Government with regard to their policy in China. I will, in the first place, deal with the remarks made by the noble lord and those who agree with him. What they have blamed has been the course which Her Majesty's Government have taken latterly in regard to the expedition of Captain Sherard Osborn, the employment of Major Gordon, and the engagement of civilians to assist the Chinese Government in the collection of their Customs' duties and other matters of that kind. It was, I think, almost unnecessary that they should express their opinions with regard to the expedition of Captain Osborn, or the employment of Major Gordon and others, because we stated, on a former occasion, that the orders in Council under which those officers were employed had been revoked, and that there was no intention on the part of Her Majesty's Government to renew them; therefore that policy is at an end. (Hear, hear.) I differ entirely from those who condemn it. I think that we were perfectly justified in the steps that we took, because it is evident that the more we can contribute to the internal pacification of China, the more that trade which everybody agrees to be the main and proper object of our intercourse with China would flourish, and it is quite obvious that in proportion as the interior of China is laid waste by civil war and rebellion, in that proportion must our trade suffer impediment and obstruction. I am very glad that the noble lord had an opportunity of explaining the expression which he used as to the "ignominious failure" of the expedition of Captain Osborn. There was nothing ignominious either in undertaking that expedition, or in the grounds upon which Captain Osborn declined to continue his services. On the contrary, as was stated by my hon. friend, and admitted by the noble lord, the whole conduct of Captain Osborn, from beginning to end, did him the highest possible credit, and reflected honour upon the country to which he belongs. (Hear, hear.)

If by allowing British subjects to enter the service of the Emperor of China we had been the means of strengthening the hands of the Chinese Government and enabling them to put down the rebellion, or in any degree to diminish its scope, we should not only have been rendering a service to China, but should have been promoting those objects for which alone our intercourse with that country ought to be carried on. Those measures have failed. I am sorry for it. They have failed not from any fault of those who planned, not from any fault of those who were engaged in them, but from the effect of those national jealousies which are too apt to prevail in many countries, and which have peculiar force in China, owing to the long established feeling of hostility to anything that is foreign and does not belong to the country. So much for that part of the subject. Then I will take the more extensive view which was taken by my hon friend (Mr. Cobden). He blames the whole policy of England—not the policy of one administration but of all – in regard to our intercourse with China; and he finds fault with different wars in which we have been engaged. Now, the history of our intercourse with China is the natural history of the relations of a highly-civilised with a half-civilised people. (Hear, hear.) It invariably happens that where a highly-civilised race comes in contact with a half-civilised race you find that they act upon different rules of conduct. The highly-civilised race expects good faith, justice, fulfilment of engagements, honour, and an absence from wrong-doing. The half-civilised race, on the other hand, recognises quite a different rule of conduct, which the other cannot submit to. Hence quarrels arise; wars follow the quarrels; engagements, treaties, and conventions put an end to this war; the conventions and the engagements are broken; further quarrels arise; and in that manner relations are embittered, the superior strength and ascendancy of the civilised race assert themselves, and then the other nation, feeling that they cannot with safety or success practice their own rule of conduct, acquiesce in the regulations imposed upon them by their more powerful antagonists. And then comes a peaceful and a friendly intercourse. That has been exactly the course of the relations between this country and China. Now, was our intercourse with China sought for simply by the Government? If the monopoly of the East India company had continued up to this time, if our trade with China had been confined to this company, in all human probability none of these wars would ever have broken out, because the intercourse would have been very restricted, nobody would have gone to China except persons under the control of the company, and the policy of the company would have been to submit to any indignity which might from time to time be offered. (Hear, hear.)

There would have been no national honour at stake, no interest save that of the company would have been concerned, and it would have been thought better to submit to any little indignity and wrong than to break off commercial intercourse without after all having power to redress these injuries. If, therefore, I say the monopoly of the East India Company had continued, the trade to China might have been much less than it is, but we should have avoided the contests which have taken place between the two countries. (Hear.) But it was not in the choice of the Government of the day to continue that system. The whole country cried out against the monopoly of the East India Company. They said it was intolerable that such a trade should be monopolised by a single company, and that monopoly was therefore abolished. Well, then, there was a general feeling that in proportion as the industry and the wealth of the country increased, in that proportion we ought to seek for new markets and new customers. It was said that the nations of Europe were wedded to their protective system, that our intercourse with them must necessarily be limited, and that we must therefore go to other countries where the same impediments did not exist, and find out new markets, and enable the commerce of the country to acquire its full development. When the monopoly of the East India Company was abolished, there came a series of contests. Injuries were inflicted by the Chinese Government. Merchants were imprisoned and threatened with starvation in order to extort from them their opium. The representative of the English Government, Lord Napier, was cruelly treated, and may be said, indeed, to have been killed by them, for when he was attacked by a severe fever, the Chinese surrounded the junk on which he was living with other junks, on board of which, under the pretext of doing him honour, gongs were sounded every hour of the twenty-four, and he died in consequence of not being able to obtain the rest necessary for his recovery. One outrage followed another. Again there was war. Next came an agreement. That agreement was afterwards broken; a conflict ensued, and so, step by step, we arrived at the Treaty of Tien-tsin. My hon. friend the member for Rochdale was very sentimental as to the objections made by the Chinese Government to a British resident at Peking, and he said it was very touching to read the arguments of the Chinese Government against allowing this. But I take leave to say that if we had had a Minister at Peking at the outset of these disputes, none of these wars would have taken place. (Hear, hear.) It was because we were debarred from communication with the Government of Peking, because we were at the mercy of provincial governors, who committed acts of injustice, knowing that they could do so with impunity, and could render their own account of what passed, preventing all remonstrance with the central Government —it was on this account that we did not obtain redress and that wars arose. (Hear, hear.)

I venture to say nothing has been done of more importance, with a view to the maintenance of friendly relations between this country and China, than the admission of our Minister as a resident at Peking. Well, then, I think that this House and the country ought to consider, not the policy of one particular measure affecting our relations with China, but ought to consider the great features of our policy, commencing with the abolition of the monopoly of the East India Company, and ending with the residence of an English diplomatic agent at Peking and the establishment of direct diplomatic relations with the Chinese Government. The benefit resulting from this policy had been immense. We are told—and I agree with the statement—that our object in China is simply trade. (Hear.) We do not want conquest. (Hear, hear.) We want trade—but the trade must be protected by treaties. (Hear, hear.) Was the extension of our trade by means of treaties matter of indifference to the nation? Why, we all remember the pressure put upon the Government for the abolition of the monopoly of the East India Company, and we also remember the enthusiasm excited in this country by the treaty signed by Sir H. Pottinger, and the vast expansion of commercial intercourse which was anticipated from it. That treaty was made in consequence of instructions which it fell to my lot to draw up, and was concluded almost entirely in accordance with those instructions. One stipulation of importance, however, was omitted from the draught—the provision that if any dispute arose as to the interpretation of any article of the treaty, it should be settled according to the English and not according to the Chinese version. What happened? The Chinese inserted in their version a stipulation which was not in the English version, and thereupon disputes arose. This bears upon the proposal of my hon. friend the member for Rochdale that certain ports or certain islands should be occupied as places of free commerce, for the stipulation which the Chinese fradulently inserted into the treaty was that there should be no communication with Hong Kong except from the five treaty ports, that there should be no communication between Hong Kong and any other part of the Chinese coast. This very much diminished the value of Hong Kong, and showed that the Chinese would have been very little disposed to tolerate an English settlement like Singapore, free to communicate with any part of the Chinese empire, and unless it had that freedom its value would not be that which my hon. friend attached to it. (Hear.) But let me recall to the House the great delight of the country on the conclusion of the treaty signed by Sir H. Pottinger, and the great anticipation of commercial intercourse which would result from it. I recollect rather endeavouring to moderate the fervour of expectation in this House by reminding the House and the country that, though undoubtedly there was an ample field for the ultimate development of commercial intercourse between the two countries, the development would probably be of gradual growth, and that we ought not to be too sanguine of great results at a very early period. But trade has gone on increasing since then.

My hon. friend has quoted figures which have been disputed, but which are perfectly correct, and one remarkable fact is that the amount of our imports from China greatly exceeds our exports to China. In 1863, I think, the value of our imports was about £14,000,000, while the value of our exports was not above £3,000,000 or £4,000,000. The balance was of course to be made up by opium from India or by specie sent out. But how was that opium paid for? The Chinese did not send us £14,000,000 of goods without payment, and those who received those goods must have sent out commodities of some sort to India in order to get the opium by which the difference was to be paid, or to get the specie by which the balance of trade was to be redressed. Well, sir, I must say that I very much agree with the description of the Taipings given by my hon. and gallant friend (Sir J. Elphinstone), if he will permit me to call him so.

Digitized by Google

There can be no doubt that a civil war waged under such circumstances of cruelty by both parties, though the balance of the crime is undoubtedly on the side of the Taipings, must place the country in a much worse state than would be the case if peace were established. Whether peace will be speedily established in China it is impossible for any man in this country to predict. We know that for 3,000 years China has been the seat of turbulent disorders, of revolts, and rebellions, and it is therefore rather sanguine to expect an entire termination of the war, though information did reach us not long ago that the rebellion would be subdued at an earlier period than might be supposed. It has been said that our objects in regard to China have been purely selfish, and, no doubt, they are so, taken in a national point of view; but those who view this question only in the aspect which it bears upon the interest of the particular merchants who export to China, and who have establishments in that country, take a very narrow and limited view of the question. Those merchants in reality only form the outlets by which the thousand rills of industry in this country find their way to the great ocean market of the world. These merchants are persons who convey to foreign countries the results of the industry of hundreds and thousands of our working classes, and those who wish to change the policy at present pursued, to narrow our foreign markets, and to stifle the development of our foreign trade are doing their best to take the bread out of the mouths of our working classes and to deprive them of their means of sustenance. ("Oh, oh!") I beg pardon, but what does your export trade do but carry your industry to foreign countries? and if access to those countries be debarred the industry of our working classes is checked, and they are deprived of the sustenance which they derive from the industrial operations of this country. (Hear.) For that reason I do not admit that our policy has been a selfish one in the sense in which the word is sometimes employed.

It is the duty of the Government to endeavour by every means in its power to extend the commerce of this country, not for the advantage of those particular merchants who may be engaged in trade with any particular portion of the world, but for the purpose of aiding in the development of the general industry of the country, and thus rendering those industrious classes who produce those different commodities happy and prosperous at home. Well, sir, I claim the credit of this view for the policy of the Government, and I do not claim it for the present Government alone, because the other Governments have been parties to treaties with the Chinese as well as ourselves. (Hear.) The policy which the Government of this country has pursued from the period of the overthrow of the monopoly of the India Company to the present time has been eminently successful. I am persuaded that having attained the great end of entering into friendly and direct relations with the central Government of China our position will not easily be shaken, and that the establishment of those peaceful relations will result in a large increase to our trade. I am also most firmly persuaded that if we can get an unrestricted commerce with so large a population as that which occupies China we shall have succeeded in effecting an object of great importance to the industry and prosperity of this country. (Hear, hear.)

Mr. BRIGHT: It appears to me, looking over the debate upon this question this evening, that hon. members who have taken part in the discussion have expressed nothing but general condemnation of all that the noble lord has done with regard to China for the last 30 years. The hon. member for Lancaster, who has exhibited a confidence in the noble lord which might have been reasonable in him 60 or 65 years ago towards any person older than himself, following the noble lord with a docility that was perfectly charming ("hear, hear," and a laugh), and I suppose with the view of supporting the policy of the noble lord, has been touting in the city for the opinions of China merchants who approve the policy of the noble lord. I understand there are about 120 to 150 English merchants in China, some of them having very extensive business connections. The policy of the noble lord, which the hon. member supports, requires that there should be at least one ship of war sent from this country to sustain each three of those mercantile houses. (Hear, hear.) That is not the state of things with regard to English commerce in other parts of the world (hear, hear), and I suspect that there is some radical error in this branch of our commerce or our politics with it which it is well worth the while of this House to consider. Now, the hon. member tells us that those gentlemen who have been writing these—I must term them uninteresting letters—(a laugh)—had a great stake in China. I am not at all sure that the hon. member did not supply those questions with the answers as well as the questions (a laugh), for they are so wonderfully alike. (Hear.)

I should not be at all surprised if he had sent them a kind of Treasury circular. No doubt it was true that these gentlemen had a great stake in China, but so had also the people of England; and looking over the last 30 years there is probably no part of our policy of which we have less cause to be proud than that portion of it which bears upon our relations with China. The hon. member for Portsmouth did not agree either with my hon. friend the member for Rochdale or with the noble lord. What the hon. gentleman had prophesied had come to pass, while none of the prophecies of the noble lord had seen their fulfilment. The hon. gentleman's defence of the Government was that they had got into such a state of inextricable confusion that it was hardly worth while to do anything to get them out of it. (A laugh.) The hon. gentleman proposed this incredible plan, that on the great river, which, as he states, is infested with every kind of ruffian who can make his way to it from all parts of the world, he would have I don't know how many of those gunboats which he says now lie rotting at Portsmouth. I suppose he would also establish a travelling assize, and appoint police magistrates similar to those in London who should go to every place where an American or European ruffian had established himself and carry out the law, not after the Chinese, but after the English fashion. We should thus be establishing tribunals for the administration of justice, having nothing to do with the institutions of China, and owning no allegiance to the Government of the country, but dependent altogether upon the Secretary of State for the Home Department in Downing-street. A more ridiculous—I do not wish to be offensive—but a more absurd, and, I venture to say, a more impossible scheme was never submitted to Parliament. We may, I think, come to the conclusion that the House, with the exception of the two hon. members to whom I have referred and the noble lord, universally condemned the policy which has been pursued. ("Hear, hear," and "No," from Mr. Kinnaird.) I beg pardon, I did not see the hon. member in his place. (Laughter.) An hon. member asked me in the dining-room if any one had risen to defend the policy of the Government, and my answer was that the hon. member for Perth was not in the House, and that, therefore, no one had got up. (Cheers and laughter.) Why, the policy has been condemned by men of every party in the House. (Hear, hear.)

Will any one say that there was anything in the speech of my hon. friend the member for Rochdale which exhibited party feeling against the Government or personal feeling against the noble lord? The noble lord the member for Cockermouth (Lord Naas) has made an exceedingly able speech, and one which does him infinite credit. He has placed the facts before the House in the clearest manner, and, as I believe, fully expressed the sentiments of the House, and yet his speech contained nothing of which any member of the Treasury bench could complain. The hon. member for Northumberland (Mr. Liddell) and Honiton (Mr. Baillie Cochrane) had spoken on the same side of the question, and other hon. members have expressed similar opinions without there being the slightest exhibition of party feeling, and yet from all parts of the House has come the condemnation of the policy we have adopted; and, I may add, lamentation at the faults which we have committed during the last 30 years. Even our Minister at Peking, Sir Frederick Bruce, has shown himself to be weary and disgusted with the policy he was expected to pursue, and we know that this policy is directly in the teeth of the most emphatic expression of opinion delivered a few years ago from this side of the House by the noble lord who is now the Secretary of State for Foreign Affairs (hear, hear), and it was condemned in terms, if possible, more emphatic still by the right hon. gentleman the Chancellor of the Exchequer. I think I can answer also for other members of the Government who, if they were not silent under the influence of their position in this House, would express themselves in language equally decided in condemnation of the course which the Government have pursued in China. (Hear.)

The Government appear to be in such a state of difficulty and embarrassment that no one knows what is to be done. The noble lord is on every occasion, as I think, reckless and unguarded in the statements that he makes about China, and every prophecy that he has made in past times has proved to be wholly baseless. He admits that everything he has done in his recent policy has been a failure. [Mr. Kinnard: "No."] The hon. member for Perth, I believe, did not hear the noble lord's speech. [Mr. Kinnaird: "I beg your pardon, I did."] The noble lord blamed the noble lord the member for Cockermouth for speaking about points that it was necessary to mention, since they had failed. I do not believe that the House has any reason to regret that the policy in question has failed. The failure is not a blame to the Government, but the conception of plans so absurd and impossible is a blame to them, and when they say that their plans have failed it is proper in this House to take notice of that failure, and to inquire what pretence there is to ask the House to trust the Government after a failure that is patent to all the world. I have no doubt the Chinese marauders—or rather the European marauders in China—would use the same argument as the noble lord. He says that the natural history of all contact between a highly civilised and a semi-barbarous nation is that unpleasantnesses will arise, that disputes will be occasioned, that wars follow disputes, and that after wars have been carried on to such a length that the highly-civilised nation has battered to pieces the semi-barbarious nation, then the semi-barbarious nation becomes entirely submissive, and nothing can be more harmonious than the relations of the two countries. (A laugh.) He did not tell us that one of the results of his policy had been to bring to a state of decreptitude, and almsot absolutely to destroy, the Government of the nation which enjoys the most ancient civilisation of the globe. (Hear.) At this very moment these horrors, of which so many members have spoken, originate mainly in the policy of the noble lord. (Hear.) And the hon. baronet the member for Portsmouth only said what was quite true when he stated that our insisting upon entering their great cities, and especially in breaking the seclusion of their capital city, and peeled off the mysterious and awful character that had prevailed in regard to their Government, and that, in point of fact, we had succeeded in shattering the whole political and social system of an empire comprising one-third or one-fourth of the population of the globe. If I were in the position of the noble lord I durst not get up either in this House or anywhere else and speak boastfully of the policy I had pursued, if results so grave and so disastrous had happened to so large a portion of the human race. (Cheers.) The noble lord had, I will say, an audacity beyond that; for he charged my hon. friend (Mr. Cobden) by implication with having no regard to the condition and interests of the industrious classes of this country. He attempted to persuade the House that the trade with China—the most miserable trade in the world when we compare it with the actual population—was of such great importance to the working classes of this country that it is worth while to persevere in the policy that has been carried on, and to encounter the great expense that has been incurred.

Now, I venture to say, on the contrary, that our trade with China for many years back—I believe for thirty years—has not left one farthing of profit (I speak of the export trade from England to China), if you pay out of it the cost of the wars, the intermeddling, and the military and naval force which is now apparantly permanently established there. (Hear hear.) There are fifty ships of war for the protection of an export trade of less than £4,000,000 a-year. If all our export trade required to be protected by an equal amount of naval force, we should want 2,000 ships of war to give that sort of guardianship to our foreign commerce which the noble viscount thinks necessary, and which we pay for our trade with China. (Hear, hear.) The people of this country manufacture cotton and other goods that are sent to China. They also pay taxes, and whatever interest they may have in regard to employment and wages it is at least counterbalanced by the excess of the expenditure of the Government and the taxes they have to pay for our policy in that country. I waited to hear what the noble lord would say about the future. He pointed to the past. He went to the East India Company, and told some imperfectly-narrated stories about transactions in China. He admitted that his policy for some years past had been a total failure. He does not deny now that the country is in a state of absolute anarchy. He has had English officers fighting out there, and says that orders have been sent

Digitized by Google

that they shall fight there no longer. He maintains, notwithstanding, an army, the number of which I do not exactly know. He maintains forty ships of war—more than fifty ships altogether. And yet the noble lord had not a single hope to hold out that there would be any change in his policy for the future. Does he intend to fight until the Taipings are utterly put down; or if the Taipings should gain the ascendancy, will he join them in an endeavour to establish another Government at Peking? (A laugh.) What does he propose to do? Is it not clearly the opinion of this House that the policy of intermeddling in China is a policy of absolute idiocy? (A laugh, and "Hear, hear.")

Here we are, a small island on the opposite side of the globe, with a population so limited that we are told we have not an army that we could transport to Denmark—(hear, hear)—yet still we are somehow to take within our great ambition this vast empire of 300,000,000 or 400,000,000 persons; we are to influence the dynasty that shall sit on its throne; and, in point of fact, we are to direct the whole affairs of the country just as we should those of some small neighbour close to our shores. I do not know how such an idea ever got into any man's head, but having once entered in, and having taken absolute possession of the noble viscount, I suppose at his time of life he cannot get rid of it. (A laugh.) I protest against it, however, and the noble lord should take the advice recommended by several hon. members to-night of abstaining religiously from the slightest intermeddling between the two parties, of teaching—I will not say the merchants, but that other class which are not included in the list of British merchants—namely, those rude and unprincipled adventurers who abound in China, that it is not the intention of the English Government that the English army or navy should take any steps to defend them from whatever misfortune may happen to them. (Hear, hear.) It is a monstrous folly that the population of this country, so hard toiling and so suffering, in comparison with those who sit here, should be taxed year after year, as millions of them are taxed, to carry on a policy that for thirty years has covered us with discredit, and which has wholly failed, and that this policy should be carried on only to please the curious crotchet of the noble lord at the head of the Government—a crotchet which is not participated in, as I believe, by a single member of the Cabinet, which this House is willing wholly to repudiate, and which I believe in every society in England where it is discussed receives the condemnation that this House has passed upon it to night. (Hear, hear.) I hope that when the noble lord sees this entire failure of his plans and of his prophecies, he will for once come to the conclusion that he is not infallable—(a laugh)—and that the united good sense and wisdom that springs from discussion, and which has been shown by this discussion, ought rather to govern a great question of foreign policy like this than the prejudices which the noble lord has so passionately cherished for thirty years that at last they have got the better of his reason and his judgment. (Cheers.)

Mr. CORDEN withdrew his motion.

From BATAVIA.—At LONDON: West. At FALMOUTH: Fredrika.

From PENANG.—At LONDON: Edinburgh Castle, and Devonvale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

No improvement has taken place in outward freights, and there is still difficulty in placing ships either for coals or general cargo. Homeward rates continue satisfactory, and inquiries for vessels from the rice ports are becoming general; but little, if any, chartering has as yet been done.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 to £40, and £1. 18s. For Shanghai: £50 to £52, and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26. 10s., and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

The Loochoo barque, Warden, from Ardrossan for Shanghai, has been otally wrecked on the north bank of the Yang-tsze-kiang; three men eported missing.

Digitized by Google

The Tricolour, Price, from Liverpool for Hong Kong, put back to Liverpool May 28 leaky.

CAPETOWN, April 20.—The Countess of Yarborough, Dumaresq, from Cardiff, which sailed hence April 16 for China, put back on the 18th, making 6 inches water per hour, having sprung a leak about 70 miles from this port, and will have to discharge part of cargo to be surveyed.

The Ramolino (barque), from Newcastle for Hong Kong, put into the Cape March 23 to discharge 40 or 50 tons of coal in order to lighten her, and sailed again on March 30 for her destination.

The Zanzibar, Maack, from Batavia for Rotterdam, put into Simon's Bay April 13 for spars, sails, &c., lost in a hurricane off Mauritius. The repairs required are extensive, chiefly masts and spars.

At ST. VINCENT, C. V.—May 9, Dumbarton Castle (str.), from the Clyde, and left 10 for China.

At ASCENSION.—March 28, No. 8,247, from Java, and sailed 30, for Rotterdam.

Off ASCENSION.—April 1, No. 9,134, from Foo-chow-Foo for London 10, Ortelius (Dutch ship), from Sourabaya for Amsterdam.

At ST. HELENA.—April 18, Alcyon Landweer, from Banjoewangie and sailed for Amsterdam; 21, Neuhof, Kross, from Amoy, and sailed for New York; 24, Wilhelmina and Elise, Priebe, from Cheribon, and sailed 25, for Amsterdam; 25, Medea, v. Teutem, from Batavia, and sailed for Rotterdam; Troas, Desborough, from Manila, and sailed for Boston; Mary Shepherd, Nichols, from Kanagawa, and sailed for London; Cymbeline, from Japan; Danube, Larson, from Batavia, and sailed for Rotterdam; 28, Eudora, Barker, from Ningpo, and sailed for London.

At TABLE BAY.—April 11, General Ward, Fuller, from Boston, and sailed for Shanghai.

HOLLOWAY'S PILLS.—DESIRABLE POSSESSION.—Without health, no amount of wealth, no means of pleasure are of the slightest value. It is inconceivable how small a disturbance of the animal functions begets wretchedness, and how readily it may be rectified by a few doses of some purifying and regulating medicine, such as these world-renowned Pills. These have proved the best friend to mankind in every grade, in every land, and under almost every circumstance. Holloway's Pills purify the blood, rectify digestion, stimulate the liver and kidneys, and regulate the bowels. When fevers, influenza, and other ailments are epidemic, these Pills should be taken occasionally by every one to keep the blood and system free from the seeds of the prevailing pestilence.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The advices from this port are to the 15th of April. The following highly important and satisfactory intelligence is from the *Japan Herald*:—

"We have rumours from Miako, but more or less requiring confirmation. They are to the effect that the Council of Daimios having agreed upon a peaceful policy in reference to the intercourse with foreigners, have now in great measure dispersed to their provinces, leaving the charge of that policy in the hands of Etzizen and other of their numbers, who continue at Miako. The Mikado has avowed that the representation of his will for expulsion of foreigners was made without authority, and that, though previously undetermined in his mind upon the subject, he is now in favour of more extended and free intercourse. The Tycoon will in all probability remain at Miako until he shall have fulfilled the duty now devolved upon him, of punishing Tsiosiu, but it is said that he will allow that rebellious Prince to escape more condign punishment if he makes ready obedience to the mandate which will remove him to a territory where his powers for mischief can be more easily restrained.

"There is no truth in the report of the 'resignation of the Mikado,' nor another report that 'he will accompany the Tycoon to Yedo and reside in his palace to give him advice!' The report that 'Stotsbashi has resigned his position as Daimio, and become *inkio*" is also untrue. We are perhaps incorrect in speaking of these as 'reports,' for we have heard nothing of them but in the columns of the *Commercial News*, upon whose editor some wag seems to have turned more than an usual amount of laughing-gas this week.

"It is presumable that in these days of many books and much writing about Japan every one who cares to know anything about the country, knows the vast line of demarcation between the Daimio and military classes, on the one side, and the merchants and traders on the other; a line so broad that the smallest two-sworded man of the former would seem to have regarded the wealthiest of the latter as one of an inferior race. How natural then is the universal wonderment that one of the haughtiest of the Daimios, the great Kokoshioo Satsuma himself, has rushed into the ranks of trade. The (comparatively speaking) large quantities of silk which have lately come into this market are, for the most part, a speculation of that Daimio, whose recent experiences of and intercourse with the English appear to have had the effect of inoculating him with the money-making propensities of the nation of shop-keepers (as Napoleon called us). It seems he has bought up every available bale of the staple in Yedo at the lowest prices, for the purpose of sending them in here for sale to foreigners. It is said that remonstrances lasting over some ten days were made against so unusual a proceeding, but without avail. Having tasted the sweets of the trade, they were found too good to be relinquished for a custom; the 'pigeon' was persevered in, to the considerable benefit of Satsuma."

In reference to Satsuma turning merchant, the *Commercial News* observes:—The effects of Satuma's interference with the interdiction of the exportation of silk by the Government is already being felt by the merchants of Yokohama. Some 150 bales under Satsuma's crest and protection have arrived, the merchants having paid for the privilege 72 itz. per horse load of four bales. Satsuma's bales are made up of three times the usual size of Yedo bales, so that we may look for at least two thousand bales before long.

The intelligence adverted to above, and treated by the *Herald* as mere "bosh," is given thus:—

Digitized by Google

"Our political news is important, could our information be implicitly relied on—but of course though our Japanese correspondence is the best that can be had, our reports must be taken as we receive, and give, them—*cum grano*. With this proviso, we have to announce a very startling fact—the resignation of the Mikado. What are the reasons which have led to this step we have not yet learnt, but as the late Mikado has been the ostensible head of the anti-foreign party it is to be hoped that the Liberals have gained a victory in the Japanese Cabinet. In consequence of his resignation, the name of the dynasty has been changed from the time of the reign of the Mikado, from Bunkiu 3rd year to Genge Gonen, or Genji first year, commencing on Japanese 3rd month 2nd day, or April 7. The report is also, but it needs confirmation, that Stutbassi has also resigned his position as Daimio and become *inkio* (resigned), owing to his intrigues against the Tycoon not succeeding. As a natural consequence of the reported fall of the Mikado, it is asserted that the Tycoon, being now in greater power, rank, and position, will return to Yedo, that the former Mikado will accompany him and reside in his palace, giving advice, &c., to the Tycoon. The 264 Daimios are also to reside there with a large force. In partial confirmation of this we can positively state that the greatest activity is now manifest in Yedo, the retainers of the various Daimios being busily engaged in making hasty preparations to receive their masters and his Majesty the Tycoon, whose palace has large gangs of workmen employed upon it night and day. On the whole, we are inclined to think that better prospects are opening before us than we have seen for some time past."

"O Mowori" (the great Mowori), as the Japanese curtly style Mats'daira Daizen-no-Daiboo, the now famous Prince of Nagato, is, according to our latest advices (reports the *News* of the 6th April), reigning in his own territory, quite independent and wholly regardless of the remonstrances and threats of the Mikado and the Tycoon. His people heartily sympathise with him; and the result is, that for so far he has been able to treat with contempt all the commands which have reached him from those who assume to be the Government of Japan. In his determination to close the Suwo-Nada to foreign shipping, he attacks every foreign looking vessel that comes within range of his batteries, without regard to ownership; and in this way Satsuma has, we hear, come to grief a second time. The latter Daimio is greatly incensed at some of his officers having been killed on board one his ships which had been boarded of late by Mowori's men. Satsuma is determined to stand this treatment no longer; and his representations to the Mikado and the Tycoon have led to the appointment of Kiusiu (Hosokawa Etsiu no Kami?) and Thosa to control and punish Tsiosiu provided he does not lay down his arms and own allegiance. Already messengers have been sent by Thosa, &c., to Nagato, calling that Prince to a conference with them. Should Tsiosiu, behead the messengers, as is his custom, war will be declared and commenced at once; but should they be received and well-treated, the result will be, that Tsiosiu will be allowed to commit *hara-kiri* and so save his principality. No attempt will be made to pass through the Straits, where even native junks destined for Nagasaki are now stopped. Mowori will be surrounded, and, if with one hundred of his men he prove himself able to cope with 1,000 of the Government party, the latter will increase their forces by tens of thousands, and compel Mowori to surrender. Such is said to be the determination now formed; how far it will be carried into effect, and whether the alleged displeasure of the Mikado and the Tycoon at Tsiosiu's doings is not all a sham, remain to be seen. It is said that Thosa has been removed from his place as one of the guardians of the Mikado, and that Prince Etizen (Shoongakoo), under another title and with an additional revenue of 50,000 Kokoos of rice, takes Thosa's place. Japanese officials say the Tycoon has not yet returned from Kioto, but the people generally assert their belief that he is now in Yedo.

It is pleasant to see that many new shops and business places are being built in the native town of Yokohama. A proclamation or notification of the Gorojio is looked for by the end of this month, permitting natives to resume their business here. The *pseudo ronin* scheme has been, or soon will be, abandoned, and a greatly improved trade is expected. Since the new branch Custom-house at the eastern jetty has been opened to business, it has been found necessary to refer to the Governor upon many matters; and considerable delay in the transaction of business is thus occasioned. The novel idea of telegraphic communication between the two establishments has been started by some clever Japanese, and a magnetic telegraph, manufactured entirely by Japanese, is, we hear, in town, but there is not skill enough among the natives to erect and work it.

The circular following was issued to the British mercantile community on the 8th April, by Mr. Consul Winchester:—

"The undersigned has received the instructions of Sir R. Alcock, K.C.B., &c., &c., to make known the substance of a despatch received from the Gorojio on the 2nd inst., viz.—'On the list mentioning the articles (import) on which the duties have been reduced, porcelain has been omitted. This article must be classed among those which pay a duty of 6 per cent. It is, therefore, desirable to consider porcelain as included in the list above referred to.'"

The great boat race between the Japanese and foreigners, with foreign boats, came off on the 7th April. Much interest was manifested, and a large concourse of citizens and Japanese assembled at the wharves to see the result. The foreigners' boat was pulled by five men belonging to the *Bouncer*, and that of the Japanese by the crew of five belonging to the private house boat of *Kin-kee*. The distance run was over two miles, and ended in the *White Diamond* winning easily, the Japanese being in excellent condition.

CHINA.

TIEN-TSIN.

Dates are to the 19th April, per steamer *Nanzing*, arrived at Shanghai. The following is from a correspondent's letter to the *North China Herald*:—

Our correspondent at this port complains of very inclement weather; heavy gales from the north and west, with dust storms. Snow fell on the 7th inst. in considerable quantities. The health of the settlement, however, was excellent. Two considerable fires had taken place among the Chinese houses. Trade was entirely at a stand-still; and almost all the imports which arrive are on Chinese account, to the great disgust of foreign merchants. The good harvest made by the latter during the 1st and 2nd years after the opening of the port has now fallen to nothing, and, according to our correspondent, matters show no signs of revival. The country round is perfectly quiet. Some smuggling is said to have taken place, and complaints have been made to Mr. Bruce, who lighted on the wrong party. Jews of various countries are said to be the real culprits; and the consequence is, that no one can go to Peking without first obtaining Sir F. Bruce's permission, through the Consul. This restriction only applies to British subjects, who are thus punished for the faults of others. Sir F. Bruce was believed to be preparing to leave for England. H. P.M's *Gazelle* was in port."

NEWCHWANG.

The *Kaffir Chief*, the first vessel of the season, arrived at this port on the 25th March, at which date the river was first opened. But great inconvenience was experienced from the quantity of broken ice floating about, and the absence of cargo boats. Prices for all import goods ruled very low; while exports, on the other hand, were high. Twenty-three foreign vessels were in port loading, principally for Amoy and Swatow. The Prussian brig *Melita*, for Shanghai, with eighty chests of opium on board, was a total wreck outside Newchwang, just below Ying-tze; all the cargo was lost, but the captain and crew have escaped. The Danish brig *Iris* was also reported badly on shore.

SHANGHAI.

The present mail brings dates to the 23rd April, three days later than received on the 4th inst., per French Mail. No later mail had arrived from England than the 26th February, which we recorded in our issue of the 4th inst.

A well known medical gentleman on his return from a trip through the Shantung Province, gives the following account of the places he visited.—"We slept all night on the top of the famous Tai-shan mountain. The cold was excessive, and we were caught in a snow-storm which caused us great difficulty in reaching the bottom again. A road of steps extends to the very summit, and appears to me the most wonderful thing of all in connection with this celebrated mountain. The natives says that the height is 45 *le* from top to bottom, and the ascent is certainly very gradual. Temples and tea-houses are erected at intervals the whole of the way up. Thousands of pilgrims are constantly toiling up and down. At Chu-fow we saw the

Digitized by Google

burial place of Confucius, with a temple erected to the memory of the sage—the largest building of the kind I have ever seen, and replete with interest. The grave is without the city, and is approached by a long avenue of fir-trees. The burial ground is twenty *le* (upwards of 6 miles) in circumference, (an area larger than that of the city itself) and contains the remains of all the descendants of the philosopher, as well as his own. One of his descendants, the present head of the family, has the title of 'Duke,' and has charge of everything relating to this place. The great man's tomb is a large mound with a simple tablet. The stone is devoid of all decorations, and is in striking contrast with those of a more modern date which surround it on every side, and which are covered with numerous barbaric carvings."

A case has been tried in the Consular Court, in which the owners of the *Ayrshire Lass* were plaintiffs, and the P. and O. Company defendants. The facts were as follows :—The *Ayrshire Lass* took up a berth on the evening of the 20th March at a distance from the P. and O. moorings, variously estimated by the plaintiffs and defendants respectively at 350 and 200 yards. At that time the *Pekin* was the only vessel at those moorings ; but on the following morning the *Nepaul* came up and was lashed alongside of the former vessel, though slightly projecting beyond her. When the two ships swung to the tide, the *Nepaul* fouled the *Ayrshire Lass* and occasioned damage to the amount of 500 tls., which was sued for in the Consular Court by the owners of the latter vessel. The P. and O. Company assert that the anchorage ground in question belongs to them ; but it is alleged that the permission to lay down the moorings at that spot is not to be considered as conferring on them an exclusive right to the anchorage ; and that the *Nepaul* was wrong in taking up a position unknown to the Harbour-Master, at so short a distance from the *Ayrshire Lass*. It is also said the collision would not have occurred but from the slackness of the P. and O's. moorings ; which, it is complained, is their usual state, from the too great strain put on them ; for they are intended for only one vessel, whereas it was not infrequent for two steamers and a number of cargo boats to be attached to them at once. The propriety of erecting a landing-place for P. and O. vessels is under discussion by the managers of the company, and it is to be hoped the decision will be favourable to the project. Now that the line has been extended to Japan, that accommodation is greatly required, both to facilitate the landing and discharge of cargo, and to relieve passengers from a long *sampan* excursion, in occasionally very inclement weather and very rough water.

The following account of the Anglo-Chinese force is from the *North China Herald* :—

SOOCHOW.—Colonel Gordon's force attacked the rebels at a place called Wai-soo, in the neighbourhood of Kiang yin, at 10.30 A.M., on the 11th instant ; they were found strongly entrenched and very numerous. After about an hour's shelling their flank was turned, and they precipitately retreated. The Imperialists, who were in great force, pursued them and killed several thousands. Wai-soo is reported to have been strewed with dead. The rebels numbered some 15,000, and the Imperialists from 8,000 to 10,000. Colonel Gordon, having only some 800 men with him, the remainder being still at Le-yang, left the pursuit to the Imperialists, but was prepared to follow up his success with a telling blow wherever it might appear to be most advantageous.

A correspondent at Soochow informs us that Ching, after suffering severely from his wound, died some days ago. His death was concealed for some time, on account of the discouraging effect it was feared it would have on the soldiery. In fact, even yet the occurrence has not been officially announced, and is only known to a few mandarins. His loss to the Futai at the present moment will be serious, as he was certainly the best mandarin general in the province. The Futai has gone to attack Yang-Sah. This is rather creditable to him, as it is unusual for a mandarin of his rank to take the field in person. Whatever may be Le Futai's short-comings, he cannot be denied the credit of having devoted his whole energies to clearing the province under his charge from the rebels. He has given up the pageantry natural to his position in order to economise, and has unquestionably devoted all the money which he could raise, whether legitimately or by squeezing the wealthy Chinese in the foreign settlement, to this all-important object. Guns and howitzers, shot and shell, have been substituted for the miserable jingals and native powder; muskets and bayonets for swords and spears.

The result has been most satisfactory, and has, in many instances, enabled the mandarin troops to do good service, whereas they were previously an expensive and utterly useless body. One of Le Futai's faults is that, although ready to avail himself of the assistance of foreigners, he is slow to recognise their merits. He carries this peculiarity even into his relations with his own countrymen, and has excited much jealousy among his subordinates and ill-feeling among his subjects, by appointing to many of the principal civil posts inhabitants of his native province, in preference to those of Kiang-su. These individuals are not remarkable for their intelligence, but have particularly distinguished themselves by their squeezing propensities, and established a dread of this latter peculiarity in the breasts of the peasantry little short of that inspired by their late masters, the Chung-maos. But in the case of Chinamen, Le Futai at least awards credit where credit is due; whereas in the case of foreigners he always arrogates to himself the success which the latter have achieved.

This has been frequently exemplified in the accounts which have appeared in the *Peking Gazette* of Gordon's victories, the principal credit for which was always given to Le Futai. However much his reforms in the armaments of his troops have conduced to their efficiency, they would not have enabled them to take the initiative against the rebels, with the slightest chance of success, without foreign aid. To foreigners alone does Le Futai owe the successes which have marked, last year, his government of Kiang-su ; but he lacks the generosity to give them more than the scantiest meed of praise. Macartney, too, in another way, has rendered him valuable service. A year ago Le Futai was induced, by his persuasions, to establish a shell factory, of which he undertook the superintendence. The project has been carried out most successfully through great obstacles, and the Soochow arsenal now supplies the greater portion of the ammunition used by the Futai's forces.

On the break up of the Lay-Osborn expedition, Macartney succeeded in obtaining a portion of the machinery which was brought out from England with a view to manufacturing ammunition for the Chinese fleet ; this has now been got into full working order, and is turning out shot and shell at the rate o from 1,500 to 2,000 a week. Besides shell, fuzes, and detonating tubes, several mortars have already been manufactured, and it is hoped that, before long, muskets and caps will be added to the list. It is impossible to overrate the importance to the province of an establishment of this nature, and great praise is due to Macartney for the perseverance with which, in spite of much discouragement, he has brought the arsenal to this advanced stage of utility. We hope that his efforts will be appreciated by the Futai, and that he will give credit to whom credit is due. We are aware that the arsenal has attracted the notice of the Peking authorities, and trust that in reporting its history to the Government his Excellency will give Dr. Macartney the credit which is fairly his, for originating and carrying out the scheme, instead of, as he has so frequently done, claiming honour and praise for himself, or for some Chinese official who has had no hand in the business for which he was rewarded.

NINGPO.—Our correspondent informs us that a portion of the French contingent has been detached, under the second in command, to undertake the siege of Hoochow. M. D'Aiguebelle, with the other portion, remains to garrison Hangchow. A large number of rebels are said to have been killed, when the latter city was evacuated. The Taotai received information that they were leaving, and attacked them early in the morning.

The Municipal Report, 1863-64 is published in the *North China Herald* of the 9th April *in extenso*.

The following is from the *China Mail* :—

"To all appearance the crushing of the Taiping rebellion is simply a work of time, and it has been affirmed that four months more will put an end to it. It need not be supposed, however, that the actual plague which these marauders have inflicted upon the country is entirely removed. The original rebels have been so long in arms and so much accustomed to pillage and bloodshed that they are not at all likely to resume industrious pursuits. The probability is that they will now begin to apply their devastating powers to the southern provinces of China, where the opposition to their rapacity and cruelty is not so strong. Those who are best informed, however, upon Chinese matters say that active measures will be taken to crush these marauders wherever they appear. The Chinese Government is no longer the weak thing it was once justly enough represented. The Taiping rebellion has done its work: It has awakened the

Digitized by Google

governing powers to a sense of their duty; and the assistance rendered by England has had at once a moral and material effect upon the country and its rulers. For the expected happy consummation the Emperor of China will certainly have to thank Colonel Gordon; but, at the same time, he, or his Cabinet, will be duly made aware that China must do her own work in future. It is a mistake to suppose that we are likely to repeat our Indian policy in China. It would be easy were it absolutely necessary to upset the existing Government, but with foreigners it would be absolutely impossible to replace it. The present Cabinet is composed of men who are both energetic and intelligent, and we have reason to believe that they are not at fall negligent to the wants of the Empire."

HANKOW.

A meeting was held at the Club House on the 31st March, Mr. Mackenzie in the chair. The subjects discussed were:—The late detention of the steamer *Huqong*, and the enormous coast trade duty on teas for export. A full report of the proceedings appeared in the *North China Herald* of the 16th April.

KIU-KIANG.

The members of the Principal Council on their retirement from office have submitted to the land-renters their report of the expenditure and improvements connected with the roads, lighting, drainage, &c.

HONG KONG.

The dates are now down to the 29th April, three days later than received per French Mail. The French Mail, with dates from London to the 17th March, arrived out on the 28th April.

The immediate erection of a new post-office in Hong Kong has been decided on. The existing building has served its day and generation, and is among the many public works whose dimensions the community has entirely outgrown. So far as we can learn, the structure now in use will be pulled down and a new erection substituted. The plans are drawn out and have been designed with every regard to facility and accuracy in the despatch of business.

It is notified that Lieutenant C. K. Chatfield, H.M. 20th Regiment, has been appointed Private Secretary and Aide-de-Camp to His Excellency the Governor and Commander-in-Chief, in room of Lieutenant H. A. Atkinson, of the 99th, resigned.

The following is from the *China Mail*:—

Joseph Hume was called—or called himself, we forget which—the watch-dog of the House of Commons. This was a somewhat distinguished position to occupy, though perhaps not an enviable one unless to men of certain temperaments. It is the part of a watch-dog to bark at everyone, friend or foe, and his bark is a means, at least, of drawing attention to whatever is coming. Mr. Hume was, to continue the simile, a much stronger and better-bred animal than some others who have yelped since his day, and among the latter we would direct notice to Colonel Sykes. The gallant Colonel has a shrill voice, and never misses a chance of making it heard. Rather than want an opportunity of gratifying his Aberdeen constituency by standing up in the House, he is at pains to obtain reports from China upon which he can base a telling representation to the House of Commons. These reports he professes to get in private letters from China, and we believe that he actually does correspond with one or two persons in this part of the East. In point of fact, we rather think we could lay our hand upon the shoulder of his Hong Kong correspondent, and as the matter is one of some little interest to the public both here and at home, it may not be amiss to draw attention to it at once.

Let us look at the report of the gallant and honourable gentleman's speech in the House on the 4th ult., on the subject of China. After speaking of the Futai's breach of faith with Gordon in the Wangs, the Colonel draws attention to the fact that General Brown had, by stationing troops at Taitsan and Quinsan, enabled Gordon's force to capture Soochow. Colonel Sykes says that his information was received in November last, and that his informant dated from Soochow. The date must have been some time in September, or just about the time that Burgevine was in Soochow with his rowdies, after having captured the Imperial steamer *Kiao-Chao*. These foreigners at one time threatened to become mischievous, and might have perpetuated indefinitely the Taiping pestilence, had not General Brown twice placed British troops in the rear of Gordon's little force—first at Taitsan, and then at Quinsan—and so disheartened the rowdies in Soochow that they saw their case was hopeless, and agreed to accept Colonel Gordon's clemency. Planting troops quietly beyond the radius was a neat move, just enough, and no more, to let the rowdies feel that Gordon had something at his back. There was little in the movement itself, the General probably not having the fear of Colonel Sykes before his eyes; it was simply the infant's touch that makes the evenly-balanced beam to kick.

The rowdies had been encouraged to believe that beyond a certain line British soldiers dared not go. They had strong newspaper articles on the subject which proved conclusively that the English Government were peremptory in their views on that score, and they had watchful journalists ready with theodolites and azimuth compasses to shriek out to the world the moment that a British uniform was seen outside of the charmed thirty-mile circle. Being thus taught to believe that they could safely work mischief at a given distance from Shanghai, they proceeded to do so. One of them, however, afterwards disclosed to the world in his published statement that they had all found themselves mistaken in this idea, and that their defection from the Taiping cause was mainly induced by a knowledge of the fact that British troops were stationed at Quinsan.

The following, on the Anglo-Chinese fleet, is from the *China Mail*:—

The luxury of having had a fling at Messrs. Lay and Osborn having been now fully enjoyed by the English Press, we may hope to obtain a hearing for one or two mild observations on the leading feature in their published correspondence. We call it the leading feature, not from its positive prominence in the progress of negotiations, but as affording a key to the temper in which the two gentlemen proceeded to work:—

From the heavy salaries paid to both, it is natural to conclude that pecuniary considerations were not quite inoperative on the minds of Messrs. Lay and Osborn. With great candour, however, the two honest men, rightly judging that their motives were liable to be wrongly judged, were most explicit in their statements that they were actuated by the very highest motives. Of course this settles the question and puts all suspicion to rest, and we cannot therefore be too grateful for an explanation that puts unworthy thoughts out of our minds. The best of it is that the excuse was made before the accusation, and that there was no time lost; and it puts us in lively remembrance of an English consul in Japan, who called a meeting of foreign residents to prove to them that he had not been accessory to the death of a Japanese.

Messrs. Lay and Osborn, then, who seemed destined to go down the stream of time chained to each other, having confided their joint cause to the opinion of the world, we, as representing an humble section of that world, may review their defence. When men are dragged into public notice it is often good taste to avoid criticising them, but when the appearance is voluntary, the thing is a kind of invitation to notice their case, and we shall now do so for Messrs. Lay and Osborn as briefly as possible. We shall, of course view only their joint action at present; and we quote the following as a key to the temper in which they proposed to begin their work:—

"We have to deal with Asiatics prone to deceit and falsehood, ready to evade any engagement directly it interferes with their views of monetary interests. We are about to afford them material military aid, and it behoves us to guard against its being misapplied, and thereby bring scandal upon ourselves and those who in Great Britain have promoted our views; above all, we are to take care that the great power and proportionate responsibilities conferred upon us by Her Majesty's Order in Council be not abused by us, by our successors, or by the Chinese authorities."

It will seen from the first of these sentences that the two good men take moderately high ground. Let us see how they occupy it.

The case may, nay must in fairness to both sides, be thus stated; and we do not, we assure our readers, at all enjoy the task of putting matters in their proper light. Indeed, we can confidently ask anyone, whether or not we ever spoke unfairly of these gentlemen; and whether, if we spoke from wrong information, we did not take the first opportunity of confessing our mistake. In the present instance, we surely cannot be wrong in basing our remarks on a *compte rendu* or minute drawn up by themselves and presented for general perusal.

The Emperor of China, desirous of pacifying his poor country and of policeing the waters of the Yang-tsze to protect his subjects against the advancing tide of foreign rowdies which the "opening" of that river admitted, thought he would employ a portion of his revenue for that most laudable purpose. A million taels of his own legitimate means was accordingly voted, and, with undoubted good sense, he determined to employ foreign material for his purposes. He was rightly enough advised that the money he was prepared to spend would obtain the articles he wanted. Shipbuilders consider the Emperor of China's money just as good as any other man's; and England has still many honest, brave, and restless spirits who will fight for money in a praiseworthy cause. Even Scotchmen are to be found who will draw a dirk or pull a trigger for hire, if the side on which they are to fight recommends itself to their judgment. The philosophy of this truth we can discuss at any time; but the fact stands.

Why should we make a parade of high motives in everything we do for money? It is generally, and correctly, assumed that Englishmen are not Italian bravos who will stiletto a man for half-a-crown. We require pecuniary inducement as a matter of course, but the employment must not be in any way disreputable. And, moreover, we can only dishonour ourselves by expressing contempt or disesteem for our employers. The Scotch have a proverb which enjoins her sons and everybody else never to speak ill of a man whose bread they may be eating; and we suspect that the maxim is more for the protection of the employed than the employer, as it is an open act of baseness to remain in the service of one for whom you cannot conceal your contempt. Even "servant-gals" and flunkies dismiss their employers now-a-days if these should reduce their style of living or give up orthodox carriages and pair.

Messrs. Lay and Osborn are not up to this elevation of character, but deliberately commence by saying that they are about to enter the employ of men "prone to deceit and falsehood, ready to evade any engagement directly it interferes with their views or monetary interests." To take a vulgar view of this statement we should say that no two men ever more plainly "wrote themselves down asses." Had they, like Colonel Gordon, despised pay and reward, it might have been competent for them to use such language. The Colonel has, for a good object, run the gauntlet not only of German ammunition discharged by a horde of the most despicable scoundrels that ever mutilated women or cut children's throats, but he has walked unharmed through a fire of the grossest newspaper scurrility that ever disgraced the Press. Lay and Osborn will have no such unction for their wounds. Men who sit down, "with deliberation," as they themselves avow, and agree to do a service, at good wages, for other men whom they, with still more deliberation, pronounce to be scoundrels, can never occupy a niche in the temple of fame, and are very much deserving of being ousted from the temple of English honour and honesty.

MACAO.

(*China Mail.*)

The improved state of Macao has been the subject of remark lately, and we accordingly visited that Brighton of the Far East

Digitized by Google

on Saturday last, "doing" the whole trip in forty-six hours The physique of the Praya Grande has undergone a change for the better, and it forms a contrast to our own Praya which is not flattering to Hong Kong. The entire course of the Praya has been raised two feet, and evidently laid with very good "metal." The retaining wall has been correspondingly heightened and trees planted about five feet in its rear all along the course, so that a tasteful promenade may be expected in a couple of years' time. Between these trees and the parapet the road is flagged with good granite pavement, and the main road is ensured against becoming sloppy in wet weather by being bevelled in outline. The grass plot where the band plays has been enclosed, and Chinese are not admitted inside except in the cases of nurses in charge of children. Bamboo chairs are placed within this enclosure at the expense of a few public-spirited people, and these chairs are, for the time being, at the service of those who may find them unoccupied. The new Governor is said to be untiring in his efforts to improve the place, and is at any rate rendering Macao more agreeable to its residents and more attractive to strangers. We hear that he leaves for Peking and Japan very shortly in order to submit his credentials to the highest authorities of the Celestial Empire and the Rising Sun. We are glad to hear that the state of education is in a flourishing condition in Macao both as regards English and other foreign languages; and we may remind the Portuguese that a classical acquaintance with their own and our language tends vastly to improve their position and influence in China. Besides the improvements we have alluded to, there is a sort of *je ne scais quoi* improvement in everything about Macao. There is a liveliness and good-humour about the people that did not show so strongly before; the houses have put on their spring clothing, having in almost all instances been freshly coloured within the last few months. The Governor's official residence has been relieved of the curious pink garment which it formerly wore, and a blue-tinted coat has been substituted; indeed, all along the Praya, which seems to be the aristocratic quarter, a great deal of paint has been laid out, and in various hues, as is the wont of the Portuguese in dress and decoration. There is something in this, as rendering the place attractive to Hong Kong people in its capacity as a watering-place. Macao never wearies us, but is "ever charming ever new." But improvements such as these do not affect the root of a colony's prosperity. The time was when Macao might have been set off with a good fresh start as a thriving mart of business, but the refusal of the Portuguese Government to make the place a free port, and to allow foreigners to hold property, turned the flow of trade towards Hong Kong. Look at both places now. The one is poor and the other thrives. Macao drives an iniquitous trade in human flesh by exporting men to the Guano Islands, to the disgrace of humanity, not to say religion, which latter is evidently run upon if we may judge by the number of padres and sacred edifices with which the streets and squares of the holy city is dotted over.

There is still one strong practical measure that might probably bring trade to Macao; we mean the deepening and dredging of the harbour. If the Portuguese Government were only equal to facing the outlay we feel sure that the money would come back to them tenfold. At present the matter is a topic of conversation, as it has been, at various intervals, during the last few years. There are some places where improvements have to be detained a long time at the talking stage, and Macao is one of these. It is a most charming place for invalids, gossips, pleasure-seekers, and hard-worked Hong Kong men in search of change. But it should and could be made more. It is the mere empty shell of a commercial town. The lower stories of the houses on the Praya are furnished with strongly barred windows, but they protect no bales of goods or chests of tea. In many houses there is a strong room with an iron door and treble rows of stanchions, but there is no treasure to plunder in the inside. The needless precautions, however, tell of a time when they were necessary safeguards, and they savour of past commercial prosperity.

When the Governor has done trimming the trees we would recommend him to set about doing something that should send legitimate trade into renewed motion. Let one of the able writers in the local journal write out a few masterly essays on the subject in his most terse and trenchant style, so that serious inquiry may determine whether the whited sepulchre cannot be improved inside, and the dry bones made to shake. We recommend our readers to visit Macao frequently this season; all that meets the eye is pretty and pleasing, and the improvement since last year is very marked.

SIAM.

BANGKOK.

The steamer *Chow Phya* has completed her repairs, and resumed her station on the Singapore line. Dates are down to April 23. Nothing new.

COCHIN CHINA.

"There is a rumour," says the *Penang Gazette*, "that the French Government has agreed to return the three ceded provinces in Cochin China, with the exception of Saigon and two other ports, to the King of Annam, for a sum of forty millions of francs. The French also stipulate for the protectorate of Annam, and on the other hand the King is not to fortify any ports or places on the coast without permission of the French."

The above rumour (adds the *Free Press*) we believe to be well founded. A French gentleman, who will ultimately take up the appointment of Consular General in Siam, lately passed through this on his way to Saigon, charged with a mission to revise the French Treaty with the Cochin Chinese Government. It is contemplated to give back some of the provinces the loss of which the Annamese seem to feel so acutely. From what we can learn, the policy of the French Government appears to be to extend its territory and influence in the direction of Cambodia and Laos. The French claim to have succeeded to the rights of Cochin China over Cambodia, and have lately entered into arrangements with the latter State by which the protectorate of France is recognised. This brings them into collision with Siam, which also asserts rights over Cambodia. Some of these questions, we have heard, it has been proposed to refer to the arbitration of the King of Belgium.

SAIGON.

We learn that the French Government have established an opium farm in their territory in Cochin China, from which it appears that they derive a monthly revenue of $7,583. The Government, it seems, were at first averse to the introduction of the Opium traffic in Cochin China, but finding the great addiction of the people to its use, it was found quite impossible to prohibit it entirely, and there was nothing left but to tax the drug as heavily as possible and so restrict its consumption by every means in the power of the Government. At the same time they are endeavouring to raise the tone of morality among the people, by apportioning somewhat more than a tenth of the revenue to religious and secular education. It appears the farmers have received about 40 chests per mensem since the commencement of their contract, and their profit is said to exceed $20,000. It is urged upon the French Government that a much larger rent should be charged when the present contract is out, which will be in October of the present year.

It appears by the *Free Press*, that the consumption of opium in Singapore is about 60 chests per mensem, so that, notwithstanding the high rent of $33,660, the farmer clears a monthly profit of $13,000.

JAVA AND NETHERLANDS INDIA.

We have Java papers to the 29th April. The *Java Times* has commenced a weekly, instead of a fortnightly, issue, without any increase of price. It appears there are no less than fifteen newspapers published in Netherlands India.

STRAITS OF MALACCA.

SINGAPORE.

The dates hence are to the 7th May. The *Emeu*, with the mails from Europe of the 26th March, arrived on the 20th April.

The American steamer *Kiu-Kiang*, an incident of whose arrival at Table Bay is noticed in another column, reached Singapore also on the 29th April, and sailed for China on the afternoon of the following day.

A fresh difficulty (says the *Straits Times*) has presented itself in the way of the transfer to the Colonial Office. No account has hitherto been taken of the large sums deposited in the Treasury for intestate and trust estates. The money, it appears, has been expended according as the necessities of the State required, and not a tenth of the amount to the credit of these estates is now in hand. The Imperial Government refuse to take over the colony with this liability, and India will no

Digitized by Google

reimburse. This is a subject which must be carefully investigated.

H.M. ship *Severn*, bearing the broad pennant of Commodore Montresor, was expected daily, and, it was understood, would remain on the station for some time. In the new arrangements lately made regarding the command of the Cape and East India stations, it was proposed to make Penang the terminus of the command, leaving Singapore under the flag of the Admiral on the China station. On a representation being made of the inconvenience likely to arise from having the Straits ports thus placed under two authorities, the Admiralty has made an alteration by which Acheen Head is made the limit of the jurisdiction of the Admiral in the Cape and East India waters, while the Straits ports are annexed to the China command.

The surveying steamer *Rifleman* having been joined by Capt. Ward, who came out to relieve Capt. Reed, has started to prosecute the survey of the China Sea, and will probably be away about four or six months. The following notice had been received from the Admiralty:—

With reference to hydrographic notice No. 10, China Sea, dated 4th February, 1864, where it is stated that H.M. gun vessel *Vigilant* had lost part of her false keel by passing over some supposed danger in lat. 13, 52 N., and long. 118, 36 E., it now appears from subsequent information received, that the shock felt on board, as if the vessel had grounded on a shoal, must have been that of an earthquake, for on her being docked at Bombay it was found she had not received the slightest injury either to her keel or copper.

Notwithstanding a few showers had fallen, the heat continued very great, and the drought was still severe. The wells in town were drying up, and there was a scarcity of wholesome water.

The *Free Press* contests the correctness of a statement made by the *Straits Times*, and hailed with delight by the Batavia *Handelsblad*, that "it would be difficult, from the information we as yet possess, to establish a ground of remonstrance against the Dutch." The *Handelsblad* says:—"The treaties, which were concluded by the Netherlands India Government with the several Princes on the Eastern coast of Sumatra must, according to the second section of Article III. of said treaty, be communicated to the English Government, and this obligation has certainly been carried out; and if, during all the time since it was informed of the contents of the treaties entered into by us, no reason has been found to cast reproach on the Dutch Government, it will not be subject to any doubt that all efforts, by which it is sought to provoke the English Government to active measures will end in nothing. It is also evident that the proceedings on the eastern coast of Sumatra may and can by no means be considered as encroachments." To this the answer is brief. In 1841 the Dutch Government communicated to that of Great Britain a treaty with Jambi as the model by which all the Dutch treaties with native States were framed. This treaty was characterised by Lord Palmerston as inconsistent with the third article of the treaty of 1824, and Her Majesty's Government called upon the Government of the Netherlands to abrogate without delay any articles of its treaties with any native States in the Eastern Seas which tended, by the imposition of unequal duties, to exclude British trade from the ports of such States. In the course of a discussion regarding the British treaty with Siak, entered into in 1818, Lord Palmerston made the following observations, which are equally applicable to the whole of the States on the east coast of Sumatra with which we have agreements:—

The treaty of 1818 with Siak contains no stipulation inconsistent with he 3rd article of the treaty of 1824, and therefore that treaty was not mentioned by the British Plenipotentiaries in their declaration; and therefore also that treaty of 1818 with Siak has been and will be maintained in the shape in which it was concluded, and Her Majesty's Government cannot be expected to remain indifferent to any proceeding on the part of the Dutch authorities in the East, which would tend to deprive British subjects of the benefit of that treaty, by destroying or encroaching upon the independence of Siak. For Her Majesty's Government can by no means admit that either the spirit or the letter of the treaty of 1824 went, as represented by Baron Verstolk, to establish the position that Great Britain abandoned all interest in the maintenance of the independence of the native states of Sumatra, and engaged not to interfere in support of that independence.

It will thus be seen that the *Handelsblad* is mistaken in thinking that the British Government has never taken exception to the Dutch treaties with the native States on the eastern coast of Sumatra. On the contrary, they were most strongly impugned, and in 1842 the Netherlands India Government abandoned several posts on that coast which had been occupied for some time, because Lord Palmerston protested against their establishment as being inconsistent with the maintenance of the independence of the native States.

Mr. C. P. Lalla, of Singapore, has made arrangements to open, at his own expense, some time next month (June) a public free school at Tanjong Paggar. A suitable building has already been secured, and a qualified teacher engaged. The scholars, who are invited from all classes of the native population, will receive all the elements of a plain English education. Mr. Lalla certainly in this matter shows an example of public spirit and private munificence which will not fail to secure him the respect of the English residents, and the gratitude of those who will be more directly benefited by his liberality. We have often had to regret the absence of public spirit in Singapore as compared with that in such places as Bombay and are glad thus to record some indication of its awaking.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAPEL—On the 31st May, at 25, Princes-square, Bayswater, the wife of Arthur R. Capel, Esq., of a son.

HOGG—On the 9th June, at 6, Grosvenor-road, Highbury New-park, the wife of Fredk. Hogg, Esq., of a daughter.

HOUGHTON—On the 4th June, at Leyton, the wife of Chas. J. Houghton, Esq., of twin. sons.

SANDILANDS—On the 1st June, at Alderney, the wife of Captain Sandilands, Royal Artillery, of a son.

MARRIAGES.

TURNER—CURNOW.—On the 28th May, at St. John's Church, Penge, Surrey, by the Rev. David McAnally, Henry Turner, Manager Imperial Bank of China, India, and Japan, eldest son of Henry Newman Turner, Esq., of London, to Margaret Phillips, youngest daughter of William Curnow, Esq., of Alverton, Penzance, Cornwall.

WRIGHT—PHILLIPS.—On April 16, at St. John's Cathedral, Hong Kong, by the Rev. Thos. Stringer, Alfred Wright, of the *Daily Press* Office, Hong Kong, to Elizabeth Phillips, both late of Greenwich, Kent.

DEATHS.

BOYD—On April 6th, on board the steamer Nanzing, while going up the Peiho, William Boyd, 3rd Engineer, from entanglement in the machinery, aged 27 years.

REID—At sea, on the 21st March, Henry Reid, late chief officer British schooner Vibilia, a native of Arbroath, aged 24 years.

REMEDIOS—At Macao, on the 23rd April, deeply and sincerely regretted by the whole Portuguese community of Macao and Hong Kong, Maria Francisca, the beloved wife of J. J. dos Remedios.

PORTER—On 24th April, at the Royal Hotel, Macao, W. Thomas Porter, aged 23 years, of the firm of Messrs. Foster, Porter, and Co., Wood-street, London.

WORDSWORTH—At the Seamen's Hospital, on 17th April, George Wordsworth, late of Shanghai.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—From the date of last report until within a few days since this market remained inactive, when, rather unexpectedly, the holders of Congous gave way and several settlements have since been made at a decline of from one to two taels, the greatest fall being on the finer descriptions, which have been brought within home rates. Some sales of new style Tysaans have been made at extreme rates. Of Scented Teas only two or three musters of new Capers have as yet been brought forward the new sales reported being of old. Some new Canton Gunpowder has been placed on the market, and has realised four taels above last season's opening rates. The sales of old Canton Greens reported below, were made for shipment to New York.

FOOCHOW.—The transactions of the fortnight have necessarily been small, the stock being all but exhausted and the season nearly over. The selection on the market is too restricted to indicate any alteration in the feeling or quotations. The following are the settlements reported since last mail:—Congous, 366 chests and 360 half do., at 14½ to 15 taels for good common to slightly preferable; Souchong, 571 chests at 21½ taels for good; Oolong, 902 half-chests at 15 taels for common cargo; Scented Teas, 400 boxes at 17 taels for common.

SHANGHAI.—Black: The market has again continued very dull, and only two settlements are reported at prices which show no decline on the previous quotations. In spite of the continued bad advices of the home market, the few chops which remain in stock are firmly held from Hankow and Kiu-Kiang have amounted to six chops. Settlements on the market, 2 chops, 743 chests Ooopacks, Oonhams, Ninchows and Hohows. Re-shipped on owners' account none, making total to date 393,782 chests. Stocks, waiting shipment and for re-sale, 8 chops. Second and third crop Oopacks and Ningchows are quoted tls. 25 to 28; do. Oonhams, tls. 20 to 25; do. Hohows, tls. 17½ to 21. Green: Settlements have been made both for the English and American markets, and the prices paid establish an advance of one tael on former quotations. Arrivals from Kewkiang have come forward very sparingly, and the market throughout the whole fortnight has been very barely supplied. A few Pingsueys and Shanghai packed have been taken at previous rates. Re-shipments and settlements for the fortnight—8,916 half-chests Fychows, &c.; 397 chests Pingsuey; 197 half-chests Japan and Shanghai packed—together, 9,510 half-chests, making total to date, 291,950 half-chests. Stock of Green Tea is estimated at 7,612 half-chests Fychow, &c.; 700 half-chests Shanghai packed Japan; 284 half-chests Pingsuey—total, 8,596 half-chests.

HANKOW.—There has been a fair inquiry during the past fortnight, holders displaying more anxiety to realise, and to return to the country to look after the coming season's operations. The settlements reported amount to three chops—say 2 chops common Oonam at 13½ to 14 taels, and 1 chop fair Oopack at 21 taels. The stock remaining on the market amounts to 6 to 8 chops.

KEWKIANG.—Green Teas: The dates extend to the 18th current. The decline in value mentioned in our last has induced an active demand, and all the finer descriptions had been bought up at stiffening prices. One chop had arrived from the country, but no further supplies were expected. Settlements amounted to 9,263 ½-chests Fychew and Moyune, while stocks were reduced to 4,500 packages, mostly Kewkiang packed teas.

YOKOHAMA.—Current prices show a decline of $1 to $1.50 on all sorts, and on fine and finest, perhaps $1 more may be considered as established. Looking at the state of the Home market, this reduction on rates, however, is barely sufficient to tempt purchasers to go in, while both European and American affairs appear so threatening to commercial prosperity. We are

Digitized by Google

promised by native merchants musters of the new crop in from fifteen to twenty days, but these early arrivals will most probably consist of limited parcels.

RAW SILK.—SHANGHAI.—In the early part of the fortnight the market was very dull, and as the dealers became more desirous to realise, a reduction of about 10 to 15 taels per picul on Tsatlees, and 15 to 20 taels per picul on Hainings, was established, at which about 600 bales have been settled. This is a larger business than might have been expected from the late very unsatisfactory advices from Europe, and has been influenced by the now certain short crop for this season, with the probability of a further diminished supply for the coming one. There has been no silk brought down from the country, so that the stock is further reduced. From Japan 207 bales have been received, and in the Yokohama market, by last report, prices were declining, with rather more silk in stock. The transactions of the fortnight are estimated at 900 bales, against 1,000 bales corresponding fortnight of last year, and 2,500 bales the season before. The present unsold stock is called 3,000 bales, against 1,000 bales in 1863, 2,000 in 1862, and 6,000 in 1861. The following are the latest quotations:—Tsatlees, No. 2, $420 to $430 per picul; Taysaams, No. 1 and 2, 385 to 405.

YOKOHAMA.—Better supplies have reached us during the past week, but the native dealers are so firm as to greatly restrick business; prices are a shade lower, but the continued dull advices from Europe keep buyers out of the market. Ida, best, none; medium, 535; inferior, none; Mybash and Sinchus, best 540 to 550, medium 520 to 530, inferior 510 to 520; Coshios, best 495 to 510, nominal, none; medium 470 to 490, inferior 440 to 450; Oshios, best 530 to 545, nominal, none; medium 490 to 515, inferior 445 to 570; Sodai, none; Adsodgee, best, 410 to 420, nominal, none; inferior 360 to 390.

COTTON—HANKOW.—Is difficult to sell, there being few buyers on the market. The nominal rate is from 18 to 19 taels per picul. At Shanghai the supply of really good and dry cotton is limited, and the demand for Liverpool running generally on the best sorts, the settlements have been small, and prices on the whole firmly maintained. Within the past few days a superior parcel has been bought at 21½ taels per picul, which is fully 5 m. under the market.

CHINA IMPORTS.

COTTON YARN.—During the early part of the fortnight some inquiry was manifested for the higher numbers of Yarn, and slightly better prices than those given under date of last circular were obtainable, but the market is now dull and inactive. Sales are put at 567 bales. In Canton sales have been effected of 45 bales, at prices which show a slight improvement in the value of the medium and lower numbers. Grey Shirtings: An average amount of business has been transacted in these fabrics during the past fortnight, about 25,000 pieces having changed hands, principally taken by foreign purchasers. Nothing has been done in these goods in Canton, but from Fuhchau sales of 650 pieces 7½ lb. are reported at $5.75 per piece, and at Amoy 600 pieces have changed hands at $5.20 to 5.50. White Shirtings: A small sale of 3,500 pieces taken on foreign account, and 1,350 pieces Chinese re-sales, complete the transactions of the fortnight. T-Cloths: Are not in any request, and the fortnight's transactions are comprised in sales of 1,500 pieces. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: The sales effected of these goods during the fortnight amount to 600 pieces of the first-named, 500 pieces of white, and 500 pieces of coloured Brocades, prices remaining without material change. Damasks: There are not any sales of these goods to report. Chintzes: Have found buyers to the extent of 450 pieces. Handkerchiefs: Have been in moderate request, and the sales of the fortnight are estimated at 2,000 dozens.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies, and Habit Cloths: These goods have not met with any inquiry during the fortnight, and there are no transactions to report from this market. Long Ells: Have also been in but little request, and the sales effected since the date of last circular amount to some 250 pieces, purchased at about previous rates. Camlets remain much as before quoted, with sales to advise of 440 pieces. Lastings: Have not met with any demand, and there are not any sales to report. Blankets: Have found purchasers to the extent of 100 pairs.

METALS.—Iron, flat, &c.: The business of the fortnight has been confined principally to nail rod iron, and prices of all descriptions remain without material alteration to notice. Sales of all kinds are estimated to amount to 3,970 piculs. Nail rod iron again shows a trifling advance in value in the Canton market, where sales of about 400 piculs have been made during the fortnight. Lead continues very low in price, with but a small amount of business transacted in this colony during the fortnight, the total sales amounting to not more than 700 piculs. In Canton, where 3,000 piculs have changed hands, an advance in value of about 15 cents is noticeable. Tin: 140 piculs have changed hands, rates showing a decline of about 50 cents per picul. Tin plates have been in moderate request at about the prices previously current, and the sales of the fortnight amount to 1,200 boxes. Steel: There are not any sales of steel to notice.

EXCHANGES ON LONDON.

At SHANGHAI.—For London: Keepsake and steamer Rajah. For Liverpool: Mayflower, Neville, Fanny, Cyclone, Elizabeth Nicholson, Helvellyn, and Unrivalled. For New York: Luzon and Anita.

At FOO-CHOW.—Flying Spur, Dora, and Nitherby.

At HONG KONG AND CANTON.—For London: Chandernagore, Belted Will, Rifleman, and Scawfell. For New York: Robert and Alexander.

At MANILA.—No report.

At SINGAPORE.—For London: Tartar, Athalstan, and Prince of Wales. For Liverpool: Bombay. For New York: Ocean Home.

At PENANG.—None.

FREIGHTS.

JAPAN.—For London: Cotton £6, tea £5. 10s. to £6, and silk £7 per ton of 50 cubic feet.

SHANGHAI.—For Europe: A good inquiry for tonnage exists. The rates to Liverpool and London are £4 to £4. 10s.; to New York, £4, with upward tendency.

HONG KONG.—For Europe: The demand for tonnage is good; the following are some of the charters:—Rifleman, 371 tons, and Scawfell, 826 tons, £4. 10s. To London: Achilles (532 tons), Manila to Falmouth, £4. 15s., if to continent, 7s. 6d. extra. For New York: The Robert and Alexander is on the berth at £3. 8s. per ton.

MANILA.—To London: £4. 15s. per ton clayed sugar, and £5 to £5. 10s. for tobacco.

SINGAPORE.—A very fair inquiry exists for suitable sized vessels, principally for rice charters, viz.:—From Bangkok to Hong Kong, 52½ cents per picul; to the North, 80 cents; Penang to Hong Kong, 60 cents; to Rangoon and back, 45 to 50 cents. To Europe the rates are:—Sugar, £3. 10s.; measurement goods, £4. 10s. per 50 cubic feet.

PENANG.—To London: £3. 15s. for heavy freights, £4. 5s. light do., and £4. 10s. measurement; for China there is little demand.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—April 12, Little Edith, from Cardiff to Shanghai; Hijroniminus, Hamburg to Samarang; Star of China, London to Hong Kong; 14, St. Jan, Rotterdam to Hong Kong; 15, Eiliana, Rotterdam to Singapore; Banian, London to Hong Kong; 17, Northern Queen, Sunderland to Shanghai; Alexander, Glasgow to Batavia; 18, Siam, Bordeaux to Saigon; 19, Emperor, Sunderland to Hong Kong; 20, Blairmore, Hamburg (for orders); Stirlingshire, Sunderland to Shanghai; Sea Wave, Glasgow to Singapore; Maria, Toulon to Saigon; Majestic, Glasgow to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT.—April 22, Bristow, Hong Kong to Liverpool.

From CHINA, &c., to UNITED STATES.—April 12, Osborne, Japan to New York; 19, Cordelia, Sarawak to New York; 21, Benefactor, Foochow to New York; 22, Bernard, Singapore to New York.

CASUALTIES.

NEWCHWANG.

LOSS OF THE MELITA. STRANDING OF THE IRIS.

The Prussian brig Melita, from Shanghai, above port, with eighty chests of opium on board, was a total wreck outside Newchwang, just below Yingtze; all the cargo was lost, but the captain and crew have escaped. The Danish brig Iris was also reported badly on shore.

HONG KONG.

The British barque Cornelia, 374 tons, Capt. Burns, from Shanghai, bound to New York with tea, struck on Pratas Shoals on 18th April. Owing to thick weather the whole passage, the captain did not get a sight of the sun. There being little swell on the vessel did not break up and the crew remained with her until Thursday 21st, at 4 P.M., at which time the captain took a boat's crew and proceeded towards Hong Kong, leaving the chief mate and the rest of the crew in charge of the vessel, where he arrived on Saturday. The s.s. Chanticleer has been chartered and has gone down to the wreck. The Cornelia has on board 439,700lbs. fine Green, 3,800 Japan tea, and 16 pcls. Raw silk.

COMMERCIAL POSTSCRIPT.

SILK.—The Circular of Messrs. Waithman says:—Accounts of the European crop are bad, and although no doubt exaggerated to some extent, it appears certain that the result as to quantity will not be equal to that of last year, while the quality is expected to be inferior, and from the prices paid for cocoons, it is clear that the cost of both Italian and French silk will be much higher than last season. Deliveries from the 1st to the 8th inclusive:—China, 966 bales; Japan, 635; total, 1,601 bales.

ARRIVALS NOT INCLUDED IN THE TABLES.—June 6th, in Channel, from Kanagawa, Mary Shepherd; 6th, off Dungeness, from Batavia, Ionia; 9th, off Falmouth, from Akyab, Johanne Lange; 7th, off the Lizard, from Sourabaya, James and Mary; 10th, in Downs, from Shanghai, Annie Archbell; June 10, at Deal, from Batavia, Hermann; 11, at Queenstown, from Maulmain, T. J. Roger; 10, at Deal, from Kanagawa, Cymbeline; 8, off the Start, from Java, Edouard and Marie; 12, at Falmouth, from Java, Emilie; at Deal, from Singapore, Chili; at London, from Penang, Edinburgh Castle; from Hong Kong, Alchymist.

DEPARTURES.—June 5, from off Plymouth, for Hong Kong, Rochelle; 7, from off the Start, for Batavia, Willemina and Clara; 3. Franz and Elise; 7, from Sunderland, for Singapore, Stafford; June 8, from off the South Foreland, for Batavia, Kosmopoliet; 10, from London, for Hong Kong and Canton, Sovereign of India; 12, from Glasgow, for Singapore and Kanagawa, Stad Enschedi; 6, from Sunderland, for Hong Kong, J. M. Joshua; 10, from Liverpool, for Hong Kong, Juanpore; 9, from Sunderland, for Shanghai, Weymouth; 11, from Deal, for Batavia, Robertus Hendricus; 4, from off the Goodwin, for Batavia, Vier Gezusters.

LAID ON.—At London, for Hong Kong, Annie Archbell.

SPOKEN.—Jason (Belgian), Rotterdam to Batavia, April 17, 7 S., 30 W.; County of Ayr, Java to Rotterdam, May 24, 41 N., 23 W.; Catharina Marie (Dut. barq.), Batavia to Holland, May 25, 49 N., 20 W.; Ortelius (Dut. ship), Java to Amsterdam, May 25, 49 N., 23 W.; Edward and Marie, Sourabaya to Rotterdam, May 17, 36 N., 33 W.; Jeddo, Samarang to Rotterdam, May 26, 49 N., 23 W.; Henry Darling, London to Singapore, May 5, 2 N., 25 W.; Troas, Manila to Boston, May 28, 40 N., 32 W.

ETHNOLOGICAL SOCIETY.

There was a very large attendance of members at the meeting of this society on the 7th inst., Mr. Crawfurd in the chair. The first paper was read by Mr. Dunn, "On the Influence of Civilisation on the Brain of Man," in which he contended that education and moral culture produce changes in the size and form of the brain, which was manifested by the conformation of the skull. By the influence of civilisation, he maintained, the skull of the negro may be altered from its original type, and may be rendered equal in its phrenological developments to the skull of a European. On the table were placed casts of the skull of an individual at different periods of adult life, to show the changes that had been produced in the course of ten years. A second paper, contributed by Mr. Crawfurd, was read "On the Sources of the Supply of Tin for the Bronze Tools and Weapons of Antiquity." There are but three principal sources from which the nations of ancient Europe could have derived tin—namely, Britain, the Malayan countries, and Northern China. The tin necessary for the formation of bronze would consequently be supplied from the West as well as from the East. The merchants would convey the commodity as far as it fetched a profit, until western and eastern met at a central point, where the two articles would be nearly of the same price. He named Egypt as likely to be that point. All the nations west of it would be supplied with the British, and all those east of it with Malayan or Chinese tin. The British tin would be conveyed by land to the Channel, and crossing it reach France, and through France find its way to Italy, Greece, and Egypt. With Sir Cornewall Lewis, Mr. Crawfurd said, he utterly disbelieved in the voyages of the Phœnicians to the Scilly Islands, and through which they are imagined to have supplied the eastern world with Cornish tin. When the Portuguese first visited Malacca, then close to the principal tin mines, the rich ores of Banca having been discovered two centuries later, they there found the native shipping of the Coromandel coast of India, and the junks of China, and even of Japan, the conductors of the trade between these countries and the Malayan Archipelago, and tin an article of their return cargoes. It was most probably by the same source that India and Southern China, with the countries adjacent to them, were from time immemorial supplied with the tin that enabled them to manufacture their bronzes and bell-metal. Mr. Crawfurd referred to an ancient work, entitled the "Periplus" of the Erythræan Sea, supposed to have been written by a Greek merchant of Egypt at the time of the Roman occupation, giving an account of the trade and trading ports between the Red Sea and the western coast of India, and which he considered confirmed his view of the manner in which India was supplied with tin. No hint of its origin was given, but it was named along with lead, brass, or bronze, cinnabar, and orpiment. None of those articles are products of India any more than tin; but they are all products of China, and exported down to the present time. In the course of trade, those and other commodities might have reached an emporium of the Malayan Archipelago, the tin of which being added to them, they would reach India together. The "Periplus" took no notice of copper, iron, or steel, from which it might be inferred that both India and Egypt were well supplied with those metals.

A NOVEL SHIP FOR THE CHINA TRADE.—On the 4th inst. there was launched from Mr. Charles Lungley's Commercial Dock, Rotherhithe, an Alabama-rigged patent combination ship, classed A 1 at Lloyd's for 15 years, belonging to Messrs. Smith, Heming, and Co., merchants and shipowners, of 18, Leadenhall-street. She is of 650 tons burden, and is intended for the East India and China trade. She was built from the design and under the superintendence of Messrs. S. H. Harrington and Co., naval architects, of 27, Leadenhall-street, and in consequence of the novel mode of construction has excited much interest. She has been visited by Lord Clarence Paget, Mr. Reed, the chief constructor; and Admiral Robinson, Comptroller of the Navy. The result has been that the Admiralty have contracted with Mr. Lungley to build an iron-clad vessel of war on the same principle. They are about to adopt it in the construction of their new 4,000 tons troop ships, the estimates for which have already been passed. The mode of construction is this:—The frames of the vessel are, in the first place, constructed entirely of angle iron of the same weight as that used in building iron ships of a similar tonnage. Each frame is then riveted to a horizontal keel, stem and stern plate broad enough to fasten the garboard to. A middle line keel plate is then riveted between the upper and lower horizontal keel plates, by means of angle irons running longitudinally the whole length of the ship, forming therewith a strong girder of a similar construction to those used in railway bridges. The half-floor plates are riveted to the middle line keelson between doubling clips of angle iron, and carried up in the usual way to the turn of the bilge, and the reverse frames are riveted on across the floor heads and carried up to the stringer plates. Bull iron beams are then fixed, which makes the whole frame rigid and ready to receive the planking, the first coating of which consists wholly of teak, and is fastened to the frames by galvanized nut and screw-bolts from keel to gunwale. The wood keel is also brought on the iron horizontal keel plate, and fastened to it by means of iron screw-bolts from inside. The garboards are then rabeted in and fastened through the iron keel plate with galvanized iron nut and screw bolts. This first skin is 2¾ in. thick, and the seams are fitted close, and double fastened to the frames throughout. Diagonal straps of iron ¾ by ¼in. are then let in, and on this skin, crossed in squares of about 6ft., fastened through frames when they cross, and carried from keel to gunwale. A suitable composition of chunam is then used, and the outer skin of 2¼in. rock helm brought on to the turn of the bilge. Thence upwards 2¼in. teak is used. Each plank is fitted to overlap the inner seams (rendering it impossible for the vessel to leak), and then fastened with yellow metal clench bolts to the inner skin, all the holes being carefully bored free of iron frames or straps. By this means the planking of the vessels is tied together vertically as well as longitudinally; no copper bolts or metal sheathing are in contact with iron, and the vessel is felted and sheathed with copper in the ordinary way. The obvious advantage of that system is that there are no through seams, no risk of galvanic action, great longitudinal strength, increased buoyancy, and capacity over vessels built wholly of iron. As vessels of war, they will be able to go to any part of the world, where there are no facilities for docking—which is an absolute necessity to our present channel fleet three or four times in the year. These vessels also afford a greater security to life in the event of shipwreck, as they cannot break up so readily as iron ships.

CHARACTER OF LORD ELGIN.—The *North British Review* has the following on the character of Lord Elgin:—Wherever he went, and it was his fate that in the four different spheres in which his lot was cast the same relations were constantly reappearing, it was his fixed determination that the interests of the subject races should be protected from the impatience or violence of his own countrymen—the emancipated slaves of Jamaica, the French Canadians, the Chinese in their dealings with the European residents, the Indian population in its dealings with the Anglo-Indian conquerors. That he had no bloodshed on his hands was his pride in Canada. "No human power shall induce me to accept the office of oppressor of the people" was his sincere resolve in China. The order to burn the Imperial Palace at Peking was wrung from him by the severest sense of the necessity of the crisis. When in India, the protection of the Indians was the constant source of solicitude to him. The stern determination with which he carried out the execution of an English soldier for causing the death of a native, was of itself enough to mark his strong sense of what was due from the Viceroy of India to the interests of the conquered race. "His combination of speculative and practical ability," so wrote one with deep experience of his mind, "fitted him more than any man I have ever known to solve the problem how these subject races are to be governed." It may be that in these acts he merely served to represent the growing humanity and justice of the age; but it is a great boon to mankind when the best tendencies of the age find a congenial soul in which to take root and bear fruit; and such a soul, in every sense, was that of Lord Elgin. It might almost be said that the sense of responsibility for the classes confided to his charge, especially of those who were comparatively friendless, was to him a kind of religion—an expression of his sense of the justice and love of God for all his creatures. And it may be remarked how, from this religious sense of the duty devolved upon him, it came to pass that, if there was any subject which more strongly moved his indignation than another, it was the sight, whether in foreign lands or in our own, of Christianity invoked, or of the influence of the teachers of religion brought to bear, against the general claims of justice and humanity on behalf of those who might be regarded, in race, or religion, or opinion, aliens from ourselves.

VOTES OF CREDIT FOR CHINA.—On the 4th inst. the return moved for by Sir Stafford Northcote, showing the sums voted since 1857 on account of operations in China, was issued from the Treasury Chambers, Whitehall. The total net amount voted from the time stated up to the termination of the session of 1861 was £5,206,104, of which sum £4,586,836. 9s. 9d. had been expended up to the 30th April of the present year. The amount surrendered to the Exchequer as a saving was £526,104, and the balance remaining in the hands of the Paymaster General is £93,163. 10s. 3d. The items of the expenditure are as follows:—Excess expenditure by Department of Secretary of State for War, made good out of votes of credit (1852-60, 1860-1, and 1861-2), £1,846,863. 13s. 2d.; repayments to Secretary of State for India (1860-1, 1861-2, and 1862-3), £882,113. 16s. 2d.; excess naval expenditure defrayed by the Admiralty, £1,856,746. 8s. 6d.; and other expenses defrayed directly out of the vote of credit, £1,112. 11s. 11d.

P. AND O. STEAMER "CANDIA."—The Lords Commissioners of the Admiralty have received a letter, signed by several of the passengers on board the *Candia* Peninsular and Oriental steamer, strongly recommending to their lordships' notice the very excellent conduct of twelve engineer officers of the Royal Navy, who were also passengers in the *Candia*, on the 29th of April last, when the steamer encountered a very severe cyclonic gale, during which she was for some time in great danger. These officers were on their way to join the *Euryalus*, on the China station. Their names are Messrs. Pickles, Eckersley, Bennett, Pover, Trenham, Greaves, Page, Chase, Pattison, Lewthwaite, M'Intyre, and Brown. Their lordships have expressed their satisfaction at receiving such an account, and have favourably noted the praiseworthy conduct of the officers.

LAUNCH OF ANOTHER P. AND O. STEAMER.—The splendid steam vessel *Nyanza*, built for the Peninsular and Oriental Steam Navigation Company, at the Thames Ironworks, Blackwall, was launched in a most successful manner, in the presence of a large number of spectators. Her engines, of 450-horse power, have been manufactured by Messrs. T. and G. Rennie, and the following are her principal dimensions:—Length between the perpendiculars, 310 feet; length of keel for tonnage, 288 feet 5 inches; breadth for tonnage, 36 feet; depth to top of keel, 30 feet; burden in tons, 1,988.

PENSIONS.—A pension of £1,000 per annum has been granted to the Countess of Elgin, and of £500 to the widow of Sir John Inglis, the gallant defender of Lucknow. A vote of £20,000 has also been passed to Sir Rowland Hill on his retirement.

AMONGST the gentlemen who were presented to the Prince of Wales on behalf of the Queen we noticed Mr. George Staunton Morrison, on return from Japan, by the Secretary of State for Foreign Affairs, and Colonel St. John Neale, Secretary of Legation, on his return from Japan and appointment to be a Companion of the Bath, by Earl Russell.

THE wife of Captain Pearson, described as in the China trade, has applied for a restitution of conjugal rights.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 6.

The First Chamber of the States-General was reopened on the 3rd inst. Several Bills that have already passed the Second Chamber have been received and distributed to the different sections for preliminary investigation.

Mr. Thorbecke, the Prime Minister and Minister for the Home Department, who has been making a foreign tour, has returned to the Hague and resumed the duties of his office. He yesterday paid a visit of some length to the establishment of Messrs. Paul van Vlissengen and Dudok van Heel, where he examined with great attention and interest the turntables in course of construction for the Java railroads, and the stupendous iron dry dock for the use of H.N.M. ships in the East Indies. In this visit his Excellency was accompanied by Mr. F. van Heukelom, President of the Chamber of Commerce and Manufactures, and Mr. de Clercq, Secretary of the Railroad Company.

A detachment of supplementary troops, consisting of 12 non-commissioned officers and 140 rank and file, the whole under the command of Capt. P. Van der Putt, Rittmeester of the E.I. Cavalry, returning to duty from leave of absence to this country, and accompanied by the second leutenants of the E.I. Infantry, P. H. Oosthout and C. F. Ooykaas, has left the Colonial Recruiting Depot at Harderwyk and marched to Rotterdam, where they embarked on board the chartered transport *Kosmopoliet*, Capt. J. Koning, for Batavia.

From an official report presented to the States-General, it appears that during the year 1863 the Mint coined 27,753,085 pieces of money, of the nominal value of 10,965,976 fl. and 55 cents, which were all put in circulation.

H.N.M.'s steam frigate *Zeeland*, 51 guns, Capt. G. C. Pels Rycken, last from the Cape of Good Hope, arrived at the Texel on the 1st inst., and after exchanging salutes with the batteries and flag ship, anchored in the roads. All well on board. No orders have yet been received as to the future movements of this fine frigate, though reports are current that she is to remain for the present in commission to be in readiness to join the North Sea squadron that will be fitted out should further hostilities be recommenced between Denmark and Germany.

Lieut. A. W. Keuchenius, R.N., and the administrative officers P. F. van Wage and L. F. Seelking, lately serving in the squadron in the Eastern Archipelago, have been placed on the list of non-active officers.

H.N.M.'s steam corvette *Princess Amalia*, 19 guns, Capt.-Lieut. J. J. Wichers, which sailed from this country on the 18th of December last for the East India station, arrived at Rio Janeiro on the 12th of April. All well on board.

Mr. W. H. Read, H.N.M. Consul at Singapore, has arrived at the Hague and taken up his residence at the Oude Doelen Hotel.

Capt. G. A. Chomel, of the Marines, in command of the detachment of that corps at Nieuwe Deep, has received orders to embark the middle of this month for Java, to relieve Capt. P. Prins, now in command of the Marines on board the guardship at Batavia. The former will be succeeded, it is believed, by Capt. de Haan-Hugenholtz, of the Marines.

The number of vessels that arrived in this country from the East Indies during the month of May was 33, of which 16 discharged their cargoes at Amsterdam, 15 at Rotterdam, one at Schiedam, and one at Dordrecht. Seventeen brought cargoes for the Company, fifteen for the private trade,

Digitized by Google

and one mixed. Ten came from Batavia, fourteen from Banjoewangie, one from Sourabaya, one from Passaroean, one from Probolingo, one from Samarang, one from Tjilatjap, one from Macassar, and three from Padang. Among other produce they brought 108,538 bags of coffee, 49,839 kranjangs of sugar, 15,056 bags of rice, 2,007 chests of tea, 108 chests of indigo, 213 casks of nutmegs, 26 casks of mace, and 195 bags of pepper.

The Netherlands Trading Company have chartered the following vessels to load cargoes of coal at Newcastle:—*Jeannette and Cornelia*, Capt. Romyn; *Schelde*, Capt. Hoefman; *Boni*, Capt. Moller; and *Constance*, Capt. Kimmerer—all for Sourabaya. *Scheveningen*, Capt. Annokee; *Abel Tasman*, Capt. Rycken; *Marinus Willem*, Capt. Buyzer; *Laura and Adele*, Capt. Lund; and *China*, Capt. Tofield—all for Onrust or Kuyper.

In token of recognition of signal services performed by the land army in Netherlands India during the war operations in the south and east districts of Borneo, from April to July, 1863, the King has created Capt. G. van Vuuren, of the E.I. Infantry, Sergeant P. J. Vis, and Corporal P. Kuipers, Knights of the Fourth Class of the Military Order of Willem. At the same time First Lieutenant Younker H. Bowier, and the Fusilier C. Benz are to be mentioned as specially deserving praise in the order of the day of every corps on home and foreign service.

An opportunity is again offered to lieutenants of Infantry in home regiments to exchange into the East India Army for a period of five years, retaining their date of seniority in the service, and receiving a bounty of 400 florins, with free passage out and home, and the other usual advantages.

PASSENGERS ARRIVED.

Per *Hollandia*, Captain Wap, at Rotterdam, from Banjoewangie: Captain van der Haas, E.I. Army, and family.

Per *Billderdyk*, Captain Victer, at Rotterdam, from Banjoewangie; Lieutenant Potasch, E.I. Army.

Per *Doelwyck*, Captain Hoefman, at Brouwershaven, from Batavia: Captain Thion, E.I. Army, and family; Captain Offermans, E.I. Infantry, and family; Mr. van Kervel, engineer; 7 passported soldiers on expiration of term of service.

Per *Isaac da Costa*, Captain Klein, at Rotterdam, from Tjilatjap: Mrs. van der Kaa and family.

Per *Ida Willemina*, Captain Rotgans, at Dordrecht, from Banjoewangie: Messrs. P. van Wage and L. F. Seelking, administrative officers.

Per *Ridderkerke*, Captain Teerling, at Rotterdam, from Batavia: Mr. and Mrs. Pacque and family, Mr. and Mrs. Smeets and 2 children, Mrs. Kruisinga, Messrs. J. A. Dinger, Keuchenius, and Varkevisser; 12 passported soldiers.

Per *French Mail Steamer*: Captain E. J. Weyland, E.I. Infantry, from Batavia.

Per *Hendrina*, Captain van Breen, at Amsterdam, from Banjoewangie: Mr. and Mrs. G. J. de Haan and child.

PASSENGERS OUTWARDS.

Per *Lichtstraal*, Captain Wierix, from Rotterdam to Batavia: Baron Rengers van Warmenhuyzen, Messrs. J. S. van Gunst, W. van der Jagt, J. B. van Neck, K. Hinlopen, and A. van Rasu.

Per *Frans and Elise*, Captain Niedfeld, from Amsterdam to Batavia: Rev. J. Meyer, Rev. A. G. Terwindt, and eleven Sisters of Charity.

Per *Willemina and Clara*, Captain Abrahams, from Amsterdam to Batavia: Messrs. Mayen, P. A. Cierenberg, A. and H. Burgemeestre.

Per *Landbouw*, Captain Kleyenburg, from Rotterdam to Batavia: Mr. and Mrs. H. Bloem, and Mrs. Heysen.

Per *Zephyr*, Captain Wemmerus, from Rotterdam to Batavia: Messrs. G. Veerman, P. A. Oetgens, Pancras Clifford, E. de Lang, G. Roessingh van Itersen, and Miss J. Groschel.

COMMERCIAL.

COFFEE.—The result of the Company's sale has given general satisfaction and improved the confidence felt in this article. Orders to purchase continue to arrive from abroad, the execution of which imparts a lively tone to the market. For most qualities an advance of ¼ to ½ cent is willingly paid. The Company's next sale will be held on the 15th of this month at Rotterdam, and will contain 86,100 bags, of which 7,800 bags are Sumatra, and all the rest Java. Stock of coffee on Company's warrants end of April 91,991 bags, to which add 86,164 bags of the May sale, makes 178,155 bags. The deliveries in May were 65,296 bags, leaving stock of 112,859 on the 1st of June.

SUGAR.—The Company's sale went off flowingly, all being sold at 1¾ to 2 fl. above the valuations. The principal parcels sold as follows:—

			Valuation.	Sale Price.
No. 11	469 kranjangs		Fl. 37¼	Fl. 39
„ 12	3,458	„	38	40
„ 13	6,866	„	38¾	40½
„ 14	6,568	„	39½	41
„ 15	6,774	„	39¾	41½
„ 16	10,535	„	40¼	42
„ 17	12,862	„	40¾	42½
„ 18	15,073	„	41¼	42¾
„ 19	8,717	„	41¾	43
„ 20	1,161	„	42¼	43½

The greater part was taken by the home refiners and only about a fifth for export. Since then the market is calm, the only transaction reported being 1,377 kranjangs of Java, No. 16, per *Henriette Maria*, at 41 fl., to be received on board. The stock of raw sugar in Holland is 38,575,832 kilogr., against 34,238,944 kilogr. last year. Refined has given rise to large transactions at greatly improved rates. ASR No. now sells for 45 fl.

RICE.—Market quiet, prices unaltered.

SPICES.—Holders are not so much inclined to operate, and this has rather checked business. Pepper however meets a ready sale at good prices.

BANCA TIN is rather firmer. Some parcels have been sold at 67 fl., but no more is to be had at that figure. Present available stock 42,278 blocks; deliveries from the 1st of January to 31st May, 33,260 blocks. Stock of unsold in Company's warehouses, 137,688 blocks. The Company's usual sale is advertised for the 29th of June at Rotterdam, the quantity to be offered will be 138,100 blocks, which may perhaps be increased by 20,000 more if they arrive in time for the sale.

INDIGO.—Market looking up. About 50 chests of Java, and 37 chests at Rotterdam have been taken at a trifling advance of the Company's last sale prices.

GETAH GITANG.—This new substitute for gutta-percha is becoming more extensively known and duly appreciated. Since last mail 1,900 kilogr. have been sold at prices that did not transpire.

RATTANS.—No sales reported.

HIDES.—2,130 Java ox, ex *Maria Adolphine*, have been sold by tender. 720 Java buffalo, ex same ship, are advertised for sale by tender.

JAVA TOBACCO.—No business done since last mail. Stock, 4,720 bales. Result of public sales as follows:—By the Company: 28 bales of Java, 41½ cents; 22 bales Japan, 22½. By the private trade: 238 bales Java UGJ, average price 18½ cents; 514 bales KM, average 17 cents; 282 bales BK, average 15½ cents; 631 bales BHvH, average 16 cents; and 175 bales C from 17 to 27½ cents. All sold.

Parliamentary Intelligence.

HOUSE OF COMMONS.

INDIAN OFFICERS.

(June 6th.) Col. SYKES asked the Secretary of State for India whether the recent appointment or employment (except in emergent cases) of officers of the Indian armies with regiments to which they do not belong, in supersession of the regimental rights of the officers or usages of those regiments, had been approved by him. He contended that the order was contrary to the spirit of the Act 21st and 22nd of Victoria, cap. 106, which guaranteed that the military officers of the East India Company should be entitled to the same privileges and advantages as if they had continued in the Company's service; and urged the injurious effects of the measure, which had, he said, created dissatisfaction among the officers of the late Company, and which opened a door to favouritism.—After some observations by Mr. VANSITTART, Mr. TORRENS, and Captain JERVIS,—Sir C. WOOD defended the measure, which, he said, had been very carefully considered, and explained the circumstances which rendered it unavoidable.

RUSSO-AMERICAN LINE.

(6th.) Mr. WATKINS asked the Secretary of State for the Colonies if any application had been made to Her Majesty's Government, or to the local authorities, by, or on behalf of, Mr. Collins, the Concessionaire of the Russo-American Line of Telegraph, intended to pass *via* Behring's Straits, for permission to carry a portion of such line through British Columbia; and, if so, whether such permission had been, or was proposed to be, given.—Mr. CARDWELL said that such an application had been made, but it was not only an application to pass through British Columbia, but it was an application for an exclusive privilege. An answer was returned favourable to the right of passage, but disapproving that part of the application which referred to an exclusive privilege.

THE NAVIGATION LAWS.

(7th.) Mr. LINDSAY moved for copy of any correspondence between Her Majesty's Government and the Governments of Holland, France, Spain, and Portugal, from 1850 to 1863 inclusive, relating to the abrogation of the discriminating duties still levied upon British vessels and their cargoes trading with those countries. He prefaced his motion by a short statement of facts, showing the success which had attended our free trade policy, from which our shipowners must have been large gainers, and by remarks upon those States which had not reciprocated our policy, but had adhered to that of restriction and discriminating duties. He pointed out the loss which France, in particular, suffered by persisting in the maintenance of her navigation laws, which inflicted injury upon her population as well as her shipowners. He thought, if these facts were brought by the Board of Trade or the Foreign-office prominently before those nations, they would abandon or relax their restrictive policy.—Mr. M. GIBSON had no objection to the motion. He entirely agreed, he said, in the general sentiment expressed by Mr. Lindsay, who however, had not made due allowance for the difficulties encountered by the Government of France from the interests connected with a protective policy, and from prejudices which it would require time to remove. Her Majesty's Government had lost no opportunity in pressing upon foreign Governments the advantage of relaxing their navigation laws, and in inviting them to reciprocate our policy.—After a few words from Mr. W. FORSTER, the motion was agreed to.

PENSION TO THE COUNTESS OF ELGIN.

(9th.) Lord PALMERSTON, in moving a resolution that, in conformity with the recommendation of Her Majesty, a pension of £1,000 per annum be conferred upon the Countess of Elgin and Kincardine for the term of her natural life, in acknowledgment of the eminent public services of the late Earl, gave a short sketch of those services, enumerating the offices he had held, his missions to China and Japan, and noticing his success in difficult negotiations requiring a combination of firmness and conciliation, as well as his services in India, the Government of which, he said, had resolved to settle a pension of a like amount upon the Countess out of the Indian revenues.—Lord STANLEY said he cordially and entirely concurred in Lord Palmerston's estimate of the public services of the Earl of Elgin, and the resolution was agreed to *nem. dis.*

GOLD CURRENCY FOR INDIA.

(10th.) Mr. J. B. SMITH moved a resolution,—"That the increasing trade and commerce of India, and the consequent increasing demand for a portable circulating medium, requires that a gold currency should be established in that empire." He showed what was the state of the trade of India, which, with the great demand for silver there, to supply the currency, rendered such a measure necessary, India not being prepared for a paper currency, and being desirous of one of gold, which it once possessed. He discussed some of the theories as to the effects of the influx and accumulation of gold, and noticed their signal failure, observing that writers upon this question had not duly estimated the operation of an

Digitized by Google

increased supply of gold in stimulating production, thereby preserving the relative value of the metal and commodities. In conclusion, he considered what would be the best and most convenient form of a gold currency for India.—Col. SYKES, after observing that the balance of trade between this country and India, in favour of the latter, had been long paid in silver, and that the vast influx of that metal into India was accompanied by a stationary production of silver, gave a short account of the various gold currencies in India. The natives, he said, were quite ready to accept a gold coinage of five or ten rupees, provided the metal be unalloyed; they would not receive our English sovereigns. He supported the resolution.—Sir C. WOOD said it would be difficult to effect a change in such a country as India, where the demand was chiefly for silver and copper coin. Although, he believed, gold would circulate in a certain degree, he did not think it would do so to any large extent. He gave details of the native currency of India—gold in the form of mohurs, and silver in that of rupees,—and as to the effects of a double standard, or a change of standard in that country, noticing the danger attending an extensive modification of its currency. It would be an advantage, he thought, if sovereigns could be got into circulation in India; but he could not express a decided opinion of what should be done till he learnt the decision of the Government of India, which had the subject under its consideration.

THE "KIU-KIANG" AND THE "ALABAMA."

The American steamer *Kiu-Kiang*, which left New York for China on the 9th February, had a narrow escape of the *Alabama*. The Cape *Argus* says:—"On Good Friday, the *Alabama* got up steam early, and prepared to leave on a cruize. About half-past nine the signalman on the Lion's Hill made down a paddle-wheel steamer standing in from the northward, and shortly afterwards announced that the vessel was an American. In the meantime the *Alabama* had hauled in her cable, and just about the time when the steamer was abreast of the first lighthouse, left the anchorage. The excitement amongst the different persons on the wharf, where a large crowd was collected, was considerable. It was supposed by some that Captain Semmes had discovered the character of the new arrival, and intended making her a prize, while others contended, and apparently with greater correctness, that the colonial code of signals would be unknown to the Confederates, and they would thus be in total ignorance of the vessel's nationality. Soon after leaving her anchorage, the *Alabama* was seen to change her course somewhat, and at the same time the other steamer was observed coming round Green Point. They rapidly approached each other, and when pretty close the Federal was seen to turn her head in the direction of the land. The vessels then passed closely, the *Alabama* going under the stern of the other, which stood into Table Bay. We learnt from the officers of the Federal—the *Kiu-Kiang*, bound from New York to China—that they took the *Alabama* to be an English gunboat, her ensign so much resembling that of St. George; and when informed by the port captain of her true character they could scarcely credit the fact of their escape. They say that had they seen the *Alabama* before they would have run down to her to learn the news, having spoken an English vessel of her build during the voyage out.

The *Anna Maria*, Portuguese man-of-war, was to go on the patent slip in Table Bay, to be thoroughly overhauled and repaired, and when refitted she will go on to China. Another Portuguese corvette was expected at the Cape, the officers and crew of which would be transferred to the *Anna Maria* for the China service, the old ones returning home.

THE TELEGRAPH TO INDIA THROUGH TURKEY.

Advices just received through Bagdad and Beyrout describe the causes of the delay in the transmission of intelligence through the telegraph to India, the submarine portion of which in the Persian Gulf was recently completed by Lieutenant-Colonel Stewart and Sir Charles Bright. It appears that 170 miles of the line from Bussorah to Bagdad are incomplete, and cannot be constructed on account of the disturbed state of the intervening country, the Arabs having revolted against their Turkish masters. The Porte undertook to construct this portion of the telegraph through the Pashalic of Bagdad, but in consequence of hostility from the Arabs not a Turk, it is said, dare venture into the district unless protected by a strong military force. These Arabs, however, it is affirmed, would permit the English to carry on the work; yet so jealous are the Sultan's Government of our doing anything within his territory that they would rather have this great undertaking indefinitely obstructed than permit us to act. The consequence is that messages must be conveyed over the incomplete portion on horseback, which causes a delay of about six days. It appears, also, that this is not the only present cause of interruption, a break having occurred in the route from Bagdad to Constantinople, one stage from Bagdad, "where the line is so wretchedly looked after, and the Turks are so slow about repairs, that it is impossible to say when it will be again in working order." The details thus given furnish a literal confirmation of all that was predicted seven years ago, when the English Government, after having encouraged the Euphrates Telegraph Company, which had been formed by Mr. Andrew, to incur a considerable outlay, suddenly abandoned the enterprise, in order that the Turks might themselves carry it out, and that our own resources might be expended on the Red Sea line, where a million of British capital has been hopelessly sunk.

PENINSULAR AND ORIENTAL COMPANY.

The forty-seventh half-yearly meeting was held on the 3rd June at the company's house in Leadenhall-street; Mr. P. Douglas Hadow, the deputy chairman, presiding.

The CHAIRMAN, after expressing great regret at the severe domestic affliction which prevented Mr. Anderson from taking the chair on that occasion, proceeded to state that the past half-year had been marked by the events which usually characterised their six months' operations. They had not been, and could not hope to be, entirely free from the ordeal which all companies working upon the sea had to encounter; but they had great reason for congratulation that from the accidents recorded they had come off so little scathed. The *Candia* had encountered suddenly a very severe cyclone, and the newspaper reports gave a very faithful and true account of the terrible trial to which she was subjected. The company had been building new ships, and it was necessary that they should continue to do so to keep pace with the times. Four as fine new ships as were ever built for any company had been launched during the half-year, the *Syria*, the *Baroda*, *Delhi*, and *Golconda*, and as he returned from Egypt in the *Delhi* he could speak from experience of the qualities of her performance, as well as of the efficiency of her officers and men. The *Simla*, as mentioned in the report, had gone to resume her station on the Calcutta and Suez line, and just before he came to the meeting a telegram was received from Suez announcing her arrival there at 6 a.m. that (Friday) morning, and that she was in good condition. The *Corea*, purchased for the Japan line, was built at Dundee, and was well suited to the requirements of the company. There was occupation for two vessels between China and Japan, and the traffic was growing, but he could not at present say what vessel would be associated with the *Corea* in that service.

With regard to the Australian service, he regretted that there was nothing more definite than the statement of the report to be communicated as to the progress of that line, but he might hazard the conjecture that a bi-monthly line would be established there before long. (Hear, hear.) They could not hurry Government departments, but he believed representations from the colonies would shortly bring about that result. Upon the subject of passage money, he observed that when the reduction took place in 1857 it was hoped that the company would be able to maintain it, but circumstances occurred under which they were reluctantly compelled in 1861 again to raise the charge, An alteration favourable for the public had, however, since taken place, and the directors felt bound to give the public the benefit by reducing their fares to what they considered a fair remunerative rate. The reduction amounted to about 12 per cent. upon the passage money generally.

With regard to the Egyptian deputation, as he was going out there on account of his health, he was requested to take in hand the negotiations with the Viceroy regarding the transit of passengers through Egypt. The company had been paying £7 for the transit of first-class passengers, including disembarkation and the carriage of all luggage, but the amount was still very high. An erroneous opinion had got abroad that the company was sharing this large sum, but he wished to be distinctly understood that not one penny of it came into the company's coffers—that the whole was handed over to the transit administration. The rate might have been a fair one at the time it was arranged, but it was very unfair now. Upon a representation to the Viceroy and his officials the justice of the demand was admitted, but at the same time they had been very much pressed by peculiar circumstances in Egypt, the great increase of traffic and former neglect of the line having put them to some expense, and they were somewhat reluctant at first to give effect to the views of the company with respect to the necessity of the reduction. He was happy to say, however, that with some degree of perseverance they had succeeded in their object, and after the 1st of October, instead of £7, the rate would be £4. 10s. for first-class passengers. (Hear.) They hoped also to make arrangements to secure the attendance of European guards to the trains, which in the case of ladies was especially desirable, for at present they were at the mercy of the railway officials there, and did not know where to go or where to ask for anything.

The Viceroy and all the officials had always treated the company with the greatest courtesy, and had shown a desire to do anything that was reasonable. With regard to their friendly rivals, the French company, he had had the opportunity in Egypt of seeing some of the officers connected with it, and they professed the utmost goodwill and readiness to help this company on all occasions. About two months ago one of the steamers of the French company broke down, and the Peninsular and Oriental carried their mails and some of their passengers on, and the next month a similar accident befel this company, when the French company did the same for them. (Hear, hear.) It was arranged under the circumstances that no charges should be made between the two companies, but that they should take what had passed as acts of mutual kindness. He moved the adoption of the report.

The CHAIRMAN, in reply to Admiral Coffin, observed that very complete and full instructions were given to officers in command of the company's vessels. There was no doubt captains of steamers were generally too fond of hugging the land, and very stringent directions were given on the subject. The accident to the *Rangoon* did not, however, arise from that cause, but from an error in judgment in "laying to;" the facts had been inquired into, and it had been decided that the conduct of the captain did not meet the approbation of the board. The captain of the *Candia* was well known as the man who rescued the *Sarah Sands*, and, in the case of the accident to his vessel, the glass fell so short a time before the intensity of the hurricane was felt that there was time to do nothing.

Mr. JONES was glad that the company was in a position to pay a dividend of 5 per cent. for the half-year, and to build new ships without calling for an increase of capital. He hoped that some arrangement would be made with the Viceroy for a reduction of the freight on goods, so as to give valuables the same privileges in passing from one side of the Isthmus to the other as Manchester piece goods, upon which there was a large profit. He also asked for some statement with regard to complaints in the *Egyptian Times*, that the company were trading in coals for the benefit of the Pacha, and that the coals they did supply were "rubbish."

The CHAIRMAN said that it was perfectly true that the Viceroy had asked them to procure coals for him, and they had done so, and would do so again if they were asked. (Hear, hear.) As to the allegation that the coals they supplied were not fit to burn, that was simply an untruth. They had also supplied the Viceroy from their own stores occasionally, just as they had supplied Her Majesty's Government, and would continue to do so. (Hear, hear.) He had endeavoured to obtain a reduction of freight of coals from Alexandria to Suez, and though, hitherto, such an arrangement had not been found possible, he had reason to believe that something would be done in that reduction when the line was doubled between Alexandria and Cairo.

The report was unanimously adopted, and, on the motion of the Chairman, a dividend was declared of 3½ per cent., with the additional payment of 1½ per cent. for the half-year, in accordance with the report.

LONDON, MONDAY, JUNE 13, 1864.

THE COBDEN DEBATE ON CHINA.

YET another debate on China this session. This time it is to serve the nostrums of the great free-trade oracle RICHARD COBDEN. All members of Parliament take most unwarrantable and unjustifiable liberties with China. At one time it served even to the discomfiture of the Ministry and a general election—not to serve China but party purposes—now we have Mr. COBDEN, a thoroughly honest member, attempting to prove to us that since Hong Kong was established as a free port the trade of Canton has dwindled down to nothing; and that if we established a few more such free-trade ports, we should at one blow annihilate all our troubles and expenditure in China. It is very unfortunate that honourable members will not take the trouble to ask of persons who have been resident in the country whether their opinions are correct, before propounding them in the House. Now, what are the facts of the case. From what period does the prosperity of Hong Kong date? Why, from the time of the rebels menacing Canton in 1851; until then it was a hard struggle to maintain Hong Kong, and, as Mr. COBDEN and other honourable members well know, yearly grants had to be made by Parliament for its maintenance. Before this period, land which was bought on the first establishment of the colony, in 1843, was in many cases surrendered to Government, with a loss of the improvements made thereon, rather than incur what appeared to be a useless and unprofitable outlay in the yearly ground-rent. So great was this loss and disappointment at the general progress of the colony, that the China merchants in a petition to the home Government asked for some measures to be adopted by which trade and the Chinese could be induced to come to the place. In this petition it was urged that a differential duty in favour of tea imported from Hong Kong would be the best and surest means of drawing the Chinese merchants to the colony. What will Mr. COBDEN say to this expedient for the free port. Of course Her MAJESTY'S Government were not so impolitic as to adopt such a violation of free trade. It is well known to all residents, at that time in Hong Kong, that the great burden of the despatches of the merchants and of Sir JOHN DAVIS, the then Governor, was that the respectable traders would *not* come to the place; and not until the rebellion set in did the steamers in the trade between Hong Kong and Canton give a good return to their owners. Even the goods which were landed at Hong Kong were afterwards transferred to Canton. The loss of the trade of Canton was, in the first instance, due to the rebellion, and in the second to the burning of the factories and the opening of the Yang-tse, whereby we import our teas direct from Hankow. It is very probable that the Chinese were deterred from settling at Hong Kong by the mandarins at Canton, who could see plainly that a departure of trade to that place would deprive them of the comfortable emoluments which they enjoyed; and we can assure Mr. COBDEN that his two free ports on the coast, which he proposes to establish, would share the same fate. Mr. COBDEN may know how to promote free trade in Europe, but he certainly is out of his depth when he stretches his hands to the Celestials in the Far East. It is a pity that Her MAJESTY'S Ministry cannot also be allowed the opportunity of proving the assertions of hon. members to be incorrect. We cannot blame Mr. LAYARD for not administering the knock-down-blow to Mr. COBDEN'S statements in reference to the free port of Hong Kong. We blame the system which compels a Minister "there and then" to answer hon. members. In questions of such import, it is of the last importance that the right answer should be given, and it is not reasonable to expect that this can be done off hand. The rules of the House should permit Ministers to reply to such attacks on the following evening. It is only fair that any reigning Government should have every opportunity of defending its actions, seeing that it has to stand against the enormous odds of the whole House. We do not mean as regards an adverse vote—there are ways of avoiding that—but we mean their general prestige; and to avoid their being induced to alter their policy on any question, when that policy is the best which can, under the circumstances, be adopted. Other points in the debate we shall notice in our next.

FRENCH POLICY IN CHINA.

AFTER the long and repeated discussions in Parliament and by the press of this country on the Government policy in China, the question naturally arises, what is that of our allies the French? On this head Lord NAAS, during the last debate, alluded as follows:—"If we persevered in the "course we had taken, and availed ourselves of that influence "which the employment of British military officers in that 'country would give us, we could not be surprised if before long "'we found French, Russian, and American contingents mixing "themselves up in the internal disputes of China." No further notice having been taken of this point, it would appear that the noble lord and other hon. members are oblivious of the fact that the French have drilled and officered a contingent of native troops, in the Ningpo country nearly as strong as that in the Shanghai district—which was originally raised by an American; and at present one-third of its officers are from the United States. Many years before a British soldier or an Englishman entered the Chinese service, not only were the subjects of France mingled up in the internal affairs of China, but French troops co-operated with Chinese at Shanghai, in 1854, when they bombarded the walled city held at that time by the Taipings, while the English forces kept aloof from the conflict. Apparently, the operations at Soochow and the vicinity by the Anglo-Chinese force has occupied the public mind so much of late, that the success of the Franco-Chinese contingent at Hangchow has been overlooked. Not so in France. When the news arrived reporting the fall of that city, by the same mail which announced GORDON'S reverse at Kintang, the French press was jubilant over the prowess of Colonel D'AIGABELLE and his disciplined native legion. That gallant officer belongs to the Imperial Artillery Corps, and with his brother officers from the French army in the native contingent, are on a similar footing in the Chinese service to that of British officers. The *Ministre de la Guerre*, not having followed the example of our Secretary of State for Foreign Affairs, by rescinding the order permitting that act, there is every probability of D'AIGABELLE and his force taking the lead in the Taiping campaign when GORDON and his brother officers resign. Then if he is "in at the death of Taipingdom at Nanking, French *prestige* in the internal affairs of the country will again become dominant, and England will be nowhere. As if foreshadowing this state of affairs, the *Moniteur de l'Armee* publishes a significant letter from a correspondent at Tien-tsin, who mentions the circumstance of the Peiho river being closed with ice up to a later period than formerly, in consequence of an unusually rigorous winter. On the 15th March, when navigation was open, the first ships that entered the river were two gunboats, built in America, on account of the Chinese Government. These two ships of war are to be stationed at Tien-tsin. The Court of Peking is expecting more war vessels from America, in place of those built in England. When these ships arrive, operations on a ground scale are to be commenced against Nanking. A council of war was to be held at Peking towards the 15th April, at which the French Admiral JUAREZ was to assist. Such is the purport of this suggestive communication to the Government organ of the army. Query, had Prince KUNG this flotilla in view, to be under his untrammelled control, when he so coolly declined the SHERARD-OSBORN squadron? Are these vessels to be commanded by French naval officers? What England has rejected France may be nothing loth to accept, so that she may have the first finger in the China pie. Therefore Lord NAAS need not be surprised at finding the French contingent mixing itself up in the internal disputes of the country, for they have done that pretty well already; and the present policy of the Imperial Government is still more active in the same direction.

THE JAPANESE AMBASSADORS IN PARIS.

(FROM OUR PARIS CORRESPONDENT.)

The Tycoon's Envoys are hard at work with the Minister of Foreign Affairs, with whom they have had several long and, it is said, very satisfactory interviews; and the belief is that Prince Ikeda and his companions are fully empowered to, and will succeed in, making such arrangements as will permit the intercourse between Europe and Japan to flow on without other obstructions than those which may arise unfortunately and inevitably from the ignorance or prejudice of individuals. Considering recent events on the one hand, and the resources and capabilities of Japan on the other, such a result will be amongst the most important of the age in a commercial point of view alone; but the establishment of a sound understanding with Japan must have, moreover, considerable moral effect, if only by way of example or warning to other people of the Far East.

It is generally believed that the negotiations between the French Government and the Japanese Ambassadors is virtually concluded, although nothing at present is known concerning it out of doors, and certain indications point to such a conclusion. The day before yesterday the Envoys gave a grand banquet at their hotel to the Minister of Foreign Affairs, M. Drouyn de Lhuys, and the Marquis de Chasseloup-Laubat, Minister of Marine and of the Colonies. It was a magnificent affair in every way; the entertainment was got up in the very best possible manner, and the company was numerous and distinguished. Besides the Ministers already named, there were present M. Cintrat, Baron d'André, the Marquis de Banneville, M. Herbet, and M. de Billing—all holding important posts near the Minister of Foreign Affair; Admiral the Baron de la Ronciere Le Noury and M. Delarbre, chief secretary to the Minister of Marine; Baron Gros, the Marquis de Trevise, Chamberlain to the Emperor; General Bougenel and Count de Rayneval, representing Prince Napoleon and the Princess Mathilde; Baron Feuillet de Conches, Introducer of Ambassadors to the Emperor; and many other gentlemen attached to the Court and Ministry. There were present, besides, the directors of the Imperial printing establishment, of the works at Sevres, and of other public institutions which have been visited by the Japanese Envoys. The band of the Garde de Paris played during the dinner. When the dessert had been placed on the table, the first interpreter of the Embassy gave the health of Napoleon III., to which M. Drouyn de Lhuys responded by a toast in honour of the Tycoon and the development and consolidation of the relations between the two countries.

This banquet is remarkable from the fact that it is the first instance of the Japanese having acted as hosts with French Ministers for their guests, and it is admitted on all hands that nothing could exceed the urbanity, politeness, and attention exhibited by Prince Ikeda and the whole of the members of the Embassy. This young daimio has attracted great attention in all quarters, and one of the objects that was most remarked on the occasion in question was a bust of the Prince, executed by a French sculptor named Doublemart, which is considered very successful.

The other day the Ambassadors visited the Imprimerie Impériale, where they were met by a largen umber of officials, members of the Legislature, and one or two foreign Ministers. The famous founts of Asiatic types were duly examined, and a commemorative card, brilliantly printed in crimson and gold, with the following lines in the Japanese language, with a French translation, was printed in their presence:—

"Le 30 Mai, 1864,
L'Empereur Napoleon III.
régnant,
S. Exc. M. Baroche
étant garde des sceaux,
Ministre de la Justice et des Cultes:
S. Exc. Ikeda Tsicougo no Cami,
premier Ambassadeur;
S. Exc. Cawatsou Idzou no Cami,
deuxieme Ambassadeur;
S. Exc. Cawada Sagami no Cami,
troisieme Ambassadeur
de Sa Majesté le Taicoun du Japon,
ont honoré de leur présence
l'Imprimerie Impériale de France.
Le Conseiller d'Etat directeur,
Anselme Petetin,
a présenté a leurs Excellences
cette feuille, tirée sous leurs yeux,
en souvenir cordial de leur visite."

Specimens being, of course, handed to the visitors, who afterwards partook of a collation with M. Petetin and the company present, in the garden of the establishment, which, may be remarked in passing, occupies the site of the old Temple, where the miserable Louis XVI. and Marie Antoinette were confined during the early period of their imprisonment, and where the still more wretched Dauphin, "Louis XVII.," was murdered slowly by the fiends in human form, Simon the cobbler, and his virago of a wife.

As everything connected with the Japanese Ambassadors finds readers just now, of course the industry—and, just possibly, a little of the imagination also—of the caterers for the public are called into full exercise. There is a famous *Café Chantant*, known as the *Alcazar*, a magnificent temple of harmony, smoke, beer, and grogs, where a singer named Thérésa is chief priestess. This lady is just now one of the celebrities of Paris, she has the largest, blackest, and brightest eyes, and the loudest voice *out*. In short, the *Diva* of the Alcazar enjoys at the present moment a very enviable notoriety. Of course she has many admirers and some worshippers, but recently bouquets of the most exquisite kind have poured in upon her, and lately, one of these was accompanied by a magnificent ruby ring! Nobody could, or would, tell who was the sender of these, and *Diva Thérésa* was immensely fluttered and puzzled. Still later she received a sheet of scarlet paper with some extraordinary hieroglyphics traced upon it, and at last, with the aid of a professor of the Eastern languages, it was discovered that the crimson paper contained the name of one of the Japanese Ambassadors! Nobody can state for certain from whom it came, but all remember perfectly a young distinguished man who on many occasions listened to Thérésa's singing with a rapt delight; he is described as dressed in perfect European taste, but as having a decidedly Eastern expression of countenance. He never took anything but a glass of sugar and water, always paid in gold and refused to accept the change—a circumstance which must have been very embarrassing for the waiters! The stranger has disappeared from the Alcazar but the story remains, and the comment most generally heard concerning it is a natural one—"Well, you know, after all, the Japanese are but men!"

MR. COBDEN'S DEBATE ON CHINA.

(THE TIMES.)

Parliament has at last digested the only tough morsel which disturbed occasionally the quietude of the slumbering Session. Three times already there has been an effort to get rid of that China lump, which on each occasion produced a slight nightmare and a small struggle without any happy solution. Now it is all over. The unassimilated morsel is dissolved; China is clear out of the Parliamentary breast. Like a debt paid by a note of hand, or a broken promise healed by the homage of a plausible excuse, the claims of China have been handsomely recognised, and the topic may now fairly be struck off the Parliamentary list. Nothing, indeed, has been actually done; it was only a motion made and withdrawn; very few stayed to listen, because no one expected to have to divide; but it was something that China has at last escaped the ignominy of a count-out, and that a tolerable sprinkling of the first and second class speakers have submitted to be called up in debate. It was just such a demonstration as might be expected upon a subject which was at one time of immense interest, because of immense danger, but has now lost its interest because every one knows that all danger is past. No one ventures to treat it with open contempt, because it is in itself so vast and may at any moment become so important; but at the same time no practical statesmen care to adopt it as a subject, because all moderate men are not only agreed that the present policy is sound, but they see that it is successful. It has for the present lost its party importance, and is a bit of no man's land, on to which every "independent member" may ride his own particular hobby to caper and curvet.

At this moment the position of this country towards China is the very model attitude of non-intervention. Captain Sherard Osborn is come back with his squadron, the instructions to our naval officers confine them strictly to the defence of our Treaty Ports and a little breathing circuit round them, and the order is now on its way, if it be not already arrived, which will detatch Major Gordon from the service of the Imperial Government. Whether, as has been suggested, the Admiralty have issued instructions that Chinese pirates shall not be interferred with so long as they confine themselves to the plunder of native merchant vessels, we are not informed; but this far-strained application of the non-intervention principle to non-intervention between the robber and his victim was not wanted to show that we are now perfectly impartial between the Imperial Government of China and the hordes of plunderers who infest the country. All we do is to protect our own merchants, our own Treaty Ports, and our own commerce; and that policy thrives so well that everybody is satisfied with it. The amount of our transactions with the Empire of China is increasing yearly in a ratio that seems almost incredible, and although some of the old-world superstitions seem still to survive in the House of Commons, and although gentlemen who ought to know better seem to think with the Chinese that commerce is only valuable when the exports exceed the imports, yet the British public generally have learnt that it is a good thing to have large transactions with a great country, even if you have to pay for its produce in the silver and the gold you accumulate from your commerce elsewhere. To the general public it will be a matter of congratulation that tea has been imported from China in greatly increased quantities, and that silk has come over in greater abundance. The present

Digitized by Google

generation has been brought up to believe that the more plentiful an article of general consumption is, the more attainable it is by the multitude who desire it, and therefore they rejoice that the commerce with China goes on doubling itself, even although it may be shown that the "balance of trade" is against us. In the increase of the commerceial movement at the Treaty Ports in China we do, therefore, recognise, and we believe the public in general recognises, the success of the modern policy pursued by our Government.

The closest reading of this debate will fail to discover more than one practical suggestion drawn from the speeches of the speakers. With that single suggestion it should not be our business to quarrel, for it is one which was first made in these columns, and was launched immediately the news of the failure of the Osborn expedition arrived. It requires no very great astuteness to discover that China has arrived at a point when she must be either cut up by conquest or eaten into by the gradual growth of Free Cities. This idea was the thought which pervaded the debate of Tuesday night, and which alone gave it vitality. We must protest, however, that our notion of a Free City is not that which was presented to the House of Commons in this debate. A Free City, such as we see in the future of China, is not a rock like Hong Kong, with its surrounding fleet, its Governor, its courts, and its wide jurisdiction. We do not recognise as a Free City the fortress of a first-class Power, existing as a menace to the neighbouring country. China has a fringe of islands which, if they became free in this sense, would advance the interests of commerce as much as the castles on the Rhine protected the ancient navigation of that river. Whether we bought or conquered them, such possessions as these could only be a curse to us and to the world. Hong Kong is, in itself, worse than useless, for the action of its Courts and the jurisdiction of its Governor are a standing nuisance in the Chinese seas. If we had a succession of Hong Kongs all up and down the coast, we must have a Governor and a garrison for each; we should but multiply our expenses and our chances of quarrel; and, as the example of Shanghai shows, such establishments never could compete with a really Free City. The Free Cities we hope to see are those which form of their own accord, and which arise out of the circumstances of an abundant commerce and an unsettled country. If the nations of Europe would agree to stand aloof, we should very soon see little commercial republics intrenching themselves and extending themselves upon the shores of China; just such cities as arose upon the coast of Africa, and in later history upon the coast of Italy, when similar dangers compelled traders to draw together for defence and self-government. We believe that our cheapest and our best policy is not to establish, but to favour the growth of such communities as may develop themselves into Free Cities. Nor can we expect that this development will be the work of a day, or that so great a ruin as that which is mouldering over the heads of one-third of the human race can fall, and be re-formed into modern habitations, without many clouds of dust and some terrible catastrophes. These speculations, however, are of very minor importance now we are all agreed that our interest is to force nothing in China, but to be content to defend our own and follow the course of circumstances. The active policy of obtaining possession of islands round the coast and turning them into fortified warehouses is not likely to find many advocates; the passive policy of holding our own and waiting is the policy which is now being pursued with a very general approval, and which, at any rate, has the advantage of a present success.

(DAILY NEWS.)

The debate in the House of Commons on our policy in China, although conducted with great ability, was deficient in one essential element of interest, and though relating to matters of high practical interest, it was too historical to be itself practical. A year or two ago, when the policy of intervention was in full swing, a discussion in the House of Commons, resulting in a manifestation of opinion like that of Tuesday last, would have been an event of far more importance than it is now, when that policy is dying a natural death. Many points of that policy have lately been abandoned, and the remainder are defended rather in self-defence than from any strong belief in their value, as must have been evident to all who heard Lord Palmerston's speech. Even if we had not recently been assured on confident authority that Lord Palmerston is the only English statesman who understands our interests in China, it would have been clear that the policy we have for a long time been pursuing there is the creation of a single mind, and rests on personal convictions. The measures which were prompted by it are now in course of abatement, and provided the process goes on the public may be satisfied without a more formal retractation. The great point is to return, as far as may be possible, to a position of neutrality between the parties contending for supremacy in China. Much has lately been done in this direction. Capt. Sherard Osborn's expedition is broken up, Major Gordon will not continue to serve under the Futai of Shanghai, and the Orders in Council under which British officers have been permitted to enter the service of the Chinese Emperor have been revoked, and are not to be renewed. Lord Palmerston continues to persuade himself that the policy by which those orders were prescribed was right, but in his own words, "That policy is at an end."

Lord Palmerston undertook, on Tuesday night, to describe the natural history of the relations of a highly-civilised with a semi-civilised people, of which our intercourse with the Chinese was an illustration. According to the Premier, each sets out with different expectations and different rules of conduct. On one side all is good faith, justice, probity, and honour; on the other, craft, treachery, and violence. The civilised and highly-virtuous nation will not acquiesce in the treatment it receives, and hence arise quarrels, and at length wars, then treaties, then breaches of treaty, always by the semi-civilised, then more wars, until the guilty party, being necessarily the weaker, is fairly beaten into reason and propriety. For the honour of our country and its veteran statesman let us, even if we have to forget something for the purpose, assume that this is a true representation of our relations with China. Still it would be admitted that the history is incomplete. Lord Palmerston stopped short in the series of consequences he undertook to develop. Another part of his speech, however, supplies the sequel. We have beaten the Chinese until the government of that country by the Imperialists has become all but impossible. Having thrown down the Emperor's authority, we have had to consider in our own interest how it may be set up again, but this is found to be no such easy matter. By weakening the Emperor we strengthened his domestic enemies. It was proposed to redress the balance of internal power by allowing British subjects to enter the Emperor's service, and help his government to put down the rebellion. But Lord Palmerston said, on Tuesday night, with reference to the steps taken for that purpose, "those measures have failed. I am sorry for it." And there the matter stands. The Premier's aims were worthy of his fame—he proposed nothing less than the pacification of China, which he says, "we know has been the seat of turbulent disorders, revolts, and rebellions of about 3,000 years." Far be it from us to affirm that Lord Palmerston would not have succeeded in reducing this ancient anarchy and chaos to rule and order, but we tremble to think what would become of the innocent British taxpayer in the meantime. The task was too great for us to add to our existing liabilities. Certainly no trade that we carry on, or can expect to carry on with China, can repay us the cost of such an enterprise. Indeed, if all our foreign trade were conducted under conditions as onerous as the with China—if the insurance we paid on it in the form of money expended in naval, military, and diplomatic establishments, bore everywhere the same proportion to profit as it does in that country, it would become a serious question whether we should not do wisely to send off our manufacturing population to the colonies, and settle down quietly to the cultivation of our fields. The best thing we can do is to take China as it is, and carry on the best trade we can with it, instead of attempting to create it anew in the hope of doing better. There are districts occupied by Imperialists, and others occupied by Taipings. We should bear ourselves as neutrals towards both parties. It is no doubt very desirable that one or the other party should either suppress its antagonists, or divide the empire with them, and that this should take place much sooner than is likely to happen. But even while the strife lasts we need not consider the country occupied by the Taipings lost to productive uses. Colonel Sykes, who so offends Mr. Layard by his citations of unofficial authorities, repeated on Tuesday the fact which he has often mentioned, "that since May, 1860, the Taipings have been in the possession of the two great silk districts, covering a vast extent of country, and having a population of upwards of sixty millions of souls, during which period the exports of silk from Shanghai have increased from 70,000 to 85,000 bales." The declaration of the Government, that it will in future confine its military measures to the defence of the treaty ports, and the protection of British interests, will satisfy the reasonable expectations of the public, provided it be fulfilled according to its ordinary meaning. But we must give up the ambition of becoming in any degree responsible for the Government of China, and be content with doing as much trade as we carry on, as traders, and not as Anglo-Chinese politicians and partisans.

(MORNING POST.)

Mr. Cobden suggested that our existing difficulties might be overcome, and an escape effected from an embarrassing situation, by the establishment of free ports and the confinement of our trading operations to places thus subjected to our own immediate jurisdiction. But, as Mr. Layard observed, Shanghai and Hong Kong are at the present free ports, and the establishment of others could only be effected by the cession to us of Formosa and some other islands in the China Seas. This cession would, however, be refused by the Chinese Government, for the very sufficient reason that the establishment of a number of free ports would enable us to absorb the entire of the external trade of the empire. But whether this were so or not, we should find ourselves obliged to adopt the same measures for their protection and for the maintenance of our commercial relations with the interior which we are now compelled to employ, nor could we ever hope to isolate ourselves completely from the country which would constitute the base of our operations. It has been more than once asserted that we are assisting the Chinese Government to suppress a rebellion, and thereby departing from that broad line of policy which we have for at least half a century prescribed to ourselves in respect to the internal dissentions of foreign States. This is, however, a grave error. To us it is a matter of indifference what dynasty rules at Peking. But we are obliged to recognise a *de facto* Government, and more especially so because it manifests a desire of keeping faith with us. The Taipings are in arms ostensibly for the purpose of subverting the existing Government, but in reality for the sake of plundering every town into which they can effect an entrance. No one affects to doubt what would be the consequences if Shanghai fell into the hands of the Taipings. It would be given over to indiscriminate pillage, and such of the inhabitants as remained in it probably put to the sword. If the rebels were actuated by the motives which in other countries not unfrequently lead a section of the population to resist the established Government, it might be an open question whether we were justified in aiding the Emperor of China to resist his revolted subjects, but under present circumstances no alternative is left to us but to co-operate with the authorities in resisting a common enemy. But we content ourselves with acting on the defensive. We have not sent an army to China to assist the Emperor in subduing the Taipings; we are satisfied with taking measures to prevent their encroaching on territory which, though not absolutely ours, we are justified in considering under our protection. Our position in China may be anomalous, and our relations with the Imperial Government may be peculiar, but the former could not be abandoned, nor the latter seriously modified without jeopardising the lives and property of large numbers of individuals who have taken up their residence and invested their capital in China in the belief that they were entitled to claim the protection of the British Government.

(DAILY TELEGRAPH.)

The rules and orders of the House of Commons will be found on examination to be based not only on the principle of preserving the constitutional rights of that assembly, but on good sense and convenience. In some of them, however, there seems a lack of precaution against the prevalence of boredom in members at large. It seems possible to discover a trace of this idea in those orders which prohibit a gentleman from speaking more than once in an ordinary debate, and which forbid a reference to any speech of a member made in the same session, lest he should be tempted to speak it over again. If we were to look at such regulations in an antiquarian spirit, we might imagine Hampden and Eliot contriving a new rule which would put a check on the iterations of Pym,

Digitized by Google

and which might even curb the repetitions of Cromwell. Amongst the rules which the wisdom of the builders of our constitutional system have sent down to us is one decreeing that no bill dealing with the same subject should be introduced more than once in the same session. The custom does not technically extend to abstract motions, but in practice it has been unusual for even the most enthusiastic professors of parliamentary theories to force, by sheer reiteration, their speculations upon a reluctant House. This year a special exception has occurred in the case of China. Already that subject has been elaborated by Mr. Liddell, in a speech evidently the result of great industry and full inquiry, and illustrated by statuesque attitudes and almost impassioned language. Only a few days ago Mr. Baxter touched more lightly on the question, and, though cold and even dry in his mode of dealing with it, he was sensible and pointed, and contrived to put his case into a remarkably clear and comprehensive form. Then, too, Colonel Sykes has scarcely ceased to sprinkle the notice-book with small motions, mainly directed to develop his devotion to the cause and to defend the character of the Taipings. Still, parliamentary usage having failed to prevent any further formal raising of the Chinese question, the approach of a motion by Mr. Cobden was the signal for much lobby gossip, and the usual charitable criticism on the motives and intentions of independent members was rife. It was cynically remarked that excellent and sympathetic as he might be, the member for Rochdale was not exempt from the proverbial tendency of man to look with a certain pleasure on the embarrassments of his friends, and that there was lurking in his secret thoughts a desire once more to place Mr. Milner Gibson in a position the reverse of delectable whenever Lord Palmerston's China policy was the topic in hand. Mr. Cobden was supposed to feel a humorous satisfaction in indirectly quizzing that right honourable gentleman who, as a Radical member of Parliament, provoked a general election is 1857 on the Chinese question, and who in 1859 joined a Cabinet presided over by the guardian genius of the very course which he had induced the House to condemn; that same Cabinet, too, being tesselated with dukes and earls, and thus in its main components aristocratic. Truth to say, in his speech last night Mr. Cobden did make a sly allusion to this very matter, partly justifying the insinuation of those who sought to account for his coming forward to tell a thrice-told tale; and the presence of Mr. Milner Gibson on the Treasury Bench, with the well-known and indomitable smile upon his face, gave point to the allusion.

Beyond this, there went about rumours that Mr. Cobden was yielding to a less excusable sentiment, and desired to take an opportunity of venting on the Prime Minister an ill-humour generated perhaps by a sense of public duty, but now deteriorated into personal pique. Those who were most lenient in their conjectures were confident in their enunciation of a profound opinion that he was but following a political will-o'-the-wisp in attempting to impeach, far more to alter, the traditional policy of this country in China; and prophecies were current that the debate would be anticipated and disposed of by the ready device of a "No House." Whether it was curiosity to ascertain if even so practised a rhetorician as the member for Rochdale could give life and interest to an exhausted subject; whether the accident of a wet evening kept members of committees upstairs within the precincts at the witching hour of five; or whether a combination of these causes operated to produce the result—it is certain that since the night when Mr. Gladstone made harsh and crabbed finance musical in his great Budget speech, there has not been so large a muster as that which greeted Mr. Cobden with cheers when he rose. The Opposition benches were notably crowded, and there were symptoms of a debate, and even of an organisation, to support the motion on that side if it were pressed against the Government. This might, in ordinary cases, have operated to rouse the mover out of that moderation which he observed during the whole course of his argumentative and interesting speech. He had scarcely spoken ten minutes when every one felt that they had before them no exhausted subject, and no tiresome repetitions or crude reasoning. Full of facts and statistics, the speech was happy and even piquant in illustration; untinged by the expected personality, it caught its inspiration from a clear, decided conviction, and the evidently matured adoption of a principle. Nay, on this occasion Mr. Cobden emancipated himself from the trammels of a certain hardness and severity of style which were wont to characterise his "unadorned eloquence." Positively he was light and airy, when a light and airy tone served the purpose of the moment; yet he never parted from the weightier matter of his argument. In fine, he so comported as to disappoint the sinister predictions of those who had sneered at what they called his maladroit revival of a threadbare theme. The very best and most pointed compliment was rendered which the House can pay to a successful orator; for no sooner had he concluded than there was a rush to the lobby, although it was not much after six o'clock, and no doubt this circumstance, as well as Mr. Cobden's statement that he did not intend to press his resolution to a division, tended to compress Mr. Layard's remarks into the narrowest limits compatible with the duties of his position.

When the discussion passed into the custody of Lord Naas, of a surety the interest had palpably suffered collapse, and was not resuscitated. The noble lord was under a certain necessity for speaking, since, in a moment of rashness, he had plunged into responsibilities towards the Chinese question. Last session Mr. Liddell had the misfortune to be counted out while indulging his parliamentary emotions on the touching theme of China; on a subsequent evening he complained that the Government had not kept a House for him; and being received with scant sympathy, not to say with contemptuous coldness, Lord Naas grew somewhat irritated, and gave notice that he would bring on the same question at an early day. In redemption of this rash pledge, he has gone through the indispensable course of blue-books, until at last, by sheer force of drudgery, he believes himself to be master of the whole subject of Chinese policy, and last night he duly presented himself as its interpreter and illustrator. At least he succeeded in crushing the discussion under the dead-weight of blue-book. Meanwhile, whatever may be the divergence of opinion between politicians, diplomatists, and Mr. Cobden, the unprejudiced public will doubtless be inclined to think that, in raising in a pointed and statesmanlike manner a question the importance of which cannot be overrated, the member for Rochdale has at least shown that he retains that sense of patriotic duty which no man has yet ventured to impeach.

(STANDARD.)

The gratitude of the country is due to any man who induces the House of Commons or the public to think seriously and earnestly of British interests in China. Our relations with the Chinese signify our relations with nearly a third of the human race. For evil or for good they must largely influence our commerce, our wealth, and our rank among the empires of the world. Lord Palmerston, however, while adopting this view, curiously illustrates it by sketching a contrast between the duty of a wholly civilised towards a partially civilised people, contending that England was bound to assist in pacifying the interior of China, admitting that the obligation has, under pressure been repudiated, and thus abandoning a policy which he refuses to condemn. The simple question raised by his speech, and by every other apology on the part of the Government, is, what shall be our future course? That is the very information Ministers are unable or unwilling to supply. They vindicate the past; they recur to former wars; they regret the old East Indian monopoly, which, the Premier believes, would have preserved peace; and they boast of having brought themselves into direct communication with the central and supreme authority in China. But they do not tell Parliament how, in time to come, they are to hold the balance between a might rebellion and an Imperialism gradully crumbling away. Dr. Gutzlaff, years ago, predicted that if ever a European nation gained actual access into the heart of China the event would precipitate a revolution. That prophecy is fulfilling itself. We no longer see the Celestial realm with its entire face, social and political, torpid, stagnant, incrusted with stereotyped forms, and reflecting one ancient tradition. The deluge has broken through the invisible banks between which it had for ages accumulated. The Tartars are assailed in their citadels; all the eighteen provinces, each with the space, population, and opulence of an ordinary kingdom, are convulsed; and we desire to know whether it is the task of England to range her gunboats or engage her officers in a puny effort to resist one of the most tremendous forces ever set in motion by mankind, varying the destinies of so vast a portion of the earth? What is it that we wanted in China? Lord Palmerston answers—trade. Perhaps something more; yet we shall not secure even this by making war upon two-thirds of those aggregated millions, who are, beyond comparison, more friendly to us, and better inclined to be our customers, than their savage Imperialist enemies. Where it otherwise, we have no business to be crusading for a rotten dynasty on the Eastern side of the globe, and licensing Englishmen to associate themselves in acts of ferocity and heathenism perpetrated by bands of Manchou butchers.

There may be a difference of conditions in our treatment of an Oriental and our treatment of a European Power; but there can be no difference of morality. We have as much right to interfere in Hungary or Poland as to meddle with the internal politics of China. Lord Palmerston denies that we are meddling, upon the pretence that we are simply defending the treaty ports. Not one of the treaty ports has been attacked. Not an Englishman has been insulted or outraged by the rebels. We might surely wait, then, for an occasion of offence before commissioning an amateur flotilla to maraud upon the Yang-tse-Kiang or suffering British officers to enrol themselves in the brutal ranks of the mandarins. The Chinese, since our victories upon their soil, have been delivered from their old delusion that their Emperor was the one potentate of the world, the sole representative of human supremacy and the cynosure of creation; and being thus emancipated from the superstition of twice ten centuries they are making a colossal effort for themselves, Right or wrong, let us watch the game. Let us protect our own flag, our own subjects, and our interests. We have a minister at Peking, and we have a naval force in the Eastern seas. With the issues of the conflict between Imperialists and Taipings we have nothing whatever to do; and nothing could come of our intervention except disaster, disgrace, and confusion. The old Chinese party, we are aware, charge upon Europe, upon its imported ideas—religious, political, and ethical—the calamities of their civil war; they upbraid our merchants as the precursors of change and sedition; they wince under the new sense of weakness which has been inspired in them since the triumphal entry into their sacred capital; and they apprehend schemes of conquest—a second series, in fact, of such developments as laid India at our feet. Generally, they may not be at fault in the accusations they urge, which amount plainly to the truth that there is a prospect of the Chinese becoming ultimately civilised; and even with regard to plots of aggression, Captain Sherard Osborn's expedition was an aggression upon the Chinese people, if ever there was an aggression since the beginning of the world.

Never having encouraged that morbid jealousy of Russian progress, which amounts to a positive mania in some minds, we venture to contrast our own policy in China unfavourably with the Russian. Russia is not compelled to make war upon a costly scale every few years in defence of her Chinese trade. Her vast inland commerce was not purchased by bloodshed. The great fairs of Kiachta and Maniachen, on the Mongolian frontier, through which floods of imports and exports pour, were not the fruits of bombardments or battles. Russia has, by peaceful means, gained her grand necessity in the East, of free access to unfrozen seas, and opened wide gates upon the Pacific, without noise or brawl, or senseless and expensive meddling with the domestic affairs of the empire. Why cannot England, in another direction, arrive at the same results by a similar process? The English have a larger stake in China than even the Russians. They draw millions upon millions sterling annually from that immense and teeming region, which is endeavouring to regenerate itself; which, however industrial, no longer aspires to be self-sufficing; which has ceased to be exclusive, and which is agitated by perturbations beyond our capacity to comprehend and beyond both our right and our power to control. Lord Palmerston pleads necessity. Where is it? Was our trade falling off? Was our anomalous position on the southern coast endangered? Had our mission in the north been affronted? No; a secret arrangement between two or three irresponsible persons very nearly plunged us into the vortex of a deadly struggle between forces incalculably vast, and, having narrowly escaped the danger, we are without any guarantee whatever that it will not be risked again. Our policy has hitherto been a failure, in so far as we have promoted it by war; and whatever has been suffered by our commerce the suffering is attributable, not to the rebellion, but to our own system of murderous, ruinous, blundering, and dishonest intervention.

We may rely upon it that our wisest course would be to treat China as

Digitized by Google

a nation, and only diplomatically as an empire. Its prodigious bulk is revolving upon the axis of our century, and moving into a new orbit, as it moved when its arms spread affright through Russia, when it gave that dreadful impetus to the Huns which sent them conquering to the walls of Rome, and when the Master of the West sued for a bride in the East, in the palaces of Peking. The country of ivory and lanterns, of porcelain and vermilion, which understood astronomy when the wise men of Greece were wrangling over the position of the sun, has yet, we firmly believe, to pass through many a phase of progress and development. It is not destined to be permanently ruled by a dynasty of Mantchous, who have failed altogether in keeping pace with the impulsive activity of the nation. China is rich; it teems with grain; it abounds in silk and cotton; it is full of mechanical art and industry; but, with all its natural wealth, it might be saturated with European produce, to the infinite advantage of our manufactories and our working classes, if only a policy were adopted, not of fighting with one half the nation against the other, but of studying its commercial wants and supplying them. China will come into our market, if it be properly stocked; but we had better keep our gun-boats out of her rivers.

(EXAMINER.)

According to Mr. Cobden, our trade with China has long been in a state of decadence. This result he brings about by considering our direct exports from this country only, but saying nothing of our imports, and wholly leaving out both the exports and imports of India and our colonies. In 1854 our direct exports were, he tells us, little more than £1,000,000, being a fraction less than they were twenty years before, when free trade with China was substituted for monopoly. In 1860, however, they had mounted up to £5,318,000, but again they declined, and last year they fell off, and amounted to more than £3,889,000. Now we think we can account for this oscillation in our exports to China, which, even in their diminished amount, are above threefold greater than they were twenty years ago, without ascribing the fall either to Lord Palmerston or the Taipings. Our exports to any country must be proportioned to the means of our customers to pay for them. Our large exports in 1860 arose, in a great measure, from the capacity of China to pay for them in raw silk, which, owing to the high price of silk in France, Italy, and Spain, produced by a murrain in the silkworm, came to be largely received from the Chinese, so that the value of our imports in that single article suddenly rose from about £1,500,000 to £3,000,000. In 1860 the value of our exports in cotton goods to China was better than £3,000,000, but that was when the raw material cost but 6d. a pound. In 1862 they fell to little more than £1,200,000, and one cannot be much surprised that the Chinese had less capacity to consume them when the raw material of which they were made had risen to 2s. and 2s. 6d. a pound. The difference in the value of this single article would more than make up for the fall in our Chinese exports, which Mr. Cobden ascribes to the evil deeds of Lord Palmerston.

The hon. member for Rochdale depreciates the value of our trade to China, by insisting that it forms but 2½ per cent. of our whole exports, being even lower than our exports to Egypt. Mr. Cobden has not exercised his usual perspicacity in making this assertion. Much of our export trade to Egypt consists of goods in transit to India and China, including the best part of the bullion, while by far the greater part of imports from that country are India and China goods in transit, as in the instance of raw silk, nearly all Chinese silk, and in 1862 of the value of better than £5,000,000.

Mr. Cobden will have it that the market of China is the most unsatisfactory with which the British merchant has to deal. The Chinese trade, in so far as the British exports to it alone are concerned, has certainly not advanced with the same rapidity as some other branches of our commerce, but the reason is on the surface. The Chinese are themselves, beyond all other semi-barbarians with whom we have dealings, a manufacturing people—far beyond Hindus, Egyptians, Red Indians, or Spanish-American Republicans, or Brazilian Imperialists, and consequently have less need of our manufactures than less advanced nations. It is no very long time ago since they furnished us with some cottons, all silks, and fine porcelain. In payment of the goods with which they furnished us they took, in preference to our manufactures, the opium and the raw cotton of India, finding them the more profitable. What these did not cover they took from us in silver bullion, which we had received elsewhere in return for our manufactures. We cannot state the amount of the supply we furnish either to India or China, because, going by overland route, our whole exports in gold and silver are put down to the credit of Egypt. The total amount, however, which in 1858 was but £5,200,000, has been gradually rising, and in 1862 amounted to £12,500,000. Certainly not less than one-third part of which went to China for the purchase of tea and raw silk. To give a fair view of our exports to China these millions ought to be added.

Mr. Cobden will have it that the market of China is at present glutted with British manufactures, and chiefly with those of Lancashire. We are sorry for this on account of the merchants and manufacturers of Lancashire, for they alone are to blame, since the very fact makes it evident that they have been misinformed and miscalculating. No one else finds fault with the trade of China, for in it great fortunes are realised and mighty emporia springing up, to which Peking itself is not comparable for wealth. At this moment the trade of Britain and her possessions with China is not under £40,000,000, which, in spite of Mr. Cobden's jeremiads, we must think respectable. A single Indian article alone is taken by the Chinese to the value of £7,000,000, and that article furnishes some £5,000,000, or about one-eight part of the whole Indian revenue.

It is surely something that our imports of tea have, in thirty years' time, increased from 30,000,000 of pounds' weight to 134,000,000, of the value of full £11,000,000, and that our imports in raw and thrown silk have increased within the same time from 2,000 bales to 90,000 bales, worth £3,500,000, while we are enabled to pay for the great property expressed by these figures in our own manufactures or in bullion received in exchange for them.

Upon the whole, we approve of the policy which our Government is pursuing in China, although, no doubt, some blunders have been committed. We think it was the inevitable one, and the very same which any English Administration must pursue, be it Whig or Conservative—nay, even if it were conducted by Messrs. Cobden and Bright. For a full half-century the Manchoo-Tartar Government of China has been in a state of decadence. Rebellion on rebellion have followed one another, and the rebels, always consisting of robber hordes of its own subjects, have only been quelled by bribing them in the manner in which the Roman empire in its fall bought the forbearance of the barbarians. The proceedings of the Taipings are but an aggravated form of previous rebellions, being only more extensive, more ferocious, and more destructive. It is now fifteen years since they came into existence, and in this long time they have evinced no capacity for administration, civil or military. At one time they reached within a few marches of the Chinese capital, but met with a disgraceful overthrow which nearly annihilated the invading army. A main object with them is to get possession of the European trading-places, to plunder and misrule them. Twice over they succeeded. Now these emporia extend from Canton under the tropic to Peking in the 40th degree of latitude. They must be defended unless we are to submit to loss of life and property upon a large scale, and to the insults of most ruthless robbers. For ten long years we observed the strictest neutrality between the Taipings and the Imperial Government, hoping for an enlightened Christian revolution in China, instead of which we have had rapine, incapacity, and blasphemy. As our last hope, we turn to the Tartar Government, to whom we are bound by solemn treaties. The insurrection of the Taipings has had a fair trial, and turns out to be no honest rebellion against bad government, but a rising of banditti and pirates, the common enemy of all civilised communities.

Mr. Cobden suggests that, instead of our present policy, we should have emporia along the coast of China, constituted on the model of Singapore. But in making this proposition, surely he abandons his peace-principles. Singapore is 1,500 miles distant from China, and the Chinese have no claim upon it. When occupied it was a desert, and for the desert we paid a handsome and satisfactory price to those claiming property in it. All the islands from which a trade with China could be conveniently carried on are on the coast of that country, and under its sovereignty, and inhabited by its subjects. One island we took by force of arms, and our possession of it has been an eyesore to the Imperial Government ever since. In order to seize the islands coveted by Mr. Cobden, it would be necessary to make a third war on China, and in that case I hope Messrs. Cobden and Bright would be the very first to complain that their own proposition had been adopted. Even in possession of the islands, we should still require fleets and garrisons to protect them. Mr. Cobden ought to have pointed out the islands to which he refers. For our own parts, we know of none, even if we had made up our minds to rob the Chinese. The Chusan Islands seemed the most likely, but they turned out on trial to be remote and inconvenient.

(ECONOMIST.)

Few among us will be disposed to dissent from the general doctrine which lay at the root of Mr. Cobden's argument on Tuesday night in reference to our Chinese policy. Fewer still, probably, would be inclined to go along with all the propositions he laid down in the course of his speech, or with the precise terms of the resolution with which he concluded it. As an expression of feelings and wishes, there was much in which we all concur; but, unfortunately, he failed in the practical part of his plan—in showing, that is, either that we could very well have acted radically otherwise than we have acted, or that his plans and principles of future proceeding would be wiser or more feasible than those of the Government.

It is unquestionably true, as Mr. Cobden explained, that our exports to China have increased since the opening of the trade by the abolition of the East Indian Company's monopoly, at an unprecedentedly low rate, when compared with the wonderful advance in the magnitude of our trade with most other countries. But he altogether failed in making good his charge that this difference arose from the warlike and quarrelsome character of our political intercourse with the Chinese. The disappointment which has unquestionably been felt on this score by our merchants and speculators was foretold at the time by the advocates of the Company, and is to be attributed to the circumstance often pointed out, viz., that the Chinese, like ourselves, are in an advanced though a peculiar state of civilisation, and, like ourselves, are an eminently fabricating people. They make at home and for themselves everything, or nearly everything, they want; and they make everything nearly or quite as cheaply as we can supply it to them. The most remarkable developments of trade are those that take place between a manufacturing country on the one side, and a country rich in raw produce on the other. But the relations between England and China can never have precisely this character. We want many things which they produce—especially tea and silk; and we can procure these things from China better or cheaper than elsewhere. But they really need nothing that we can send them, and they accept our goods, therefore, chiefly as payment for what they send us. If it were not for the opium and the specie which they obtain either direct or from India, it would not be easy for us to carry on as large a trade as we do. A glance at the figures of our trade returns will show this. In the thirty years from 1834 to 1863, our exports to China and Hong Kong averaged £2,011,000. Of the value of our imports thence we have no record till very lately. But in the five years 1858-1862,

Our exports thither were	£21,180,000
Our imports thence	46,600,000

It is undeniable, again, that in our dealings with China, as with Japan and any other Oriental nation, we should as carefully abstain from "armed intervention in their internal political affairs," as we do, or profess to do, in Europe, so far as this is possible. But, unfortunately, both experience and common sense combine to show that such abstinence, possible enough in Europe, is not possible in Asia. This was the weak point of Mr. Cobden's argument; and it would have been more candid at once to have admitted that the same principles and modes of procedure cannot, from the very nature of the case, be strictly applied to savage and semi-civilised as to highly-civilised nations. Civilised and European Governments have certain recognised and established rules of action by which their intercourse and that of their subjects is regulated; and they are able to enforce these rules. It may be broadly stated, as a general truth, that they can control their own citizens and that they abide by the treaties and engagements they have formed. When we trade with France, with Russia, or with

Digitized by Google

America, our merchants need no protection except such as the Governments of those countries, when properly appealed to by our Government, can and as a rule do afford them. When the Governments of those countries enter into treaties with us, and yield us certain privileges, those privileges are as a rule secure, and those treaties are faithfully carried out. We do not require in dealing with such States to take the law into our own hands, to send out a force to protect our merchants, to govern and control our own citizens, or to coerce the Governments to stand by their engagements. In the East the case is notoriously different. It is notorious that our traders force their way into every quarter of the world; and that those who thus force their way in the first instance are the most adventurous and usually the least scrupulous and reputable of their class. It is notorious that when they have thus forced their way, they insist upon the protection and countenance of their own Government; and that it is our principle never to refuse this countenance and this protection. We do not choose our traders to be wronged, and we do not choose our flag to be insulted. It is impossible that commerce should grow up anywhere without leading to differences, to questions of right, to disputes, even to quarrels. Two separate cases of difficulty arise which bring us into collision with the Government of Oriental nations; and it is not easy to see how any action of ours, or any suggestions of Mr. Cobden, could preclude these. Sometimes the Asiatic Government does not choose to abide by its engagements;—and how, then, can we escape the obligation of compelling it to do so? Sometimes it is unable to do so;—and how then can we avoid the necessity of ourselves affording that protection to the lives and property of our merchants which the Asiatic Government has promised but is too weak to give.

Now apply these observations to the case of our proceedings in China at the present moment. We are not going to say a word in defence of the remote past. We were certainly wrong in the Bowring or "Arrow" war. We may have been partly wrong in the Elgin war. We have most assuredly been often and shamefully in the wrong in our Chinese policy. We need not, for the purpose of our present argument, discuss or pronounce upon any of these questions. The sole practical question before us at this time is this:—On the faith of solemn engagements entered into by the Imperial Government, and ratified by our own, our merchants have engaged in a vast traffic with specified portions of the Chinese Empire. They have settled with their families—perfectly legitimately—in the several treaty ports. They have accumulated in those treaty ports much valuable property—again in a perfectly legitimate manner. It is idle to say that these lives and this property are not entitled to protection, and must not receive it. Of course, in theory, it is the duty of the Imperial Government to afford that protection, and of our Government to call on the Chinese authorities to afford it. But it is idle to talk of theory in such a case. The Chinese authorities cannot protect the European settlers. They can scarcely defend themselves. They are engaged in a desperate struggle for something very like existence. The Europeans in China, therefore, must protect themselves, and, naturally enough, call for aid upon the British naval and land forces which are available. England has responded to the call, as it was evident she would and must do, and has said that the treaty ports and thirty miles round shall be defended against the rebels. It is difficult to say how we could have done otherwise. It is not clear that we could safely and wisely have done less. But this decision as to defending ourselves necessarily brings us into alliance with the Imperialists (who are also defending this territory), and into collision with the rebels (who are assailing it). Now, virtually—since the rescinding of the Order in Council permitting British soldiers and sailors to enter the Imperial service and the return of Captain Osborn's squadron—this is the amount and this the limit of our "armed intervention in the internal political affairs of China," which Mr. Cobden's resolution condemned. Would Mr. Cobden have us not go as far as this?

The truth and the extent of the truth may, it appears to us, be thus summed up. It is a great evil, a great annoyance, a great danger, the getting thus mixed up with the internal wars and police of a country like China. It may be a great pity that we should have any property or any merchants actually on the mainland to be protected. But if trade with China is to go on; if merchants are to be protected where they go openly and under treaty, and where they act honourably and decorously; and if the Government of the State, either from weakness cannot, or from dishonesty will not, afford the covenanted protection, there is no alternative but for the merchants to protect themselves, and for our Government to aid them in their efforts at self defence. What is clear—and this, we presume, is what Mr. Cobden was so anxious to enforce upon the British public—is that, in this case as in every other, there should be the minimum of interference; that we should never become a party to the internal struggles of any country with which we have commercial relations, except when our own safety and interests, and only so far as our own safety and interests, imperatively compel us; and that, warned by the past, we should be ever on our guard against the acquisition of territory or the formation of engagements which might sooner or later entail upon us the necessity of taking in hand the administration of a country with which we intended only to buy and sell. Further than this, we apprehend, Mr. Cobden would scarcely go in practical action. Thus far there are not many Englishmen who would not go with him. What this admitted *minimum* of intervention is must be decided by the facts of the case, the requirements of the hour, and no doubt in part also, and inevitably, by the temper of the nation and the character of the foreign Minister at the moment when the need for action shall arrive.

(SATURDAY REVIEW.)

The frequent debates or conversations on China in the House of Commons are conducted by very few speakers, and, with the exception of the official explanations, they consist principally of censures on the Government. Mr. Gregson was ridiculed by Mr. Bright on Tuesday evening because he disturbed the general harmony of accusation by interfering on behalf of the merchants who are concerned in the protection of their trade. It would be an entire mistake to suppose that the House concurs in disapproving a policy with which the majority of members are but partially acquainted. The large and silent jury which listens to the arguments on either side intimates, rather than returns, a verdict by expressing no opinion, or, in case of need, by retiring from the box. The unanimous indignation which results in a customary count out can scarcely be serious or formidable. Those who attend to the discussion find that Lord Naas differs almost as widely from Mr. Cobden as from Lord Palmerston, and that Colonel Sykes stands alone in his friendly admiration of the Taipings. There may perhaps be a vague suspicion that English dealings in China have not been consistent with perfect wisdom or with absolute justice; but few private members are disposed to think that they thoroughly understand the question, or are prepared to suggest an alternative mode of proceeding. It is not difficult to discover that the assailants of the Government are almost equally undecided. Mr. Cobden's harmless resolution was equivalent to an admission, either that he had no practical course to propose, or that he knew his opinions to be hopelessly unpopular. As no person or party maintains the abstract expediency of interfering in the civil dissensions of China, there is no use in affirming an undisputed proposition. It might also have seemed unnecesary, within a fortnight of Mr. Liddell's motion, to bring the Chinese question once more forward; but when Mr. Cobden announces a set speech, there is no danger that the House will be counted out.

Lord Palmerston's speech though it was not strikingly original, contained almost the only general truth which applies to the relations of England with China. A civilised State in contact with a lower form of civilisation is necessarily involved in misunderstandings and disputes. The Government and its agents can make allowance for the unavoidable difficulties of intercourse, but individual traders are more eager and less considerate, and it becomes necessary both to control European energy and to resist Chinese violence and frand. It is indispensable, notwithstanding Mr. Cobden's protest, to extend a certain anomalous protection to English residents in China, and to restrain them by an irregular and extra-territorial jurisdiction. The House of Commons is stirred to languid disapproval when the impropriety of interfering with the sovereignty of China is stigmatised by an eloquent speaker; but a feeling of different intensity would be aroused if, by the neglect or tameness of the Government, half a dozen English merchants had been subjected by a Chinese mandarin to torture or to death. It is idle to compare a Chinese province to an English county, and to suggest the impossibility of tolerating a foreign tribunal in Oxfordshire. It is because the laws and the administration of China are suited only to a backward social condition that all the States of Christendom insist on retaining their authority over their own subjects, even within the Emperor's dominions. The charges which are urged against the English Government affect, in a certain degree, all the Powers which are represented at Peking; for France, Russia, and the United States interfere to precisely the same extent with the territorial jurisdiction of China. Mr. Cobden himself can only devise the inconvenient alternative of retiring from every part of the Empire, except one or two trading ports, and he fails to explain whether he would allow the native Courts to deal with Englishmen within the restricted precincts of the settlements. If his precedent of Singapore were to be literally copied, other places in addition to Hong Kong would be occupied as independent English possessions, while the rest of China was absolutely closed to foreign traders. Mr. Cobden apparently forgets that Hong Kong was obtained in one of the wars which he deprecates, and that the Chinese Government would certainly refuse the voluntary cession of a single square foot of the Imperial dominions. It is true that Singapore has, within forty or fifty years, become a populous city instead of a jungle, but a similar improvement has been more rapidly effected at Shanghai, which still remains nominally a Chinese city. In the trading ports, the representatives of Europe and America have organised peculiar communities which have some of the characteristics of independent Republics; and thus far the common necessity of resisting Chinese encroachments has controlled the jealousies which might have been expected to divide the functionaries of the different nations. It would be less easy to govern ceded dependencies by joint action, and if England established posts on the coast of China, similar grants would be immediately demanded by all the great trading nations. The present owners of the soil would derive but a questionable benefit from the collisions which would probably ensue, and from the cessions by which they might be terminated or averted.

Some of the speakers in the debate recognised more candidly than Mr. Cobden the important distinction between responsible diplomatists or Consuls and individual adventurers. Sir F. Bruce is enabled, by his position at Peking, to discountenance and to restrain the pretensions of his countrymen; but if the mission were withdrawn to-morrow, and if all formal relations with China were dissolved, neither the regular traders nor the mixed multitude of Englishmen would follow the receding official tide. There might, as Lord Palmerston observed, have been neither a Chinese war nor an English population in China, if the monopoly of trade by the East India Company had continued to the present day. As soon as the restriction was removed, it only became a question of time when systematic measures should be adopted for the protection of English interests. There is a certain presumption in favour of unforeseen arrangements which have resulted from unpremeditated attempts to deal with actual difficulties. Even in theory, the direct intercourse which has been established with the Imperial Government seems preferable to the unsatisfactory communications which were formerly conducted with the Viceroy of Canton. Mr. Cobden's little Singapores along the coast would probably be excluded from all legal trade with the neighbouring ports, and although opium would still be exchanged for silk and tea, the legitimate commerce which now exists would become a vast smuggling system. Lord Palmerston appropriately mentioned the omission, in Sir H. Pottinger's treaty, of a provision that the English text of the document should possess exclusive authority. The ingenious Chinese negotiators had inserted in their own copy a prohibition of trade between Hong Kong and several ports which were to have been opened by the treaty; nor would the Chinese of the present day fail to make the same use of any similar opportunity. It may be true that the profits of the trade have, thus far, been in a great measure absorbed by the expense of three successive wars; but it would be a grave mistake to sacrifice all that has been obtained as a return for a heavy outlay, in the unfounded belief that what has been painfully extorted would be hereafter peaceably conceded. On the whole, Mr. Cobden's project is the least sagacious scheme which has yet been advocated in Parliament.

Since the refusal of the Chinese Government to accept Captain Osborn's

Digitized by Google

services on his own terms, the English Government has determined to confine its efforts to the defence of the treaty ports. There is, therefore, nothing for the House of Commons to debate upon except the merits of a policy which has for the present been discontinued. The commercial evacuation of China which Mr. Cobden proposes will scarcely provoke serious discussion. Mr. Liddell and Lord Naas are, for the time, agreed in opinion, though not in principle, with Lord Palmerston. Political observers suspend their judgment until further experience has shown whether non-interference is likely to be permanent. The English Government seldom exercises an initiative where there is any room for private enterprise. Ministers have to follow the eccentric movements of traders and emigrants, with as little power to desert their charge as a shepherd boy possesses when he wanders over a common after his flock. New colonies have often been founded in defiance of official discouragement, and the Foreign Minister, like his Colonial colleague, must accept responsibilities which he would never have voluntarily incurred. The introduction of European modes of thought and action into the stagnant East, though it may involve many violations of formal consistency, is not altogether an unwholesome process. If it is uncontrolled, it will probably place the Chinese population at the mercy of adventurers like Burgevine, who, unless they are restrained by their own Governments, may perhaps carve out for themselves principalities after the fashion of conquering chieftains in many ages of the world. Their success may possibly lead to some beneficial results, but it seems safer and bolder to regulate, even at considerable cost and inconvenience, the relations which, under any circumstances, must exist between China and the civilised world.

Naval and Military.

The paddle-wheel steam sloop Centaur, 6, Commander John Creasy, from Hong Kong, January 11; Singapore, January 23; Anjer, January 29; Mauritius, March 6; Simon's Bay, April 3; Ascension, April 23; St. Vincent, May 10; and Madeira, May 19, arrived in Plymouth Sound on Friday night. The Pearl left Ascension April 21, for Portsmouth. The Centaur spoke May 26, off Cape Finisterre, the ship Melody, outward bound. She brings home 85 invalids, including Mr. Parker, late Master of the screw steam frigate Euryalus, 35; Acting-Commander Mayow, late of the screw steam gun vessel Sparrow, 5; and Mr. Inglis, late Master of the paddle-wheel steam sloop, Gorgan, 6. The Centaur was put in commission in September, 1859. She has been chiefly occupied in the East, and considerable changes have occurred in her officers and crew. Both the ship and her engines will require repair.

The Pearl, 21, gun screw corvette, Capt. John Borlase, C.B., arrived at Spithead on the 7th inst. from China and the Cape of Good Hope, last from Plymouth Sound. The Pearl is ordered into Portsmouth harbour to dismantle and pay out of commission. She was put into commission in August, 1859, and has been chiefly occupied in China. She was in the action at Kagosima, where 12 of her crew were wounded. Only seven of the officers originally appointed have returned in her; the remainder have either died or have joined other ships on the station.

A claimant for prize money at Canton writes:—"I know I am only one of the great many that would like to know what has become of the amount commonly known in China as the 'Seymour Fund,' but now ironically designated the 'See no more Fund.' The captures to which I allude were made during the time that Sir Michael Seymour was the commander-in-chief, and surely sufficient time has elapsed to have arranged the distribution of the proceeds.—I am, Sir, yours, &c.,—CANTON."

We are pleased to find that the officers of the late Anglo-Chinese expedition have, in token of the sincere regard they entertain towards Captain Sherard Osborn as a friend, and of the great estimation they hold him in as a high-minded officer, presented him with a service of plate.

Monetary and Commercial.

A curious proof of the value of newspapers occurred lately. The *Water Lily*, bound from Shields to Nagasaki, made a very long passage out, and after 173 days, put into Coepang (Timor). Her safety was considered very doubtful, and the underwriters at Lloyd's would not accept less than 35 guineas per cent. The committee of Lloyd's had not received any advices, nor had the Jerusalem; in fact there was no news of her, and she was supposed to have gone to the bottom. On the publication of the usual number of the *London and China Telegraph* on arrival of the mail, a full account was given of the sickness of her crew and of her arrival at Coepang.

An ordinary general meeting of the shareholders of the Labuan Coal Company (Limited) was held on the 31st May at the office of the company, Threadneedle-street; Sir J. D. H. Elphinstone, Bart., M.P., in the chair.

The report of the directors stated that the quantity of coal raised during the year 1863, although considerably in excess of the proportionate yield for the last nine months of 1862—the quantity in the twelve months being 10,807 tons, against 3,295 tons in the nine preceding months—has been prudently kept within certain limits by Mr. Sinclair, owing the great difficulty experienced in obtaining vessels on charter to remove it to the markets at Singapore, Saigon, and to ports now open to foreign trade in China, and the inconvenience and expense that would have attended the storage of too large a stock at the island, had it been allowed to accumulate. The difficulty referred to was aggravated during the latter part of the year by the visit of the *Alabama* to the Eastern seas, whose raids amongst the Federal shipping and destruction of a barque in the neighbourhood of Singapore led to a blockade of all vessels sailing under the Federal flag, and enhanced freights already high. The steamer *Stirling*, under charter to the company, only arrived at Labuan, as the shareholders will recollect, at the end of December, too late of course to contribute towards the realisation of the coal up to the date of the accounts now published. The lease of the mines in this company's favour was signed on behalf of the Crown on the 30th April, and confers upon the company the exclusive power of mining coal in the island of Labuan for a period of twenty-one years from the 29th of December last, at a royalty of 6d. per ton on the quantity raised for the first seven years, and of 1s. per ton for the remainder of the lease, with the privilege of cutting timber, and occupying, rent free, any land required for the construction of railways or tramways, and the right of acquiring unappropriated surface land to the extent of 1,000 acres, at the price of £1 per acre.

The Chairman, having moved the reception and adoption of the report, adverted to the improved position of the company consequent upon the agreement entered into with the China and Japan Steam Navigation Company, by which that company took a minimum quantity of 20,000 tons of coal annually, at one guinea per ton. The quality of the coal continued to be highly spoken of by all who used it. There had been, unfortunately, during the past twelve months, a scarcity of tonnage, owing to the number of Federal ships shut out from the trade.—Mr. Mackenzie seconded the adoption of the report. Having referred to the many difficulties that the company had had to contend against, he stated that he considered the chief obstacles were now at an end.—The report was received and adopted.—The retiring directors and auditors were re-elected.—A special resolution was passed increasing the capital of the company by the issue of 5,000 new shares of £10 each, to be offered rateably to existing shareholders in the proportion of one new share to two old.—The proceedings closed with a vote of thanks to the chairman.

Advices from Alexandria state that the balance-sheet of the Egyptian Trading Company has been made up, and that a dividend of at least 10 per cent. will shortly be declared, to be followed by another of like amount as soon as the fusion with the Egyptian Steam Navigation Company shall have been completed. The latter company, it is said, will distribute more than 20 per cent. to its shareholders for the second six months, which, with 18 per cent. already paid, makes 38 per cent. per annum. It appears also that a concession has been granted of a Credit Foncier for Egypt.

The biddings for 30,00,000 rupees (£300,000) in bills on India took place, as usual, at the Bank of England. The proportions allotted were—to Calcutta, 18,00,000 rupees; and to Bombay, 12,00,000 rupees. The minimum price was as before, viz., 1s. 11¼d. per rupee on Calcutta and Madras; and 1s. 11⅜d. on Bombay. The applications within the limits amounted to 214 lacs. Tenders on Calcutta, at 1s. 11¼d. receive about 78 per cent.; on Bombay, at 2s., about 15 per cent.; and all above these prices in full. No allotment was made to Madras.

Mr. Heaton Robinson (son of Captain Robinson, R.N.), many years in the London and County Bank, goes out by the next mail to assume the duties of accountant to the Asiatic Bank at Colombo.

A notice has appeared in some of the daily papers of a protest issued in Bombay by the shareholders in the Commercial Bank of India against the issue of 9,600 shares lately made in London at £10 premium and of 400 to the directors at par. It appears that at a meeting of the shareholders held in Bombay, these proceedings were duly sanctioned by a large majority, and that the persons who have signed the protest are mostly new members. The qualification for the directors is fifty shares, and the 400 were simply reserved to issue to the eight gentlemen who were asked to join the London board, against which no reasonable complaint can be made. We may notice that the shares issued here at 10 are now quoted at 16 to 17 premium.

The report of the Ceylon Company, to be presented at the annual meeting on the 14th inst., states the profit for the twelve months to have amounted to £30,498, out of which a dividend is recommended at the rate of 10 per cent. per annum, with a bonus of 2½ per cent., making together 10s. 6d. per share. This, with the interim dividend paid in December, will absorb £14,358, leaving £10,000 to be applied to a reserve fund, and £6,303 to be carried forward. The 6,200 shares not yet allotted, are to be offered to the existing proprietors at £2 pm.

The Trade and Navigation Accounts for the month, and the four months, ending the 30th April, renew the gratifying prospect afforded by the preceding returns of the present year. Though the Exports for the month are a little less in value than those of March, yet the increase for the whole year more than maintains the rates of progress exhibited in the first three months of 1864, as compared with the two antecedent years. The following is the return of the total declared Value of British and Irish Produce exported:—

Digitized by Google

For the month ended 30th April.

	1862.	1863.	1864.
All articles	£9,822,888 ..	£11,897,177 ..	£13,225,039

For the four months ended 30th April.

All articles	£36,246,651 ..	£39,458,381 ..	£49,892,420

The Exports to the countries and ports of the Far East, in regard to the articles enumerated, are returned as follows :—

CHINA AND HONG KONG.

For the month ending 30th April.

	1862.	1863.	1864.
Cotton yarn	422,180 ..	58,060 ..	87,800 lbs.
Cotton manufactures ..	12,948,863 ..	2,778,951 ..	5,126,790 yds.
Wool and worsted manufactures	244,696 ..	201,157 ..	127,094 yds.
Worsted stuffs	577,437 ..	308,267 ..	662,384 yds.
Lead	622 ..	963 ..	479 tons

Value for the four months ending 30th April.

Cotton yarn	£97,926 ..	£25,265 ..	£67,524
Cotton manufactures	595,876 ..	232,167 ..	517,664
Wool and worsted manufactures	87,303 ..	102,317 ..	88,498
Lead	42,153 ..	112,531 ..	44,101

The Export of cotton manufactures for the month ending 30th April is given thus :—

	1862.	1863.	1864.
Singapore	2,940,928 ..	2,121,309 ..	3,932,323 yds.
Java	4,121,283 ..	— ..	2,211,958 „
Philippine Islands ..	1,759,914 ..	1,555,604 ..	— „

Value for the four months ending 30th April.

Singapore	£251,847 ..	£109,663 ..	£375,964
Java	188,068 ..	32,444 ..	231,101
Philippine Islands ..	97,062 ..	77,242 ..	162,159

Of Cotton Yarn, 136,000 lbs. were exported to Singapore in April, against 238,200 lbs. in April, 1863, and 182,300 lbs. in 1862; the value for the four months of 1864 being returned at £51,426, against £37,785 for the same period of 1863, and £40,571 in the year preceding.

Of Sugar, the importation from Java and the Philippine Islands has been as follows, for the month ending the 30th April :—2nd quality (not equal to white, but equal to brown clayed), 2 cwt.; 3rd quality (not equal to brown clayed), as entered previously to 16th April, 5,678 cwt.; 4th quality (not equal to Brown Muscavado), as entered subsequently to 16th April, 1,195 cwt. The quantity of 3rd quality from the Philippine Islands entered for Home Consumption in the four months ending 30th April (previous to the 16th April) was 164,879 cwt.; of 3rd quality (not equal to brown clayed, but equal to Brown Muscadova), entered subsequently to the 16th, 23,023 cwt.; and of 4th quality (not equal to Brown Muscavado), entered subsequently to the 16th, 26,545 cwt. The value of the sugar imported from the quarter mentioned during the three months ending 31st March (all of 3rd quality) is given at £33,066, against £252,221 in the same period of 1863, and £99,712 in 1862.

The quantity of Hemp imported from the Philippine Islands during the month of April was 41,727 cwt., being nearly the whole importation of the year, as the quantity for the four months is but 44,735 cwt. The value of this article of import from these islands for the first three months of the present year is only £5,264, against £75,250 in the same period of 1863, and £51,734 in 1862.

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the parts named below, for the three months ending the 31st March, was as follows :—

	1862.	1863.	1864.
Singapore and the Eastern Straits	£320,162 ..	£172,673 ..	£429,366
Hong Kong	241,165 ..	268,403 ..	382,047
China (exclusive of Hong Kong)	536,200 ..	455,219 ..	637,865
Netherlands India (Java, &c.) ..	185,326 ..	61,597 ..	244,503
Philippine Islands	101,921 ..	64,465 ..	213,587
Siam	— ..	1,374 ..	—
Japan	— ..	31,255 ..	79,111

One peculiar feature in the Trade Returns of the present year is the importance assumed by the shipments of Raw Cotton to this country from China. The quantity imported for the four months ending the 30th April is set down at 210,118 cwt., against 36,863 cwt. in the same period of 1863, and 9 cwt. in 1862. The value of the import for the three months ending 31st March was as follows :—1864, £939,637; 1863, £182,368; 1862, £32.

The value of the merchandise imported from the places undermentioned for the quarter ended on the 31st March last, compared with the corresponding periods of 1862 and 1863, is stated thus :—

	1862.	1863.	1864.
Singapore and the Eastern Straits	£380,831 ..	£312,091 ..	£273,252
Hong Kong	48,460 ..	212,759 ..	355,541
China (exclusive of Hong Kong)	3,501,920 ..	4,526,927 ..	3,344,248
Japan	185,047 ..	385,566 ..	80,732
Netherlands India (Java, &c.) ..	660 ..	3,041 ..	8,279
Philippine Islands	208,603 ..	344,615 ..	44,743
Borneo	2,349 ..	— ..	6,626
Siam	17,414 ..	16,778 ..	—
Cochin China, Camboja, and Tonquin	— ..	— ..	4

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 4th inst., was in gold :—To Alexandria, £2,000; to Madras, £849. In silver :—To Calcutta, £10,000; to Penang, £2,000; to Singapore, £45,450; to Hong Kong, £14,930; to Yokohama, £2,700; to Foo-chow-Foo, £540; to Shanghai, £6,050. Total, in gold, £2,849; in silver, £82,470.

ARTICLES OF IMPORT.

TEA.—Importers seeing the quantity afloat now reduced to only about 5,000,000 lbs., have shown great firmness, whilst confidence has also been imparted to the trade by several speculative purchases of blackish-leaf Congous, and the result has been a larger amount of business than for some time past, and prices show an advance of ½d. to 1d. per lb. on red-leaf Congous, and 1d. to 1½d. per lb. on blackish-leaf kinds, from the lowest point of the market in May. The small quantity declared for public sale, without reserve, being only 5,950 packages, as compared with 38,150 packages in May, has also tended to strengthen the market, which closes with a steady although not active demand. Low and dusty kinds of Congou have been in fair request, and prices have advanced about ½d. per lb. Fair to good common remain much as before, export orders being limited. The fair flavory kinds have been more saleable, and may be quoted ½d. to 1d. dearer, also fair to good Kaisow kinds. Common to good blackish-leaf kinds have been taken on speculation, and prices have rallied 1d. to 1½d. per lb. from the extreme low point of last month. Good to fine Moning and Kaisow kinds continue firmly supported at full prices; in the finest kinds of both but little has been done. Tayshans show no material alteration; of the new make from Canton there have been no fresh arrivals. Oolongs remain much as before. In Souchongs there have been a few sales at about previous prices. Flowery Pekoes continue to sell at low prices, chiefly at public sale, without reserve. There has been more doing in Scented Orange Pekoes both from Canton and Foo-chow, and prices have recovered from ½d. to 1d. per lb.; some few purchases have been made on speculation. Scented Capers remain much as before; fine, of Canton make, are scarce, and command full prices. In the absence of general export demand for America, Uncoloured Japans have been less saleable, and prices must be quoted ½d. to 1d. per lb. lower. There have been no further public sales of Indian Tea. Green Teashave sold very readily, and prices for Gunpowders have advanced from 2d. to 3d. per lb. for the Ping Suey kinds, whilst Moyunes have been saleable at the extreme previous quotations. Twankays and Hyson skins have not sold so readily. Young Hysons have been fairly supported. Hysons have sold at full prices. Canton made Gunpowders have sold rather higher, also good to fine make Young Hysons.

SILK.—We have had on the whole a fair amount of business in China and Japan Silk during the past month, and notwithstanding the stringency of the money market, prices have shown a tendency to improve. The probable result of the European crop has absorbed the attention of the trade, and although for some time past complaints have been heard, it is only within the last few days that the accounts have been so unfavourable as to materially stimulate purchases. The reduction of the Bank rate from 9 to 8 per cent., and subsequently to 7 per cent., with every prospect of increasing ease, has encouraged buyers, hence we have at the present moment a somewhat excited market, and prices are fully 6d. per lb. dearer than they were a fortnight since. The Deliveries continue on the most meagre scale, being only 2,595 bales of China, and 1,317 bales of Japan. Bengal silk has continued in fair request during the past month, and certainly at present prices it appears to be relatively cheaper than any other class of silk. At New York the quotations are:—Canton re-reeled Cumchook, No. 1, $9 to

SUGAR.—After a period of considerable animation, there has been latterly a return of general quietness, and a limited business has been done at some decline; but compared with those of the 9th ultimo (states the Price Current of Messrs. Carey and Browne) present quotations still show an average improvement of 1s. per cwt., and at the close a firmer tone is apparent. The limited supply of Penang in public sale has mostly found free buyers at relatively full prices. Clayed Manila, although not at all times meeting an active inquiry, has commanded a similar advance to that established on other sorts, and a rather extensive business has been done. In Unclayed moderate transactions have been effected, both on the spot and to arrive, also at improved rates. During the past month there have been sold:—200 tons Penang, good middling to fine brown, 38s. 6d. to 40s. 6d.; low and middling yellow, 41s. 6d. to 43s.; good middling to good grocery, 43s. 6d. to 44s. 6d.; 4,500 clayed Manila, commencing at 37s., and closing at 38s. 6d. to 39s.; 300 tons unclayed, at 35s. 6d. to 36s., chiefly the former price; and 350 tons to arrive, at 27s. 3d., for Liverpool. 80,400 baskets of Java, brought to auction by the Dutch Trading Company on the 24th May, were cleared off at an advance of nearly one guilder on the rates of March last, or 1 to 1½ guilder above the valuations.

COFFEE.—After extensive public sales, the value of Plantation receded about 1s. per cwt., at which decline there has lately been more inclination to buy, and rather stiffer rates have been paid. Native has, in general, been of slow sale, and being held with some firmness, transactions were restricted at about the former currency till recently, when a reduction of about 6d. per cwt. was established. Mocha has been but little inquired for, and with an indifferent supply, scarcely anything has been done. Only small quantities of other East India kinds have been brought to auction, which have met few bids, and been but partly realised. The total transactions of the month are, of Ceylon, 6,500 casks, 5,100 barrels and bags plantation, at first, fine to fine fine ordinary, 77s. to 80s., low middling and middling 81s. to 84s., latterly, fine fine ordinary to low middling, 78s. to 82s., middling to good middling, 82s. 6d. to 85s., fine 86s. to 92s.; and 800 casks, 7,500 bags native, good to real good ordinary, 68s. 6d. to 69s. 6d., fine ordinary to superior, 70s. to 71s.; also 700 bags fine ordinary Malabar and Cochin at 74s. to 75s. 6d.; 450 bags yellowish Singapore, 72s. 6d. to 73s. 6d., and 140 bags good Neilgherry at 88s.

COTTON.—There was only a moderate demand in the London market last week, and with a very dull market prices declined about ¼d. per lb. for Western, China, and Japan. Of sales for arrival there were 250 bales Japan, 19d. for March shipment, guaranteed fair. At Liverpool, prices for China have fallen fully ¼d. per lb. For delivery, the closing quotations were, China, July or August, 18¾d. Messrs. Whitaker, Whitehead, and Co. report that the state in which most of the cotton is landed is the reason why China is for the time out of favour.

RICE—During the greater part of the interval since the 9th ultimo, the market has had a dull aspect, and (excepting new Ballam, which has sold readily at full prices) transactions were but slowly concluded until the last week, when a report of the repeal of the duty on this article in France produced an inquiry from speculators, and a fair business has been done at a slight improvement. Common to fair Madras 8s. 6d. to 9s. 7½d., and old Rangoon 8s. 6d. to 9s. 6d.

CAMPHOR.—Moderate business in China at 95s. per cwt., at which rate there are still sellers; and of Japan at 100s.

CASSIA LIGNEA.—Transactions uninteresting. Buds: Continue to sell slowly at the higher quotation of £16 per cwt.

DRUGS.—Cubebs: Steady; only 15 bags at auction sold at £5 per cwt., and there is a little more inquiry. Dragon's Blood and Galangal Root: Nothing of the least consequence doing in either. Rhubarb: Some inquiry, but upon lower terms; no auctions.

GUMS.—Benjamin: Fine qualities, both of Siam and Sumatra, wanted, and scarce. Only 38 cases Sumatra at auction, sold at 35s. per cwt. for low fourth quality. Damer: Remains flat; 40 cases at auction all retired. Gamboge: Steady; 8 cases at auction all retired at high prices.

GUTTA PERCHA.—The market has become flat, with sellers were there before buyers; supplies augmenting, no auctions. India-rubber: Not any auctions; private business very limited; no change in value.

HEMP.—Manila: Firm, and in demand; 20s. to 30s. per ton advance obtained on moderate sales.

JAPAN WAX.—Quiet, and without any business of importance to report.

OILS.—Aniseed: Firm, with limited business at 6s. 9d. to 6s. 10d. per lb. Cajaputa: None here; some inquiry. Cassia: Very large transactions have taken place at 9s. to 9s. 3d. per lb., and the oil is now firm at the higher figure; only 4 cases at auction retired at 9s. 4d. Cinnamon: A single case at auction, sold at 2s. 1d. per oz. for fair quality. Mace and Nutmegs: Two cases sold at auction at 2¼d to 2¾d. per. oz., being dearer.

SAGO.—In the early part of the month 500 boxes pressed for sale went at a depreciation of 6d. to 1s. per cwt., fair to good small Pearl 22s. 6d. to 23s., since which the article has been difficult to realize but at a further slight decline; of 1,063 boxes lately offered, 1,000 boxes were sold, middling small 21s. 6d. to 22s.; Borneo Company's fine small and small medium 22s. to 23s. 6d. Flour: There has been more demand, and with little offering, limited sales have taken place at an advance of 1s. per cwt. on the rates of the 9th ultimo. Tapioca: During the month, 1,258 bags fair white Penang were with difficulty disposed of at 2¾d. which was a decline of ¼d. per lb., and of the large amount (4,600 bags) in auction since, barely half has been realized, common to good middling 2d. to 2¼d., good 3d, siftings 1½d. to 1¾d., a few lots fine 3½d. to 3¾d. Pearl: Has advanced about 1s. per cwt., 300 cases good white having been taken at 23s. 6d. to 24s. 6d.

SPICES.—Cloves: Penang rather lower; and of 33 cases at auction, only one-fourth sold at 1s. 1¾d. to 1s. 2¼d. per lb. for good: in Zanzibar moderate business has been done privately at high prices; 25 bags at auction retired. Mace: Lower; and of 52 cases Penang, and 11 cases Singapore at auction, half sold at 1s. 7d. per lb. for low dull red to middling palish. Sales advertised. Nutmegs: Are on the average fully 1d. per lb. cheaper; of 254 cases Penang, 9 cases Singapore, and 17 cases Batavia at auction, the bulk sold at 2s. 7d. to 3s. 7d. per lb. for ordinary to fair bold, and 11d. to 2s. ordinary small and shrivelled to fine medium. Pepper: Black remains very flat, with limited business privately at rather lower prices; 1,679 bags Singapore at auction, all retired; and of 762 bags Penang two-thirds sold at 3¼d. per lb. White: Firm, 193 bags Singapore at auction sold at 5⅝d. to 6d. per lb. for fair to good; and 126 bags Penang sold at 5⅞d. to 6⅝d., for fair to fine.

TOBACCO.—Manila Leaf: The *Helvetien*, after calling at Falmouth, sailed for the Continent. Manila Cigars and Cheroots: Rather easier; the greater portion here is inferior. Japan: Sold at lower rates. Java: Good classes wanted; medium in fair request; inferior and musty parcels neglected. Quotations: Manila Cigars and Cheroots, 7s. to 7s. 6d; Manila leaf, none; Japan, 4d. to 8d.; Java, 6d. to 1s. 1d.

TERRA JAPONICA.—Cutch, Pegue: This market remains quiet. 185 bags at auction sold at 25s. 6d. to 26s. per cwt. for good quality, private business has been limited, upon former currency. Gambier is again dearer; 508 packages good sold at auction at 24s. 3d. to 26s. per cwt. for block, and 28s. Cubes; a good deal of inquiry privately, with fair business up to 26s. 6d., both on the spot and for arrival; Cubes have realised 30s.

MISCELLANEOUS.—Blacklead: Steady; and of 738 barrels at auction half sold at 12s. 6d. to 21s. per cwt. for middling to fine lump, and 4s. to 10s. 9d. low to fine dust. Galls: All kinds—Bussorah, China, and Japan—are still scarce and in demand. We quote Japan and China 80s. to 100s. per cwt. 50 cases China at auction retired at 120s., and 12 cases Japan sold at 87s. 6d. Musk: Of 155 caddies Tonquin at auction, the whole sold with fair spirit at quite the average valuations; 23s. to 34s. per oz. for ordinary rough to very good selected; and 17s. to 20s. 6d. pickings: 3 tins Nepaul sold at 7s. 6d. to 8s., and of 5 tins Grain, 2 sold at 46s. 6d. to 48s. 6d. for good. Rattans: Are again rather cheaper, with ample supply, and 1,446 bundles Singapore, and 7,092 bundles Penang at auction sold at 3s. 11d. to 6s. 1d. per 100. Sapanwood: Held firmly, stock diminishing; 17 tons Siam at auction all retired; some inquiry. Star Aniseeds: We continue without any stock; much wanted. Siam Sticklack: No auctions held; limited sales effected privately upon previous terms. Elephants' Teeth: From £34 to £53 per cwt. for sound Siam ivory, which is always of very ready sale. Tortoise-shell: Of 5 cases Singapore at auction 2 cases sold at 10s. to 13s. per lb. for common; 2 cases Macassar retired; fair demand privately, and several cases sold. Turmeric: No China here, and nothing of any importance doing in Java. Vermilion: Quiet, 13 boxes at auction, retired at 2s. 10d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s.; nail rod, £9. 10s.; hoops, £11; sheets, single £12; Staffordshire bars, £10 rails, £7. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 9d. per lb.

TIN.—108s. for block; 109s. for bar. Tin plates, best charcoal, I.C., 30s. to 31s. per box.

LEAD, &c.—English pig, £21. 15s. to £22; W.B., £23; shot, patent, £24; sheet, £22; spelter, £23. 5s. to £23. 10s.; zinc, English sheet, £26. 10s.; quicksilver, £8. 15s.

The following is from the Circular of Messrs. French and Smith:—Notwithstanding the money market was much less stringent, business in metals did not improve during the past month. The disturbed state of political affairs on the continent, added to the uncertainty as to the duties payable in the Northern States of America, checks transactions of moment. Iron: Scotch Pig has not varied much the last few weeks, and speculative transactions have been inconsiderable. Welsh Iron is in moderate demand. Rails are steadily inquired for. Staffordshire is quiet. Copper is more inquired for. The second-hand parcels are gradually clearing off the market Foreign quiet. Yellow Metal is in better demand. Tin: In English few purchases have been made, excepting at from £2 to £3 per ton below official quotations. Smelters have been rather firmer. In Straits a speculative inquiry arose about a week since, and up to 110s. was paid at three months' prompt; but on the announcement of the Dutch Company's sale, for the 29th inst., when probably 150,000 slabs will be offered, the market became dull. The Dutch Company propose also to sell again in March, 1865, which considerably shortens the period for

Digitized by Google

peculative operations. We quote Banca 112s.; Straits, 107s., cash. Tin Plates: The demand for Charcoal is moderately good, but for Coke very flat. The quantity shipped to all parts last month was about 118,000 boxes, against 77,000 boxes in May, 1863. Lead: The price is maintained, but the demand is not quite so active. Spelter has continued to advance; the last quotation was £23. 10s. for 25 tons on spot. The stock has increased during the month about 800 tons. Stock in London 12,448 tons, against 4,790 tons 1st June, 1863. Quicksilver is easier, £8. 15s. per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

From BATAVIA.—At LONDON: West. At FALMOUTH: Fredrika.

From PENANG.—At LONDON: Edinburgh Castle, and Devonvale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

Outward freights remain quiet, and the tonnage on the different berths is more than sufficient for the present export trade. Coal freights from the outports are also without animation. Homeward freights are good; ships are in request for teak from Maulmain and Sarawak; and for rice from Akyab and the usual ports; and for general cargoes from the Malabar coast and Java. Small vessels can be easily fixed for time employment in the Eastern and China Seas.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: 36, and £1. 18s. For Shanghai: £45 to £50, and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26. 10s., and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

The Zanzibar, Maack, from Batavia for Rotterdam, put into Simon's Bay April 13 for spars, sails, &c., lost in a hurricane off Mauritius. The repairs required are extensive, chiefly masts and spars.

AT MAURITIUS.—May 5th, from Singapore, Pamellad de Noqueira; 6th, Urbane, Booker, sailed for Singapore; April 11, Kiu Kiang, steamer, from New York for Shanghai; 29th, Argonaut, Norton, from Manila for New York, leaky in her upper works.

STEAMERS FOR THE BRITISH INDIA STEAM COMPANY.—Messrs. Denny and Co., of Dumbarton, have launched a screw of 1,014 tons, named the *Punjab*: and Messrs. Simons and Co., of Renfrew, a screw of 800 tons, named the *Madras*, to be commanded by Captain Bowers, late of the China trade.

BOYVEAU LAFFECTEUR'S ROB,

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail—London: Joseau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, A. Bugeja, Magri, and A. Rolando Esperanza. HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing these great secrets of health, by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitution, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

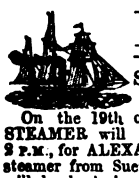
OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels at their London Offices for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place, Southampton.



INDIA and CHINA.—New Overland Steam Communication.—French Mail Steam Ships.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

On the 19th of every month a FRENCH MAIL STEAMER will be despatched from Marseilles, at 2 P.M., for ALEXANDRIA, corresponding with another steamer from Suez to India and China. Passengers will be booked and cargo received for conveyance to the following ports:—Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta Singapore, Saigon, and Hong Kong. In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bacalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped. Insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA and MAURITIUS—Overland, 20th.

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to 500 places, free on application at

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus W., and 23, Regent-street, S.W

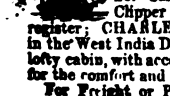
MANILLA Direct (guaranteed first ship, and sailing under the Spanish flag), the splendid, new, Spanish clipper ELISA, A 1 at Lloyd's for ten years, 431 tons register, FRANCISCO RIVERO, Commander; loading in St. Katharine's Dock. This vessel has been built expressly for the Manilla line, and offers an excellent opportunity to shippers requiring despatch.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helen's, E.C.

HONG KONG and WHAMPOA (under engagement with the Lords of the Admiralty), to sail on the 1st of June, the magnificent China clipper ship SOVEREIGN OF INDIA, A 1 ten years, 774 tons register; loading in the East India Docks.

Apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

A Regular Trader.



FOR COLOMBO, CEYLON (Direct), having a considerable portion of her Cargo engaged, the magnificent China Clipper WYNAUD, A 1 for 13 years; 521 tons register; CHARLES P. JONES, Commander; loading in the West India Docks. This splendid vessel has a very lofty cabin, with accommodations of the most superior kind for the comfort and convenience of passengers.

For Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO direct, the fast-sailing regular trader ECLIPSE, A 1 twelve years; JOSIAH HARRIS, Commander; now loading in the St. Katharine's Docks.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street.

NOTICE to SHIPPERS for COLOMBO and COCHIN.—The ELIZA LAING, A 1 ten years, is completing her loading in the West India Export Dock. Last shipping day Monday, 13th June.

For Freight or Passage apply to SUART and SIMPSON, 7, Clement's-lane, Lombard-street.

INDIA AND CHINA.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	SirH. Parkes.	W.I.D.	With des.
Kanagawa	Cymbeline ...	W.I.D.	With des.
Manila	Angela ...	W.I.D.	With des.
Manila	Manila ...	W.I.D.	To follow.
Kurrachee	Victoria ...	W.I.D.	With des.
Penang	Mangerton...	W.I.D.	With des.
Singapore	Alexandra ...	W.I.D.	With des.

Apply at 5, Newman's-court, Cornhill, London; or York-chambers, 55, King-street, Manchester.

CHINA, JAPAN, and SINGAPORE.—The following splendid first-class Clipper Ships will be despatched as under:—

Port.	Ships.	Docks.	Last Shipping Day.
Shanghai	Aurora Australis ..	E.I.D.	June 20.
Shanghai	Antipodes ...	E.I.D.	July 12.
H. Kong & Whampoa.	Pak-Wan ...	E.I.D.	With des.
Kanagawa & Nagasaki	Seringapatam	W.I.D.	With des.
Singapore	Early Dawn .	S.K.D.	With des.

For Freight or Passage, apply to KILLICK, MARTIN, and Co., 28, Nicholas-lane, Lombard-street, E.C.

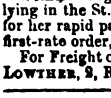
FROM LIVERPOOL for CHINA.

Ships.	Tons	Class.	Destination.	To Sail.
Prince Arthur	547	A 1 ...	Hong Kong & Whampoa ...	With des.
Twilight ...	610	A 1 ...	Shanghai ...	„

For terms of Freight or Passage apply to McDIARMID and GREENSHIELDS, Liverpool.

FOR SHANGHAI, to sail on the 20th June, the splendid Clyde-built Clipper TAMERLANE, A 1 12 years; 764 tons register; ADAM LOGAN, Commander; lying in the St. Katharine's Docks. This Ship has just made the passage from China in ninety-four days.

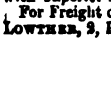
For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.



FOR YOKOHAMA AND NAGASAKI, to sail on the 25th June, the well-known clipper ship JULIA. A 1; 477 tons register; DAVID FORMAN, Commander; lying in the St. Katharine Docks. This ship is celebrated for her rapid passages in the China trade, and is now in first-rate order, being newly classed A 1 at Lloyd's.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.



FOR HONG KONG and WHAMPOA, the well-known clipper ship OITHONA, A 1 thirteen years; 766 tons register; WILLIAM HOLMES, Commander; lying in the West India Docks. This ship has a full poop, with superior accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

CHINA FIRE INSURANCE COMPANY

Subscribed Capital, 2,000,000 taels, in 400 Shares of 5,000 taels each.

The French Mail, with dates from Hong Kong to May 26, arrived at Suez on June 27, and is expected in London on the 7th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Delta, arrived June 29.—From Hong Kong: Mr. C. F. Davies. From Shanghai: Mr. Mayers. From Singapore: Mr. Wehle.

To Southampton, Per Syria, expected to arrive July 6.—From Hong Kong: Mr. R. Eyre, Mr. G. Woodcock, Mr. Smith's two children, J. Milne. From Singapore: Mr. Kyser. From Shanghai: Mrs. Crane and infant, Capt. and Mrs. Warden. Remained in Egypf.—From Hong Kong: Mr. E. H. Green.

By last Bombay mail.—To Suez.—From Shanghai: Mr. and Mrs. Chamberlain and native servant. To Alexandria.—From Hong Kong: Mr. Haward.

PASSENGERS OUTWARD.

Per P. and O. steamer Poonah, June 20, from Southampton.—To Hong Kong: Mr. J. J. Hassall, Paymaster W. E. Chown, R.N., two second-class passengers. To Singapore: One second-class passenger. To Calcutta: Mr. Albert Weylands, Mr. A. F. Danill, Mrs. King, Mr. M. Chapman, Mr. J. A. Loch, Capt. J. George, Mr. Dyer, twelve second class passengers. To Madras: Colonel G. A. Baillie, two second-class passengers. To Ceylon: Miss J. Scott, Mr. J. L. and Mrs. Vanderspar and four children, Mr. C. E. Karslake, Mr. T. F. Lee, Surgeon-Major McDonald, Mr. W. Law, Mr. J. A. Franklin, Mr. and Mrs. Park, ten second-class passengers. To Alexandria: Prince Mohamed, Prince Abdoolah, and servant.

From Marseilles, June 29.—To Singapore: Mr. Reme. To Shanghai: Mr. Blekman, Mr. Blekman, Junior, and European male servant, the Japanese Embassy (18) and Suite (15), T. J. Jackson. To Calcutta: Mr. G. F. Hills, Mr. E. T. Ansell, Captain G. H. Elliott, Mr. W. Wynter, Captain Hale, Mr. J. D. Nichol, Mr. H. W. Harrison, Major D. P. Browne, Mr. Ridge, Mr. A. S. Carter. To Ceylon: Mr. Paul.

Per P. and O. steamer Baroda, July 4, from Southampton.—To Shanghai: Mr. J. Turner. To Hong Kong: Lieut. L. Geneste, R.N. From Marseilles, July 12.—To Hong Kong: Mr. R. Stewart.

Per P. and O. steamer Ceylon, July 20, from Southampton.—To Penang: Mrs. Smith, two Misses Smith. From Marseilles, July 28.—To Shanghai: Mr. C. Ziegler.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The *Nepaul*, with dates from London to the 26th February, arrived at Yokohama from Shanghai on the 24th April. The advices thence to the 27th of April are of considerable interest, as they render it clear that changes of great importance are going forward in Japan, which, we cannot but believe, will turn out to be favourable to the further extension of commerce and of friendly intercourse with the rest of the world. We subjoin the statements made by our contemporaries of the Island Empire of the East, who, as usual, contradict each other in all the details, but still leave enough certain to show that some event has lately occurred of so much import as, by the formal admission of the authorities themselves, to mark an era in the history of Japan. The *Daily Commercial News* of the 20th April, after preluding on the great difficulty of obtaining correct information in such a country, stating that the natives themselves are often divided on questions of fact, and that there "are contradictory rumours abroad concerning recent affairs at Miako," continues as follows:—

"The Nengo, or name of the era, was changed on the first day of the third moon, from Bunkin to Genji. There have been eight different Nengo since the year 1804. It is not easy to discover the occasion of these changes, in most instances. They are, however, always made on the first year of a new cycle of sixty. Sometimes they are significant of a change in the policy or administrative measures of the Government, at others of the accession of a new Emperor to the throne, and at others of some remarkable disturbance in the country, whether physical or political. We know not what other occurrences may give rise to the introduction of a new Nengo. Of the eight that have been made in the present century, we notice that three have been coincident with the arrival of foreigners in some part of Japan, viz: a Russian Envoy in 1804 at Nagasaki, an English ship at Uraga in 1818, and a Dutch envoy in 1844. Three were ordered in years of great earthquakes, or in the year following such a phenomenon, and one was introduced in the beginning of 1860, the year after the opening of the ports to foreign trade. The new Nengo of the present month, like that of 1804, marks the first year of a cycle. The intervals between the Nengo of the present century are of very unequal lengths, varying from fourteen to four years. We cannot suppose that these changes are to be attributed to the mere whims of His Imperial Majesty or his advisers. False and deceitful the Japanese authorities unquestionably are, but they are not fools; and unless the information which we can glean from retainers of the Tycoon and Daimios, as well as from other sources, is false, there is enough in recent movements at the capital to furnish a better reason for adopting a new Nengo than the mere fact that this year is the first of a cycle. We give our readers the substance of the reports which have been made to us, and they will be able to judge whether, granting them to be true, we have made too much of them.

"It is proposed at Miako (so say persons connected with the palace of the Tycoon), that the Imperial Court or Dairi be removed to the Eastward, that is to Yedo or its vicinity, and that all the Daimios be required to repair thither with their families, as of old. Whether this denotes that the sovereign is to abdicate in favour of one of his sons, and to come to Yedo to reside as an ex-Emperor, bringing the members of his household with him, or whether the 'Capital of the Tycoon' is to become the seat of the Imperial Government, it is difficult to determine from the wording of our correspondents.

"It would appear that Yedo is to be the seat of government if we may believe another statement, namely, that the Tycoon is to be raised to the position of a member of the Royal families; and by virtue of that elevation is to be relieved from the duties of the Shoogunship, which are hereafter to be per-

Digitized by Google

formed by the Gosanke, or the heads of the three families in whose line the office of Tycoon descends. Thus Owari, Kiushiu, and Mito are to perform the functions of the Tycoon in yearly rotation. To this latter arrangement the Prince of Karga is said to refuse his consent, and that for this cause Stotsbashi has begged leave to retire from public life.

"Aidz is to be placed in command of the army, and Owari, Kiushiu, and Satsuma to be charged with the management of trade with foreign countries, and a congress of the Daimios is to assemble to decide upon the above-mentioned changes.

"If the half of all this should be done Japan would have, indeed, entered upon a new cycle in its history, as well as in its years, and the era of its commencement may well be called 'Genji,' or that of an initial or new Government. There can be no question that affairs in this country for some time past have been rapidly tending towards an important crisis of some kind, and those who are aware of the pressure of the various forces both within or without will not be greatly surprised at an organic change in the Government as great as that indicated by the reports we publish to-day

"Many of the difficulties which the trade with Japan has had to contend with have risen from the hostility of the great Daimios to the Tycoon. It wounds the pride of these Princes to see the Tycoon increasing his wealth, power, and dignity by means of the large revenue he derives from the foreign trade, while they receive no share in its profits, or at least no fair proportion of it. It is not strange that these men, who by hereditary rank are not inferior to the Tycoon, and are all but absolute monarchs in their own domains, should wince under such a regime, and plot against its author. The appointment, if true, of Owari, Kiushiu, and Satsuma to the superintendence of trade, certainly looks like a yielding to the pressure on the part of the Daimios, and an augury of less restricted commerce with Japan.

"The Tycoon's assumption of the treaty-making power, inherent only in sovereignty, has also been in all probability a grievance keenly felt by the feudal princes. The Tycoon is in no sense a monarch, and yet he assumed to be when he made the treaties, and is still receiving the honours of one, from all the Governments that have treaty relations with this country. It is not unlikely that he would be glad to get out of this false position, for the sake of his own peace and safety at home, and if he is elevated to a place in the Imperial family and relieved from the responsibilities of a Tycoon, and if moreover, the Imperial Court be removed to Yedo, or even if the actual Emperor still remain at Miako—the father-in-law of the Tycoon, as ex-Emperor, removing his household to Yedo—it will place the Tycoon in a better position with the Daimios, and he might have a better warrant for the exercise of the prerogative of a sovereign than he has ever had before."

The *Japan Herald* treats the whole of the above, fact and argument alike, as solely an effort of the imagination. It says:—

"In a number of the *Japan Commercial News*, published the other day, we observed a supremely ridiculous statement, to the effect that the Mikado, having abdicated, was about to come to Yedo with his friend the Tycoon, to aid him in his Government (!) &c., &c., &c. One can scarcely credit that any person could be found in Japan so utterly ignorant of its Government as to imagine such nonsense, or so very verdant as to submit to be plied with such a very palpable shave; but that it should find a place, as editorial intelligence, in any public print, is certainly beyond all comprehension, and would be beyond credence, had we not before witnessed similar instances of 'sensation' vending in Yokohama . . . .

"We cannot spare time or room here to discuss the lengthy subject of the very peculiar constitution of the two Courts of the Mikado (or Spiritual Emperor) and that of the Tycoon; nor is it necessary, for in all the books that have been written on Japan from the time of Kempfer to that of Sir R. Alcock, all, and much more than we profess to know upon the matter, will be found. Any one who has read any of these will see that to speak of the Mikado going to Yedo to aid the Tycoon in his Government, is not one whit more reasonable than it would be to state that his Holiness Pope Pius IX., having abdicated the chair of St. Peter, had consented to act as the Private Secretary of Victor Emmanuel II., King of Italy. The name of the Japanese Cycle, or Nengo, has been recently changed. In Japan, as China, since 3,000 years B.C., each cycle comprises sixty years, or 720 revolutions of the moon, and expires. The old cycle has just gone out, and the Emperor (in whom lies the superior power even to institute and change the cycles), in the fullness of his reliance that his recent good understanding with the Tycoon and powerful nobles will result in the establishment of peaceful influences for the future, has named the incoming era 'Gen-si,' or 'Eternal Peace.' This seems to be the little peg upon which our local contemporary has hung this huge load of sensation intelligence."

The *Commercial News* next made the startling announcement that all trade had been prohibited in Rice, Oil, Silk, and Wax. Its statement was that "the Japanese Customs officers had held a meeting at the Police Office, to take into consideration the propriety of forbidding certain articles of export to be sold to foreigners, on the grounds that they were wholly required for internal consumption, and the native merchants were summoned to attend with their books and papers in order to furnish a statement of sales for the information of their own Government. The meeting was, therefore, fully attended, and it was decided that the articles specified above should be immediately declared prohibitory, and the vending thereof to foreigners for exportation at once stopped."

The *Japan Herald* was again ready with its contradiction, and, as will be seen, the *News* was compelled afterwards to admit its information to have been incorrect as regarded the most important of the four commodities mentioned. The *Herald's* contradiction was as follows:—"We have heard, some time since, that the article *oil* had become exceedingly scarce at Yedo, and do not think it at all improbable that there may have been some talk amongst the Japanese as to the advisability of including this, as *rice* has long been included, amongst articles the exportation of which shall be prohibited; but every inquiry we have been able to institute assures us that there is no foundation for the statement so far as the staple *raw silk* is concerned—and it is this, of course, to which the *News* points when it speaks of 'silk.' On the contrary, within the last few days there have been further small arrivals, and several settlements in silk have been made; we hear further that some 300 more bales are hourly expected to arrive from Yedo. It is more than probable that manufactured piece silk goods may, like oil, be becoming short for home consumption, and a talk has consequently been had as to the propriety of putting them amongst the articles reserved from exportation; but, considering the very insignificant quantity of the manufactured silk exported hence by foreigners, and that there has been for a long time since only one shop in Yokohama where silk piece goods could be purchased, and that has been shut up for the last three months, this reduces the mountain-like significance of the 'intelligence' to the proportion of a very small mole-hill indeed."

The *Commercial News* gets out of its assertion with reference to Silk in rather a lame fashion:—

"In our daily issue of the 22nd inst. we had occasion to refer to one of the most recent moves in the game—the prohibition against certain articles being exported. We have to add another—*Pease*—to that enumeration, and we are credibly informed that their sale to foreigners is rigidly interdicted; of course not in violation of the *spirit* of the Treaty, but merely as a protection to the poor of Japan, who would suffer, say they, the trials of famine if their staples of consumption were to be sent out in any quantity. With such a prolific soil as this, very little credit can be attached to such argument. Their philanthropy indeed is so blunted, nay deadened, in other directions that we cannot concede them the possession of that virtue here. But judging from their general disposition towards us, we may not unreasonably infer that where a plausible excuse can be advanced, by so much will our trade be crippled. We must, however, modify our statement as regards Raw Silk; but only to add that the commodity must, in the first instance, be sent to Yedo—no matter at what inconvenience—and irrespective of the distance which the native dealer has to trudge to the capital. Arrived there, the silk is transferred to the custody of what may be termed the Silk Merchants' Association, a company of dealers to whom is confined the duty of adjusting the trade with Yokohama. They simply give receipts for the quantity made over by the owner, with the promise of payment at some specified time, six months or more after the sales are effected with foreigners, from whom they, however, take cash on delivery. But apart from the commercial considerations which attend such a circuitous traffic, despite the heavy duties and transport charges which should augment the original price before its sale here—so much, as perhaps to amount to prohibition—it is not quite certain that the 'Guild' at Yedo would forward on the stocks at all; at any rate they

Digitized by Google

would retain a quantity equivalent to the supposed wants of the officials. There is no stoppage, exactly, of the silk trade in all this—no open prohibition—but what does it amount to? It discourages the Japanese trader, disappoints the foreign merchants, and compasses the ends of the government."

The *News* complains of the conduct of the Chinese who have been imported into Japan in the wake of the foreign merchants. It says:—

"The Chinese folk here have established gambling houses, to which the Yokohama Celestials regularly resort and pass the night 'dicing.' It seems that there are watchmen employed who are on the *qui vive*, and ready to give the alarm at any moment, and that the whole thing is systematically carried out as in China. We believe that gambling is strictly prohibited among the Japanese, and that hitherto they have not been tainted with that vice. But such is the proverbial fascination with which the fatal passion allures those who are once unguardedly drawn within its influence that the restraint of authority will in time be defied, and precautions against discovery will be multiplied as the extent of the danger increases, the end of which will be that Japan will rival China in this chief of vices. We consider, therefore, that those who have Chinese servants should look to it, and that the authorities also should inquire into the truth of the case. The Chinese would not be tolerated here as settlers, but only in virtue of their dependence on foreigners. This privilege will accordingly reflect unfavourably upon us if abused, and we hope that every exertion will be made, therefore, to nip this canker in the bud, before its blighting, desolating influence shall permeate the various channels of society in Japan."

There had been several fires about the middle of April, the most serious of which occurred at Yedo, where the destructive element raged unchecked for two entire days, causing an immense amount of loss in property, about 120 houses. The other conflagrations occurred at Toby and Otanghaia, in the vicinity of Kanagawa.

Her Majesty's steamer *Osprey* left Yokohama on the 16th April for Nagasaki, conveying to that port Mr. A. A. J. Gower of late attached to the British Legation. It will be recollected that Mr. George S. Morrison having been allowed to retire from the post of Her Majesty's Consul at Nagasaki, Dr. Myburgh was confirmed in the appointment. The Doctor is now coming home on leave, and Mr. Gower has been sent to Nagasaki as Acting Consul.

H.M.S. *Conqueror* left Hong Kong early in May on her passage to Yokohama.

NAGASAKI.

The dates from this port are to the 20th of April, but we have no public news to report. The steamer *Annette* was leaving for Hong Kong, and we may probably have some news by the French mail, expected here on the 7th inst.

CHINA.

TIEN-TSIN.

Mr. William Baker has been transferred from the Customs at Chefoo to this port.

Mr. Joseph Edkins, the missionary, has produced a second edition of the Mandarin grammar spoken of; and in what it is better than its predecessor of the first edition, we shall let the author tell in his preface, which we have much pleasure in reproducing below from a copy which has been sent to us from the Presbyterian Mission Press, where it has been printed under the critical eye of Mr. William Gamble.

CHEFOO.

Three of the residents at Chefoo lately took a trip through the Shan-tung province, in fact, over an extent of some 120,000 miles, during the month of March. The cold was intense. The inhabitants appear to have behaved very civilly.

NEWCHWANG.

A correspondent to the *Friend of China* writes, at the end of February:—

Meadows has gone to Pekin, and unfortunately his pistol went off and wounded him in the leg. Previous to his going, he had all the foreign community around him and told them that there was a large number of thieves near the place, and he would not be surprised if some fine morning we were all killed. So they immediately formed into a body, and agreed to appoint Mr. Huntington (a very capital appointment) as the Captain of the Yingtze Dragoon. Since then they have met regularly once or twice a week, and I would say they know how to handle a musket. Their uniform is rather spicy and shows taste. It consists of a hat, cap, wide awake or sloucher, all in red; jacket, of course, made according to the taste; belts various colours; trowsers, boots or shoes, to the taste of the wearer; but the best of all are their guns, from 2 feet long up to 6 or 8.

Of opium, not a chest has been sold by a foreigner since the port closed. We anticipate the ice will break and the river be clear about the 20th March.

CHIN-KIANG.

From Chin-kiang dates are to the 27th April. Business is dull but decidedly improving. The Bund of the Concession is finished, and the public roads nearly so. It is expected that new European hongs will soon begin to be built. Mr. Adkins remains as Consul; and an old joss-house on a hill is being converted into a Consulate, and being finished as fast as Consulate work at Chin-kiang usually is. The new Commissioner of Customs, Mr. C. Lord, appears very willing to give all reasonable facilities—we are quoting from a correspondent's letter—for the despatch of business, and is about to build the Custom House close to the Concession, very shortly; so that, in the course of a few months, both Custom House and Consular business may be transacted without going to Silver Island. The anchorage off Silver Island is bad. Some of the hulks, including the Customs', have anchored above the Concession; some remain in their old berths, in a good anchorage, on the opposite side.

SHANGHAI.

The London Mail of 10th March arrived here on the 27th April. The latest dates are up to the 6th May.

THE ANGLO-CHINESE FORCES.

After the victory at Wai-soo, Colonel Gordon advanced, driving the rebels before him, to besiege Chang chow. He arrived before that city on the 14th April, and at once commenced operations by attacking, in conjunction with the Imperialists, the stockades in possession of the rebels outside the west gate of the city. The attack was successful, and the stockades, twelve in number, taken. He commenced to place his siege batteries in position on the 24th, and the next evening, while superintending the operation, had a narrow escape from being shot by his own men, who mistook his party for rebels, and fired, killing Colonel Tapp and three others. Having completed his preparations and widened the breaches made by the Imperialists, he ordered an assault on the 27th; but the storming party encountered such desperate resistance, that it was compelled to retire, after a severe struggle, with a loss of 300 men and 27 officers killed and wounded.

The officers, we learn, displayed great gallantry, but the men hesitated to face the shower of missiles which was hurled on them, and the assault had to be abandoned. Gordon retains his position before the city, which is closely beleaguered on all sides, and will make another attempt to carry it at an early date. The rebels are now evidently fighting with the courage of despair. They have been driven out of Che-keang; they hold one town in Ngan-wei, and four in Kiang-su. After Chang-chow has fallen, Nanking will be their only remaining city which is likely to offer any serious resistance to the Imperialist troops, and its reduction is only a question of time. This time the rebel leaders will naturally endeavour to prolong by every means in their power, and we anticipate that the closing struggle will be the most severely contested that has yet been fought. The rebel chief who was in command of Tai-tsau at the time of Holland's defeat, and who was made Wai-wong for the capture of the latter's thirty-two pounders, surrendered with his troops to the Futai of Che-keang, at Haining. He is the same man who was in command at Tai tsan when Le Futai's brother was entrapped and so many of his men slaughtered. Yet he has been admitted to terms, and has been given a button. Verily the ways of Chinese are inscrutable. The Soochow wangs were decapitated for having defended themselves bravely; the individual in question has been rewarded for an act of gross treachery.

The *China Mail* says:—"We may expect to hear of something decisive being done in the course of a fortnight. Upwards of a hundred thousand men are now encamped about Chang-chow-foo; the place is closely invested, every gate being guarded, so that if the city be not taken by assault, the garrison must eventually surrender for want of food. In any case there will be much suffering and misery; but, unfortunately, that is only a secondary consideration to the suppression of a hideous rebellion which carried misery wherever it went, and whose leader proposed to carry it all over China,—and then to

Digitized by Google

establish commerce and trade. With the fall of Chang-chow-foo the Taiping Rebellion will be crushed, as Nanking is invested by Tseng Kwo-fan's forces, and will soon be starved out. Other places in rebel possession are of minor importance, and only one or two in number. We are not, therefore, surprised to hear that Colonel Gordon intends to retire from the Imperial army after the fall of this city, disbanding, at the same time, the little force that has accompanied him through so many victories."

THE FRANCO-CHINESE AT NINGPO.

The mandarins contemplate reducing the strength of the disciplined contingents in Che-keang. No doubt, now that Hangchow has fallen, and the rebellion has been confined within such narrow limits in the province of Kiang-su, the danger of a fresh irruption of rebels into the province of Che-keang has become remote. But the mandarins would do wisely, in the present instance, if they would adopt the European maxim that "prevention is better than cure," and, acting on it, pursue the European plan of keeping always ready the means to repel attack, from whatever quarter. China is in little danger of aggression from without, and if she were, even her disciplined force would be perfectly useless to resist it; but no country in the world has more urgent need for a reliable standing army to repress internal disturbances.

Setting completely aside the influence which the existence of troops led by foreign officers must always give foreigners with the authorities of a province where disciplined contingents exist, it would be well if the consuls at Ningpo would impress on the mandarins in that province, for their own good, the folly of disbanding men who have done such good service, and on whom they can rely to quell disturbances of any nature that may arise. The wealthy merchants of Ningpo are averse to the contemplated measure, both because they consider it premature as regarding the rebels, and because the Anglo-Chinese Contingent has rendered efficient service in checking piracy in the neighbourhood of that port, which they well know would soon become rampant if that check be removed. Rowdyism has been almost as troublesome in the foreign settlement at Ningpo as at Shanghai, and far more so in the neighbourhood.

A detachment of the garrison has been constantly scouring the latter, and has frequently succeeded in arresting foreigners who were making a living by levying squeezes on boats passing to and fro with merchandise. A fortnight ago, for instance, three men who had committed a robbery of 2,170 taels at Yu-yao, were arrested by a detachment sent out for the purpose by Colonel Cooke, tried, and sentenced to one year's hard labour and subsequent deportation. A short time previously the same officer sent to Shanghai, for disposal, ten subjects of non-treaty Powers, who were found in the interior, armed and without passes. We mention these two instances, out of many, to show the utility of the force, and the short-sightedness of the economy, if economy it be, which would induce the mandarins to discontinue it. We suspect, however, that the insane jealousy of foreigners which the Futai of Che-keang and Foh-kien has always exhibited, is a more powerful motive than the desire to economise; as the native merchants, who pay for the force, fully recognise the danger to trade that will ensue on its removal, and are desirous that it should be continued at its present strength.

The maintenance of a garrison of disciplined troops at Hang-chow is important with regard to the rebels. If the defence of that city be entrusted to Imperialists it will, for a few months, be exposed to imminent risk of recapture by the rebels, and pillage by the hordes of pirates who infest the bay which bears its name. In the blindness of their folly, too, the mandarins are actually discarding, at a stroke, all the Cantonese war junks which have hitherto been employed at the siege of Hang-chow—in other words, pursuing a course which is certain to make them either desert to the rebels, or swell the bands of pirates. We repeat that it will be well if the influence of the foreign authorities can be brought to bear to dissuade the Che-keang mandarins from a course fraught with so much danger.

A large seizure of arms has been made at the Mariners' Home, in the American settlement, at the instance of Mr. Dick, the Commissioner of Customs at Shanghai. The police found 448 pistols, 32 swords, and 2 bayonets, which are at present in charge of the Customs authorities.

The French Municipal Council have published their report for the year ending 31st March, and budget for the ensuing year. They are able to announce important reductions in their taxes, it being proposed to abate 25 per cent. of the land-tax on European property by reducing the valuation to that extent; and, further, to encourage the Chinese by lowering the 8 per cent. tax to 6 per cent., as also making further minor reductions which are found to press too heavily on the native population. It appears that the Council actually commenced the collection of the 8 per cent. tax on rentals for his Excellency the Taoutai, but obtaining conclusive proof that the Chinese authorities were levying squeezes, in defiance of the terms of the agreement, they, with the approval of the Consul General, declared the agreement vitiated by such acts, and thenceforth null and void. The finances seem in a flourishing state; the receipts, during the year, amount to taels 103,451.89, and the disbursements to taels 101,383.24, leaving a balance in hand of taels 2,068.65. The payments, however, include taels 32,000 on account of a new municipal building, taels 8,838.55 repayment of loan, and some items for furniture, &c.

The Spring Races took place on the 27th, 28th, 29th, and 30th April. The weather, on the whole, was fair, and the grand-stand was crowded on each day. The racing was good and attracted great interest. The race which caused the greatest speculation was that between Hadji and Forester for the Arab Cup, which was won by the former. These horses had before won a race each, so that now Hadji is the conqueror. The Challenge Cup, value 500 guineas, was won by Haddington, after a splendid race with Exeter, who seemed to have an equal chance till the horses reached the distance-post, when his opponent came away and won by several lengths. The Garrison Cup, a steeple chase, brought a capital field to the post, and was eventually won by Stockwell, who was well and steadily ridden throughout; Lawyer, who lost his chance early in the race by refusing at the brook, came in second; Hackney sprained his shoulder when going round splendidly with a lead of nearly a quarter of a mile. A full record of the races will be found in the *North China Herald* of the 30th April.

The new American steamer *Kiang Loong* has arrived from Hong Kong, and takes her departure for Hankow. Her build and general accommodation are much admired.

The case of the ship *Sebastopol* against the tow-boat *Defiance* resulted in the following verdict:—"The Court hold that the port hawser used in towing the *Sebastopol* on the 22nd of March last was not cut by any one on board the *Defiance*, and that the parting of the hawser is not attributable to negligence or improper conduct on the part of the defendants' servants."

Cases of considerable mercantile interest are fast multiplying. No sooner is that of the *Sebastopol* v. *Defence* disposed of, than we find another instituted—Gilfillan v. Glover and Co., of Japan, for a breach of duty as agents or factors, for the sum of $28,000 or £9,333. The facts of the case are simply as stated by the plaintiff's counsel there: Mr. Gilfillan sent the steamer *Chusan* over to the port of Nagasaki in Japan, with instructions to Messrs. Glover and Co. to sell her if possible for the sum of $100,000; this limit was ultimately reduced to $80,000, which it is alleged Glover and Co. refused.

Intelligence, which we hail as a veritable sign of the times with reference to the rebellion, reaches us from the mainland, to the effect that bodies of rebels have been observed on the Northern border of the Canton Province, and in the adjoining districts of Kiang-si. At the same time we learn from Shanghai that the scattered remnants of the Taiping forces who have been broken up by Colonel Gordon's recent successful advance, in combination with the movements of the Imperial army under the late General Ching, were known to be making their way through the Southern region of Ngan-hwei in the direction of the Kiang-si frontier. This is the natural conclusion, or rather perhaps the commencement of the end, of the insurrectionary movement, but it indicates a possible state of affairs in this part of China to which we have no doubt the Imperial Government is fully alive, and which we trust it will be prepared promptly to grapple with.

HANKOW.

It is stated that the adverse opinion formed on Mr. Macpherson's conduct in the *Huquang* steamer affair are now by subsequent events reversed.

HONG KONG.

The London mail of the 26th of March arrived out on the 6th of May. The dates are now up to the 13th.

The discussion in reference to Canton continues, and the following comments appear in the *China Mail*:—

We sent a reporter to Canton, and we regret to state that our worst fears are confirmed with regard to that port. This is a pity, for Canton

Digitized by Google

people deserve to be encouraged, and we have at present no means at all of encouraging them. It is rumoured, whether truly or not we have no means of saying, that Messrs Dent and Jardine intend to remove their agencies from Canton. This can only be accepted as a sign of the times. Firms like those are rarely mistaken in what they do; and should they decide to leave Canton, it may be safely enough concluded that there is not much doing in that city.

Of course we must all regret this, because we have a partiality for the Canton people; but, at the same time, it is impossible to conceal the fact that Canton is rapidly declining as a place of business. Some weeks ago the idea was mooted by Sir Macdonald Stephenson of having a railway between Canton and Hankow. We see no necessity for denying that Sir Macdonald spoke to ourselves on the subject; and, as he appears to be a man of enthusiasm we should not be at all surprised if he should carry out his views. We hear from Canton that some of the Chinese authorities have obtained a model of the steam-engine, which they have naturally enough to set to work and very much approved of. This is encouraging. There cannot be any doubt, we think, but that the Chinese are opening their eyes to the merits of foreigners. It may be that they have borrowed their ideas, in this respect, from the Taipings, who, whatever may be said against them, have shown all along a most praiseworthy appreciation of Europeans and their appliances.

The *Government Gazette* of the 30th April assumes the dimensions of a miniature blue-book, from the publication in full of the Bankruptcy Ordnance, which extends to two hundred and one sections, and fills two-and-thirty pages. There is nothing else of any importance in the *Gazette* save two small formal notifications. The first intimates that the Hon. J. Smale, Esq., W. H. Alexander, Esq., Henry Kingsmill, Esq., and Wilberforce Wilson, Esq., are nominated Cathedral Trustees on behalf of the Government for the ensuing year; while J. C. Power, Esq., is nominated auditor. The two trustees nominated by the seatholders are the Hon. Charles W. Murray, Esq., and Edward Parry, Esq., with T. G. Linstead, Esq., as auditor. The second notifies the appointment of Wilberforce Wilson, Esq., as Acting Surveyor-General, and Shearman G. Bird, Esq., as Acting Assistant Surveyor-General, during the leave of absence of the Hon. the Surveyor-General.

A serious affray took place at West Point. The inmates of Mr. T. C. Ladd's house, Rice Mills, West Point, were alarmed by the report of a musket, which had been discharged by their watchman at a man whom he had seen stealing out of the domestics' rooms: it appears that he missed his aim, and quickly followed the man round the corner of the house. The thief, instead of attempting to climb over the wall, as the watchman had supposed he would, waited behind the corner for the watchman's approach. As soon as the pursuer's head emerged, he received a stab in the face, which happily glanced off, not doing him more damage than making a large gash across his nose. His cries soon brought Mr. J. Ladd to the verandah, revolver in hand, who found the thief making his escape over the wall. Mr. Ladd attempted to fire at him, but his revolver having lain long by had got rusty and would not act. The last that was seen of the rogue was when he was walking leisurely up the road. The servants had been paid off that morning, and how he got the information it is impossible to conjecture, unless one of the servants was his ally. There is no doubt but what he had some comrades outside who were both ready and willing to help him to carry off the booty or assassinate anybody attempting to defend their property. Fortunately he stole nothing.

A burglary was committed on the premises of Messrs. Holliday, Wise, and Co., by a gang of thieves. The alarm having been raised, however, by the watchmen on the premises, five of them were captured, along with the implements belonging to the professional housebreaker. They were all committed for trial.

The gas works are progressing satisfactorily. In another column will be found a notice of the meeting held in London.

LOCAL BANK RETURNS.

	Notes Issued.	Specie in Reserve.
Oriental Bank	$614.322	$250,000
Mercantile Bank	691,795	250,000

Agra and U. S. Bank	358,134	158,000
Totals	$2,033,056	$800,000

COCHIN CHINA.

SAIGON.

We have the *Courrier de Saigon* of the 10th May.

A dry dock was inaugurated on the 26th April, by admitting the first-class gunboat *Avalanche* into it. This dock is more than 73 metres in length, and has been constructed for a sum of 70,000 francs. Many difficulties were met with, but the engineer, M. Antoine, Director of Naval Constructions, succeeded in overcoming them.

The Government has established a monthly line between Saigon, Pulo Condore, and Singapore, placing upon it the despatch boat *Echo*. It will carry freight and passengers at the rates that were formerly charged in the *Grenada*.

The officials at Pulo Condore lately had a narrow escape from being cut off by poison. The master carpenter of the House of Correction, at the end of his day's labour, was about to drink a glass of water when one of the prisoners snatched it from his hand. On being pressed for an explanation of this act, he confessed that the water and provisions of the Europeans had been poisoned, and gave the names of the culprits, four in number. These men, on being taken before the Commandant, confessed their crime. One of them, in the middle of the examination, cut his throat with a knife which he had managed to conceal on his person; and another swallowed some broken glass, dying some days afterwards in horrid torture.

JAVA AND NETHERLANDS INDIA.

We have dates from Batavia to the 11th of May. The Government had passed the following resolutions:—

"A regulation imposing a head-tax on the natives of Macassar, from which, however, the native chiefs, officials, honourably-discharged officials, and acknowledged clergy are exempted. The tax to be from 1 f. to 16 f. a head, according to the means of the native man, or single woman.

"Such native chiefs and officials who have hitherto been allowed to live on the support of their district people, to be paid a monthly salary of from 8f. to 50f. by the Government, who releases those district people from that duty.

"The owners of spice parks in the island of Banda to be exempted from the obligation of planting spices and delivering the crops to Government, as also from the obligation of returning the advances received by them from the Treasury, leaving them the free disposal of their property and liberty to dispose at discretion of the produce which they grow in their parks; the Government monopoly of the same being withdrawn on the following conditions:—1. That the owners of all spice parks waive all claim which they may assert to have in the assistance or interference of the Government for the procuring of labourers, the supplying of rice, piece goods, or other merchandise, and for subsidies for the repairs of dwelling-houses or otherwise. 2. That they take over all the obligations of Government proceeding from contracts with labourers working in the parks; binding themselves strictly to fulfil the same, the Government reserving to itself the right of superintending the fulfilment of this engagement. To such as accede to the above, and who desire to remain in the enjoyment of such grounds as may not belong to the spice parks, the same will be leased at a moderate rate.

The *Samarang Courant* has letters from Banjermassing which state that peace is not quite restored in that quarter. An under-adjutant and six men were lately murdered on the Barito river, and although petty chiefs are constantly coming in and making submission, they as constantly break out again. The authorities have prohibited the communication of intelligence regarding the state of affairs at Banjermassing.

A letter from Ternate communicates the following:—On the 13th March a Sangir prahu arrived in the roads here, laden with oil, and having six wounded men on board. This prahu was attacked by pirates close to the islands of Tyfore and Map, when three of the crew were killed. One of the six men wounded had since died from his wounds, which were inflicted by iron harpoons. Some days after the attack, some pirates were seen near Nakian. The steamer *Retch* had gone to search for these pirates.

The superintendent of the kina culture in Java, Dr. Franz Junghuhn, died at Lembang (Preanger Regencies) on the night of the 24th April. Dr. Junghuhn was a native of Prussia, and arrived in Netherlands India in October, 1835, as an assistant surgeon in the Indian army. In 1838, at his own request, he was transferred to the Government Physical Commission. In 1839 he was promoted to surgeon of the second class. In this capacity he was appointed to the West Coast of Sumatra, and executed a topographical and physical survey of the Batta country, the results of which he afterwards published in a work called "Die Batta-lander auf Sumatra." He was employed in similar researches until 1848, when he visited Europe for the purpose of publishing the results of his labours. In 1855 he returned to Java, and in 1856 the direction of the kina culture in Java was confided to him. Dr. Junghuhn's health had lately failed, and he had obtained a two years' leave of absence to Europe when death overtook him.

The *Java Times* says that another large firm has failed at Sourabaya. The liabilities are estimated at nearly three and a-half millions, which, however, it is expected will be paid in full.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 21st May. The P. and O. Company's

Digitized by Google

steamer with the mails from Europe of the 10th April had not arrived.

Business generally had been much interrupted since the departure of the last mail in consequence of the failure ofseveral Chinese, one of unprecedented magnitude, which has created a complete want of confidence. The present system of conducting business is most unsatisfactory, and the enormous losses sustained since March prove the necessity of a radical change. The *Overland Free Press* remarks :—

"The commercial crisis in Singapore which began some months ago appears to have now reached its height. The failure of two firms with liabilities of over a million of dollars and largely indebted to Chinese traders of all kinds, has naturally reacted upon the latter, and they are now almost daily suspending payment. No doubt some are taking advantage of the opportunity to effect a composition with their creditors, when there is probably no necessity that they should do so, but the greater have been bona fide 'cleaned out.' This is not the first crisis of the kind we have had in Singapore, although it is probably the most severe, owing to the greater facilities which now exist for obtaining discount, and which has naturally led to overtrading amongst the native dealers. The system on which business is conducted here—the sale of goods on three months credit —has been frequently blamed as the cause of these disasters, but we think the system is not so much to blame as the manner in which it is applied. The real evil is the indiscriminate credit given to every one who chooses to start as a trader. It has often been said that a cooly has only to put on a clean *boju* and go to the European godowns, when he will obtain as much goods on credit as he wishes, and we believe there is considerable truth in the representation. In ordinary times these men manage to keep afloat and extend their business, but when any derangement of trade occurs and a pressure ensues, they collapse, and it is found that they have been carrying on business without any capital. The competition amongst the European houses to effect sales is too keen to allow of a proper discrimination in the selection of buyers being exercised, and in this lies the root of the evil. The only effectual remedy would be the adoption of cash sales, but this would so restrict business that few would be found willing to adopt it. The best palliative would consist in the banks restricting the amount of accommodation, and laying down a rule that, in the case of native traders, their notes will only be discounted to a certain moderate amount in each case, however good may be the names of the European firms appearing upon them. Unless some plan of this nature is adopted, we see no chance of the present hap-hazard system being amended, or any security being provided against a recurrence of these periodical smashes in the native trade."

The *Penang Gazette* informs us that the Foreign Office was too busy with American and German-Danish affairs to allow of its inquiring into the complaints that had been made from the Straits regarding Dutch encroachments on the East Coast of Sumatra. The *Gazette* adds :—"The latest news from the East Coast that we have received is, that the Dutch have been endeavouring to stir up the Malays of Batubara to attack Assahan, and should a war arise between these two States, it may afford an opportunity for our meddlesome neighbours to interfere with advantage to themselves. It will require all the vigilance of the local government to counteract these designs. The whole subject is full of importance, and if the welfare of Penang is to have a place in the consideration of its merchants, they will do well to be up and doing, if they are desirous to preserve the Sumatra trade." We may mention (adds the *Free Press*) that we have heard a report, though not from an official source, that an understanding has been come to between the English and the Netherlands Governments on the subject of the east coast of Sumatra. The Dutch are not to be interfered with so long as they do nothing to obstruct trade, which they undertake shall be allowed to follow the usual channels.

As regards the "transfer" of the Settlement, a notice will be found in another column of an interview had with the Secretary of the Colonies by a deputation that waited upon him in reference to the matter.

His Honour the Governor has been pleased to make the following appointment, with effect from the 1st May : Mr. T. A. Fox to be Commander of the Straits Government steamer *Pluto*, vice Eales, transferred to another appointment.

Captain Hardie, of the *Omar Pasha* of this port, committed suicide by blowing his brains out with a pistol, when two days out from Bangkok bound to China. No cause is stated for the act. The *Omar Pasha* put back to Bangkok.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANTROBUS—On the 21st June, at 65, Eaton-square, the wife of H. Lindsay Antrobus, Esq., of a daughter.

BOWMAN—On the 3rd June, at Grangrove, Eden-bridge, Kent, the wife of A. Bowman, Esq., of a son, stillborn.

MANUK—On the 4th May, at Hong Kong, the wife of G. J. M. Manuk, of a daughter.

TWYNAM—On the 13th June, at Bideford, North Devon, the wife of Captain Twynam, late Indian Navy, of a son.

MARRIAGES.

BUSH—DODD.—On the 16th June, at Wanstead Church, Essex, by the Rev. W. P. Wigram, rector, Henry Edward Bush, Esq., of Newchwang, China, to Jeannette, eldest daughter of P. G. Dodd, Esq., of Cornhill, and New Wanstead, Essex. No cards.

MARTIN—LEGG.—On the 23rd June, at the parish church of St. Leonard's on-Sea Sussex, John Bell, eldest son of M. J. Martin, Esq., of Melville-street, Edinburgh (formerly of Singapore), to Ellen Francis, fourth surviving daughter of T. R. Legg, Esq., of Croom's hill, Blackheath, Kent, and Bermondsey, Surrey.

ROBINSON—SIMMONDS.—On the 18th June, at Holy Trinity Church, Bayswater, by the Rev. Charles Walsham, M.A., Heaton Boyd Robinson, Esq., son of Captain Charles Gepp Robinson, R.N., to Margaret Maria Serine, only daughter of Richard Simmonds, Esq., R.N., of the Admiralty, and Queen's-terrace, Hyde-park.

DEATHS.

BAYLEY—On the 11th June, in London, John Ritchie, son of Francis and Lucy Bayley, of Point de Galle, Ceylon, aged 11 months.

CLEASLEY—On the 23rd April, at Kowloong, Thomas Cleasley, private H.M. 20th Regt, aged 28 years.

DOUGLAS—On the 9th June, at Inchmartine, Perthshire, the seat of Douglas Vaughan Allen, Esq., Lady Douglas, widow of Lieut.-General Sir Neil Douglas, K.C.B., K.C.H., late Commander of the Forces in North Britain, aged 72.

GRIFFITHS—On the 3rd May, at the General Hospital, Hong Kong, Daniel Griffiths, private H.M. 67th Regt.

POMSON—On the 8th May, at the Seamen's Hospital, Hong Kong, Wm. Pomson, seaman of Prussian brig Typhoon.

PONKS—On the 11th May, at Hong Kong, on board H.M.S. Hercules, Wm. Ponks, Sapper, Royal Engineers, aged 32 years.

STEPHENSON—On the 11th May, at the Civil Hospital, Hong Kong, C. Stephenson, destitute seaman.

SECRETAN—On the 18th May, on board the schooner Nina, in Singapore harbour, Francis James Secretan, Esq., late of Ampanam.

TAYLOR—On the 6th May, at the Civil Hospital, Hong Kong, Henry Taylor, a destitute seaman.

ZELUTI—On the 6th May, at the Civil Hospital, Hong Kong, Frederick Wm. Zeluti, Acting-Usher at the Police Magistrate's Court.

COMMERCIAL REPORT.

CHINA IMPORTS.

COTTON YARN.—The quotations annexed do not show any material change upon those given under date of 28th ult., and the sales of the fortnight are estimated at 469 bales, and 20 bales of sea-damaged yarn moved off by public auction. Grey Shirtings are generally quoted a shade lower, and the business of the past fortnight has been restricted to purchases made by Chinese dealers only, foreign buyers being at the moment disinclined to operate; the total sales are estimated at 8,000 pieces, of which 1,000 have been moved off by public sale. Since the arrival of the Shanghai steamer a slightly better feeling has been manifested, and holders are now demanding higher prices. White Shirtings remain without inquiry, and the fortnight's settlements are restricted to a small sale of 500 pieces. T-Cloths remain without any inquiry, and there are not any sales to be reported. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: The sales effected of these goods during the fortnight amount to 300 pieces White, and 250 pieces Dyed Spotted Shirtings. White Brocades have not been in any request, but 250 pieces of Dyed Brocades have found buyers at the annexed quotations. Damasks: There are not any sales of these goods to report. Chintzes: 570 pieces have changed hands during the fortnight. Handkerchiefs have met with but little inquiry, and the sales of the fortnight are put at 460 dozens.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: The demand for these fabrics has again been very limited, and prices of Spanish Stripes are slightly lower, sales are put at 240 pieces. Long Ells have also been in but little request, and the sales effected since the date of last Circular amount to only 100 pieces at about the rates previously current. Camlets, without change to notice in price, these goods have met with a fair amount of inquiry during the fortnight, and the sales reported amount to 1,120 pieces. Lastings have likewise been in some request, and have found buyers since the date of last Circular to the extent of 350 pieces. Blankets have found purchasers to the extent of 300 pairs.

METALS.—Iron, flat, &c: A brisk demand, consequent on the tenor of the advices from Shanghai and Japan, was exhibited for most of the descriptions of iron imported, shortly after the departure of the last mail steamer, and quotations speedily advanced from 15 to 25 cents per picul. The article is not now readily procurable at the prices annexed. The transactions of the fortnight amount to about 7,200 piculs of all kinds. In Canton the transactions are confined to 2,100 piculs of nail rod, but the nominal quotations of all sorts of iron show some improvement. Lead shows a slight improvement in value, but the amount of business transacted has been upon a small scale, amounting (with some 2,000 piculs, sold prior to the departure of last mail but not reported) to 2,900 piculs. In the Canton market, where 1,700 piculs have changed hands, an advance of 15 cents per picul has been established. Tin: Has been sold to the extent of 809 slabs. Tin-Plates: Show some improvement in value, and have been placed during the fortnight to the extent of 1,230 boxes. Steel: There are not any sales of steel to notice from this colony, but 200 tubs have found buyers in Canton.

CHINA EXPORTS.

TEA.—The season is drawing to a close, the stock on the market, both of black and green being nearly exhausted. Prices continue to be well maintained until the last, the settlements of the past fortnight displaying an upward tendency. Regarding the new teas, the advices are, as usual, kept private at this stage. They will probably be a little later than they were last season, because the rates given then are much higher than can be given now, and consequently there will be a little delay in bringing the holders in the producing districts to terms. From Hankow advices come that the following vessels have been engaged to load there for London at the following rates :—The steamer Sea King at £15; the steamer Robert Lowe at £10. 10s.; the clippers Falcon and Challenger at £8. 10s. At Foochow no less than thirteen clippers are on the berth, or are proceeding thither to load. At Amoy, the new musters are coming in. This is all that can be said with certainty. The Messageries Imperiales are supposed to have made an arrangement as to the conveyance of new teas to England, in which case some may leave on the 26th of May.

CANTON.—Since the departure of last mail, the market has been cleared of all the Congous. A chop of "old refined" was taken by a native hong for sale by retail; two chops were taken "in barter" for shipment to New York; and six chops have been taken in the regular way for shipment to London. The small stock and varied demand en-

Digitized by Google

abled the teamen to recover a great proportion of the fall last noted, which was principally in the finer qualities. Common description of blackish leaf have been, by comparison, the dearest purchases. Taysaan Congous of Kaison and Souchong makes have found buyers at extreme rates. The price of the leaf suitable for the manufacture of these teas has advanced considerably. In Scented Teas the operations have as yet been small, and for Pekoe have been confined principally to the extra fine. The new Capers appear to be generally of coarse make and defective in scent. Both Capers and Pekoes are dearer than they were last season, the Capers by 1½ to 2 lbs., the Pekoes by about 3 lbs. Of Canton Greens settlements to a moderate extent have been made.

MACAO.—New Tyshans: Arrivals during the fortnight amount to 2,680 bales making up for the season to date 7,280 bales, equal to about 10,000 half-chests; say 7,500 of Kysow make, and 2,500 of common leaf; deliveries of private contracts so far amount to 3,000 half-chests, and 3,100 boxes of the better kinds, with 200 half-chests of the common; sales on the market 1,000 half-chests of the latter quality at 18 taels, prices of private settlements have not transpired.

AMOY.—One or two musters of New Congous and Plain Orange Pekoes have been received, and teas will begin to be brought to market in about a week to ten days. The teamen report the first crop teas will probably be deficient in strength, owing to heavy rains having fallen whilst the leaf was being picked. Only a few first-crop Orange Pekoes will be received here this year as there is an active demand for native consumption at higher rates than shippers are likely to pay. From the Oolong districts we hear that prices for fine and finest have opened very high, but in other descriptions there has been very little doing as yet.

FOOCHOW.—The only transaction of the fortnight is the settlement of 190 chests Congou at 15½ Tls.

SHANGHAI.—Black: With continued bad advices by the last mail the market has remained very dull, and the settlement of a common Oonham at Tls. 18 and two small chops of Flowery Pekoe at Tls. 21½ are the only transactions reported during the fortnight, the former establishes a decline of fully two taels on previous quotations. Green: There is again to report a considerable business, and recent settlements have reduced unsold stocks to about 4,000 half-chests, which are principally composed of common and undesirable parcels, rates may again be quoted higher, and the recent purchases are fully one tael over last quotations.

HANKOW.—During the past fortnight 1 chop fair Oonam has been settled at 17½ taels, and 2 chops have been shipped on Chinese account to Shanghai. There is but one chop left on the market, and the season may be said to have closed. The total shipments of the present season have been 366,000 chests, against 286,000 chests last season.

YOKOHAMA.—Rather more business has been done during the past week. Prices continue unaltered. Settlements amount to about 650 piculs.

RAW SILK.—SHANGHAI.—Notwithstanding late disheartening advices from Europe, there has been a large business concluded during the fortnight, the transactions being estimated at 1,200 bales. Prices are unchanged, and in consequence of the recent activity, the dealers do not appear such willing sellers. Chop Tsatles have been sold at the quotations given below, but the bulk of the purchases have been made from Medium and Inferior Tsatles and Hainings, of which the stock is chiefly composed. There have been no receipts from the interior, so that the stock of unsold silk is reduced to a very small compass, being variously estimated at from 1,000 bales to 2,000 bales.

YOKOHAMA.—A few transactions have taken place almost daily in this staple at a trifle under last quotations, and prices may be considered weaker. Arrivals keep about equal pace with settlements, and there are between 500 to 600 bales in the market.

DRUGS, &c.—CANTON.—Rhubarb: 100 piculs are on the market, of a quality too common for shipment to Europe. China Galls: Sales, 250 pls. at $12.80 to 13.40; no stock left; the article is still wanted. Cassia Buds: The market has been swept by a purchase of 100 pls. Musk: No transactions; the stock on the market consists of 25 catties inferior. Cassia Lignea: $15.75 to 16; stock, 1,500 piculs; sales, 350 pls. The musters of the new crop exhibit an indifferent quality. Galangal: No settlements; stock, 200 piculs, held at $3.75. Essential Oils, Star Aniseed, and Turmeric: The market remains without supply. SHANGHAI.—Straw Braid: Fine Chefoo 30 to 35 taels, common 25 to 28 taels; little demand and small stock. Wool: Sales 400 piculs at $10 for very common to 18 for the best; stock 500 piculs. Rhubarb: Fine, 45 to 55 taels; common 12 to 18 taels; no settlements. Hemp: 3,000 piculs are on the market, for which is asked 12 to 13 taels for white, and 9.50 to 10 taels for green.

CAMPHOR.—Nearly 3,000 piculs have arrived from Formosa in the Salamander and steamer Union. The whole has been disposed of at $18 and 18.50 per picul unpacked, and more could probably have been placed at similar prices, the demand being good for the article. The Japan camphor is still held at prices above real market value.

COTTON.

HONG KONG.—The unfavourable advices from England have not influenced the market so much as anticipated, because supplies having been scant and native demand good, importers have not been dependent on the movements of shippers. The arrivals of the fortnight have been about 5,000 bags, sales to Chinese amounting to about the same quality—chiefly Japan at $33,50 to 34. To-days quotations are:—Shanghai, $29 to 31.50; Ningpo, $32 to 32.50; Japan, £33. The stock is estimated at 20,000 bales.

SHANGHAI.—Business done in this article has been very limited, rendered more so on the receipt of advices brought by the 10th March mail. No. 1, Shanghai denomination, is offering at tls. 19 to 19.50 without inducing buyers.

The Table of Exports, Tea, Silk, &c., will be corrected and given in our next issue on arrival of the French Mail about the 7th inst.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—From London: April 20, Patrician. From Plymouth: 21, H.M.S. Scylla.

At SHANGHAI.—From London: April 26, Brockham. From Newcastle: 23, Courier. From Cardiff: 27, Bonito. From New York: 24, Gondola; May 24, D. Jex; 5, Vulcan.

At FOOCHOW.—None.

At HONG KONG.—From London: May 5, Glenaros; 8, Star of China; 9, Banian. From Sunderland: 9, Kelso. From Hamburg: 4, Preciosa: 7, Marco Polo.

At MANILA.—From Liverpool: April 24, Sales.

At SINGAPORE.—From London: May 10, Dewa Gu[illegible]hur. From Glasgow: 7, Sea Wave and str. Yum-Tye-Tse. From Newport: 1, Thusnelda. From Cardiff: 2, Trebizond; 3, Batavia; 10, Triton. From Shields: 17, Philip. From Bordeaux: 7, Malabar. From Hamburg: April 26, Oscar; 27, Albertine; May 4, D. F. Webersen. From Rotterdam: May 5, Ellina.

At BANGKOK.—None.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—For London: April 22, Osborne House; 28, steamer Rajah. For Liverpool: 30, May Flower; May 4, Neville. For New York: 5, Luzon.

From FOOCHOW.—Netherby, for London.

From HONG KONG and CANTON.—None.

From MANILA.—For Liverpool: May 3, Trafalgar. For Falmouth (for orders): 4, Canaan. For Cork (for orders): April 21, Victoria Cross, and for St. Thomas (for orders), Whirlwind. For New York: April 27, Morning Star.

From SINGAPORE.—For London: May 11, Athelstan; 16, Dunkeld.

From BANGKOK.—None.

VESSELS LOADING.

At JAPAN.—For London: Canton, Patrician, W. W. Smith, and Yokohama.

At HANKOW.—For London: Steamer Robert Lowe, steamer Sea King, Challenger, and Falcon.

At SHANGHAI.—For London: Keepsake, Cyclone Reigate and Eliza Shaw. For Liverpool: Fanny, Elizabeth Nicholson, Australia, Warwick Castle, Peerless, Helvellyn, and Unrivalled.

A FOO-CHOW.—For London: Elping Spur, Dora, Robin Hood, Tiba, Yang-tzse, Young Lochinvar, and Childers.

At HONG KONG and CANTON.—For London: Chandernagore, Belted Will, Echo, Thos. Blyth, and Seawfell. For Liverpool: Edward Percy.

At MANILA.—For London: Alavesa, Abuera, Cambodia. For Liverpool: Barinaga. For Havre: N. Antoitre. For New York: Geo. Peabody.

At SINGAPORE.—For London: Dewa Gungadhur, Princess of Wales, and Tartar. For Liverpool: Harry Paddomsey and Bombay. For New York: Gertrude and Ocean Home. For Boston: Magnet and Agnes.

At BANGKOK.—None.

FREIGHTS AND CHARTERS.

HANKOW.—For London, for new teas, £15 per steamer, and per clipper sailing vessel £8.

JAPAN.—To London, cotton and tea, £5. 10s. to £6; silk, £7 per ton.

SHANGHAI.—For London there is little freight offering, but for Liverpool there is more inquiry, with rather a scarcity of suitable vessels. For the coast there is but little doing. The following are the rates:—To London (new teas), £6; to Liverpool (cotton), £4. 10s.

FOOCHOW.—To London, £5.

HONG KONG.—The following, from George Holmes's Circular, are some of the settlements:—Echo (370 tons), Whampoa to London, £4. 10s.; Belted Will (812 tons), do., £4. 10s. to £5; Thomas Blyth, Whampoa and Macao to Falmouth (for orders). £3. 15s. to Great Britain, and £4. 10s. if to Continent; Edward Percy (879 tons), to Liverpool, £4. 10s.; Indiaman (999 tons), Manila to London, £4 for sugar, and £5 light freight. To Bangkok and back the rates vary from 45 to 55 cents per picul.

MANILA.—There is less inquiry for tonnage, with downward tendency. The Reigate is on the berth for London at £4. 5s; and for New York the Gleam and Bessie Stanton are loading at £4. 5s. per ton.

SINGAPORE.—The demand for tonnage is small. The rate for dead weight is £3 to £3. 10s., and for measurement goods £4. 10s.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—April 12, Little Edith, Cardiff to Shanghai; Hjroniminus, Hamburg to Hong Kong; 14, Si Jan, Rotterdam to Samarang; 15, Elima, Rotterdam to Singapore; 14, Banian, London to Hong Kong; 16, Whampoa, Rotterdam to Samarang; Allegonda Jacoba, Rotterdam to Batavia; Stad Leyden, Amsterdam to Batavia; 11, Koning Willem, Amsterdam to Batavia; 17, Northern Queen, Sunderland to Shanghai, and Alexander, Glasgow to Batavia; 18, Siam, Bordeaux to Siam; 19, Cornelia, Rotterdam to Batavia; Emperor, Sunderland to Hong Kong; 20, Blairmore, Hamburg (for orders); Sea Wave, Glasgow to Singapore; Maria, London to Saigon; Majestic, Glasgow to Shanghai; 23, Caractacus, Liverpool to Shanghai; May 2, Vigil, London to Shanghai, 3, Peronella, London to Batavia; 4, Robin, London to Shanghai; Kestrel, London to Hong Kong; 9, City of Quebec, London to Shanghai; Isabella, Newport to Hong Kong; Philomela, London to Hong Kong; 10, Jan Van Brakel, Amsterdam to Singapore; Assyrian, London to Shanghai; 11, Melta Argasta, Amsterdam to Kanagawa.

From UNITED STATES to CHINA, &c.—May 5, Pluto, New York to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—April 22, Bristow, Hong Kong to Liverpool; 24, Alexandra, Japan to London; 25 Queen's Own, Macao to London; May 6, Noord Braband, Batavia to Rotterdam; 7, Java, Singapore to Bordeaux; 9, Glengairn, Shanghai to Liverpool; 13, Carol Chisholm, Singapore to Liverpool.

From CHINA, &c., to UNITED STATES.—April 12, Osborn, from

LIVERPOOL, JUNE 25.—The Bessie (barque) for Rio Janeiro, dragged her anchors in the river on the 23rd June, and fouled the Gazelle (barque) for Sourabaya; the latter lost jibboom.

AT ASCENSION.—May 25, Avondale (barque), from Singapore, and sailed 26 for London.

Off ASCENSION.—May 14, Thomas Royden (ship), from Shanghai, for Liverpool; 16, Sarah Ralston (ship), from Foo-chow-Foo, for London; 26, West (barque), from Batavia, for London.

Off ST. HELENA.—May 13, George Ruxton, from Shanghai for Liverpool.

At ST. HELENA.—May 18, Cervantes, Aguire, from Manila, and sailed 19 for Cadiz; 19, Argo, Gesterkamp, from Batavia, and sailed for Amsterdam; 21, Maasluis, Post, from Macassar, and Aeolus, de Vries, from Banjoewangie, and both sailed for Rotterdam; Martin von Rossem, Gerrebrands, from Batavia, and sailed, 23, for Rotterdam; 23, Dionysia Catharina, Taski, from Samarang, and sailed, 24, for Amsterdam; 24 Eliza Thornton, Maxwell, from Singapore, and sailed, 26, for London; 25, Maria Anna, V. Monnom, from Batavia, and sailed, 27, for Rotterdam; 27, Claymore, Fernie, from Penang, and sailed, 31, for London; 29, H.M.S. Encounter, from China, &c.; 30, Sophia George le, Rosenkranz, from Penang, and sailed for London; Susanne, Vonck, from Sourabaya, and sailed, 31, for Rotterdam.

AT TABLE BAY.—May 2, Kalahome, McMillan, from Singapore, and sailed, 10, for London; 18, Mo. Yeune (str.), Briggs, from New York, and sailed, 21, for China; 9, Koophandel, Mooi, sailed for Batavia; 17, Countess of Yarborough, Dumasque, sailed for China.

At ALGOA BAY.—April 16, Emma, Haesloop, sailed for China.

Off NATAL.—April 16, Leading Star, Graham, from Batavia and sailed for Amsterdam.

CASUALTIES.—St Helena, May 28, The Teide, Becards, from Manila for Liverpool, which put in here April 1, leaky, has been surveyed after discharging nearly all her cargo, and has been recommended to be sold.

CAPETOWN.—May 21, the Olympia (Hanov. barque), from Buenos Ayres for Samarang, with a cargo of mules and horses, foundered 100 miles off Tristan d'Acuna; master and crew saved and landed at Simon's Bay, April 26, by the Waverley, Forsyth, from London to New Zealand.

THE Admiralty have invited tenders for the conveyance of 444 hhds. porter and a few combustibles, from the River Thames to Hong Kong.

STEAMERS FOR CHINA.

The screw steamer *Kinlin* has been despatched from the Clyde for China. The *Kinlin* was built by Mr. Seath, and her dimensions are as follows:—Length, 170 feet; breadth, 22; and depth, 12. On her trial trip she steamed at 12 knots. The steamer *Glengyle*, Captain Sullivan, will be despatched for Hong Kong in about a week.

THE STRAITS TRANSFER.

ON Wednesday, the 29th June, a deputation of the merchants of the Straits Settlements, accompanied by Mr. Gregson, the member for Lancaster and chairman of the East India and China Association, and by Mr. John Crawfurd, had an interview with Mr. Cardwell, the Secretary of State for the Colonies, on the subject of their transfer of these Settlements from the Indian to the Colonial Department. They were as courteously received by Mr. Cardwell as by the Duke of Newcastle, and that was saying a great deal. It appears that the Colonial office is ready to take charge of the Settlements at once; nor, indeed, does there seem to be any difficulty in any other department, such as existed at the Treasury and War-office having been overcome. An Act of Parliament of a few clauses is, however, necessary; and as, considering the lateness of the season, there may be some difficulty in getting it through the House of Commons during the present session, the transfer may be delayed until the commencement of the next.

THE FIRE AT NOVGOROD, SIBERIA.—A letter in *Le Nord*, dated Nijny-Novgorod, 18th of June, gives an account of the great fire which took place there on the 16th:—"The fire," says the account, "destroyed, the day before yesterday, the greater part of the buildings in which the famous fair of Nijny-Novgorod is held. The conflagration commenced at five o'clock in the afternoon, and was not mastered till three o'clock next morning. During these ten hours the flames laid bare an area of nearly a square kilometre. The fire was so fierce that the fire-engines could not be kept near enough, and some had even to be thrown into the river to prevent their being burnt. The town of Nijny is separated from the quarter of the fair by the River Oka, and all the town fire-engines went to assist those of the merchants' quarter. The English fire-engines alone, being able to act at a considerable distance, were used with some success. The engineer-in-chief of the railway, Wigel, assisted by four other engineers, arrived on the scene of the disaster with a steam fire-engine, and the whole of the *gastinoy dvor* along the canal was saved by this powerful engine. The market for hides, mats, and ropes, and the enormous stocks of wood have been consumed. The conflagration has also destroyed the theatre, the circus, twenty booths of mountebanks, eight photographic establishments, two cafés, 16 restaurants, eight taverns, 50 wine cellars, six hotels, one ice-house, six inns, two apothecaries' shops, seven counting-houses, four hairdressing saloons, three bathing establishments, 300 retail shops—total, 437 private establishments and 12 buildings belonging to the State. There have, besides, been gutted, without counting the depôts for timber, 40 commercial buildings, with 1,514 magazines, and 148 isolated buildings. The fair not having commenced, a considerable portion of the magazines were empty. Nevertheless, the losses are enormous, and amount to several millions. Only a few of the buildings were insured, the total hardly amounting to 800,000f. The cause of the conflagration is unknown. A commission of inquiry will be held to-morrow.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE CIVIL WAR IN CHINA.

(June 13.) Mr. LIDDELL asked the Under-Secretary of State for Foreign Affairs by whose orders and under what instructions Major Gordon was appointed to the command of the Chinese disciplined force now employed in the suppression of the rebellion in China, and empowered to conduct the recent military operations having for their object the restoration of

Digitized by Google

Nanking to Imperial rule, inasmuch as Sir Frederick Bruce, in the enclosure of a despatch to Earl Russell, dated June 12, 1863, being copy of a memorandum addressed by him to Prince Kung on June 5, 1863, stated "that he (Sir Frederick Bruce) must decline to allow officers of Her Majesty's army to take any part in military operations further than may be necessary for the protection of British interests, and his first step, consequently, will be to desire that Major Gordon and others serving with him at Shanghai shall not pass the boundary described as the 30-mile radius." —Mr. LAYARD said the hon. member, on referring to the blue-book upon Chinese affairs, would see that the authority for Major Gordon to take command of Chinese troops was given by Brigadier Staveley on certain conditions. There was every reason to believe that the appointment was sanctioned by Sir F. Bruce, the paragraph quoted from the memorandum having its sense entirely altered by being detached. As standing in the original, it was a conditional threat.

THE LATE MARQUIS OF DALHOUSIE.

(20th.) SIR J. FERGUSSON put a question relative to a statement made by the hon. member for Inverness (Mr. H. Baillie) in a former debate. His hon. friend stated that Lord Dalhousie a short time before quitting India in the plentitude of his power, and with all the arrogance of office, told a native prince that he regarded him no more than the dust beneath his feet. That prince was the Nizam. That statement surprised him (Sir J. Fergusson), and he thought it right to ascertain at the India-office whether it was well-founded or not. As far as the knowledge of any of the persons at the India-office went, no such expression occurred in any of the documents of the office, and a few of those who were confidentially acquainted with the late marquis told him that to the best of their knowledge no such thing had taken place. Having thus taken all the trouble he could to ascertain the facts, and as the members of the late marquis's family felt pained at the allegation, he wrote to his hon. friend to ask whether he had any authority for such a statement, and whether he could mention where such a sentence had occurred. His hon. friend was unable to mention his authority, but said he would try to discover it. —Mr. H. BAILLIE said he had now to refer his hon. and gallant friend in the first place to a very able article upon Indian affairs which appeared in the July number of the *Quarterly Review* of 1853. The words which he used in the House would be found at page 265. Those words were published in the *Quarterly* during the time Lord Dalhousie was alive, and, as far as he knew, had never been contradicted. In the next place, he would refer his hon. and gallant friend to a more learned work, which had been lately published by Mr. Dickinson, a gentleman well versed in Indian affairs - a very interesting book upon the annexation of the principality of Dhar—and at page 27 he would find the statement repeated, and said to be on the very highest authority. [Sir J. Fergusson.—"What authority?"] It was stated to be on the very highest authority. The hon. and gallant officer, no doubt, would find that the despatch existed in the archives of Hyderabad.—Sir J. FERGUSSON asked whether the hon. gentleman, who had held a position connected with the Board of Control, had no other authority for making the statement.—Mr. BAILLIE conceived that when such a statement appeared in a publication like the *Quarterly Review*, and remained uncontradicted for some years, it might be accepted as authentic.

POSTAGE TO AUSTRALIA.

(21st.) Lord A. CHURCHILL asked the Secretary to the Treasury whether the rates of postage on letters between this country and Australia had recently been doubled; and, if so, whether, considering that our Australian colonies contributed one moiety of the postal subsidy required for this service, they had been consulted as to this increase, or had in any way expressed their opinion respecting it.—Mr. F. PEEL said the revenue derived from letters sent to Australia was not nearly sufficient to pay our moiety for transmitting that correspondence. It had consequently been decided from the 1st of next month to raise the charge on letters to Australia from 6d. to 1s., but the same regulation provided that the postage on letters sent by private ships should be reduced to 4d, with a view of meeting the case of poorer correspondents to whom economy was a greater object than expedition. Our postal arrangements with Australia were based on a Treasury minute of 1855, and it did not, as was supposed, form any part of that arrangement that the rates of postage should not be raised by either party without mutual consent. On the contrary, the minute contained the following passage:—"One of the advantages of the plan we have adopted will be that it will leave the House and the Colonial Government free to regulate the rates of postage in any way they may think fit." Due notice of the alteration had been given to the Australian colonies.

THE SOUTHAMPTON POWDER MAGAZINES.

(23rd.) Mr. ROSE asked the Under-Secretary of State for War what was the actual quantity of gunpowder stored at Marchwood magazine, and whether he had the opinion of competent military officers as to the safety of Southampton in the event of an explosion of that magazine.—The Marquis of HARTINGTON said the quantity of powder at present stored at Marchwood was about 50,000 tons. This was not all stored in one but in seven magazines, the largest quantity contained in any one store being about 28,000 barrels. Before the hon. member gave notice of his question, in consequence of some apprehension felt by the inhabitants of Southampton, a report was called for from Colonel Gordon, the commanding engineer, the officer commanding artillery, and the storekeeper, as to the security of the magazines at Marchwood. In their report they stated that, having examined the magazines very minutely, they were of opinion that there was no place in which powder could be stored with greater security. The distance was a mile and a-half from Southampton, the country round was not very populous, and danger was reduced to a *minimum* by the excellent arrangements. The only houses in the immediate vicinity were those occupied by Government officials (laughter), and much stricter regulations were enforced than would be possible in a private magazine.

THE "ALABAMA" AND THE "RESEARCH."

(23rd.) Sir J. HAY wished to ask the Secretary to the Admiralty whether the attention of Her Majesty's Government had been drawn to the report of an action which took place last Sunday between the United States' frigate *Kearsage* and the Confederate ship *Alabama*, and whether they had considered the report of the Commander-in-Chief at Devonport on the preparation for battle of Her Majesty's ship *Research*. With the permission of the House, he would read the report of the Commander-in-Chief at Devonport. It was as follows:—

"The space in the battery is so confined that the men have not room to work the guns with that facility that is required. 1. The battery is 33ft. in length by 32ft. in breadth inside; within this space are four heavy guns. upwards of 80 men. funnel, wheel, hatchway for supplying powder and shell. 2. There is a difficulty in traversing the guns from the broadside to the bow and quarter ports. 3. When the broadside guns were fired with extreme train, foremost ones to the left, after ones to the right, the captains of them could not stand to direct and fire them. These points being of great importance, I have considered it right to bring them before the Lords Commissioners of the Admiralty."

He would also ask whether, as the last-named report showed that this class of ship could not fight her guns with advantage, and the first-named report showed that she would easily be destroyed in action, Her Majesty's Government would continue to build ships which could not be expected either to fight or swim; and he would further ask, as the advantage of guns of large calibre had been so clearly shown in the above-named action, whether Her Majesty's Government would at once obtain a proper supply of large rifled guns for the service of the navy.

Lord C. PAGET: In answer to the question of the hon. and gallant officer, I have to state that the Admiralty have considered, as I suppose everybody else has done, the report of the action which took place last Sunday between the *Kearsage* and the *Alabama*, which, I may remark, however, has no reference whatever to the question of the *Research*. The Admiralty have likewise considered the report of the Commander-in-Chief at Devonport on the preparation for battle of Her Majesty's ship *Research*. That report goes to the effect that there is not room enough to work the guns, in consequence of the wheel, funnel, and other matters being within the battery. We are taking steps to remove them. These, however, are matters of detail, and in other respects I have no reason to believe that there is any dissatisfaction with the *Research*. A few days ago I was on board the *Research*, and I asked the captain—a young, active, and intelligent officer, whether he was satisfied with her fighting qualities. He replied that he was perfectly satisfied on that point. With respect to the comparison which the hon. gentleman has drawn between the *Research* and the *Alabama*, perhaps he is not aware that the *Alabama* is - [Several hon. Members.—"Was."]—was a wooden ship of light scantling, whereas the *Research* is armour-plated. Therefore, there can be no comparison drawn between the two ships. With regard to the further question, "whether Her Majesty's Government will continue to build ships which cannot be expected either to fight or swim," I must state that Her Majesty's Government have no intention to build ships that can neither fight nor swim. These vessels are undergoing a fair trial, and I ask for them fair play. I ask likewise fair play for another experimental ship going out in a few days—the *Royal Sovereign*, designed by a talented officer of the navy, Captain Coles. I shall be happy to make a frank statement in regard to her after she has undergone a fair trial. With respect to the third question, about the guns, the hon. member must be aware that the Government are taking steps to procure heavier rifled guns. The hon. and gallant gentleman was present at the trials at Shoeburyness, when the average weight of shot was 167lb., the average charge of powder was 30lb., and the heaviest charge was as high as 50lb. The weight of the heaviest shot was 300lb. The Admiralty have ordered a considerable number of 10½-inch guns, throwing 150lb. shot, smooth bore, and they have likewise ordered a large number of 7-inch rifled 100 pounders. The *Prince Albert*, the *Royal Sovereign*, and the *Minotaur* will go to sea carrying 12-ton guns, throwing 10½-inch shot. I think this will show that the Government are alive to the importance of the subject.

PAPERS ON CHINA.

(24th.) Colonel SYKES inquired why certain papers relative to China had not been laid on the table.—Mr. LAYARD apologised for not having laid the papers on the table before, but there were some doubts as to what the Consular orders were, and they had not them at hand. He hoped to be able to present the papers in a day or two.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 22.

Everything connected with the weal or woe of the Royal family finds a responsive sympathy in the breast of the loyal Dutch nation. No wonder, then, that the twenty-fifth anniversary of the marriage of the King and Queen on the 18th inst.—such anniversaries being known here as a "silver wedding"—called forth the accustomed display of loyalty by illuminations, fireworks, and a great show of national flags, not only at the Hague and in this city, but over the whole country generally. In addition to this domestic jubilee in the reigning dynasty, the day was also held as a national festival, it being the anniversary of the battle of Waterloo, in which the Dutch troops, under the then Prince of Orange, took an honourable part.

Since my last letter there has been considerable excitement throughout the country, in consequence of the general elections for one-half of the members of the Second Chamber of the States General, but without any irregularities or breach of the peace. The general result is that the balance of parties remains much the same as before. At the Hague the Liberal party have lost a seat; at Limburg two new Conservative

Digitized by Google

members were elected *vice* two Liberals; at Winschoten and Breda the Liberals were victorious; and here at Amsterdam the result was as follows:—Mr. S. Cool was re-elected by an absolute majority (1,118 out of 1,752 votes), while the other candidates at the head of the poll not having an absolute majority (877 votes), a second election with relative majority must take place. These four gentlemen are Lieutenant-General van Zwieten (who polled 842 votes), Mr. C. van Heukelon (828), Mr. J. Heemskerk (789), and Mr. J. A. Santhagens (695). The other votes were split among thirty-one other different candidates. Mr. van Heukelom and Mr. J. Heemskerk were hitherto the sitting members. General van Zwieten has never yet been in Parliament. Two of these four candidates will be elected. In all the other electoral districts the old members mere returned.

With reference to the wonderful discovery of M. Hooibrenk for the artificial impregnation of fruit-bearing trees and vegetables, which I mentioned in a late letter, I am now enabled, by the courtesy of a gentleman connected with the Colonial Department, to give you some account of the experiments to be made this year in Java. Attached to the Government House at Tjipannas are some rice fields which the Governor-General, as possessor for the time being, cultivates by hired natives. An area of 20 *bouws* has been measured off for a trial of the Hooibrenk system, and the operations will be conducted personally by a controller in accordance with instructions contained in the work on the subject published by Mr. Rochussen, some copies of which have been sent out to Netherlands India. When the Governor-General was at Tjipannas in March this year, he had a conversation on the subject with the Resident of the Preanger Regencies, and it was further arranged that in the month of July, when the coffee trees begin to blossom, they should also be experimented on, the result of which is looked forward to with great curiosity and the most lively interest. In the meantime the well-authenticated result of a trial on a small scale has been received from Buitenzorg, made by order of the Assistant Resident of that district, and executed under the personal inspection of the Demang of Tjibaroessa. A large rice field was divided into two equal parts, each 114½ ft. long, and 36 wide, both divisions being planted with paddy at the same time and under exactly the same circumstances. When the proper time arrived one of the halves was operated on according to the Hooibrenk system by the Demang himself On Saturday, the 2nd of April last, the paddy was cut in both divisions of the field, also in the presence of the Demang, who took special note of the result, which was that the half fructified on Mr. Hooibrenk's principle produced 310 katties, whilst the crop of the other half was only 274. It thus appears that the advantage in favour of the new system is equal to 13 per cent., besides which the report states that the ears were all of one uniform size and full of large-sized grain. The Demang adds that till the rice was cut and weighed no distinction could be made in the appearance of the two crops, even by the closest inspection and by experienced observers. The result is considered satisfactory, and next season, it is understood, experiments will be made on a larger scale, both on the same ground at Buitenzorg and other rice fields in that neighbourhood.

The directors of the Billiton Company give notice by advertisement, dated the Hague, 8th of June, that in future all their tin will be sold by public auction at Batavia, in lots of 25 piculs or thereabouts, without limitation of price; that every year six such auctions will be held, at not less than the lapse of a month between them; that each sale shall be advertised a fortnight previously in the *Java Courant* and two other Batavia journals, stating the quantity to be put up at each, and the condition that the tin be delivered at Batavia on payment of the amount; and that should any alterations be made in future, due notice will be given to the trade.

The following twenty-one first-class vessels have been chartered by the Netherlands Trading Company to convey produce from Java, under the usual conditions, to the undermentioned ports:—

Margaretha Simonetta, Capt. Hoffman; *Presto*, Capt. Tekes; *Koninkl. Nederl. Yachtclub*, Capt. J. Zwart; *Hendrika*, Capt. de Groot-Stiffry; *Henriette and Geertruida*, Capt. de Boer; *Willemina and Clara*, Capt. Abrahams; *Herman*, Capt. Oosteroom; *Johanna Elizabeth*, Capt. Duinker; *California*, Capt. Leonhard; *Henriette*, Capt. Visser; *Goede Verwachting*, Capt. Hellenius; *Zeemanshoop*, Capt. Reinierse; and *Anna Dina*, Capt. Ouman—all for Amsterdam; *Mary and Hillegonda*, Capt. ——; *Tollens*, Capt. Verhagen; *Nyverheid*, Capt. Schaap; *Ridderkerk*, Capt. Teerlink; and *Johanna Maria*, Capt. Wilhelmie—all for Rotterdam; *Regina Maris*, Capt. Ouwehand, for Middelburg; and *Mercator*, Capt. van der Woude, and *Johanna Christina*, Capt. de Clercq, for Schiedam.

The Zoological Society (*Natura Artis Magistra*) of this city has made a present of 2,000 young salmon trout and a quantity of gold fish to the East India Military Asylum at Broubeck, for the purpose of stocking the fish-ponds of that establishment.

H. N. M. steam screw-corvette *Dommel*, 10 guns, Lieut. van der Kruysse-Pillar, last from the West Indies, has arrived at Helvoetsluys. All well on board.

Lieut. H. A. van Rappard, R.N., lately belonging to the guard-ship at Batavia, and now returned to this country by private ship, has been placed on the list of non-active officers of the navy.

Messrs. Visser, van den Heuvell, and van Santen, of the Hague and Leyden, have just published the second part of Major-General W. A. van Rees's "Recollections of the Life of an Indian Officer," in 2 vols., 8vo., with eight engravings, the first part of which work was so successful when it appeared.

At the usual monthly sitting of the Royal Academy of Sciences (Literary Department) the receipt of a work was announced lately published by Mr. P. D. Matthes, Corresponding Member at Macassar, containing a collection of legends at Macassar and Boegines, translated into Dutch by the above-named gentleman.

PASSENGERS ARRIVED.

Per *Nederland*, Capt. van Steenderen at Amsterdam from Batavia: Mr. A. C. van Maarseveen and family, Mr. P. A. le Mahieu, Administrative officer, Lieut. E. Simon, R.N., Mr. van der Aa, Mr. M. Brockhove and family, and Mr. J. Henry.

Per *Jedo*, Capt. van Rossen at Brouwershaven from Java: Mrs. Setten and family.

Per *Ortelius*, Capt. Groote, at Amsterdam from Banjoewangie: Mr. and Mrs. Butteling and six children, Miss Stoolman, Mr. Crevecoeur, Mr. van Notton, nine passported soldiers.

Per *Holland*, Capt. Gronbeck, at Amsterdam from Batavia: Capt. Bylon.

Per *Capella*, Capt. Kruisinga, at Rotterdam from Banjoewangie: Mr. and Mrs. J. N. Stevens and four children.

Per *Alcyone*, Capt. Landweer, at Amsterdam from Banjoewangie: Mrs. Bear and two children, Miss de Leeuw, Mr. M. H. de Vogel, and Master Ulriks.

PASSENGERS OUTWARD.

Per *Kosmopoliet*, Capt. Koning, from Rotterdam to Batavia: Mr. G. Royards, officer of the E.I. civil service, wife and three daughters, Rev. A. P. van Moorsel, R. Cath Priest, Messrs. J. L. Spengler, J. H. Schluter, and H. Becking, Miss E. S. Pieron, Capt. P. van der Putt, E.I. Cavalry, wife and son, Lieutenants P. J. Oosthout and C. F. Ooykaas, E.I. Infantry; 150 men, supplementary colonial troops.

COMMERCIAL.

COFFEE.—The Company's Sale of 86,137 bags of Java and Padang went off very well, the whole quantity being sold, though about half-a cent lower than the brokers' valuations, good ordinary realising 42½ to 43 cents. The few small lots of the better descriptions fetched comparatively the lowest prices, fine brown valued at 59 selling only at 57½ to 57¾, and some light brown, valued at 53 to 54, went off at 52½. On the other hand, 8 numbers realised 1 to 1½ cents more than the valuations. The private trade sales that followed went off as follows:—5,000 bags of Padang, ex *Van der Palm*, partly sold and partly bought in at from 43 to 46 cents (the latter disposed of after the sale by private contract at the above rates); 1,200 bags of Java, ex *Maria Louisa Antoinette*, 300 bags sold at 37¼ to 41½, and part of the remainder subsequently placed at the same prices; and 362 bags of Bali bought in. The sales by importers included 3,800 bags of Padang, ex *Johanna Maria*, at 43 to 48 cents, and 1,000 bags of Java, ex *Marinus Willem*, *Insulanerin* and *Rudolf*, at 41½ to 43½ cents. The market is in a firm condition, and there is a considerable demand for favourite numbers, but no sellers without an advance.

SUGAR.—The raw article has recovered from the calm that ensued after the Company's sale, and prices have again crept up till they are now fully equal to those of the May sale. Among the transactions of the past week were 664 kranjangs of Passaroean, No. 16¼, of fine quality, but rather damp, at 41½ fl.; 952 do. of Cheribon, ex *Nyverheid*, No. 15¾, fine steam made, at 42 fl.; 1,200 do., No. 16, ex *County of Ayr*, fine though rather soft, at 42 fl.; and 4,436 mats of Manila, ex *Angelo de Alcatina*, No. 8, soft, at secret prices for shipment.

RICE dull, business being confined to the execution of a few small consumptive orders. Prices unaltered.

SPICES.—Some parcels of nutmegs and mace have changed hands at previous values for export—cloves neglected. There is some inquiry for Java Cinnamon No. 4, but sellers are not much inclined to operate.

BANCA TIN is lower, a few lots having been done at 65 fl., and the market is depressed.

INDIGO firm and looking up. There is a continued good demand, the sales amounting to 420 chests of Java at full prices. 124 chests of private trade have arrived, but are not yet in the market.

RATTANS.—In more request at former rates. Sales by importers 450 bundles (120 piculs). *Nederland*, and 453 bundles (100 piculs) ex *Regina Maris*. The announcement of the company's summer sale is shortly expected to be made.

JAVA TOBACCO.—Market quiet, but still the following sales by private contract are reported: 128 bales HZ, ex *County of Ayr*, 500 bales KL, 200 b. HZ, 99 b. Malang PA, all ex *Johanna and Oluffa*, just arrived; 329 b. L 249 b. K, 217 b. P, 212 b. BB, 952 b. PK, 200 b. Tikong, 168 b. D, 132 b. RAWL, per sundry vessels; 444 b. PK, and 85 b. D, ex *Hamstede*; and 795 b. KL, ex *Henriette Maria*. Stock 9,727 bales.

DRUGS.—At public sale, by importers, 197 chests of Japan Wax were bought in at 38 and 37 fl. for A and B; of 490 packages of Cassia Fistula, 200 were sold at 6 fl. 75 cents, and the rest bought in at 7½ fl.; 274 packages of Cassia Vera, sold at 19 fl., and 100 bought in at 16 fl.; 20 bales of Japan do. sold at 18 fl.; 14 chests of Gum Damar, sold at 22 fl.; 10 chests of Japan Soy, sold at 50 to 52½ cents; 3 chests of Sumatra Gum Benzoe, bought in at 45 cents; 3 chests of superior Siam do., sold at 302 cents; 63 bottles of Croton Oil, bought in at 4½ fl.; 2 chests of China Rhubarb, sold at 3 fl. 90 cents; and 5 bales of Indiarubber sold at 88 fl.

Naval and Military.

We understand (says the *Army and Navy Gazette*) that Major-General W. G. Brown has resigned the command of the troops in China, and returns home to England immediately. He has only held the command since the early part of last year. Among those who are likely to succeed him may be named General Staveley, who held the command before General Brown. But no appointment will be made until the arrangement of the scale of pay and allowances to be given to General Brown's successor is determined.

The Pearl, screw steam-corvette, Capt. J. Borlase, C.B., was paid off at Portsmouth on the 19th inst. She was commissioned August 23, 1859, by Capt. Borlase, who, with several of the officers and men, have returned to England in her after most active and useful employment on the China station. Long service medals and gratuities were awarded to John Friend, the quartermaster; John Hawton, coxswain of the launch; and John Stone, captain of the muster. The Pearl is placed in the third-class steam reserve.

Captain John Corbett, late in command of the Scout, has been appointed Flag-Captain to Rear-Admiral Sir Lewis T. Jones, K.C.B., at Queenstown, vice Shadwell, appointed Captain Superintendent at Haslar and the Royal Clarence Victualling Yard.

ADMIRALTY, JUNE 21.—The following promotions, dated the 15th instant, consequent on the death, on the 14th instant., of Admiral of the White Sir A. Fanshawe, K.C.B., have this day taken place—viz., Admiral of the Blue the Hon. H. J. Rous to be Admiral of the White; Vice Admirals on the Reserved List R. A. Yates, C. G. Randolph, and E. R. Williams, to be Admirals on the same list; Vice Admiral of the Red Sir H. B. Martin, K.C.B., to be Admiral of the Blue; Vice Admiral of the White C. R. D. Bethune, C.B., to be Vice Admiral of the Red; Vice Admiral of the Blue H. J. Codrington, C.B., to be Vice Admiral of the White; Rear Admiral on the Reserved List R. Eliott to be Vice Admiral on the same list; Rear Admiral of the Red J. E. Erskine to be Vice Admiral of the Blue; Rear Admiral of the White J. J. Stopford to be Rear Admiral of the Red, Rear Admiral of the Blue F. Hutton to be Rear Admiral of the White; Captain T. S. Thompson to be Rear Admiral on the Reserved List; Captain H. E. Edgell, C.B., to be Rear Admiral of the Blue. The undermentioned officers on the Retired List to have the rank and title expressed against their names, but without increase of pay:—Retired Vice Admirals J. Pakenham, H. Litchfield, and W. Webb, to be Retired Admirals; Retired Rear Admiral A. Luckraft to be Retired Vice Admiral. And the following Retired Captains have been promoted to be Retired Rear Admirals, but also without increase of pay:—G. G. Burton, H. Layton, W. H. Kitchen, R. F. Gambier, Sir C. Ricketts, Bart., and W. H. Jervis.

RULES FOR STEAM ENGINEERS.—The following circular has been recently despatched to all commanders-in-chief, to captains and other commanding officers of Her Majesty's Navy, dated Admiralty, 18th May, 1864:—Until further experience has been gained of the working of surface condensers and superheaters, and the best means have been more clearly ascertained of obviating the evils which sometimes occur to engines and boilers so fitted; the following rules are to be strictly observed:—Superheater.—The heat is to be shut off from the superheater, wherever there are means of doing so, during the time the steam is being got up, and until the engines are set to work, and also whenever it may be necessary suddenly to open the smoke-box doors. When steam is being raised, the communication valves between the boilers and superheaters, also those leading to the engines, should be opened soon after the fires are lighted, so as to allow the steam as it rises to circulate through the superheater, thus preventing the tubes becoming unduly heated. The temperature of the steam at the cylinders is never to exceed 320°, unless after sufficient experience it should be evident that the temperature may be safely increased without risk of injury. Care is to be taken that the temperature to which the superheater is exposed be not improperly increased by unnecessarily urging the fires, by air leaks near the smoke-box doors, or by any other causes. Whenever priming occurs, the blow-through cock or other channel for clearing the superheater of water is to be opened, and on all occasions, whether the superheater be at work or not, care is to be taken that no water be allowed to remain in it, and that no soot be allowed to accumulate near it. Superheaters should always be carefully dried in every part, and painted, if possible, when not likely to be used for some considerable time. Boiler.—Any boiler, after having been at work for one week, although only at intervals, is to be entirely blown out, and filled with clean sea water; and the loss arising from the blowing of the safety valves, or from other causes, it is to be made good by salt water. No tallow is to be put into the boiler unless in the case of excessive priming. The interior of the boilers is to be carefully examined once a month, with a view of ascertaining the condition of the boilers, and whether there appears to be any corrosive action going on. Engines.—As little tallow is to be used as the good working of the machinery will admit of, for the expansion and slide valves, pistons, and stuffing boxes. Whenever time will permit, the expansion and slide valves and the interior of the cylinders are to be carefully examined, cleaned, and coated with oil. Condensers.—If blow-through valves are fitted, they should be used with great caution, a sudden rush of steam sometimes it is thought cracks the tubes of the condensers. The tubes of the condensers are to be drawn out, and the grease cleaned off them at least once in six months, unless the construction of the condensers admit of the tubes being effectually cleaned in place; in either case they are to be kept perfectly clean. If the condenser tubes are leaky, the sea-cocks of the circulating pumps should be shut when the engines are stopped, to prevent the water getting into the cylinders through the condensers. In addition to observing strictly the foregoing regulations, it is expected that the engineers of the ship will devote their best energies and judgment to keep in efficient working order the condensers and superheaters, as well as the machinery and boilers generally; and that by care and judicious management those parts which require more than ordinary attention, will not only be preserved from injury but kept in good working condition for a lengthened period.—By command of their Lordships, C. PAGET.

THE MUTINY ON BOARD THE OCEAN QUEEN.

An attempt at mutiny occurred on board the steamship *Ocean Queen*, on her way from New York to Aspinwall, which was immediately suppressed by the courage and decision of Commander Ammen, of the United States navy. The particulars were as follows:—

The steamship *Ocean Queen*, Captain Tinklepaugh, from New York, on the 13th May, with eight hundred passengers for California, and two hundred and twenty seamen for the Pacific squadron, arrived at Aspinwall on the evening of the 23rd. On the third day out from New York an occurrence took place on board that came near being a very serious affair, and which was only checked by the coolness and determination of Commander D. Ammen, U.S.N., in shooting two of the ringleaders dead upon the spot. The seamen that came by her are some of those transferred from the army. They were under charge of Commander Ammen, to be delivered in charge of the senior naval officer at this place, and, although some good men were to be found among them, still there was a majority disposed to be noisy, turbulent and desirous of "kicking up a row." Symptoms of discontent were visible soon after getting to sea, and they had to be closely watched; but on the third day they came aft and attempted to force the grating placed to separate the cabin from the steerage passengers, saying that they intended to dine in the cabin. Commander Ammen was immediately sent for, and, upon reaching the spot, told the three men who appeared to be foremost in the affray, in his usual calm and determined manner, that if they made any further attempt he would shoot some of them. To this remark one of them replied that he knew what that threat was worth; that he had been under fire and did not care a damn. As he made the remark the three made a rush, when the foremost fell instantly dead from a shot from the revolver in Commander Ammen's hand; the second shared the same fate, but the third dodged and escaped. This quieted them, and after the bodies were sewn up and thrown overboard, the other men were mustered and passed to the upper deck, one by one, and as they went up the worst characters were put in irons, and the balance had their knives taken from them. The passengers then held a meeting, and such as had arms volunteered to keep watch on the scoundrels, and did so, which kept matters quiet. On falling in with the convoy off Mayaguana Island—the United States steamer *Neptune*—the worst characters were transferred to her, and she then accompanied the *Ocean Queen* to Aspinwall, bringing the mutineers in irons. The *Neptune* will (says the correspondent) remain to convoy the *Ocean Queen* on her return, on account of the steamer *Tamar*, that arrived at Aspinwall on the 23rd, having been chased when off the east end of Jamaica by the rebel privateer *Florida*.

MONGAN V. GREER.—This was an action tried in the Court of Common Pleas, with a special jury, to recover damages for injuries sustained in falling down a staircase. Mr. M. Smith, Q.C., and Mr. Griffith appeared for the plaintiff, and Mr. Serjeant Parry and Mr. M. Lloyd for the defendant. The plaintiff was the English Consul at Tien-Tsin, in China, but was in this country upon leave of absence. On the 24th March last he went with his wife to the shop of the defendant, a furniture dealer at the corner of Museum street, Holborn, with the view of buying some furniture. They looked at a table which was standing on the top of two others; and soon afterwards the shopman left them to go into the counting-house, and fetch a catalogue of iron bedsteads. Whilst the shopman was away the plaintiff went to have another look at the table, and, passing round to the other side of it and stepping back, he fell down a staircase into a room below the shop. The result was that he broke both bones of his left arm and dislocated his wrist; and although he could now move his fingers, he could scarcely use his arm to any greater extent, and the doctor thought that it was probable that he would never recover the proper use of the limb. The question in the cause was upon whom the fault lay. The plaintiff's case was that the staircase was not properly fenced, and that he stepped into the unguarded opening without seeing it; whilst, on the other side, it was said that the staircase was of a usual and proper construction, and that if the plaintiff had used proper care the accident would not have occurred. The defendant's evidence was that he had, shortly before the accident, told the plaintiff to be careful of the stairs, and the reply was, "Yes, I see them;" and it was further stated that the plaintiff had some months before been down the stairs into the place below. The plaintiff in his evidence said that he had no recollection whatever of either of these circumstances having occurred. The jury were locked up from three o'clock until eight, when they were discharged without having been able to agree to a verdict.

SUICIDE OF AN INDIAN OFFICER.—On the 23rd Dr. Lankester held an inquiry at the Silver Cup Tavern, Cromer-street, Gray's-inn-road, respecting the suicide of Captain Frederick Lloyd, aged 33 years, late of the Bengal service. Mr. Skinner, 4, Mecklenburgh-street, said deceased had lived in his house for the last three months. On Tuesday last witness saw him with a pair of pistols which he said he was going to clean. The witness went out, and on his return found that the deceased was dead. He had sometimes said that he wished he was dead, as he had nothing to do. He was in very comfortable circumstances. The witness was not aware that he was about to be married. He used to go to the Haymarket to see Miss C. Hill perform, but the witness believed he had no correspondence with her, and that he had never seen her off the stage. A policeman who was called in asked him what made him do such a thing, and he said, "It is that blessed girl, Miss Hill, that has made me do it." The witness found a discharged pistol lying on a photograph of Miss C. Hill representing her as *Apollo*, in the play of "Venus and Adonis." Mr. Robert Mayer, of Haddo, said that the deceased was a captain of artillery. He served in India, and assisted in the suppression of the mutiny. He received a *coup-de soleil*, and had to retire on a pension. He was in comfortable circumstances. Mr. Skinner said he did not attach particular importance to the affair of Miss Hill. There were no letters. Deceased had also a photograph of Miss Bateman. The jury returned a verdict of "Suicide while in a state of unsound mind."

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, FRIDAY, JULY 1, 1864.

BRUCE, GORDON, AND LAY.

Two communications have appeared in *The Times* without comment, which have been transferred to our columns, significant of the different motives that rule the conduct of our countrymen in China, whose names head this article. Sir FREDERICK BRUCE'S letter to Major GORDON is not more just and complimentary to that gallant officer than it is well deserved. His singleness of purpose and abnegation of self after the Soochow affair, and his subsequent action in the field with the disciplined Chinese, exhibit astute diplomatic qualities, as well as excellent generalship. We have not a copy of his own despatch to the British Minister at Peking, but we can gather from the reply of Sir FREDERICK that his reasons for resuming operations in the face of hostile criticism was to avert the "serious calamity and addition to our embarrassments in China" if he was compelled to leave his work incomplete, "and were a sudden dis- "solution or dispersion of the Chinese force to lead to the re- "currence of that state of danger and anxiety from which, "during the last two years, Shanghai has suffered." After expressing his views on this point so strongly, there is reason to conclude that if Earl RUSSELL'S despatch rescinding the Order in Council relative to British officers in the Chinese service leaves the Minister the smallest latitude in postponing its promulgation, he will do so in GORDON'S case until he has rendered his work complete; or, at all events, allow the continuance of his operations in the field, until the setting in of the summer heats compels the cessation of hostilities—if the campaign be not ended before then. And, be it remarked, that this consummation of the Taiping rebellion, if effected under GORDON'S command of the Imperial forces, will accrue as much from his conciliatory policy towards the misguided followers of an impostor, as his prowess in attacking their strongholds. To him, and he alone of all the leaders, native and foreign, who have endeavoured to quell this insurrection, have the Taiping chiefs surrendered, for they relied on his faith and humanity. It is true that the treachery of the Chinese Governor frustrated for a time this mode of pacification, and which was apparent in the reverse at Kintang, and the resistance at Chang-chow. While such is the case, we gather from this document that the Chinese Government sent a despatch to Sir FREDERICK, which states that "in "any future operations in which a foreign officer is con- "cerned, the rules of warfare as practised among foreign "nations are to be observed." This is an important concession to British policy as advocated by Her MAJESTY'S representative at the Court of Peking, and presents strong evidence of the success of that policy on the Chinese mind, which Hon. Members opposed to it should take into consideration. This concession in the cause of humanity, by a Government acting in obedience to a sanguinary and detestable code of laws, may be the precursor of reform in the native military administration equal in clemency. Thus the Soochow affair, so bad in the beginning, will probably have a more wholesome effect on the regeneration of China than any event which has yet transpired in its foreign relations.

The publication of this interesting document has elicited a communication from Mr. H. N. LAY—ex-Inspector-General of H.I.C.M.'s Customs—now in England. Its tenor, in the mildest acceptation, is in very bad taste, and exhibits evident *animus* against Sir F. BRUCE, ingratitude towards his late Chinese masters, and a fair display of egotism. He has no hesitation in declaring that the course pursued by H.M.'s Minister "is "dictated rather by considerations of personal comfort and "convenience than by a regard to the great interests of Eng- "land and China." An assertion of this nature advanced by some independent authority, untainted with selfishness, might have weight; but, coming as it does from a source where self-aggrandisement was more the rule than the exception, it sounds as hollow as it is mean. Was it for the "great interests of England and China" that Mr. LAY demanded from Prince KUNG a palace to reside in at Peking, and to live on the fat of the Chinese exchequer, without any "considerations of personal comfort and convenience?" In Sir FREDERICK BRUCE'S letter to Major GORDON there is a paragraph wherein he applauds him for the disinterested conduct he has observed "in pecuniary questions," which forms a strong contrast to the course pursued by the ex-Inspector-General, as shown in the last Blue Book on China. Now, being discarded by the Chinese authorities, forgetful of or ignoring all the pecuniary benefits he has received at their hands, he negatively disapproves of their receiving any assistance from our officers beyond the thirty-mile radius around Shanghai, which he, and all the employés in the foreign Protectorate of Customs, considered the very safeguard of their pecuniary existence. The case is altered now; and the bosom friend of the TAOTAI, the FUTAI, and other functionaries, having pocketed a princely consideration in taels from the REGENT, turns round upon the country wherein he has made his fortune, sides with COBDEN and the anti-China clique, and would rejoice, in all probability, if the Taipings overthrew the existing dynasty and reigned in their stead—when foreigners of easy political virtue could accept offices hostile to their former masters. We are none of those who echoed the cry of "mercenary!" got up by a section of the press in China, against the foreign officers in the Imperial Customs; for we knew that there were gentlemen in that department as little deserving of the appellation, in its offensive meaning, as any of the highest officials in H.M.'s Customs. But it would appear that the term was not inappropriate amongst a certain class of employés and *soi disant* friends of China. Instead of adding fuel to the fire of controversy on British policy in that Empire, it would be more becoming on the part of Mr. LAY to remain in silent obscurity.

RETURN OF COLONEL NEALE FROM JAPAN.

Sir RUTHERFORD ALCOCK having resumed his post as British *Chargé d'Affaires* at Japan, after an absence of eighteen months, his *locum tenens*, Colonel ST. JOHN NEALE, returns to England to settle down amongst the throng—like many other notables abroad—unnoticed. During the period he held that important office affairs of the most momentous character transpired in our relations with that strange people and their sanguinary institutions. Of these the RICHARDSON murder and its retribution was the most prominent, and forms an episode in the annals of that country which time cannot efface. On the first blush of that tragic affair and its attendant circumstances, as reported by the Japan and China press, we, in common with our contemporaries, held up Colonel NEALE'S course of action in the matter as open to censure and unbecoming the *amour propre* of an Englishman. Since then, however, his despatches on the occasion to the Foreign Office have been published; and on calm consideration we are of opinion that they amply justify the course he pursued, under circumstances involving no small degree of peril to British life and property in Japan. Had he at the time acted upon the excited resolutions passed at the midnight meeting of English and other foreign residents at Yokohama, demanding immediate satisfaction at the point of the sword, backed merely by an insignificant troop of horse, and petty detachments of marines and blue-jackets, in all probability the two-sworded Yaconins, having tasted the hated blood of the foreigner, would have attacked the whole community with unrestrained violence, and a general massacre would have ensued. While he acted calmly, and judiciously restrained all acts of violence or retaliation until the force at his disposal was strengthened from China, he bore with silent dignity the covert taunts and inuendos of the young and hot-blooded residents. Nevertheless, these despatches disclose the fact that he was uninfluenced by this temporary unpopularity in using his best endeavours for the punishment of the offenders and the future security of life and property. He continued to urge upon HER MAJESTY'S Government, and the military

and naval Commanders-in-Chief inChina, that it was absolutely necessary to make a hostile demonstration, and, if need be, proceed to hostilities with all the forces available by sea or land, to demand satisfaction for RICHARDSON'S murder, and to maintain the *prestige* of England in the eyes of the Japanese. His requests were feebly met by Generals STAVELEY and BROWN, but warmly responded to by Admiral KUPER. The result of that bold course of action is now a matter of history—the bombardment of Kagosima, at which he was present; the payment of the two indemnities; and the resumption of pacific intercourse with the Japanese authorities under the most favourable auspices, after the severe lesson they had been taught. The recognition, also, of his services by Earl RUSSELL, and the bestowal of the Companionship of the Bath by his Sovereign, show that his conduct has been fully appreciated and rewarded where it was most capable of being judged. On his departure from the Far East, we observe that the Press generally commend his prescient attributes as a diplomatist, with his calmness and courage under trying circumstances. The old adage, "Better late than never," is peculiarly applicable in this instance of the Press making the *amende honorable* to a deserving public officer whose conduct was formerly misunderstood. Having classed ourselves in this category, we cordially join in congratulating Colonel ST. JOHN NEALE on the successful manner in which he has carried out British policy in Japan, and trust that his attainments will lead to higher duties in connection with the scene of his past labours.

RECALL OF THE JAPANESE AMBASSADORS.

(FROM OUR PARIS CORRESPONDENT.)

A rumour was afloat some little time since that the Japanese Ambassadors would return home without visiting any other European country besides France, but it obtained little credence. It turns out, however, to have been well founded; theAmbassadors have had their final interview with M. Drouyn de Lhuys, the Minister for Foreign Affairs, have formally taken their leave, and are now on their way back to the East. No particulars have been allowed to transpire respecting what has passed between the Government here and the Ambassadors in question, the public being simply informed, in the usual stereotyped phrases, that the excuses offered for the past conduct of the Japanese and the promises made for the future are highly satisfactory. It is to be presumed that some explanation of the asserted recall of the embassy has been offered to the British and other Governments, otherwise the apologies made to France for the injuries done to Frenchmen leave the offences against the English, the Dutch, and the Americans more glaring by contrast! Possibly the negotiations which have been carried on in Paris have been with the knowledge and assent of the representatives of the other Powers; but if so, it would be satisfactory to know that such has been the case, and that the Japanese have determined to enter cordially into the family of civilised nations. But we have no information, no hint even, that such is the case; and as there is little hope that the world will be enlightened by any means, perhaps some member of the House of Commons will inquire of the Government whether the Japanese have contented themselves with giving satisfaction to France, and slighting all the other Powers, or whether some general arrangement or understanding has been arrived at. It is almost impossible to believe that the former is the case; but the relations between Japan and this country—especially when there is the slighest doubt about our relative treatment — is one of too much importance to be allowed to rest on hope or hang in doubt. The ways of Eastern nations are curious, and their peculiarities must be allowed for; but when any suspicion of favouritism is mooted, there is nothing for it but a plain straightforward question and an equally plain and straightforward reply, and if that is not to be obtained at Westminster it will be quite in vain to search for it elsewhere in Europe.

The interest taken in all matters connected with the Far East has increased enormously here of late, and one consequence of this is that all kinds of Chinese and Japanese curiosities are being forced before the public nose; the auction rooms are full of bronzes and porcelain, shops for the sale of these and other articles of virtu are springing up everywhere, and the very showmen are bitten with the Eastern fever. For instance, we are told that a dwarf Chinese princess—nothing less than a *princess* of course! —is being exhibited at Perigueux. She is described as being twenty years of age, weighing about twenty-two pounds, and otherwise emulating Tom Thumb. This miniature specimen of humanity whom one would suppose, according to the accounts, to have been taken off a fan or a tea-caddy, and as quite suitable for a chimney ornament, is said to be after all—princess though she be—only half-bred. Her father is declared to be English and her mother Chinese; and the young lady is described as partaking of the characteristics of both parents, having fair and peculiarly silky hair, blue eyes—"like all the English!"—but with the slope of the Celestial empire. Her skin is described as being of the saffron tint, her features regular and pleasing, her limbs well formed, her nose slightly *retrousse*, her teeth as developed as a woman of five-and-twenty, her feet and hands small and well made, and her height rather less than twenty-two inches. This wonderful dwarf is described as tolerably intelligent, and the only wonder is that Paris, "the capital of Europe," has not yet been honoured by her presence.

THE JAPANESE CONVENTION WITH FRANCE.
